1 Foreword

The National Institute of Standards and Technology (NIST), Center for Nanoscale Science and Technology (CNST) NanoFab provides researchers with rapid access to state-of-the-art, commercial nanoscale measurement and fabrication tools and methods, along with associated technical expertise, at economical hourly rates. It is well equipped to process and characterize a wide range of nanoscale materials, structures, and devices.

In November 2013, CNST replaced its original lab management software with an in-house designed and developed web application. The NanoFab Equipment Management & Operations (NEMO) web application is laboratory logistics software that strives to be intuitive and easy to use, making life easier in the lab. NEMO manages tool reservations, controls access to areas and tools, and streamlines logistics and communication. The program is being actively developed with new features, improvement, and bug releases approximately once a month.

The code is open source and free so that other labs can benefit. NEMO is hosted at <https://github.com/usnistgov/NEMO>. The web application is written in the Python programming language and uses the Django web framework. It is system independent (can run on Linux, Windows, or Mac) and does not require special hardware to operate.

Users can customize NEMO for their own laboratory, enabling any customer with a network connected desktop or mobile device to reserve tools, view the operating status of instruments, and seek assistance from laboratory staff.

The CNST hopes to foster a developer community to collaborate on new features and improvements to NEMO. Source code contributions are welcome via GitHub pull requests. The CNST will compile and evaluate these suggestions, modifying NEMO as needed.

2 Introduction

This manual provides an overview of NEMO and detailed information on each webpage and describes how to configure NEMO to add or remove content to suit the end user's needs. The manual is organized to progress through NEMOs web pages in the order presented to a user accessing the website through the navigation bar and landing page.

The manual starts with a description of how NEMO works, then progresses through logging into the website, the site navigation bar and landing page, then details each user accessible page, then each staff accessible page, and finally each site administrator page. Most of the pages are accessible through the navigation bar however, to keep NEMO highly customizable, some pages must be added through the landing page if desired.

Every page description provides details of the pages direct access web address, how the page is used, how to configure optional features, any differences between the desktop view and mobile device view, and any customizations. To minimize the need for direct code changes, many of NEMOs features automatically hide if they have not been configured.

3 How NEMO works

To better understand the features presented in this manual, an overview of NEMO and the key relationships and terms used throughout the manual will be provided.

3.1 NEMO Infrastructure

NEMO is a scalable web application whose features can be run as a distributed application across multiple servers and devices or condensed to run on a single server without additional features. The NEMO components shown below detail the required and optional network connected parts of NEMO (Figure 1). A basic implementation of NEMO can be run with a web server, database, and user authentication as a single standalone server.

Figure 1 NEMO topographical map

- Production web server – (required) runs NEMO code.
- Database – (required) stores NEMO data.
- Authentication server – (required) authenticates users allowed to access NEMO.
- Development web server – (optional) write and test custom code changes without impacting the production environment
- NEMO entrance tablets – (optional) use NEMO to control access to labs in conjunction with door interlocks.

- NEMO kiosks – (optional) allow users quick access to NEMO via badge reader to enable/disable tools and make reservations.
- Tool interlocks – (optional) physically disable tools to prevent unauthorized access. This is typically disabling a keyboard and mouse, monitor, or tool interlock via relay control.
- Door interlocks – (optional) use NEMO to trigger door strikes on access-controlled doors via relay control.

3.2 User model

The user model begins with an account. Accounts are the highest level grouping and can be thought of in terms of who the bill is sent to. An account could be a business using the lab, a school in a university, or some other operational unit. Accounts are discussed in the [accounts and projects](#) section on page 191.

Each account will have one or more projects. Projects allow the account to distinguish what department, group, or project leader is using the account. All activity in NEMO is charged to a project. Projects are discussed in the [accounts and projects](#) section on page 191.

Each project will have one or more users. Users can be associated with multiple projects and even projects from different accounts (Figure 2). Users are discussed in the [users](#) section on page 270.

Figure 2 User model

3.3 User roles

NEMO has three types of distinct users to limit access to only the pages needed by the users role. A users role is defined in the users table of the database discussed in the [Detailed administration → Users](#) section on page 502.

- The first level is “user” which has basic access to a predefined set of features and functions that allow a user to do work in the lab.
- The second level is “staff” which has all of the basic access of a “user” but can override certain rules that restrict a user as well as an additional set of features specific to staff working in the lab and administering users.
- The third level is “superuser” which has all of the access of a “staff” along with admin access to configuration and database administration. NEMO must have at least one user with “superuser” role that can setup customizations and configure the website.

3.4 Tool model

Tools are the things a user will use, and that the lab is interested in keeping track of. There are many features associated with tools and most are optional (Figure 3). Tools are defined in the tool table of the database discussed in the [Detailed administration → Tools](#) section on page 466.

Figure 3 Tool model

- Training – users must be qualified to use a tool. Training and tool qualification is discussed in the [training](#) section on page 266.
- Reservations – qualified users can make reservations for tools with customizable rules to limit reservation abuse. Reservations are discussed in the [Calendar → Reservations](#) section on page 49. Reservation rules are defined for each tool in the tool table of the database discussed in the [Detailed administration → Tools](#) section on page 466.
- Tasks – allow users to report problems with tools and documents repairs. Tasks are discussed in the [tool control](#) section starting on page 82.
- Resources – (optional) allows a tool to depend on common facilities which allows shutting down multiple tools by disabling a resource. Resources are discussed in the [resource](#) section starting on page 241.

- Configuration – (optional) allows users to select the required configuration of a tool at reservation time and communicates the configuration request to staff. Configurations are discussed in the [Configuration Agenda](#) section on page 212.
- Consumable – (optional) allows lab to charge users for consumables used during a process through questions after usage. Consumables are discussed in the [supplies](#) section starting on page 261.
- Area – (optional) allows limiting tool use unless user is currently logged into a specific area. Areas are configured in the areas table of the database discussed in the [Detailed administration → Areas](#) section starting on page 370.
- Interlock – (optional) allows physical disabling of tool when not logged into by a qualified user. Interlocks are configured in the interlocks table of the database discussed in the [Detailed administration → Interlocks](#) section starting on page 402.

3.5 Area model (optional)

Areas can optionally be defined in NEMO to group tools in common places. An area can optionally have doors associated with it and permission for the door can be given to users as physical access levels to control when they can access an area (Figure 4). Areas can optionally be configured to restrict access to doors and tools unless the user has a current area reservation. Areas are configured in the areas table of the database discussed in the [Detailed administration → Areas](#) section starting on page 370.

Figure 4 Area model

3.6 Supply model (optional)

NEMO has the ability to track supplies and their distribution to users. In addition, the supply model is used to track consumables used during tool runs (Figure 5). Consumables and supplies are discussed in the [supplies](#) section starting on page 261.

Figure 5 Supply model

3.7 Billing model

NEMO tracks 6 types of billing by default. The data is accessible directly from the database tables or through the API interface. The database tables are discussed in the [Detailed administration](#) section starting on page 347. The API is discussed in the [API access](#) section starting on page 511.

- Tool usage – Tool usage is tracked in the usage events table of the database.
- Area access – Area access is tracked in the area access records table of the database.
- Consumables – Consumables, both supplies sold to users and supplies consumed during tool runs are tracked in the consumable withdraws table of the database.
- Staff charges – Staff charges, where a staff member performs work on behalf of a user, are tracked in the staff charges table of the database.
- Missed reservations – Missed reservation, where a user fails to show up for a reservation before a grace period expires, are tracked in the reservations table of the database.
- Training sessions – Training sessions are tracked in the training sessions table of the database.

3.8 Controlling NEMO

NEMO is a web application is written in the Python programming language and uses the Django web framework. All NEMO functionality is available using any common web browser by logging into the website to perform any needed actions. In addition, NEMO provides two dedicated interfaces to access NEMO controlled doors (Entrance tablet) and to provide a quick interface to access and reserve tools (Kiosk). The [entrance tablet](#) feature is discussed starting on page 533. The kiosk features are discussed in the [kiosk](#) section starting on page 520.

4 NEMO user authentication

The first step to accessing the NEMO website is the authentication log in. A successful log in requires authentication against the institutions' account system and an active user name in NEMO. NEMO user creation and user status is discussed in the [Users](#) section on page 270.

4.1 Web address

The login page is accessible at site-address/login. For example, www.nemo.com/login/. The logout page is accessible at site-address/logout. For example, www.nemo.com/logout/.

4.2 Usage

4.2.1 LDAP authentication

If LDAP is used for authentication, the log in page (Figure 6) is displayed. Enter a valid user name and password, then click 'Log in'.

Welcome to our lab!

If you are having trouble with your user name or password, please see a user office staff member.

Figure 6 NEMO LDAP Login Page

Upon successful log in, the user will be redirected to the [landing page](#).

If invalid user credentials are entered, the user will be prompted in red with, "The user name or password was not valid" (Figure 7). In this case, enter a valid user name and password to continue.

The screenshot shows the login interface for the NEMO Equipment Management & Operations website. It features a 'User name' input field, a 'Password' input field, and a green 'Log in' button. Below the fields, a red error message box contains the text 'The user name or password was not valid.' A large blue information box below the message contains the text 'Welcome to our lab!' and 'If you are having trouble with your user name or password, please see a user office staff member.'

Figure 7 NEMO LDAP Authentication Failed

4.2.2 Remote user authentication

If a remote user authentication such as Kerberos is used, authentication is handled behind the scenes and users **will not** be prompted for a username and password.

Upon successful log in, the user will be redirected to the [landing page](#).

If the user does not have an active NEMO account, they will be denied access to NEMO (Figure 8). This message is customizable and is described in the [Customization → NanoFab failed login](#) section on page 303.

You do not have a NEMO user account or your user account has been deactivated. Please contact the NanoFab User Office for assistance.

Figure 8 Remote User Authentication Failure Message

4.3 Mobile device authentication

There are no special user authentication views for mobile devices. The authentication procedures above should be followed.

4.4 Authentication customizations

4.4.1 Authentication

Authentication is configured to set LDAP or Remote User log in via the settings.py file described in the [Configuring NEMO settings → Authentication Backends](#) on page 549.

4.4.2 Customizable Login Banner

The log in page has a customizable html banner as shown above in blue. If a banner file has not been loaded, nothing will be shown. Customization of the login banner is described in the [Customization → Login banner](#) section on page 215.

4.4.3 Remote User Authorization Failure Message

If NEMO uses remote user authentication and a user is denied access to NEMO because they do not have an active user name, a failure message is displayed. This message is customizable and is described in the [Customization → NanoFab failed login](#) section on page 303.

5 Navigation Bar

The navigation bar is available at the top of every NEMO user page. Users that are designated as staff have visibility to more features than non-staff users. The distinction between staff and non-staff is set in the [Detailed administration → Users](#) dialog described on page 357.

5.1 User Navigation Bar

The default navigation bar (Figure 9) provides users with useful information and quick links to the most common NEMO features.

Figure 9 Navigation bar with default features

NEMO – Link to NEMO [landing page](#) described on page 29.

Calendar – Link to [calendar page](#) described on page 37.

Tool Control – Link to [tool control page](#) described on page 82.

Status dashboard – Link to [status dashboard page](#) described on page 130.

Requests – This link is optional and is only visible if configured. Link to [requests page](#) described on page 139.

Welcome – Identifies the user currently logged into NEMO. This can help reduce confusion in labs where users share computers to access NEMO.

 Preferences – Link to [user preference page](#) described on page 185.

Logout – Clicking this link will log the current user out of NEMO and return to the [login page](#) described on page 17. The logout link will only be displayed if LDAP authentication is used, and the button is enabled (see [customizations](#) below).

5.2 Staff Navigation Bar

The navigation bar for staff (Figure 10) includes the same information for users and adds the Administration menu and an indicator if a staff member is charging time to a user.

Figure 10 Navigation bar with additional staff features

Administration – Drop down link list to the NEMO administration features that require staff or super user rights to access (Figure 11). Details of the administration pages begin on page 189.

Figure 11 Navigation bar administration menu

Charging Staff Time – If a staff member is charging staff time to a user, it is noted in red on the navigation bar, so the staff member remains aware of accumulating charges. Hovering over ‘Charging staff time’ will show details of the staff charge including who, what project, and when the charges started (Figure 12). Clicking ‘Charging staff time’ will take you to the [Staff charges page](#) which is detailed on page 253.

Figure 12 Charging staff time details

5.3 Mobile device navigation bar

The navigation bar will automatically change to a mobile-type menu icon drop down (Figure 13) if the window width is too small to display all information. The links provided for users and staff are maintained. However, there is no indication of charging staff time and the user name is not indicated. In addition, the preferences icon will change to a menu item.

Figure 13 Navigation bar for small windows with menu icon

Clicking on the menu icon will drop down the menu (Figure 14).

Figure 14 Mobile device drop down menu

5.4 Navigation bar customizations

5.4.1 Logout button

The logout button is configured to display or hide via the settings.py file described in the [Configuring NEMO settings → Templates](#) on page 549.

5.5 Landing Page

The landing page (Figure 15) is the home page for NEMO. It provides users and staff with important information as well as quick links that are fully configurable by your organization. In addition, first time lab users are prompted to complete a lab rules tutorial to reinforce important policies.

The screenshot shows the NEMO landing page with the following layout:

- Top navigation bar:** NEMO, Calendar, Tool control, Status dashboard, Administration, Welcome, Captain, Logout.
- Upcoming reservations:** You're late for your Ellipsometer reservation! Starting on Thursday, April 16th @ 5:00 PM Ending on Thursday, April 16th @ 10:00 PM
- Alerts & outages:** Sputter tool annual PM next week. The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users. Resource outage: O2. We are out of oxygen and expect more next week.
- Current NanoFab usage:** You are using the Chlorine Etch for the project named Cleanroom Staff since Tuesday, April 14th, 2020 @ 7:58 PM. You are using the Fluorine Etch for the project named Project 2 since Tuesday, April 14th, 2020 @ 5:34 PM.
- Information boxes:** PECVD. Starting on Friday, April 17th @ 4:00 AM Ending on Friday, April 17th @ 5:00 AM. You are logged in to the cleanroom (logout). Usage time is being billed to the project named Cleanroom Staff. Click here to bill to a different project at any time.
- Quick links:**
 - Calendar (icon: calendar)
 - Tool control (icon: toolbox)
 - Status dashboard (icon: info sign)
 - Safety (icon: first aid kit)
 - Send feedback (icon: speech bubble)
 - Contact the NanoFab staff (icon: smartphone)
 - View your usage (icon: receipt)
 - Google (icon: books)

Figure 15 NEMO landing page

5.6 Web address

The landing page is accessible as the home page of NEMO. For example, www.nemo.com/. The page can also be accessed from the navigation bar menu item “NEMO”.

5.7 Upcoming reservations

The landing page will list the next three reservations in two background colors, yellow or green. Each reservation box details the tool, start date/time, and end date/time. Details about reservations and how to make them can be found in the [Calendar page → Reservations section](#) starting on page 49.

Clicking on an upcoming reservation will take you to the [Tool control page](#) for the reserved tool which is described on page 82.

Yellow – indicates that you are late for your reservation (Figure 16). Once you log into a late reservation, it will no longer show up on the list. If you log out before your reserved end time, it may reappear.

You're late for your Ellipsometer reservation!
Starting on Thursday, April 16th @ 5:00 PM
Ending on Thursday, April 16th @ 10:00 PM

Figure 16 Late reservation dialog box

Green – indicates a future reservation that has not started yet (Figure 17).

PECVD
Starting on Friday, April 17th @ 4:00 AM
Ending on Friday, April 17th @ 5:00 AM

Figure 17 Future reservation dialog box

5.8 Alerts and outages

On occasion, the lab staff need to communicate important information to users. Alerts and outages (Figure 18) are shown in red to indicate their importance. Alerts and outages are configured through the [Alerts page](#) detailed on page 200.

Sputter tool annual PM next week
The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users.

Figure 18 Alert notification dialog box

Lab resource outages are also indicated in red (Figure 19). Resources are fully definable by the organization and associated with tools. Details of the resource feature and how it is used can be found on the [Resources page](#) on page 241.

Figure 19 Resource outage notification dialog box

5.9 Current NanoFab usage

The landing page will list all current tool usage and lab area access in blue background boxes.

5.9.1 Tool Usage

Each tool usage dialog box (Figure 20) details the tool and start date/time. Clicking on a tool in use dialog box will take you to the [Tool control page](#) of the tool which is described on page 82.

Figure 20 Tool usage dialog box

5.9.2 Staff Charges

If a staff member is actively charging staff time to a user the details are displayed including the user, project, and start time. Clicking on the staff time dialog box will take you to the [Staff charges page](#) which is described on page 253.

Figure 21 Staff charge dialog box

5.9.3 Lab area access

The lab area access dialog details which lab you are in and which project your lab time is billed to. Area access history is maintained in the database. Lab areas are configured through the [Detailed administration → Areas page](#) detailed on page 357.

5.9.3.1 Manual area log in

NEMO can be configured to accommodate manual area log in through the landing page. If manual login is enabled, a green box under Current NanoFab usage provides the interface to log in to an area (Figure 22).

Figure 22 Manual area login dialog box

Clicking anywhere on the box will take you to the self-log-in dialog (Figure 23).

- If you have multiple projects, a radio button list will appear, select a project
- If you only have one project, your active project will be selected automatically
- If there are multiple areas, a radio button list will appear, select an area
- Click Log in to log into the area.

A screenshot of a web-based self-log-in dialog box. The title is "Log in to an access controlled area". Below it is a question "Charge area access to which project?". There are three radio buttons: "Cleanroom Eng", "Cleanroom Maint", and "Cleanroom Training". Next is a question "Log in to which area?", with two radio buttons: "Cleanroom" and "CMP lab". At the bottom is a green "Log in" button.

Figure 23 Self log in dialog

Upon success, the user will be logged in to the selected area using the selected project. There are several reasons a user may be denied log in including expired user accounts, no active

projects, area closures, resource outages, and more. Additional details about log in errors can be found in the [Entrance tablet → Log in errors](#) section starting on page 542.

5.9.3.2 Changing projects

If you have multiple projects, there will be a link to bill your area access time to a different project (Figure 24) than the one you initially selected when logging in.

Figure 24 Area usage dialog box

Clicking the link 'Click here to bill to a different project at any time' will take you to the change project page (Figure 25). Click the project name button to change the project. Projects are configured on the [Accounts and projects](#) section detailed on page 191.

Figure 25 Bill area access to a different project

5.9.3.3 Manual area log out

NEMO can be configured to accommodate manual area log out through the landing page. If manual area log out is enabled, a logout link will appear next to the area name (Figure 26). Click the link to log out of the area (Figure 26).

Figure 26 Area manual log out dialog box

5.10 Configurable Quick Links

The NEMO landing page can be configured with custom icon links (Figure 27) that point to commonly used features of NEMO, organizational internal web pages, and external internet pages. Links can be configured with a custom icon, description, how to open, staff only, and desktop or mobile device rendering. Landing page quick links can be configured with a custom icon, description, how to open, staff only, and desktop or mobile device rendering. Setup details can be found under [Detailed administration → Landing page choices](#) on page 402.

Figure 27 Landing page quick links

5.11 Lab Tutorial

The NanoFab rules tutorial is an opportunity to provide new users with a tutorial about your lab operating procedures and rules. However, it is an optional and fully configurable tutorial that can be triggered in a user's profile. In addition, it is setup to be self-completing so after a user successfully completes it, the trigger will be unchecked. If triggered, it will not allow any reservations or tool log ins until complete. The trigger is set in the user's profile and by default is set upon user creation. NEMO user profiles are discussed in the [Users](#) section on page 270. Details for creating the tutorial, tutorial completion email template, and email address can be found in the [customization](#) section starting on page 282.

Each time a user with the tutorial trigger set logs into NEMO, they will receive a prompt to begin the tutorial (Figure 28). Clicking anywhere in the dialog box will start the tutorial. The tutorial page can also be reached at any time regardless of the training required setting. The tutorial page is accessible at site-address/facility_rulesTutorial/. For example, http://www.nemo.com/facility_rulesTutorial/.

Figure 28 NanoFab rules tutorial dialog box

If the tutorial has not been configured but a user has been checked, an error message will be returned stating, “The NanoFab rules tutorial has not been customized for your organization yet.”

Upon completion of the tutorial, the training required checkbox in the user profile will be cleared and an email will be sent if the abuse email address has been configured and the tutorial summary email template has been configured. The user will be prompted with a completion dialog (Figure 29). Click the continue button to return to the landing page.

Figure 29 Landing page tutorial complete dialog

5.12 Mobile device landing page

The landing page will automatically change to a mobile display by stacking information into a single scrollable column (Figure 30). Information is prioritized in the order of upcoming reservations, alerts & outages, current NanoFab usage, then quick links. Functionality remains the same. The landing page quick links can be configured to only display on mobile devices or only on desktop computers.

Figure 30 Mobile device view of landing page

5.13 Landing page customizations

5.13.1 Area manual log in and log out

The landing page can be configured to allow manual area log in and/or manual area log out. Setup details can be found under [Customization → Application settings](#) on page 287.

5.13.2 Configurable quick links

Landing page quick links can be configured with a custom icon, description, how to open, staff only, and desktop or mobile device rendering. Setup details can be found under [Detailed administration → Landing page choices](#) on page 402.

5.13.3 Lab tutorial setup

The lab tutorial is a custom JavaScript enabled html page. Details of how to setup and load the tutorial can be found under [Customization → NanoFab rules tutorial](#) on page 300.

6 Calendar

The calendar page is the main interface for making area and tool reservations, viewing reservation schedules, and reviewing usage. The page features a side bar to quickly navigate between areas and tools and shows each tools status as well as links to review your reservation schedule and actual usage; and the calendar which can be set for day, week, or month resolution to graphically show your reservation and usage information. Several reservation policies are implemented to limit abuse and ensure fair access to all users. The calendar page will automatically refresh every 30 seconds updating the current calendar view and all tool status icons.

6.1 *Web address*

The calendar page is accessible at site-address/calendar/. For example, www.nemo.com/calendar/. The page can also be accessed from the navigation bar menu item “Calendar”.

6.2 *Calendar Side bar*

The side bar allows the calendar mode and an area or tool to be selected and the personal schedule to be selected (Figure 31). If calendar overview options are enabled in the [Customization → Calendar settings](#) page, those links will be displayed in the sidebar as well.

Area Notes:

- The area section of the side bar is only visible if an area is configured to require a reservation for access.
- Area categories are optional.
- Area creation and configuration are discussed in the [Detailed administration → Areas](#) section on page 370.

Tool Notes:

- The tool section of the side bar is only visible if tool have been configured.
- Tool categories are required.
- Tool creation and configuration are discussed in the [Detailed administration → Tools](#) section on page 466.

Figure 31 Calendar side bar

6.2.1 Calendar Mode

The top button on the side bar controls what information the calendar displays, and which calendar functions are available (Figure 32). Each mode is detailed in the following sections starting on page 49.

Figure 32 Calendar mode selection

6.2.2 Area and Tool list

The area and tool list has a variety of features to help users visually identify area, tools and training status, as well as convenient navigation.

6.2.2.1 Find the area or tool of interest

The expand and contract buttons (Figure 33) provide a shortcut to open or close the area and tool list.

Figure 33 Expand (left) and contract (right) buttons

Clicking expand will fully expand the area and tool list so all categories, sub-categories, areas, and tools are listed (Figure 31).

Clicking contract will close the area and tool list so only top categories are listed (Figure 34).

Figure 34 Tool list contracted

To find an area or tool directly, enter the name in the search dialog (Figure 35) then select the name of the list returned. The return list updates automatically as typed, and a tool can be clicked from the list at any time (Figure 36). Once clicked, the list is expanded to show the area or tool clicked and that area or tool is selected.

Figure 35 Tool search dialog

Figure 36 Tool search return list

6.2.2.2 Personal schedule

The personal schedule link appears as the first item in the tool list and provides a way to show reservations or usage across all tools for the current user. Note that since a specific tool is not selected while viewing a personal schedule, reservations cannot be made in this mode.

6.2.2.3 Overview options

Overview options can be enabled in the [Customization → Calendar settings](#) page detailed starting on page 287. Once enabled, you will have the options to see “All tools”, “All areas” and “All tools and areas” depending on the settings you decide to enable.

As their name indicates, those options will allow the user to see all tools, areas or both in the calendar. Those links will also work with both the “Reservations” and “Facility usage” event feeds (Figure 37).

Figure 37 Tool overview options

6.2.2.4 Hierarchy of the area and tool list

The area and tool list are displayed in alphabetical order by top level category, then by second level category, etc. If both areas/tools and sub-categories exist at any level, areas/tools are listed first in alphabetical order, then sub-categories are listed in alphabetical order (Figure 38).

All tools must have at least one top level category. Area categories are optional and set in the area table discussed in the [Detailed administration → Areas](#) section on page 370. Tool categories are set in the tool table and are discussed in the [Detailed administration → Tools](#) section on page 466.

Figure 38 Example of category and tool mixed listing

6.2.2.5 Area list icons

Each area lists information to determine the status of the area. A person icon indicates the occupancy status according to color. A fraction follows indicating the number of occupants versus the total number allowed (Figure 39).

Figure 39 Example Area with icons

- The occupancy of this area is low and additional users will be allowed into the area. Hovering over the icon shows a list of current users.
- The occupancy is close to the limit. Hovering over the icon shows a list of current users.
- The occupancy is at or above the limit and users will not be allowed to enter. Hovering over the icon shows a list of current users.

The list of current users is color coded by role. Users in white, staff in green, and service personnel in orange (Figure 40).

Figure 40 Hover over occupant listing

3 / 5 Fraction indicating the number of users currently logged in to the area versus the total number of users allowed. Hovering over will display the number of users, staff, and service personnel.

Note: The occupancy limits can be configured to include or exclude staff and service personnel in the total occupant count. In that case, they will be listed separately from the occupant count. The occupancy limit and counting staff and service personnel are set in the area table discussed in the [Detailed administration → Areas](#) section on page 370.

6.2.2.6 Tool list icons

Each tool can list icons to give a quick reference to visually note the operating status. Hovering over an icon will give a description of its purpose in case the icons meaning isn't known.

The tool requires an area reservation. Before a user can make a reservation on the tool, they must first make an area reservation that will encompass the start time of the tool reservation.

A user is currently logged into the tool. Hovering over the icon will show the logged in user's name.

A delayed logoff is in effect. The tool is not available for users.

A scheduled outage is in effect for this tool. The tool is not available to users.

A scheduled outage of an option resource is in effect for this tool. The tool is available but may not be fully functional.

A required resource is unavailable. The tool is not available to users.

An optional resource is unavailable. The tool is available to users, but the tool may not be fully functional. The optional resource unavailable icon is only displayed if the required resource unavailable icon is not displayed.

The tool is shut down because of a serious problem. The tool is not available to users.

The tool has a problem that may impact usage or results. The tool is available to users, but the tool may not be fully functional. The tool problem icon is only displayed if the tool shut down icon is not displayed.

6.2.2.7 Area and tool qualification

By default, users can not see the areas they are not qualified to access. However, that is configurable in the [Customization → Calendar settings](#) page detailed starting on page 287. If enabled, areas that users are not qualified to access will be greyed out in the same manner as tools.

Tools that users are qualified to access will appear dark on the list while tools that a user is not qualified to access will appear greyed out (Figure 41). User tool qualifications are detailed in [Qualifications](#) on page 233.

Area	Tool	Qualification Status
Deposition	Evaporator	Qualified (blue)
	PECVD	Qualified (blue)
	Sputter	Qualified (blue)
Etch	Chlorine Etch	Qualified (blue)
	Fluorine Etch	Qualified (blue)
Inspection	Ellipsometer	Qualified (blue)
	Microscope	Qualified (blue)
	Profilometer	Not Qualified (grey)
Lithography		
Wet Processing		

Figure 41 Tool list showing user qualifications

6.3 Calendar

6.3.1 User calendar header bar

The default calendar header bar is displayed above the calendar and provides users an interface to navigate dates and switch views (Figure 42). By default, the calendar displays a one-week view which can be changed to a one-day view or one-month view. The default view is customizable and detailed in the [Customization → Calendar settings](#) page detailed starting on page 287.

Figure 42 Default calendar header

6.3.1.1 Arrow buttons

Clicking the left or right arrows will increment or decrement the current view. For example, in the week view, the left arrow will move to the previous week and the right arrow will move to the following week.

6.3.1.2 Today button

Clicking the “Today” button will change the display to include the current day in the selected view. In any view, when the current day is in the view, the background is highlighted in beige (Figure 43).

Figure 43 Background for current day (left) and other day (right)

6.3.1.3 Login to the area button

Clicking the login to the area button will log the user into the area selected if they have a current reservation. The login to the area button is only visible if area reservations are required, an area is selected, and the allow area login/logout in the calendar view option is set in the [Customization → Application settings](#) section detailed on page 289.

The log in process follows the same steps outlined in the [landing page](#) section stating on page 32.

There are several reasons a user may be denied log in including expired user accounts, no active projects, area closures, resource outages, and more. Additional details about log in errors can be found in the [Entrance tablet → Log in errors](#) section starting on page 542.

6.3.1.4 Current day/time indicator

The current day is highlighted in each calendar view. On calendar views with the time displayed (day and week views), the current time can optionally be displayed with a red pointer (Figure 44). This option is set in the [Customization → Calendar settings](#) page detailed starting on page 287.

Figure 44 Calendar day and time highlights

6.3.1.5 Day view button

Clicking “Day” will show a single day view calendar. The top of the calendar will show the date in the form of ‘day of week mm/dd/yyyy’ (e.g. Monday 04/20/2020) (Figure 45). The default date format is customizable and detailed in the [Customization → Calendar settings](#) page detailed starting on page 287.

Figure 45 Calendar day view

6.3.1.6 Week view button

Clicking “Week” will show a single week view calendar. The date for each day will be displayed at the top of the calendar in the form of ‘day of week mm/dd’ (e.g. Mon 4/20) (Figure 46). The default date format is customizable and detailed in the [Customization → Calendar settings](#) page detailed starting on page 287.

Figure 46 Calendar week view

6.3.1.7 Month view button

Clicking “Month” will show a single month view calendar with leading and trailing day from prior and future months. The calendar header will show the month and year, the top of the calendar will show the days of the week, and each day will show the day of the month (Figure 47). The default date format is customizable and detailed in the [Customization → Calendar settings](#) page detailed starting on page 287.

Mon		Tue	Wed	Thu	Fri	Sat	Sun

		10					

Figure 47 Calendar month view

6.4 Reservations

Selecting “Reservations” mode from the [calendar sidebar](#) will allow placement of area specific and tool specific reservations onto the calendar (Figure 48). All reservations are audited through system reservation policies as well as area specific and tool specific reservation policies. The calendar view is used to create a reservation, change a reservation, or view a personal schedule. All tools, all areas or all tools and areas can also be displayed if enabled in the [Customization → Calendar settings](#) page. A reservation history is maintained in the database including active, canceled, missed, moved, and resized reservations. Reservation records are discussed in the [Detailed Administration → Reservations](#) section on page 424.

Figure 48 Calendar side bar in Reservations mode

6.4.1 Staff calendar header bar

In “Reservations” mode, the calendar header bar expands for staff (Figure 49) and adds reserving on behalf of someone else and scheduling an outage. The distinction between staff and non-staff is set in the [Detailed administration → Users](#) dialog described on page 357.

Figure 49 Staff calendar header bar in reservations mode

6.4.1.1 Reserve for someone else button

The ‘Reserve for someone else’ button starts a staff reservation on behalf of another user which is detailed on page 62.

6.4.1.2 Schedule an outage button

The ‘Schedule an outage’ button starts the scheduling of a one time or recurring shutdown of an area or tool which is detailed on page 63.

6.4.2 Calendar view

Reservations for all users and scheduled outages are viewable for the selected tool in the time window displayed (Figure 50). Reservations display in blue and show the start time, end time, and user that reserved the tool. Scheduled outages display in red and show the start time, end time, and outage title. NEMO automatically updates the reservations upon any navigation change for tool selection or time window. A scroll bar will appear on the right side of the calendar view to allow scrolling the time window. Clicking any reservation or scheduled outage will show additional details (Figure 51, Figure 52).

Figure 50 Tool specific calendar view

Figure 51 Scheduled outage details dialog

Figure 52 Reservation details dialog

6.4.3 Personal schedule view

The personal schedule view will display all reserved areas and tools for the user in the current time window. Personal schedule reservations display in green and show start time, end time,

and the area or tool name (Figure 53). Reservations may be moved or deleted in this view. Clicking any reservation will show additional details (Figure 54).

Figure 53 Personal schedule calendar view

Figure 54 Personal schedule reservation details dialog

6.4.4 All tools, All areas and All tools and areas calendar views

Similar to the personal schedule, selecting “All tools” will allow the user to see all tool reservations (Figure 55). The same goes for “All areas” and “All areas and tools”.

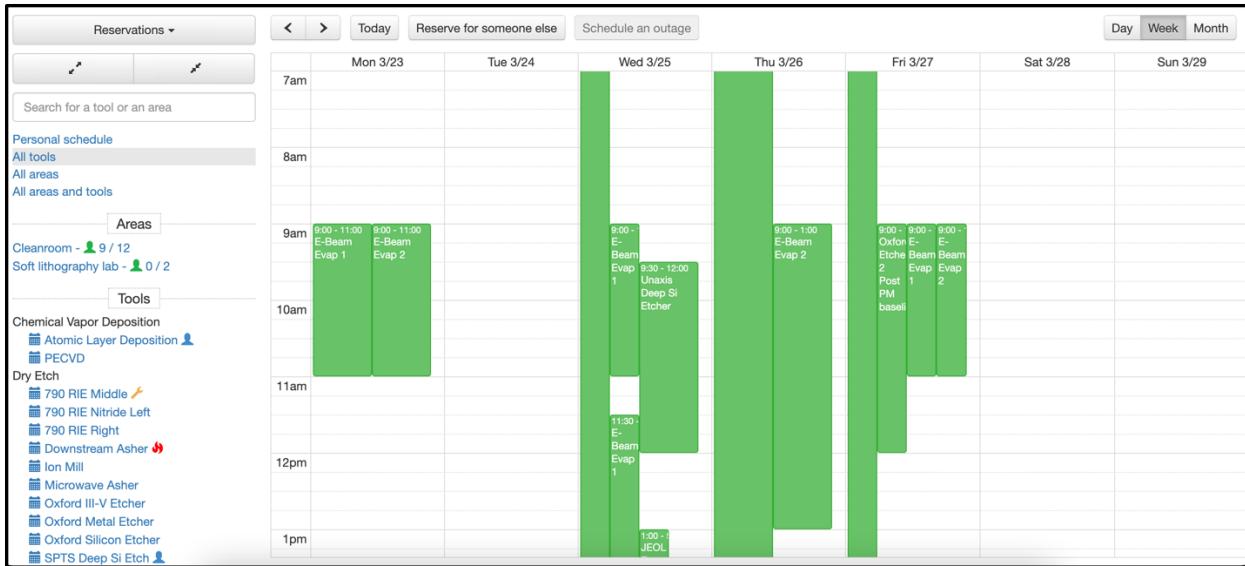

Figure 55 All tools calendar view

6.4.5 Reservation policy

Reservation policies fall into two categories. There are system reservation policies and area/tool specific reservation policies. The policies are intended to safeguard NEMO, ensure the integrity of the database, and provide a customizable profile to maximize tool availability to users. Staff are able to override many of the policies on behalf of a user to provide scheduling flexibility and promote staff awareness of special tool needs such as excessively long runs that might otherwise go undetected.

6.4.5.1 System reservation policies

The following system reservation policies must be met to allow a reservation to be created or modified. Staff **may not override** any of these policies.

- Reservations may not have a start time that is earlier than the end time.
- The user may not create, move, or resize a reservation to coincide with another reservation.
- The user may not create, move, or resize a reservation to coincide with a scheduled outage.
- Reservations that have been cancelled may not be changed.
- The user must belong to at least one active project to make a reservation. User project associations are discussed in [Users](#) on page 270.
- The user must associate their reservation with a project they belong to. If a user has only one project, this is automatic.

The following system reservation policies must be met to allow a reservation to be created or modified. Staff **may override** any of these policies on behalf of a user. If a staff member is making the reservation for themselves, these policies will not be checked.

- The user must complete NEMO training to create reservations.

- The user may not create or move a reservation to have a start time that is earlier than the current time.
- The user may not move or resize a reservation to have an end time that is earlier than the current time.
- The user must be qualified on the tool in question in order to create, move, or resize a reservation.
- If an area requires a reservation a tool reservation in that area may not be made without a corresponding area reservation where the tool start time is within the area reservation.
- An area reservation may not be moved or resized out of range of any tool reservations it originally contained.

6.4.5.2 Area and tool specific reservation policies

Area specific reservation policy setup is discussed in the [Detailed administration → Areas](#) section on page 370.

Tool specific reservation policy setup is discussed in the [Detailed administration → Tools](#) section on page 466.

Area and tool specific reservation policies can be configured to automatically override for all users based on the time of day and for weekends. This can help promote off hour and weekend usage for high demand tools that have restrictive policies to limit regular weekday hours monopoly of tools.

The following area and tool specific reservation policies must be met to allow a reservation to be created or modified. Staff **may override** any of these policies on behalf of a user. If a staff member is making the reservation for themselves, these policies will not be checked.

- The reservation may not be made more than the area or tool's reservation horizon number of days in advance.
- The reservation must be at least as long as the minimum block time for the area or tool.
- The reservation may not exceed the maximum block time for the area or tool.
- The user may not exceed the maximum number of reservations per user per day for the area or tool.
- The user may not make reservations without the minimum amount of time between reservations for the same user and same area or tool.
- The user may not make reservations exceeding the maximum amount of time they may reserve in the future for the area or tool.

6.4.6 Create a reservation

To create a reservation in NEMO:

- Navigate to the Calendar page
- Select the area or tool of interest from the tool list on the sidebar.

- Note: when an area requires a reservation for access, tool reservations can only be made inside of an area reservation window, so make area reservations first.
- Navigate the calendar view to show the start day and time.
- Click the left mouse button and hold at the start day and time.
- While holding the left mouse button, drag to the end day and time.
- Release the left mouse button.
- The requested reservation will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation will not be made (Figure 56). Click ‘Continue’ to close the dialog. [Reservation policies](#) are discussed on page 52.

Figure 56 Reservation policy conflict dialog

- If a user has only one project, it will automatically be selected.
- If a user has multiple projects, they will be prompted to select a project from their list of projects (Figure 57). Details about projects can be found on the [Accounts and projects page](#) discussed on page 191.

Figure 57 Reservation project selection

- If a tool/area has a “missed_reservation_threshold” set, a message will appear warning the user that a fee might be charged for missing the reservation (Figure 58):

Figure 58 Reservation project selection with missed reservation message

- Project information is needed to implement missed reservation and tool configuration accounting. Staff are exempt and therefore will not be asked for a project when making reservations.
- If there are reservation questions, a form will appear asking the user to answer the questions. Reservation questions are discussed in the [Reservation Questions](#) section on page 437.
- If the tool is configurable, a configuration dialog will appear. Tool configurations collect information about how a tool will be run by the user and can be collected for informational purposes or to prompt staff to configure a tool for a user. Configuration history is saved in the database. Each tool configuration has a minimum advanced notice. If the reservation request is within the advance notice window, the user will be prompted in red at the top of the window that the staff may not be able to accommodate the request. Select the appropriate options and provide details as necessary (Figure 59). Configurations are discussed in the [Configuration Agenda](#) section on page 212.

Choose tool configuration

Warning: 1 hours of advance notice is required when reserving this tool in order to configure it properly. You may still create a reservation right now, but there is no guarantee the tool will be properly configured when you arrive to use it.

Please select the target you will need. If you will provide the target, provide the details in the comments.

Target:

Select a target from the list.

Do you have anything else to add? (Optional)

Please provide any additional information regarding tool configuration for your reservation (using less than 3000 characters).

Create this reservation

Figure 59 Reservation tool configuration

- For tool reservations, if the area has a reservation warning person limit configured, the user will be prompted with a message to inform them of the number of people expected in the area and to consider social distancing when making reservations (Figure 60). In addition, if multiple people are expected in the same location within an area that information is provided as well. Areas are defined in the area table of the database and discussed in the [Detailed administration → Areas](#) section on page 370. Locations are defined in the tool table of the data base and discussed in the [Detailed administration → Tools](#) section on page 466.

Figure 60 Reservation occupancy warning

- The reservation will be written to the Reservations table in the database which is discussed in the [Detailed administration → Reservations](#) section on page 424.
- The reservation will appear on the calendar.

6.4.7 Move a reservation

- Move the mouse pointer into the middle of the reservation to be moved. If you have permission to move the reservation, the mouse pointer will change from the arrow to a hand.
- Click the left mouse button and hold.
- While holding the left mouse button, drag the reservation to the new day and time.
- Release the left mouse button.
- The requested move will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation move will not be made (Figure 61). Click 'x' to close the dialog. [Reservation policies](#) are discussed on page 52.
- NOTE: An area reservation may not be moved out of range of any tool reservations it originally contained.
- Any time a reservation is moved, the old reservation is cancelled and a new reservation with updated information takes its place. The descendant field links the old reservation to the new one, so the history of reservation moves, and changes can be easily tracked.

Figure 61 Reservation move failed dialog

6.4.8 Resize a reservation

- Reservations may only be resized to change the end time. If the reservation needs to start at an earlier time, move the reservation to the new start time, then resize it.
- Move the mouse pointer over the bottom of the reservation to be resized. If you have permission to resize the reservation, the mouse pointer will change from the arrow to a double arrow and two stacked lines will appear at the bottom middle of the reservation (Figure 62).
- Click the left mouse button and hold.
- While holding the left mouse button, drag the reservation end time to the new day and time.
- Release the left mouse button.
- The requested resize will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation resize will not be made (Figure 63, Figure 56). Click 'x' to close the dialog. [Reservation policies](#) are discussed on page 52.
- NOTE: An area reservation may not be resized out of range of any tool reservations it originally contained.
- Any time a reservation is resized, the old reservation is cancelled and a new reservation with updated information takes its place. The descendant field links the old reservation to the new one, so the history of reservation changes can be easily tracked.

Figure 62 Reservation resizing bottom change

Figure 63 Reservation resize failed dialog

6.4.9 View details or delete a reservation

- Single click the center of the reservation.
- A reservation detail dialog will be displayed that provides additional information (Figure 67)
 - Who created the reservation, this is a link that once clicked will provide an email dialog through NEMO to contact the user.
 - When the reservation was created

- The area or tool reserved, for tool reservations, the name is a link to the tool page.
- The project
 - If the user has multiple projects the selected project can be changed.
 - Click the edit icon (✎) on the right.
 - The project will change to the update dialog (Figure 64).

Figure 64 Reservation project change dialog

- Select the new project from the dropdown list (Figure 65).

Figure 65 Reservation project change dropdown

- Click the change project button to complete (Figure 66).

Figure 66 Reservation project change button

- The start time and end time

Figure 67 User reservation details dialog

- Staff Only – two additional fields are provided for staff (Figure 68)
 - A title for the reservation can be set to users see a more descriptive reason for a staff reservation. This can be useful to indicate process qualifications or baselines. Type a title into the dialog box then click 'Set title'.

- A cancellation reason box will appear next to the cancel if a staff member clicks on another user's reservation including another staff member. Staff can delete any reservation however they must give a reason that will be emailed to the impacted user. Type a reason for canceling the reservation into the dialog box then click 'Cancel this reservation'.

Figure 68 Staff reservation details dialog

- Click the 'x' to close the details without deleting the reservation
- Click the 'Cancel this reservation' button to cancel the reservation.
- Note: users may only cancel their own reservations that have not have not passed the end time.
- Any time a reservation is canceled, the canceled field in the reservation table is set.

6.4.10 Reservation email notifications

NEMO can send email notifications to staff and users

- There are user settable preferences to send reservation and cancellation emails with calendar invites. User preferences are discussed in the [User preferences section](#) on page 185.
- If staff cancels a user reservation, the user will receive an email notification regardless of user preference settings as described in [Customization → Cancellation email](#) detailed on page 303.
- Users are sent a reminder email approximately two hours prior to the start of a reservation. The email serves to not only remind user of upcoming reservations but also to alert them to any potential problems with the reserved tool as described in [Customization → Reservation reminder email](#) detailed on page 322 and [Customization → Reservation warning email](#) detailed on page 328.

6.4.11 Missed reservations

Each area and tool can be configured to automatically cancel a user's reservation if they are late logging in by more than the missed reservation threshold number of minutes. A missed reservation event requires three items to be setup.

1. A missed reservation threshold must be entered for any areas or tools that will trigger a missed reservation as discussed in the [Detailed administration → Areas](#) section on page 370 and in the [Detailed administration → Tools section](#) on page 466.
2. A missed reservation email can optionally be configured to notify the user and lab staff that a reservation was missed as described in [Customization → Missed reservation email](#) detailed on page 62.
3. A timed service app must be properly configured and running which is described in [NEMO timed services](#) on page 549.

If configured, once the missed reservation threshold is exceeded, the reservation will be canceled, marked as missed in the reservation table, and email notifications sent.

If an area or tool is shutdown, a missed reservation **will not** be triggered.

All staff reservations are exempt from this rule.

6.4.12 Reserve for someone else (staff only)

The reserve for someone else feature gives staff the ability to override reservation policies on behalf of a user. For example, reserving a tool for a user before they complete qualification on a tool or reserving further in advance due to special travel. The button is only visible if the user logged in is designated as staff.

Clicking the 'Reserve for someone else' button will display the selection dialog (Figure 69). Type the user's name in the search box. The return list updates automatically as typed, and a tool can be clicked from the list at any time (Figure 70). Once clicked, the button dialog changes to "Reserving as [user]". Proceed to make reservations.

Figure 69 Make a reservation for someone else dialog

If a reservation made on behalf of another user violates the user reservation policy a dialog will be shown to prompt the staff member with a list of policy conflicts and buttons to override the policy or not create the reservation (Figure 71). Clicking override will make the reservation for the user and override any policy violations. Reservation policies are discussed below on page 50.

To end making reservations on behalf of the user, click the “Reserving as [user]” button on the calendar header. The button text will return to “Reserve for someone else”.

6.4.13 Schedule an outage (staff only)

The scheduled outage feature allows staff to make either single or recurring reservations that will automatically change an area or tools status to shut down. This prevents user login at automatic intervals which can be helpful for maintenance tasks such as changing tool configurations or executing pre-maintenance ‘behind the scenes’ tasks that could be impacted by users inadvertently operating a tool.

Clicking the ‘Schedule an outage’ button will remove the ‘Reserve for someone else’ button and change the ‘Schedule an outage’ button text to ‘I’ve finished creating scheduled outages’. After defining the start and end time as detailed on page 49, a dialog will appear (Figure 72).

Schedule an outage

Title
You must provide a title to create a scheduled outage

Category - is there a category for this outage? This is useful for data and trend analysis

Details
Please provide any additional details for the scheduled outage. Be descriptive so that users understand why there is a scheduled outage.

Create more than one occurrence of this outage

Schedule this outage

Figure 72 Scheduled outage dialog

A title is required and should provide a brief description of the why the area or tool is scheduled for an outage. An optional category will appear if any scheduled outage categories are defined. Categories can be useful for data analysis. An optional details box can be used to provide more in-depth information.

To create recurring outages, click the check box labeled ‘Create more than one occurrence of this outage’. A new dialog will appear (Figure 73) under the check box to enter the frequency and end time. Recurring outages can only be scheduled up to 90 days in advance. It is important to note that recurring outages become standalone reservations once they are created and cannot be modified as a group. However, individual occurrences can be deleted in the calendar or bulk deleted in Detailed Administration.

The screenshot shows a modal dialog titled "Schedule an outage". It contains the following fields:

- Title:** A text input field with the placeholder "You must provide a title to create a scheduled outage".
- Category:** A dropdown menu with the instruction "is there a category for this outage? This is useful for data and trend analysis".
- Details:** A text area with the placeholder "Please provide any additional details for the scheduled outage. Be descriptive so that users understand why there is a scheduled outage."
- Frequency:** A section with "Every" (set to 1) and a dropdown menu labeled "Frequency" with options: Day(s) (selected), Week Day(s), Weekend Day(s), Week(s), Month(s).
- Until:** A button labeled "Choose a date".
- Schedule this outage:** A green button at the bottom right.

Figure 73 Scheduled outage recurrence

To complete the reservation, click the ‘Schedule this outage’ button. The scheduled outage will appear on the calendar in red listing the start and end time as well as the title provided. The example in (Figure 74) shows a scheduled shutdown that had a title of ‘Monthly PM’. The details can be seen by clicking the reservation on the calendar.

Figure 74 Example scheduled outage

6.5 Showing NanoFab usage

Selecting “NanoFab usage” mode from the [calendar sidebar](#) will display activity history on the calendar (Figure 75).

Figure 75 Calendar side bar in NanoFab usage mode

6.5.1 Calendar view

Area or tool activity and missed reservations for all users are viewable for the selected area or tool in the time window displayed (Figure 76). Tool usage displays in blue and shows the start time, end time, and user that used the tool. Area access displays in orange. Missed reservations display in red and show the user, start time, end time. NEMO automatically updates the view upon any navigation change for tool selection or time window. A scroll bar will appear on the right side of the calendar view to allow scrolling the time window. Clicking on any activity box will show additional details (Figure 77, Figure 78).

Figure 76 Calendar view usage of a tool

Figure 77 Tool usage details dialog

Figure 78 Missed reservation details dialog

6.5.2 Personal schedule view

The personal schedule view will display all activity for the user in the current time window (Figure 79). Tool usage displays in green and shows the start time, end time, and tool name. Missed reservations display in red and show start time, end time, and tool name. Area access displays in gold and shows start time, end time, and area name. Clicking on any activity box will show additional details (Figure 80, Figure 81, Figure 82).

Figure 79 Personal schedule usage view

Figure 80 Area access details dialog

Figure 81 Tool usage details dialog

Figure 82 Missed reservation details dialog

6.5.3 All tools, All areas and All tools and areas views

Similar to the personal schedule, selecting “All tools” will allow the user to see all tool usages (Figure 83). The same goes for “All areas” and “All areas and tools”.

Figure 83 All tools usage view

6.6 Show specific user activity (staff only)

Selecting “Specific User” mode from the [calendar sidebar](#) will display activity and reservation history of the selected user on the calendar (Figure 84).

Figure 84 Calendar side bar in Specific user mode

To find a user, enter any character sequence of the username, first name, or last name in the search dialog on the side bar (Figure 85) then select the name of the list returned.

Figure 85 Specific user activity search dialog

The return list updates automatically as typed, and a user can be clicked from the list at any time (Figure 86).

Figure 86 User search return list

Once clicked, the search box changes to a button with the selected users name (Figure 87) and the users information is displayed in the calendar view (Figure 88). To switch to another user, click the button showing the current users name and the dialog will switch back to the search box.

Figure 87 Search dialog now shows user

Figure 88 Specific user activity and reservation view

Tool usage displays in green and shows the start time, end time, and tool name. Missed reservations display in red and show start time, end time, and tool name. Area access displays in gold and shows start time, end time, and area name. Reservations displays in blue and shows start time, end time, and tool name. Clicking on any activity box will show additional details (Figure 89, Figure 90, Figure 91, Figure 92).

Figure 89 Tool usage details dialog

Figure 90 Missed reservation details dialog

Figure 91 Area access details dialog

Figure 92 Reservation details dialog

6.7 Mobile device calendar

The calendar page will automatically change to a mobile display by stacking information into a single scrollable column (Figure 93). A subset of features is available while in mobile view. To start, directly enter the name of the area or tool in the search dialog or select a tool by category. All categories and sub-categories are listed.

Figure 93 Mobile calendar page

6.7.1 Search for an area or tool

To search for an area or tool, start typing in the search dialog box. A button list will appear below the search dialog as characters are entered but at least two characters must be entered (Figure 94). Once the area or tool of interest appears, click the button of interest to go to the mobile reservation page detailed below on page 75.

Figure 94 Mobile calendar search box and results

6.7.2 Select a tool by category

To select a tool by category, click the category button then click the tool link in the drop down. If the tool of interest is not on the list, click another category button (Figure 95). Note: it is possible to have more than one category at a time expanded. However, the page resets each time it is opened. Once the tool of interest appears, click the button of the tool of interest to go to the mobile tool reservation page detailed below on page 75.

Figure 95 Mobile calendar category drop down

6.7.3 Mobile reservation page

The mobile reservation will show the current day reservations (Figure 96). Only a one-day view is available in mobile view.

Left () and right () arrows at the top of the page increment or decrement the day. Any reservations for the currently listed day are shown. An add reservation icon () is on the bottom right.

Figure 96 Mobile tool reservation page

6.7.4 View details or delete a reservation

Clicking the down arrow on a reservation shows details (Figure 97). A user may cancel their own reservation (Figure 98). Staff may cancel any reservation but must enter a reason for canceling another users reservation (Figure 99). A full discussion of viewing reservation details and canceling reservations can be found on page 59.

Figure 97 Mobile view another user's reservation

Figure 98 Mobile view a reservation you own

Figure 99 Mobile view another user's reservation (staff)

6.7.5 Creating a reservation

To create a reservation in NEMO through the mobile view:

- Navigate to the tool reservation page.
- Click the add reservation icon (+) on the bottom right of the screen to navigate to the top of the create a new reservation page (Figure 100).

Figure 100 Mobile create new reservation dialog

- If the user has multiple projects, a project dialog will appear just below the title (Figure 101). However, if a staff member has multiple projects, they will not be prompted for a project because they are exempt from missed reservation and tool configuration accounting. Select the project to use for the reservation. Details about projects can be found on the [Accounts and projects page](#) discussed on page 191.

Figure 101 Mobile reservation multiple project dialog

- If the tool selected has a configuration that can be selected by the user, a configuration dialog will appear next. Each tool configuration has a minimum advanced notice. If the reservation request is within the advance notice window, the user will be prompted in red at the top of the window and the staff may not be able to accommodate the request. Select the appropriate options and provide details as necessary (Figure 102).

The screenshot shows a mobile application interface for tool configuration. At the top, a blue header bar contains the text "Choose tool configuration settings". Below this, a note in a light blue box states: "Please note: 1 hours of advance notice is required when reserving this tool in order to configure it properly. A tool is not guaranteed to be configured properly if a reservation is created or modified on short notice." The main body of the form asks the user to "Please select the target you will need. If you will provide the target, provide the details in the comments." There is a dropdown menu labeled "Select a target from the list." Below this, a section titled "Do you have anything else to add? (Optional)" contains a text area for additional information, with the placeholder text: "Please provide any additional information regarding tool configuration for your reservation (using less than 3000 characters)."

Figure 102 Mobile reservation tool configuration dialog

- Next, select the date and time for the reservation

The screenshot shows a mobile application interface for selecting a reservation date and time. The title of the dialog is "When would you like to reserve the PECVD?". It contains three input fields: a top field showing "Wednesday, April 22", a middle field labeled "Choose a start time", and a bottom field labeled "Choose an end time".

Figure 103 Mobile reservation date and time dialog

- If the date needs to be changed, click inside of the date box and a calendar will pop up (Figure 104). Select the date of interest. Clicking on the date on the calendar will close the pop up and fill in the new date.

Figure 104 Mobile reservation date dialog

- Click the choose a start time box and a time wheel will pop up (Figure 105). Any times already reserved will be greyed out and noted with 'already reserved'. Click on the available start time of your choice. The pop up will automatically close and fill in the start time. Repeat for the end time.

Figure 105 Mobile reservation start time and end time dialog

- Once all require information is entered, click the create this reservation button (Figure 106).

Figure 106 Mobile reservation create button

- The requested reservation will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation will not be made (Figure 107). [Reservation policies](#) are discussed in detail starting on page 52. If an error is encountered click the back to previous page link or return to homepage link to continue.

Figure 107 Mobile reservation policy conflict dialog

- Upon successful creation of the reservation, a confirmation dialog will appear (Figure 108). Click the return to homepage link or view the tool calendar link to continue.

Figure 108 Mobile reservation confirmation dialog

- The reservation will appear on the calendar.

6.8 Calendar customizations

6.8.1 Notification emails

Several email notifications are possible associated with a reservation and must be configured to be functional.

- Missed reservations email template
- Reservation reminder email template
- Reservation warning email template
- Reservation cancelation email template
- User reservation creation email template
- User reservation cancel email template

All email templates are configured in the [Customization](#) page detailed starting on page 282.

6.8.2 Calendar view settings

The date format, default view, first day of week, calendar view start time, recurring outages days in advance and overview options can be configured in the [Customization → Calendar settings](#) page detailed starting on page 287.

6.8.3 Calendar view time grid resolution

The time grid resolution is 15 minutes. To change the value, edit the file calendar.html and change the constant in the slotDuration setting.

6.8.4 Reservation policies

The reservation policies are checked in the policy.py file. It is beyond the scope of this manual to discuss how to create a new policy however the policy.py file can be edited to turn off existing policies or change which policies can be bypassed by staff.

6.8.5 Calendar page refresh rate

The calendar page automatically refreshes every 30 seconds which updates the calendar and sidebar. To change the update interval, edit the calendar.html and change the setInterval constant (in milliseconds) in the on_load function.

7 Tool control

The tool control page is the main interface for finding information about a tool, using a tool, and commenting on or reporting problems with tools. The page features a side bar to quickly navigate between tools and visually determine each tool's status; a summary tab to provide tool information, status, and login interface; a details tab to provide information about a tool such as the tool owner, its location, required resources, and task history; and tabs to report problems and post comments.

7.1 Web address

The tool control page is accessible at site-address/tool_control/. For example, www.nemo.com/tool_control/. The page can also be accessed from the navigation bar menu item “Tool control”.

7.2 Side bar

The side bar has a variety of features to help users visually identify tool and training status, as well as convenient navigation (Figure 109).

Figure 109 Tool control page side bar

7.2.1 Find the tool of interest

The expand and contract buttons (Figure 110) provide a shortcut to open or close the tool list.

Figure 110 Expand (left) and contract (right) buttons

Clicking expand will fully expand the tool list so all categories, sub-categories, and tools are listed (Figure 109).

Clicking contract will close the tool list so only top categories are listed (Figure 111).

Figure 111 Tool list contracted

To find a tool directly, enter the name in the search dialog (Figure 112) then select the name of the list returned. The return list updates automatically as typed, and a tool can be clicked from the list at any time (Figure 113). Once clicked, the tool list is expanded to show the tool clicked and that tool is selected.

Figure 112 Tool search dialog

Figure 113 Tool search return list

7.2.2 Hierarchy of the tool list

The tool list is displayed in alphabetical order by top level category, then by second level category, etc. If both tools and sub-categories exist at any level, tools are listed first in alphabetical order, then sub-categories are listed in alphabetical order (Figure 114). All tools must have at least one top level category. Categories are set at the tool level and are discussed in the [Detailed administration → Tools](#) section on page 466.

Figure 114 Example of category and tool mixed listing

7.2.3 Tool list icons

Each tool can list icons to give a quick reference to visually note the operating status. Hovering over an icon will give a description of its purpose in case the icons meaning isn't known.

The tool requires an area reservation. Before a user can make a reservation on the tool, they must first make an area reservation that will encompass the start time of the tool reservation. Area reservations are optional and configured in the area table discussed in the [Detailed administration → Areas](#) section on page 370.

A user is currently logged into the tool. Hovering over the icon will show the logged in user's name.

A delayed logoff is in effect. The tool is not available for users.

A scheduled outage is in effect for this tool. The tool is not available to users.

A scheduled outage of an option resource is in effect for this tool. The tool is available but may not be fully functional.

A required resource is unavailable. The tool is not available to users.

An optional resource is unavailable. The tool is available to users, but the tool may not be fully functional. The optional resource unavailable icon is only displayed if the required resource unavailable icon is not displayed.

The tool is shut down because of a serious problem. The tool is not available to users.

The tool has a problem that may impact usage or results. The tool is available to users, but the tool may not be fully functional. The tool problem icon is only displayed if the tool shut down icon is not displayed.

7.2.4 Tool qualification

Tools that users are trained and qualified on will appear dark on the list while tools that a user is not qualified on will appear greyed out (Figure 115). User tool qualifications are detailed in [Qualifications](#) on page 233.

Figure 115 Tool list showing user qualifications

7.3 Tool page header bar

The tool page header bar shows the currently selected tool selectable tabs used to navigate the tool pages (Figure 116). The summary tab is selected by default each time the tool control page is loaded. The Config History tab is only visible on tools that are configurable.

Figure 116 Tool page header bar

7.4 Summary Tab

The summary tab provides users and staff with operational information such as tool serial number, tool status, rates, tool status details, comments, configuration details, log in options

for idle tools, log out options for in use tools, tool description, and tool image (Figure 117, Figure 118).

7.4.1 Tool serial number

The tool serial number is optional and will only be displayed if a value exists in the tool table. It is displayed in the top right corner of the summary tab (Figure 119). Tool serial number configuration is discussed in the [Detailed administration → Tools](#) section on page 466.

s/n : XYZ123

Figure 119 Tool serial number

7.4.2 Tool status

The tool status is displayed at the top of the summary tab and informs users and staff of the current condition of the tool. There are several possible statuses, and they are displayed with precedence in the order listed below.

7.4.2.1 Tool in use

The highest priority status is that a tool is in use. The tool in use message will identify the user, project, and the time they started using the tool (Figure 120). The user name is a link that can be clicked to contact the user by email through NEMO.

 Captain Nemo (captain) is using this tool for the project named Cleanroom Maintenance since Monday @ 11:05 AM.

Figure 120 Tool status in use by user message

If the current user is also the user logged into the tool, the message will be more personalized (Figure 121).

 You are using this tool for the project named Cleanroom Maintenance since Monday @ 11:05 AM.

Figure 121 Tool status in use by current user message

If a staff member is using a tool on behalf of another user, both the staff member and user will be listed (Figure 122).

 Captain Nemo (captain) is using this tool on behalf of Ned Land (ned) for the project named Project 1 since Monday @ 12:39 PM.

Figure 122 Tool status in use by staff on behalf of a user

In addition, if the current user is using the tool with a reservation, the reservation end time will also be displayed (Figure 123).

 You are using this tool for the project named Cleanroom Staff since Monday @ 11:33 AM.

Your reservation for this tool will end at 2:00 PM. The remainder of your reservation will be relinquished when you stop using this tool.

Figure 123 Tool status in use by current user with reservation message

7.4.2.2 Delayed logoff

The delayed logoff status indicates that the previous user initiated a delayed logoff to prevent usage for some amount of time. Users are not able to log in during this time however staff may override and log in. The feature is useful for tools that require post-process runs such as plasma cleans. It allows a user to run the post-process and leave without waiting for the completion. Tool usage time is accumulated during delayed logoff. Delayed logoff configuration is discussed in the [Detailed administration → Tools](#) section on page 466.

 Captain Nemo (captain) has finished using the Chlorine Etch but delayed logoff is in effect. The tool will be available at 11:51 AM.

7.4.2.3 Scheduled outage

There are two types of scheduled outage: a scheduled tool outage and a scheduled resource outage. If there are multiple scheduled outages, all outages will be displayed sequentially. Both outage types display the reason for the shutdown, details, who initiated the shutdown, the start day and time, and the end day and time. Scheduled outages are planned shutdowns that take a predictable amount of time.

A scheduled tool outage allows staff to automatically shut down a tool on a set date and time which can be useful for scheduling tool configurations or preventative maintenance (Figure 124). Users are not able to log in during a scheduled tool outage however staff are. Details about scheduled tool outages can be found in the [Calendar page → Reservations → Schedule an outage](#) section on page 63.

 Foil clean

The chamber is flaking so we will change the foil and vacuum.

Captain Nemo (captain) scheduled this outage from Monday, April 27th, 2020 @ 11:30 AM until Monday, April 27th, 2020 @ 1:00 PM.

Figure 124 Tool status scheduled tool outage

A scheduled resource outage allows staff to automatically shut down a resource on a set date and time which can be useful for scheduling gas bottle changes or other facility related maintenance (Figure 125). Resource outages will automatically update tool status for each tool that relies on the resource. Users are not able to log in during a scheduled resource outage when the resource is required by the tool however staff are.

 2% SiH4 scheduled outage

Gas bottle change

Captain Nemo (captain) scheduled this outage from Monday, April 27th, 2020 @ 11:30 AM until Monday, April 27th, 2020 @ 12:30 PM.

Figure 125 Tool status scheduled required resource outage

If a scheduled resource is optional on a tool, the scheduled outage will be indicated in yellow, and the tool will still be available to users (Figure 126).

An optional resource has an outage: O2 (Gases)

O2 scheduled outage: Gas bottle change

Captain Nemo (captain) scheduled this outage from Tuesday, May 5th, 2020 @ 4:36 PM until Tuesday, May 5th, 2020 @ 4:50 PM.

Figure 126 Tool status scheduled optional resource outage

Details about scheduled resource outages can be found in the [Resources](#) section on page 241.

7.4.2.4 Shutdown

The tool shutdown status is displayed if the tool has a problem that requires shut down or a required resource is not available (Figure 127). Users are not able to log in during this time however staff are. Details about tool shut downs can be found in the [Tool control page → Report a problem tab](#) section on page 118. Details about resources can be found in the [Resources](#) section on page 241.

 **This tool is shut down.**

Figure 127 Tool status shut down

7.4.2.5 Optional resource not available

The optional resource outage status is displayed if there are resources unavailable that a tool partially depends on (Figure 128). Users and staff are able to log in. For example, a fluorine reactive ion etch system with multiple types of fluorine gases, and one is not available. Details about resources can be found in the [Resources](#) section on page 241. Dependent and optional resource configuration is discussed in the [Detailed administration → Tools](#) section on page 466.

 **This tool is operational but not all resources are available.**

Figure 128 Tool status optional resource outage

7.4.2.6 Operational and idle

The operational and idle status is displayed if there are no issues preventing usage of the tool (Figure 129). However, there may be a problem listed in the tool status details below. Users and staff are able to log in.

 **This tool is operational and idle.**

Figure 129 Tool status operational and idle

7.4.3 Tool rates

The tool rates are optional and will only be displayed if they have been defined (Figure 130). Tool rates are discussed in the [Customizations → Tool rates](#) section on page 343.

Tool rates: Full Cost \$100.00 Shared Cost \$50.00
Training rates: Individual \$150.00 Group \$75.00

Figure 130 Tool rates

If a tool has child tools defined to allow multiple modes of operation with different charges, the parent and all child rates will be displayed (Figure 131). Parent and child tools are discussed in the [Detailed administration → Tools](#) section on page 466.

Tool rates:
SEM: Full Cost \$100.00 Shared Cost \$50.00
SEM Lithography mode: Full Cost \$200.00 Shared Cost \$150.00
Training rates: Individual \$150.00 Group \$75.00

Figure 131 Tool rates with parent and child tools

7.4.4 Tool usage counters

Tool usage counters, if configured, are displayed below the rates (Figure 132). Tool usage counters are linked to numeric or float post usage questions and accumulate value with each tool logout based on the answer to the post usage question. This feature is useful for displaying how much a tool has been used, to track material usage, or to trigger preventative maintenance. Detailed information on how to setup tool usage counters is provided in the [Detailed administration → Tool usage counters](#) section starting on page 466.

Total etch time: 147 *This is the running total for etch time in minutes.
Don't reset this counter.*

Etch Time: 0 *This is for the etch time in minutes.
PMs are performed every 100 minutes of use.*

Figure 132 Tool usage counter, user view

Staff are able to reset the counter and will see a reset button next to the current value (Figure 133).

Total etch time: 147 **Reset** *This is the running total for etch time in minutes.
Don't reset this counter.*

Etch Time: 100 **Reset** *This is for the etch time in minutes.
PMs are performed every 100 minutes of use.*

Figure 133 Tool usage counter, staff view

Clicking reset will open a confirmation dialog box, click ok to reset the counter or cancel to abort (Figure 134).

Figure 134 Tool usage counter reset confirmation dialog

Each time a counter is reset, a comment is posted for the tool that expires after seven days (Figure 135). In addition, if the Lab Manager role has been defined in settings.py, an email is sent. The comment and email will list the counter, its last value, who reset it, and when.

Figure 135 Tool usage counter reset comment

7.4.5 Tool status details

Tool status details provide additional information about a tool that may impact availability or results. If the information available for a particular dialog is lengthy, only the first two lines are displayed with an expansion icon (➤). Click the icon to see more information.

7.4.5.1 Unavailable required resources

When a required resource is not available, the status details will show a red leaf and identify which required resource is not available along with the description that was entered when the resource was shut down (Figure 136).

Figure 136 Unavailable required resource

7.4.5.2 Unavailable optional resources

When an optional resource is not available, the status details will show a yellow leaf and identify which required resource is not available along with the description that was entered when the resource was shut down (Figure 137).

Figure 137 Unavailable optional resource

7.4.5.3 Shutdown and problem tasks

Shutdowns and problems are reported in the [Tool control → Report a problem tab](#) described on page 118. The status details functionality are identical for both except for the displayed icon. Shutdowns are displayed with a red fire icon (Figure 138) and problems are displayed with a yellow wrench icon (Figure 139). When a shutdown or problem is reported, the user can select a category that will be displayed as the heading (Figure 138). If no category is selected, the description is displayed as the heading (Figure 139).

Figure 138 Tool shutdown

Figure 139 Tool problem

Clicking the (>) will expand the shutdown and problem dialog (Figure 140, Figure 141).

Wafers floating on platen.
This task was created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:30 PM. You can [update](#) or [resolve](#) this task. You may [cancel](#) this task if it was mistakenly created.

Progress updates
On Monday, April 20th, 2020 @ 8:53 PM Captain Nemo (captain) updated this task:
Tested pump down curve. Need new soft pump valve, on order will arrive 5/6/2020.
images:

- [2020-04-27_pecvd_01.png](#)

Figure 140 Tool status problem dialog expanded

Tool Error
Smoke coming from lamp housing when on.
Estimated resolution time is Wednesday, April 29th, 2020 @ 2:00 PM.
This task was created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:31 PM. You can [update](#) or [resolve](#) this task. The tool will remain shut down until this task is resolved. You may [cancel](#) this task if it was mistakenly created.

Progress updates
On Monday, April 27th, 2020 @ 2:09 PM Captain Nemo (captain) updated this task:
Possible frayed wires to lamp socket. Will test socket and wiring.

On Monday, April 27th, 2020 @ 2:09 PM, Captain Nemo (captain) set the status of this task to "Repair".

- [2020-04-27_microscope_01.png](#)

Figure 141 Tool status shutdown dialog expanded

Staff can update tasks and resolve tasks by following the update or resolve links provided (Figure 142).

You can update or resolve this task.

Figure 142 Tool status update and resolve links

The user that created the task can cancel it by following the link provided (Figure 143).

You may cancel this task if it was mistakenly created.

Figure 143 Tool status cancel link

All updates, new information, and expected resolution times are listed. Links are provided to any images that have been uploaded. Clicking an image link will open the image in a new tab (Figure 144).

images:

- 2020-04-27_pecvd_01.png

Figure 144 Tool status image link

Clicking the (▼) will collapse the shutdown or problem dialog.

7.4.5.4 Comments

Comments are created in the [Tool control → Post a comment tab](#) described on page 124. They are used to convey important information about a tool to users and can have an automatic expiration or display indefinitely.

➤ Please clean the bowl before logging out!

Captain Nemo (captain) wrote this comment on Monday, April 27th, 2020 @ 2:04 PM

Figure 145 Tool status comment

Clicking the (➤) will expand the comment dialog ().

Figure 146 Tool status comment dialog expanded

Staff or the user that created the comment may hide comments by clicking the hide this comment link (Figure 147).

Figure 147 Tool status hide comment link

Clicking the (▼) will collapse the comment dialog.

7.4.5.5 Update task (staff only)

Staff may update a task by clicking the update link on a problem or shutdown listed in the tool status details. Clicking the link will open the task update dialog (Figure 148). Many of the fields associated with the original task report are available to be edited. In addition, a summary of activity to date is listed on the right side of the page. However, if the page is too narrow or in mobile view, all information is listed in a single column. All fields are optional for updates. Only fields with changes are updated.

PECVD task

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:30 PM (1 week, 3 days ago).
Last updated by Captain Nemo (captain) on Monday, April 27th, 2020 @ 2:13 PM (an hour ago).

Update the task

Would you like to change the urgency of this task? This will help staff prioritize tasks in the NanoFab.

Normal ▾

Would you like to change this task's initial classification to more accurately reflect the nature of the problem? Proper classification helps the NanoFab staff analyze long-term maintenance trends.

Wafer handling problem ▾

What is the status of the task?

Triage ▾

When do you think the problem will be resolved? Leave this field blank if it's difficult to predict.

04/29/2020 12:00 PM

- This task requires the PECVD to be shutdown
- This task is considered a potential safety hazard to the NanoFab

Please describe any actions being taken to resolve this task. This information will be visible to all users in order to keep everyone apprised of the tool's status.

(empty text area)

images:

No file chosen

Figure 148 Tool control task update dialog

- The urgency of the task can be changed by selecting a new urgency from the drop down (Figure 149). The urgency is displayed on the maintenance screen detailed in the [Maintenance](#) section on page 223.

Figure 149 Tool control task update urgency

- If task categories have been defined, a dropdown and instruction will appear. Click the dropdown and select the problem category that best describes the problem (Figure 150). If no category describes the problem, leave this blank. Task categories can be used to bin problems making future problem analysis easier. Categories are configured on the [Detailed administration → Task categories](#) page described on page 453.

Figure 150 Tool control task update category

- If task statuses have been defined, a dropdown and instruction will appear (Figure 151). If the status is not known, the field can be left blank. Click the dropdown and select the new status for the problem. Task statuses are used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Statuses are configured on the [Detailed administration → Task statuses page](#) described on page 460.

Figure 151 Tool control task update status

- Provide an estimate of when the problem will be resolved if known or leave blank. Clicking in the dialog will open a date and time dialog (Figure 152).

Figure 152 Tool control task update completion date

- Check if the shutdown check box if the tool is not able to be used by others and could potentially ruin samples (Figure 153).

This task requires the PECVD to be shutdown

Figure 153 Tool control task update safety hazard

- Check the safety hazard check box if the problem is a safety hazard to people or equipment (Figure 154).

This task is considered a potential safety hazard to the NanoFab

Figure 154 Tool control task update shut down

- Provide a detailed update in the dialog box (Figure 155).

Please describe any actions being taken to resolve this task.
This information will be visible to all users in order to keep everyone apprised of the tool's status.

Figure 155 Tool control task update detailed description

- The choose files dialog may be used to upload any relevant pictures to show details that support the description (Figure 156). Clicking the button activates a standard file selection dialog. Multiple files can be uploaded. Note: it is good practice to make note of the files in the description to link the file to the text.

images:
• 2020-04-27_pecvd_01.png

Choose Files No file chosen

Figure 156 Tool control task update upload files

- Click the update button to finish (Figure 157). To cancel an update, navigate to another page prior to clicking the update button.

Update

Figure 157 Tool control task update button

7.4.5.6 Resolve task (staff only)

Staff may resolve a task by clicking the resolve link on a problem or shutdown listed in the tool status details. Clicking the link will open the task resolution dialog (Figure 158). A resolution description and resolution category can be entered. In addition, a summary of activity to date is listed on the right side of the page. However, if the page is too narrow or in mobile view, all information is listed in a single column. All fields are optional.

---	--

Figure 158 Tool control task resolution dialog

- Provide a detailed resolution description in the dialog box (Figure 159).

Please describe any actions taken to resolve this task. This information will be kept in order to analyze long-term trends in NanoFab maintenance.

Figure 159 Tool control task resolution description

- If task categories have been defined, a dropdown and instruction will appear. Click the dropdown and select the problem category that best describes the problem (Figure 160). If no category describes the problem, leave this blank. Task categories can be used to bin problems making future problem analysis easier. Categories are configured on the [Detailed administration → Task categories](#) page described on page 453.

Figure 160 Tool control task resolution category

- Click the resolve button to finish (Figure 161). To cancel an update, navigate to another page prior to clicking the update button.

Figure 161 Tool control task resolution button

7.4.5.7 Cancel task

The user who created a problem or shutdown may cancel the task by clicking the cancel link in the tool status details (Figure 162).

You may cancel this task if it was mistakenly created.

Figure 162 Tool control task cancel task link

There are no additional prompts, clicking the link immediately cancels the task and returns the user to the tool control summary page.

7.4.5.8 Hide comments

Staff or the user who created a comment may hide the comment by clicking the 'hide this comment' link in the comment details (Figure 163).

Hide this comment.

Figure 163 Tool control task hide comment link

There are no additional prompts, clicking the link immediately hides the comment and returns the user to the tool control summary page.

7.4.6 Tool configuration

Tool configurations are created in the Configurations table of the database detailed in the [Detailed administration → Configurations](#) section on page 388. If a tool is configurable, its current configuration will be shown (Figure 164).

Figure 164 Tool control tool configuration

If the tool is not in use and the current user is a staff member or has permission to change a tool configuration, a drop down with all possible configurations will be shown (Figure 165). Select the desired configuration from the drop down.

Figure 165 Tool control tool configuration dialog

Configuration history is saved in the database and is discussed in [Detailed administration → Configuration histories](#) on page 386. Configurations are discussed in the [Configuration Agenda](#) section on page 212.

7.4.7 Tool log in

The tool log in dialogs will vary depending on the user type (staff or not) and number of projects the user has.

7.4.7.1 User tool login

Users must be explicitly qualified to use tools. In addition, the tool must be in a usable tool status. Users with multiple projects will be prompted to select a project from their list of active projects (Figure 166). User qualifications are detailed in the [Qualifications](#) section on page 233.

Figure 166 Tool control login project selection

Clicking the project will enable the start button (Figure 167).

Figure 167 Tool control login multiple project start button

If a user only has one project, a message with the name of their project will appear and the start button will be displayed (Figure 168).

Figure 168 Tool control login single project start button

Click the 'Start using the tool' button to begin usage. NEMO will check user permissions before enabling the tool. If interlocks have been configured, NEMO will enable the interlock. Tool interlocks are discussed in the [Detailed administration → Tools](#) section on page 466.

A start record will be recorded in the usage events table listing the users, project, tool, and start time. Usage events are found on the [Detailed administration → Usage events](#) page detailed on page 497.

If a tool requires a user to be logged into an area and they are not, an error message will appear (Figure 169). Lab areas are configured through the [Detailed administration → Areas page](#) detailed on page 357. Tools can be configured to require a user to be logged into an area and are discussed in the [Detailed administration → Tools](#) section on page 466. If a tool requires a user to be logged into an area to use a tool and they attempt to enable the tool without being logged into the area, an unauthorized tool access email will be sent to the abuse email if configured. Both are configured in the [Customization](#) page detailed starting on page 282.

Figure 169 Tool control log in area error message

If the user isn't qualified to use the tool, an error message will appear (Figure 170).

Figure 170 Tool control log in qualification error message

If interlocks are enabled and the interlock command fails, an error message will appear (Figure 171). You can choose to Enable the tool anyway (if that option is checked), try again or cancel. More information on the [interlock settings customization](#) detailed on page 291.

Figure 171 Tool control interlock error

7.4.7.2 Multiple use tool login

If a tool has been configured for multiple uses as a parent tool with child tools then multiple start buttons will be displayed (Figure 172). The parent/child tool configuration is useful in cases where a single tool can be used multiple ways and either the usage of each way needs to be tracked or needs to be charged different rates.

Figure 172 Tool control multiple use tool log in buttons

Parent and child tools are discussed in the [Detailed administration → Tools](#) section on page 466.

7.4.7.3 Staff tool login

Staff have the option to use tools for their own projects or to perform work for other users (Figure 173). Select the appropriate usage type to continue.

What would you like to do?

- Use this tool for my own project
- Use this tool on behalf of another user
- Use this tool for a remote project

Figure 173 Tool control login staff

Selecting ‘Use this tool for my own project’ will proceed the same as a user tool login detailed above. Staff can enable any tool regardless of qualifications and therefore do not need to be explicitly qualified on a tool. If a staff member is already charging staff time to a user, that option will be greyed out.

7.4.7.4 Staff tool login on behalf of another user

If Staff select to use a tool on behalf of another user, a search dialog will appear (Figure 174). Enter the users name. As the name is typed, a list of possible users will appear under the dialog. Select the user from the list at any time.

What would you like to do?

- Use this tool for my own project
- Use this tool on behalf of another user
- Use this tool for a remote project

Which user?

Figure 174 Tool control login on behalf of user

Once a user is selected, a list of the user’s projects will appear if they have more than one (Figure 175).

Charge tool usage to which project?

Project 1

Project 2

Figure 175 Tool control staff login select project

Clicking the project will enable the start button (Figure 176).

Figure 176 Tool control staff login multiple project start button

If a user only has one project, a message with the name of their project will appear and the start button will be displayed (Figure 177).

Figure 177 Tool control staff login single project start button

Click the 'Start using the tool' button to begin usage.

NEMO will enable the tool and record usage for the selected user regardless of user qualifications on the tool.

If interlocks have been configured, NEMO will enable the interlock. Tool interlocks are discussed in the [Detailed administration → Tools](#) section on page 466.

If using the tool for a remote project, the charging staff time indicator will appear on the navigation bar (Figure 178). If the tool in use is in an area, area access time will also be recorded. Staff charges are discussed in the [Staff charges](#) section on page 253.

Figure 178 Tool control staff charging time

7.4.8 Tool log out

The tool log out dialogs will vary depending on the options configured.

7.4.8.1 Post usage questions

If post usage questions are configured and set as required, they must be answered before tool log out will be allowed (Figure 179). Questions can be multiple choice, text, or numeric input. They can be used to collect information about a run, create charges for consumables used, and record important tool parameters. Post usage questions can be configured so responses are either required or optional. In addition, questions can be grouped and repeated a configurable number of times to capture multiple processes in a single tool usage. Post usage questions are discussed in the [Detailed administration → Tools](#) section on page 466.

The dialog box contains two questions. The first question is "How much gold was deposited?" with a numeric input field showing "0" and a button labeled "nm". The second question is "Please rate your experience." followed by four radio button options: "Great", "As expected", "Not terrible", and "Disaster".

Figure 179 Tool control log out post usage questions

All post usage question responses are saved in the database usage events table described in the [Detailed administration → Usage events](#) section on page 497. Post usage question responses can also be reviewed on the [usage data history tab](#) of the tool control page detailed on page 118. The ability to review the post usage question responses provides an electronic logbook that can be viewed by users and staff.

7.4.8.2 Delayed log out

If delayed log out has been enable for the tool, the user has the option to log out while preventing usage until the delayed log out time has elapsed (Figure 180). Enter the number of minutes to delay or leave blank to skip the delay. This feature is useful for tools that require timed conditioning runs such as etch systems. It allows the user to start the post conditioning run, log out, and leave the area while the run completes.

The dialog box contains a text input field with the value "0" and a label "Prevent others from using the tool for 0 minutes after disabling the tool. [What's this?](#)".

Figure 180 Tool control log out delayed log out

Delayed log out configuration is discussed in the [Detailed administration → Tools](#) section on page 466.

7.4.8.3 Stop using a tool

If a required post usage question has not been answered, the ‘Stop using the tool’ button will be disabled (Figure 181).

Figure 181 Tool control log out button disabled

Once all required post usage questions have been answered, the ‘Stop using the tool’ button will be enabled (Figure 182).

Figure 182 Tool control log out button enabled

Click the button to stop using the tool.

NEMO will disable the tool and stop recording usage. The usage record in the database will be updated with the end time. Usage events are found on the [Detailed administration → Usage events](#) page detailed on page 497.

If interlocks have been configured, NEMO will disable the interlock immediately even if delayed log out have been selected. Tool interlocks are discussed in the [Detailed administration → Tools](#) section on page 466.

Staff only – If using the tool on behalf of another user and charging staff time, a dialog will pop up asking if staff time charges should continue (Figure 183). Click the appropriate button to continue or stop charging staff time. Staff charges are discussed in the [Staff charges](#) section on page 253.

Figure 183 Tool control log out staff charges

7.4.9 Tool description

The bottom of the tool summary page can be configured to display a description (Figure 184).

Bobs XYZ sputter system

This system has RF and DC capability up to 300 watts. The lab has several targets or you can bring your own with prior approval.

Figure 184 Tool control example tool description

The description is optional and html coding can be used to control appearance. Tool descriptions are discussed in the [Detailed administration → Tools](#) section on page 466.

7.4.10 Tool image

A tool image can be configured to display at the bottom of the tool summary page (Figure 185). If a tool description is configured, the image will be displayed next to the tool description.

Figure 185 Tool control example tool image

The image is optional. Tool images are discussed in the [Detailed administration → Tools](#) section on page 466.

7.4.11 Tool Documents

Tool documents can be added and displayed at the bottom of the summary page (Figure 186).

Figure 186 Tool control example tool documents

The documents are optional. Tool documents are discussed in the [Detailed administration → Tools](#) section on page 466.

7.5 Details Tab

The details tab provides users and staff with information about the selected tool including the responsible staff, tool location, qualified users, required and optional resources, and task and comment history (Figure 187).

A screenshot of the "Details" tab for the "Profilometer" tool. The page includes a summary of tool responsibilities, contact information, location, and communication methods. It also lists qualified users, required and optional resources, and task & comment history.

Figure 187 Tool control details page

7.5.1 Force user off of tool (staff only)

At the top of the page, staff are provided a quick link to force the currently logged in user off of the currently selected tool (Figure 188). Clicking the link will log the current user out of the tool and return the view to the summary tab.

If there are required post usage questions, an email will be sent to the user, the staff member who forced him off, the tool owner and backup owners, as well as the lab managers. The email will contain the required questions and the tool usage data entry will be blank for usage.

You may force Ned Land (ned) off this tool.

Figure 188 Tool details force user off of tool

7.5.2 Tool information

The tool information section of the details tab provides primary and back up staff contacts, problem report email, tool location, and tool location phone number (Figure 189).

Captain Nemo is primarily responsible for this tool and can be contacted with any questions or concerns about the tool.

If you are unable to reach Captain Nemo then please contact Captain Nemo, or Ned Land.

For equipment training, you can contact the primary, backup or the superuser, Pierre Aronnax.

Problem reports for the PECVD are automatically emailed to service@nautilus.com.

The PECVD is located in room NanoFab.

You may dial the phone that is closest to the PECVD at extension x1234.

Figure 189 Tool details tool information

- Primary tool owners are required. If the primary tool owner is associated with a contact, clicking on the arrow next to the primary tool owners name will display additional contact information (Figure 190).

Captain Nemo

Email: captain.nemo@nautilus.com

Office phone: 202-555-1212

Mobile phone:

- Call 098-765-4321
- Send a text message

Office location: Building 7 Room 2

Figure 190 Tool details additional information

- Backup tool owners are optional and will only display if configured. If the backup tool owners are associated with a contact, clicking on the arrow next to the backup tool owners name will display additional contact information in the same manner for primary tool owners.

- Tool superusers are optional and will only display if configured. If the superusers are associated with a contact, clicking on the arrow next to the superuser name will display additional contact information in the same manner for primary tool owners.
- Associating primary, backup tool owners and superusers with contacts is discussed in the [Detailed administration → Contact information](#) section starting on page 399.
- Problem reporting emails are optional and will only display if configured.
- Tool location is required.
- Tool phone number is required.

All tool information fields are set at the tool level and are discussed in the [Detailed administration → Tools](#) section on page 466.

7.5.2.1 Emailing tool contacts through NEMO

Clicking on a tool contact link will open the email dialog (Figure 191).

Compose an email

From: ned.land@nautilus.com

To: captain.nemo@nautilus.com

Send a copy of this message to myself

What is the subject of this email?

Send email

Figure 191 Tool control detail email dialog

To send an email

- The from and to fields are automatically set and cannot be changed (Figure 192).

From: ned.land@nautilus.com

To: captain.nemo@nautilus.com

Figure 192 Tool control detail email address

- Set the send a copy checkbox (Figure 193). By default, the user will be copied however, the checkbox can be unchecked if desired.

Figure 193 Tool control detail email copy

- Enter a subject line in the subject dialog box (Figure 194).

Figure 194 Tool control email subject

- Enter the message in the message dialog box (Figure 195).

Figure 195 Tool control email message

- Click 'Send email' button to send the message (Figure 196).

Figure 196 Tool control email send button

7.5.3 Qualified users (staff only)

Staff are able to see all qualified users on a tool (Figure 197).

Figure 197 Tool control details qualified users

Clicking the (>) will expand the qualified users' dialog (Figure 198). All qualified users are listed and there are dialogs to add qualified users and email all qualified users. If qualifying a user will automatically grant them access to the lab, it will be indicated in red. Active users are displayed boldly, and inactive users are greyed out. NEMO user creation and user status is discussed in the [Users](#) section on page 270.

Qualified users

Only qualified users are able to operate the Sputter.

Qualifying a user for this tool automatically grants them the physical access level "Cleanroom anytime".

Add a qualified user

Search for a user

You can email [all qualified users](#).

Current qualified users are listed below. Inactive qualified users are marked in light grey.

- Captain Nemo (captain)
- Conseil Aronnax (conseil)
- Ned Land (ned)

Figure 198 Tool control details qualified users expanded

Clicking the (▼) will collapse the qualified user dialog.

7.5.3.1 Qualify a user

Users can be qualified directly using the Add a qualified user search dialog (Figure 199). User tool qualifications are detailed in [Qualifications](#) on page 233.

Figure 199 Tool control details qualify a user

Start typing the user's name in the search dialog then select the name of the list returned. The return list updates automatically as typed, and a user can be clicked from the list at any time (Figure 200). Once clicked, the user is added to the current qualified users list.

Figure 200 Tool control details qualify a user search list

7.5.3.2 Email all tool users

If there are any qualified users, an email link will appear below the add a qualified user dialog (Figure 201).

 You can email all qualified users.

Figure 201 Tool control details email all users

Clicking the link will open the user email page which is described in the [Email](#) section on page 216.

7.5.4 Required resources

The required resources are optional and only display if configured (Figure 202). Resources are discussed in the [Resources](#) section on page 241. Associating resources with tools is discussed in the [Detailed administration → Tools](#) section on page 466.

Figure 202 Tool control details required resources

Clicking the (>) will expand the required resource list (Figure 203).

Figure 203 Tool control details require resources expanded

Clicking the (▼) will collapse the required resource list.

7.5.5 Optional resources

The optional resources are optional and only display if configured (Figure 204). Resources are discussed in the [Resources](#) section on page 241. Associating resources with tools is discussed in the [Detailed administration → Tools](#) section on page 466.

Figure 204 Tool control details optional resources

Clicking the (>) will expand the optional resource list (Figure 205).

Figure 205 Tool control details optional resources expanded

Clicking the (▼) will collapse the required resource list.

7.5.6 Task and comment history

The task and comment history provides a way to look at problems, shutdowns, and comments that are currently open or have been previously closed (Figure 206).

Figure 206 Tool control details task and comment history

Clicking the (>) will expand the optional resource list (Figure 207).

Figure 207 Tool control details task and comment history expanded

Clicking the (▼) will collapse the required resource list.

The expanded task and comment history provides quick buttons to display all items created in the last three months (Figure 208) or the ten most recent events (Figure 209). Clicking either will show a list of tasks and comments below the search dialog (Figure 210).

Created in the last 3 months

Figure 208 Tool control details task 3-month button

10 most recent

Figure 209 Tool control details task 10 most recent button

A search dialog is also provided to allow a keyword search or any date range to be displayed (Figure 210).

Figure 210 Tool control details task search dialog

For a key word search, enter the search text in the contains field (Figure 211).

Figure 211 Tool control details task search text

For a date range search, click the start and end dialogs to enter dates. A calendar dialog will appear that can be used to navigate to the date of interest (Figure 212). However, a date can be typed directly into each box.

Figure 212 Tool control details task calendar dialog

The search can also combine text search and date ranges. To make open ended, leave fields blank. For example, to show all tasks, leave the contains field and start date blank and enter today's date into the end date, all task records will be returned.

Click the  button to display results below the dialog (Figure 213).

Figure 213 Tool control details task display results

Clicking the (>) will expand task or comment details (Figure 214).

Figure 214 Tool control details task results expanded

Clicking the (▼) will collapse the details.

Clicking the  button will export current shown tasks and comments into a text file.

7.5.6.1 Reopen closed task (staff only)

If a staff member is viewing task history, a line will be displayed giving the option to reopen the task (Figure 215).

You can [reopen this task if it was mistakenly resolved](#).

Figure 215 Tool control details task results reopen task link

Clicking on the reopen link will open the [task update page](#) which is detailed on page 95. Click update to reopen the task.

7.6 Usage Data History

The usage data history tab provides users and staff with the ability to see how a tool was used based on answers to post usage questions. This feature is useful to replace handwritten logbooks and gives easy access to post usage question data. The tab will only be visible on tools that have post usage questions configured. The usage data history is searchable by date, last records, and can be filtered by user. The selected data can be exported in a comma separated text file.

User	Date	What material did you etch?	How long did you etch?	Any comments?
Ned Land	06/08/2021 1:48 p.m.	Silicon Oxide	5	
Ned Land	06/08/2021 1:48 p.m.	Silicon Nitride	40	
Ned Land	06/05/2021 6:45 p.m.	Silicon Oxide	12	
Ned Land	06/05/2021 4:38 p.m.	Silicon Nitride	20	
Ned Land	06/05/2021 11:14 a.m.	Silicon Nitride	10	
Ned Land	06/05/2021 11:14 a.m.	Silicon Oxide	25	

Figure 216 Tool control usage data history

7.6.1 Feature setup

- The usage data history page is automatically displayed once post usage questions have been setup for a tool.
- Post usage question setup is discussed in detail in the [Detailed administration → Tools](#) section on page 466.
- Post usage questions can be configured so responses are either required or optional. In addition, questions can be grouped and repeated a configurable number of times to capture multiple processes in a single tool usage. If a combination of grouped and ungrouped questions are configured, the ungrouped question responses only appear with the first group response.

7.6.2 Review usage data history for a tool

- Navigate to the tool control page.
- Select the tool of interest from the tool list on the sidebar.
- Click the usage data history tab.
- The default view lists the last 25 records

Usage Data History

Figure 217 Tool control usage data history tab

- Select the date range or the last number of records:
 - Enter a start and end date if desired.
 - Or select the last number of records.
 - Click update to refresh the view.

A screenshot of a search interface. It includes fields for 'From' (07/31/2020), 'to' (11/30/2020), and 'or last' (with a dropdown menu) followed by 'records'.

Figure 218 Tool control usage data history date range or last records

- Filter by user:
 - Enter a user name in the search box if desired.
 - Click on the user you want to filter by.
 - Click update to refresh the view.

A screenshot of a search interface with a 'Filter by user:' label and a 'Search for a user' input field.

Figure 219 Tool control usage data history filter by user

- Show project information:
 - Check the box if you want to see project information in the table
 - Click update to refresh the view

A screenshot of a checkbox labeled 'Show project information' which is checked.

Figure 220 Tool control usage data history show project info

- The resulting data will include project information:

User	Project	Date	What material did you etch?	How long did you etch?	Any comments?
Ned Land	Project 3	06/08/2021 1:48 p.m.	Silicon Oxide	5	
Ned Land	Project 3	06/08/2021 1:48 p.m.	Silicon Nitride	40	
Ned Land	Project 3	06/05/2021 6:45 p.m.	Silicon Oxide	12	
Ned Land	Project 3	06/05/2021 4:38 p.m.	Silicon Nitride	20	
Ned Land	Project 3	06/05/2021 11:14 a.m.	Silicon Nitride	10	
Ned Land	Project 3	06/05/2021 11:14 a.m.	Silicon Oxide	25	

Figure 221 Tool control usage data history with project information

- Scroll through the returned data to review.
- To export the selected data, click the export button.

Export

Figure 222 Tool control usage data history export button

7.7 Config History

The config history tab provides users and staff with the ability to see how a tool was configured previously (Figure 223). The tab will only be visible on tools that are configurable.

Configuration history is saved in the database and is discussed in [Detailed administration → Configuration histories](#) on page 386. Configurations are discussed in the [Configuration Agenda](#) section on page 212.

Sputter [Summary](#) [Details](#) **Config History** [Report a problem](#) [Post a comment](#)

Gun 1 Target: Cr

Gun 2 Target: Au

Figure 224 Tool control configuration details

Click the (▼) icon to collapse the details.

7.8 Report a problem Tab

The report a problem tab provides users and staff with the ability to alert others to problems with a tool (Figure 225). If a tool is unusable, it can be shut down and the tool owner notified. If it poses a safety hazard, more staff can be alerted.

The screenshot shows a web-based reporting interface for a 'Chlorine Etch' tool. At the top, there are tabs: 'Summary', 'Details', 'Config History', 'Report a problem' (which is highlighted in blue), and 'Post a comment'. Below the tabs, a text area says: 'Use this form to report a problem relating to the currently selected tool. The NanoFab staff will be notified of the problem by email and the details of the problem will be visible to everyone on the website.' A note below asks to choose a category for the problem. A dropdown menu is shown. Next, a question about task status is asked, followed by another dropdown menu. A large text area for providing a detailed problem description is present. Below it, a question about resolution time is followed by a blank input field. At the bottom, there are checkboxes for safety hazards and tool shutdown, a file upload section ('Choose Files'), and a red 'Report problem' button.

Chlorine Etch

Report a problem

Please choose a category that best describes this problem. If there is no appropriate category then leave this field blank.

What is the status of this task?

Please provide a **detailed** description of the problem so that the NanoFab staff have enough information to resolve the problem efficiently.

What is your best estimate of when the problem will be resolved? Leave this field blank if you are unsure.

This problem represents a safety hazard to the NanoFab and should be regarded as urgent. Notify the NanoFab safety officer of this issue.

Shut down the tool so that it may not be used until this problem is resolved.

Choose Files No file chosen

Report problem

Figure 225 Tool control report a problem page

7.8.1 To report a problem:

- Navigate to the tool control page.
- Select the tool of interest from the tool list on the sidebar.
- Click the report a problem tab.
- If task categories have been defined, a dropdown and instruction will appear. Click the dropdown and select the problem category that best describes the problem (Figure 226). If no category describes the problem, leave this blank. Task categories can be

used to bin problems making future problem analysis easier. Categories are configured on the [Detailed administration → Task categories](#) page described on page 453.

Figure 226 Tool problem category selection

- (Staff Only) If task statuses have been defined, a dropdown and instruction will appear (Figure 227). If the status is not known, the field can be left blank. Click the dropdown and select the initial status for the problem. Task statuses are used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Statuses are configured on the [Detailed administration → Task statuses page](#) described on page 460.

Figure 227 Tool problem task status selection

- Provide a detailed description of the problem in the dialog box (Figure 228).

A screenshot of a large text input field with a placeholder text: "Please provide a **detailed** description of the problem so that the NanoFab staff have enough information to resolve the problem efficiently." The input field is currently empty.

Figure 228 Tool problem detailed description

- (Staff only) Provide an estimate of when the problem will be resolved if known or leave blank (Figure 229). Clicking in the dialog will open a date and time dialog (Figure 230).

What is your best estimate of when the problem will be resolved? Leave this field blank if you are unsure.

Figure 229 Tool problem estimated repair time

What is your best estimate of when the problem will be resolved? Leave this field blank if you are unsure.

04/24/2020 12:44 PM

The calendar shows the month of April 2020. The date 24 is highlighted in blue. The time is set to 12:44 PM. A note on the right says: "This problem represents a safety hazard to the NanoFab and should be regarded as urgent. Notify the NanoFab safety officer of this issue."

Figure 230 Tool problem estimated repair date and time dialog

- Check the safety hazard check box if the problem is a safety hazard to people or equipment (Figure 231).

This problem represents a safety hazard to the NanoFab and should be regarded as urgent. Notify the NanoFab safety officer of this issue.

Figure 231 Tool problem safety hazard

- Check if the shutdown check box if the tool is not able to be used by others and could potentially ruin samples (Figure 232).

Shut down the tool so that it may not be used until this problem is resolved.

Figure 232 Tool problem shut down

- The choose files dialog may be used to upload any relevant pictures or data to show details that support the description (Figure 233). Clicking the button activate a standard file selection dialog. Multiple files can be uploaded. Note: it is good practice to make note of the files in the description to link the file to the text.

No file chosen

Figure 233 Tool problem upload files

- Click the report button to finish (Figure 234).

Figure 234 Tool problem report button

7.8.2 Problem posting

Once the Report problem button is clicked, a task is created and saved in the Tasks table of the database which is discussed in the [Detailed administration → Tasks](#) section on page 460.

Tasks are displayed as problems and shutdowns in the summary tab of the tool control page.

Email notifications are triggered.

- Email notifications are only sent if the New task email has been configured in [Customization](#) which is discussed on page 320.
- Recipients set at the tool level as discussed in the [Detailed administration → Tools](#) section on page 466.
 - Primary tool owner
 - Backup tool owners if any are defined
 - Notification email if defined
- Recipients set in settings.py LAB_MANAGERS as discussed in the [Configuring NEMO settings → Lab Managers](#) section on page 549.
- Recipients any non-staff user with a future reservation.

If the task is marked as a safety hazard

- In addition to the standard email notifications, a safety issue is automatically created, and a safety email is sent. Safety issues are discussed in the [Safety page](#) section on page 139.

7.9 Post a comment Tab

The post a comment tab provides users and staff with the ability to record information about a tool without changing the tool status (Figure 235). It is useful for highlighting tool usage information, process results, and general comments. Unlike reporting a problem, staff are not notified when a comment is posted therefore, comments should not be used to report problems or shutdowns.

Sputter [Summary](#) [Details](#) [Config History](#) [Report a problem](#) [Post a comment](#)

Use this form to comment on the operating status of the selected tool. The comment will be visible to everyone on the website for **informational purposes**. (Note: if there is something wrong with the tool then please report a problem instead of creating a comment). You may remove the comment at any time because you are its author.

How many days would you like the comment to be visible? 30 days ▾

What would you like to say?

Make this comment only visible to staff users

Post comment

Figure 235 Tool control post a comment page

7.9.1 To post a comment:

- Navigate to the tool control page.
- Select the tool of interest from the tool list on the sidebar.
- Click the Post a comment tab.
- Click the drop down and select the amount of time to keep the comment visible (Figure 236).

Figure 236 Comment visible time dropdown

- Enter any relevant information in the dialog box (Figure 237).

Figure 237 Comment dialog box

- Check to make comment visible only to staff (staff only) (Figure 238). This feature is useful to post special tool information.

Figure 238 Comment dialog staff visible checkbox

- Click the post comment button (Figure 239).

Post comment

Figure 239 Comment post button

7.9.2 Comment posting

Once the Post comment button is clicked, the comment is saved in the Comments table of the database which is discussed in the [Detailed administration → Comments](#) section on page 376. Comments are displayed in the summary tab of the tool control page. No email notifications are triggered.

7.10 Mobile device tool control

The tool control page will automatically change to a mobile display by stacking information into a single scrollable column (Figure 240). All of the features are available while in mobile view. To start, directly enter the name of the tool in the search dialog or select a tool by category. All categories and sub-categories are listed.

Figure 240 Mobile tool control page

7.10.1 Search for a tool

To search for a tool, start typing in the search dialog box. A tool button list will appear below the search dialog as characters are entered but at least two characters must be entered (Figure 241). Once the tool of interest appears, click the button of the tool of interest to go to the tool control page detailed below on 129.

Figure 241 Mobile tool control search box and results

7.10.2 Select a tool by category

To select a tool by category, click the category button then click the tool link in the drop down. If the tool of interest is not on the list, click another category button (Figure 242). Note: it is possible to have more than one category at a time expanded. However, the page resets each time it is opened. Once the tool of interest appears, click the button of the tool of interest to go to the mobile tool reservation page detailed below on page 129.

Figure 242 Mobile tool control category drop down

7.10.3 Mobile tool control page

The mobile tool control page lands on the summary tab (Figure 243). The summary tab, details tab, report a problem tab, and post a comment tab do not have any specializations to render on a mobile device. To select each tab, click or press near the tab title. Functionality is identical to the previously described tab features. If a tab renders larger than a screen, drag the screen to scroll.

Figure 243 Mobile tool control landing page

7.11 Tool control customizations

7.11.1 Notification emails

Email notifications are possible when a task is created, updated, or resolved or a user tries to use a tool they are not qualified for and must be configured to be functional. Email templates are configured in the [Customization](#) page detailed starting on page 282.

7.11.2 Tool usage reminders

Tool usage reminder emails can be sent periodically. A timed service app must be properly configured and running which is described in [NEMO timed services](#) on page 549. The usage reminder email template must be configured and is described in the [Customization](#) pages detailed starting on page 282.

7.11.3 Tool rates

Tool rates can be customized and are discussed in the [Customizations → Tool rates](#) section on page 343.

7.11.4 Tool control page refresh rate

The tool control page automatically refreshes every 30 seconds which updates the current tool information and sidebar. To change the update interval, edit the tool_control.html and change the setInterval constant (in milliseconds) in the on_load function.

7.11.5 Optional tool features

The tool control pages were implemented such that if a feature was not used, its corresponding content would not be displayed. This helps eliminate the need for special setups to view features and easily enables many features to be optional. All of the optional features are detailed in the tool control pages.

8 Status dashboard

The status dashboard page provides a convenient overview of all users and staff currently logged into any areas or tools. In addition, there are views for problematic tools, idle tools, and an all-tool view. The status dashboard lands on the area occupancy tab by default.

8.1 Web address

The status dashboard page is accessible at site-address/status_dashboard/. For example, www.nemo.com/status_dashboard/. The page can also be accessed from the navigation bar menu item “Status dashboard”.

8.2 Area occupancy tab

The status dashboard lands on the area occupancy tab by default and the area occupancy tab will be highlighted with a blue background (Figure 244). This view shows all users that are currently logged into all areas. Staff members are highlighted in green and service personnel are highlighted in orange, so they stand out. Each area will list the number of people in the area if it is greater than 1. Staff and service personnel are listed separately if the area is configured not to include them in the occupancy count. Lab areas are configured through the [Detailed administration → Areas](#) page detailed on page 370.

The screenshot shows the Status dashboard interface. At the top, there are two tabs: "Area occupancy" (which is highlighted in blue) and "Tool status & usage". Below the tabs, there are two sections: "Cleanroom" and "CMP lab".

Cleanroom: A yellow warning icon indicates 2 / 5 people (+ 2 staff and 1 service personnel). The table lists users and their activities:

User	Since	Working on project...
⊗ Tech Cleanroom	Monday @ 1:35 PM	Cleanroom Maint
⊗ Ned Land	Monday @ 3:53 PM	Project 1
⊗ Pierre Aronnax	Monday @ 3:53 PM	Project 2
⊗ Staff Cleanroom	Monday @ 3:53 PM	Cleanroom Maint
⊗ Captain Nemo	Monday @ 3:54 PM	Cleanroom Training

CMP lab: A yellow warning icon indicates 1 people. The table lists users and their activities:

User	Since	Working on project...
⊗ Conseil Aronnax	Monday @ 3:55 PM	Project 1

Figure 244 Status dashboard area occupancy

8.2.1 Maximum occupancy

If an area has a maximum occupancy set, the number of people will be listed as total of the maximum (Figure 245).

Figure 245 Status dashboard below maximum occupancy

If the occupancy is within one person, a yellow warning will be displayed with the occupancy (Figure 246).

Figure 246 Status dashboard near maximum occupancy

If the occupancy is at or above the limit, a red warning will be displayed with the occupancy (Figure 247).

Figure 247 Status dashboard at or above maximum occupancy

8.2.2 Force user out of area (staff only)

Staff will see a (ⓧ) icon next to each user's name. Clicking the icon will log the user out of the area. There is no prompt for confirmation, the logout is immediate.

8.3 Tool status & usage tab

Clicking the 'Tool status & usage' tab will switch the view and highlight the tab with a blue background. The default view is the 'tools in use' filter. To change the filter, click the dropdown and click the filter of interest (Figure 248). All filter views show the tool name, user name, and when they started using the tool. The tool names are followed by status icons which are identical to those described in [Tool control → Side bar Tool list icons](#) on page 84.

Figure 248 Status dashboard tool filter

8.3.1 Force user off of tool (staff only)

Staff will see a (✖) icon next to each user's name on all tool status views except for idle tools. Clicking the icon will log the user out of the tool. There is no prompt for confirmation, the logout is immediate. All normal logout procedures are skipped and if interlocks are defined, the interlock is turned off immediately.

If there are required post usage questions, an email will be sent to the user, the staff member who forced him off, the tool owner and backup owners, as well as the lab managers. The email will contain the required questions and the tool usage data entry will be blank for usage.

Tool logout procedures are discussed in the [Tool control → Summary tab → Tool log out](#) section on page 105.

8.3.2 Tools in use

The 'tools in use' filter will only show tools that currently have someone logged in (Figure 249).

8.5 Status dashboard customizations

8.5.1 Status dashboard refresh rate

The status dashboard page automatically refreshes every 10 seconds which updates the current area occupancy and tool usage information. To change the update interval, edit the `status_dashboard.html` and change the `setInterval` constant (in milliseconds) in the `on_load` function.

9 Requests

The Requests page is meant to be a common place for user requests. It includes the buddy board and the access requests. At least one of the 2 features needs to be enabled for the Requests menu item to show up (Figure 255).

The screenshot shows the NEMO application interface. The top navigation bar includes links for NEMO, Calendar, Tool control, Status dashboard, Requests, Administration, and a welcome message for 'Captain'. Below the navigation is a toolbar with 'Access requests' (selected), 'Buddy requests board', and a 'New request' button. A message box contains the text: 'Request need to be submitted before 5PM. Contact staff for assistance.' Below this, a note states: 'You do not have any current active access requests'.

Figure 255 Requests page

9.1 Buddy Board

The buddy board is a simple message system that enables facility users to pair up or form working groups required in many facilities for out of hours access.

To enable the buddy board, you must first enable it on an area. See [Detailed administration - Areas](#) on page 370.

9.1.1 Web address

The buddy board page is accessible at site-address/user_requests/buddy/. For example, www.nemo.com/user_requests/buddy/. The page can also be accessed from the navigation bar menu item “Requests”.

9.1.2 Usage

9.1.2.1 Open the buddy board

Click the Requests then on the Buddy board to access the buddy board. The page shows a new request button in the right upper corner, instructions, and the current list of buddy requests and replies (Figure 256).

The screenshot shows a 'Buddy requests board' interface. At the top, there are two tabs: 'Access requests' and 'Buddy requests board'. The 'Buddy requests board' tab has a red notification badge with the number '2'. Below the tabs, a message states: 'Requests will be automatically removed at the end of the day on their end date. Please submit a access request when everyone agrees on the dates.' A green 'New request' button is located in the top right corner. The main content area displays two posts:

- Saturday, February 5th, 2022**
 - **New** Ned Land needs a buddy in the Cleanroom
I need a buddy this Saturday Reply
- Sunday, February 6th, 2022**
 - **New** Ned Land needs a buddy in the Cleanroom
I am looking for a buddy this Sunday Reply

- All users with preferences set to receive emails for buddy request replies that they replied to will receive an email notification

9.1.3 Mobile device buddy board page

There are no mobile device views for the buddy board page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

9.1.4 Buddy board page customizations

9.1.4.1 Tab title

A title can be set for the buddy board tab in [Customization - User requests settings](#). See more details on page 289.

9.1.4.2 Description

A disclaimer/information text can be set for the buddy board in [Customization - User requests settings](#). See more details on page 289.

9.2 Access requests

The access requests feature is a system that enables facility users to temporarily request access to an area they don't typically have access to at certain times. Most often this would be used to request after-hours access to a lab/cleanroom.

To enable the access requests, you must first enable it on a physical access level. See [Detailed administration - Physical access level](#) on page 429 and by setting at least one facility manager in [Detailed administration - Users](#) on page 504.

9.2.1 Web address

The access requests page is accessible at site-address/user_requests/access/. For example, www.nemo.com/user_requests/access/. The page can also be accessed from the navigation bar menu item “Requests”.

9.2.2 Usage

9.2.2.1 Open the access requests

Click the Requests then on the Access requests tab to access the access requests (by default when clicking on Requests it will display the access requests tab). The page shows a new request button in the right upper corner, instructions, and the current list of access requests grouped by status. Possible statuses are: Pending, Approved, Denied and Expired (Figure 273).

The screenshot shows a web-based application for managing access requests. At the top, there are two tabs: "Access requests" (selected) and "Buddy requests board". A message box displays a note: "Request need to be submitted before 5PM. Contact staff for assistance." A green "New request" button is located in the top right corner.

Figure 287 Access requests pending

- Click the approve/deny button (Figure 288).

Figure 288 Access requests approve deny button

- Edit any field of the access request. It is recommended to add a message to the request description to explain the changes (Figure 289).

Modify access request

Start: 02/19/2022 1:38 PM End: 02/20/2022 12:00 AM

Area Access: Cleanroom (Anytime)

Buddies: Search for other users to add as your buddies

Selected users: Captain Nemo, Pierre Aronnax

Description: [UPDATE] Request is approved for the first day only (2/19). The following day the whole facility is closed.

Approve Deny

Figure 289 Access request approve/deny dialog

- Click approve or deny (Figure 290).

Figure 290 Access request approve/deny buttons

- A confirmation dialog will ask to confirm the choice. Upon confirmation, the user will be redirected to the access requests page.
- All users included in the request and facility managers will receive an email confirmation of the changes and new status of the request.
- Upon approval, a temporary physical access record giving access to the area to all the users included in the request, starting at the start time of the request, and ending at the end time of the request. Temporary physical accesses are discussed in [Detailed administration - Temporary physical access](#).

9.2.2.5 Weekend access

The access requests feature comes with a weekend access optional feature. An email can be sent to a customizable list of emails when users are expected to be (or not be) in the facility during weekends. To enable the feature, the weekend access emails setting needs to be set in [Customization - User requests settings](#) as well as the user office email address and the weekend email access template in [Customization - Weekend access notification email](#). This feature also needs to be set through a timed service job as described in the [NEMO Timed Services](#) section.

There are 2 cases when the email will be sent:

1. When an approved request's time is overlapping the current weekend time, an email will be sent to inform the emails set in [Customization - User requests settings](#) as well as facility managers that there will be users in the facility this coming weekend.
For example, if the cutoff date and time is set to Friday 5pm and a request is approved before that (or anytime if the cutoff date and time are not set), then the email will be sent with a `weekend_access` variable set to "true".
2. When no requests overlapping the current weekend time are approved before the cutoff day and time set in [Customization - User requests settings](#), an email will be sent at the cutoff date and time to inform the emails set in [Customization - User requests settings](#) as well as the facility managers that no users will be in the facility this coming weekend.
For example, if the cutoff date and time is set to Friday 5pm and by that day and time there are no approved requests with time overlapping the current weekend, then the email will be sent with a `weekend_access` variable set to "false".
If the cutoff day and time are not sent, the email will not be sent.

9.2.3 Mobile device access requests page

There are no mobile device views for the access requests page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

9.2.4 Access requests page customizations

9.2.4.1 Tab title

A title can be set for the access requests tab in [Customization - User requests settings](#). See more details on page 293.

9.2.4.2 Description

A disclaimer/information text can be set for the access requests in [Customization - User requests settings](#). See more details on page 293.

9.2.4.3 Access requests minimum number of users in a request

A minimum number of users in a request can be set in [Customization - User requests settings](#). See more details on page 293.

9.2.4.4 Access requests maximum number of requests to display

To limit the number of requests displayed in the access requests page, the maximum number of requests can be set in [Customization - User requests settings](#). See more details on page 293.

9.2.4.5 Weekend access emails

A list of emails can be set to send the weekend access email to, in [Customization - User requests settings](#). See more details on page 293. If this is not set, no weekend access emails will be sent.

9.2.4.6 Weekend access cutoff day and time

A day and time can be set in [Customization - User requests settings](#) after which the weekend access email will be sent if there are no approved requests by that time. If the date and time is not set, the email informing that no users will be in the facility will not be sent.

10 Jumbotron

The jumbotron is similar to the status dashboard but provides an integrated page to display user occupancy, tools in use, and any alerts or outages (Figure 291).

Area occupancy

Staff members are highlighted in green.
Service personnel are highlighted in orange.
Users with expired reservations are highlighted in red.

Cleanroom
⚠ 2 / 5 people (+ 2 staff and 1 service personnel)

Alerts and outages

Sputter tool annual PM next week
The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users.

Resource outage: O2
Gas bottle change

Figure 291 Jumbotron display

10.1 Web address

The jumbotron page is accessible at site-address/jumbotron/. For example, www.nemo.com/jumbotron/. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

10.2 Usage

The intent of this page is to run continuously on a monitor.

- Area occupancy information will only be displayed if areas have been defined.
 - This section shows all users that are currently logged into all areas. Staff members are highlighted in green and service personnel are highlighted in orange, so they stand out. Each area will list the number of people in the area if it is greater than 1. Staff and service personnel are listed separately if the area is configured not to include them in the occupancy count.
 - When area reservations are in use, users with expired reservations are highlighted in red.
- Tool usage information will only be displayed if tools have been defined.
- Alerts and outages are only displayed if any are present (Figure 292).
- An optional watermark can be used on the page to highlight the lab.

Area occupancy

Staff members are highlighted in green.
Service personnel are highlighted in orange.
Users with expired reservations are highlighted in red.

Nobody is in an access controlled NanoFab area

No NanoFab tools are in use

v 3.4.0 - Developed by CNST, NIST

Figure 293 Jumbotron not in use messages

The page automatically refreshes periodically to keep the information current. If NEMO has gone offline and does not respond to a refresh request, the page will display “NEMO is offline” (Figure 294).

Figure 294 Jumbotron NEMO offline

10.3 Mobile device jumbotron

There are no mobile device views for the jumbotron page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

10.4 Jumbotron customizations

10.4.1 Background watermark

The jumbotron can display a background watermark image. The jumbotron watermark is configured through the [Customizations → Jumbotron watermark](#) page detailed on page 306.

10.4.2 Jumbotron refresh rate

The jumbotron page automatically refreshes every 10 seconds which updates the current area occupancy, tool usage information, alerts, and outages. To change the update interval, edit the jumbotrol.html and change the setInterval constant (in milliseconds) in the on_load function.

11 Safety

The safety page provides users a method to report and view non-emergency issues in the lab and gives staff a method to document progress and resolutions (Figure 295). If a user reports a problem with a tool and checks that the problem is also a safety hazard, as described in the [Tool control → Report a problem](#) section on page 118, a new safety issue will automatically be created here. Users and staff can see current issues and look at closed issues.

Safety suggestions and observations

Call 911 if there is an immediate emergency.

We invite your suggestions and observations in order to provide a safer and more effective environment for all users and staff. Use this form to report non-emergency related safety issues, unsafe working conditions, housekeeping suggestions, or observations. You can send your comments or concerns completely anonymously or provide your name so that we can follow up with you.

You can also [view past safety issues that have been resolved](#).

Report a new safety issue

Where is the problem?

Why are you concerned?

Report this issue anonymously. Your name will not be visible to NanoFab staff. There will be no way for us to follow up with you about how the safety issue was resolved.

Report a new safety concern

Existing safety issues

Concern
There is a pinch point on the glove box. Location: Gowning room Reported anonymously on Wednesday, April 29th, 2020 @ 5:03 PM

Figure 295 Safety page

11.1 Safety message

NEMO has a default safety message displayed at the top of the safety page. It can be customized to specific lab requirements (Figure 296). A customized html safety message can be loaded into NEMO through the [Customizations → Safety introduction message](#) detailed on page 297.

Call 911 if there is an immediate emergency.

We invite your suggestions and observations in order to provide a safer and more effective environment for all users and staff. Use this form to report non-emergency related safety issues, unsafe working conditions, housekeeping suggestions, or observations. You can send your comments or concerns completely anonymously or provide your name so that we can follow up with you.

Safety issues that have been closed can be accessed by clicking the view past safety issues link (Figure 297).

You can also [view past safety issues that have been resolved](#).

Figure 297 Safety past issues link

Clicking the link will open the resolved safety issues page (Figure 298).

Resolved safety issues

This page lists previously reported and resolved safety issues.

You can also [view current safety issues](#).

Concern

Several users are not wearing safety glasses.

Location: Cleanroom lithography

Reported on Wednesday, April 29th, 2020 @ 4:58 PM by Ned Land (ned)

Resolved on Wednesday, April 29th, 2020 @ 6:39 PM by Captain Nemo (captain)

Resolution

Posted sign in lab and will watch users to remind them to wear safety glasses.

Concern

Sliding door is closing while users are standing in the entry.

Location: Cleanroom

Reported on Monday, April 20th, 2020 @ 8:24 PM by Captain Nemo (captain)

Resolved on Wednesday, April 29th, 2020 @ 5:47 PM by Captain Nemo (captain)

Resolution

Plant replaced the sensor and tested the door. It is operating correctly now.

Figure 298 Safety resolved issues page

All resolved issues will be listed with the most recent resolution listed first. If there are not any resolved safety issues to list, the user will be notified with “There are no past issues.”

Clicking the view current safety issues link will return to the main safety page (Figure 299).

You can also [view current safety issues](#).

Figure 299 Safety return to main page

11.3 Report a new safety issue

New safety issues can be created by any user or staff member. To report a new safety issue, provide a location and a description of your concern (Figure 300).

The form has a title 'Report a new safety issue'. It contains two text input fields: one for 'Where is the problem?' and another for 'Why are you concerned?'. Below these fields is a checkbox labeled 'Report this issue anonymously. Your name will not be visible to NanoFab staff. There will be no way for us to follow up with you about how the safety issue was resolved.' At the bottom is a red button labeled 'Report a new safety concern'.

Figure 300 Safety report new issue

Users can select to report issues anonymously if desired and their name will not be recorded with the report (Figure 301). However, the staff will not be able to follow up directly with the user about the problem or how it was resolved.

A close-up view of the 'Report this issue anonymously' checkbox from Figure 300, showing the text: 'Report this issue anonymously. Your name will not be visible to NanoFab staff. There will be no way for us to follow up with you about how the safety issue was resolved.'

Figure 301 Safety report new issue anonymously

Once all information is correct, click the report button (Figure 302).

Figure 302 Safety issue report button

Upon clicking the report button NEMO will:

- Create a new safety issue in the safety issues table of the database as discussed in [Detailed administration → Safety Issues](#) on page 446.
- Send an email to the safety email address using the safety email template. If either are missing, no email will be sent. Safety email address and email template are detailed in the [Customization](#) section starting on page 282.
- Upon success, a confirmation screen will appear to verify that the safety issue was received and recorded (Figure 303).

Your safety concern was sent to NanoFab staff and will be addressed promptly

[Continue to NEMO home screen](#)

11.4.4 Automatic safety issues

If a safety issues was created automatically with a tool problem report, it will say so (Figure 309).

Concern
This safety issue was automatically created because a microscope problem was identified as a safety hazard.

Smoke coming from lamp housing when on.

Location: Cleanroom Bay 5
Reported on Friday, April 17th, 2020 @ 12:31 PM

Figure 309 Safety report created by tool problem report

11.4.5 Progress

If a safety has an update but has not been resolved, it will have a progress section that lists the progress made so far (Figure 310).

Concern
Several users are not wearing safety glasses.

Location: Cleanroom lithography
Reported on Wednesday, April 29th, 2020 @ 4:58 PM by Ned Land (ned)

Progress
Posted sign in lab and will watch users to remind them to wear safety glasses.

Figure 310 Safety issue showing progress

11.5 Resolve or update a safety issue (staff only)

Staff can resolve an open issue or make progress updates. Clicking anywhere in a concern box will open the update page (Figure 311). The update page has check boxes to resolve an issue and hide an issue, a dialog box to enter information, save and abandon update buttons, and a listing of all information to date.

Update a safety issue

- This issue has been resolved
 This issue is visible to users

Provide an update on how this safety issue is being handled or resolved.

Save update

Abandon update

Concern

Several users are not wearing safety glasses.

Location: Cleanroom lithography

Reported on Wednesday, April 29th, 2020 @ 4:58 PM by Ned Land (ned)

Progress

Posted sign in lab and will watch users to remind them to wear safety glasses.

Figure 311 Safety issue update page

If this is the final update and the issue will be closed, check the issue resolved checkbox (Figure 312).

Figure 312 Safety update issue resolved checkbox

All issues are visible to users by default, if an issue needs to be hidden from users, uncheck the visible to users' checkbox (Figure 313).

Figure 313 Safety update issue visible checkbox

Enter a detailed narrative or the progress to date or the final resolution (Figure 314).

Provide an update on how this safety issue is being handled or resolved.

Figure 314 Safety update narrative dialog box

To save, click the save update button (Figure 315). After clicking save, the main safety page is opened.

Save update

Figure 315 Safety update save button

To leave without recording any changes, click the abandon changes button (Figure 316). After clicking abandon, the main safety page is opened.

A yellow rectangular button with the text "Abandon update" in black, centered within the button.

Figure 316 Safety update abandon button

11.6 Notifications (*staff only*)

When safety alerts are created, the notification status is set for staff members. It automatically expires after one month. If a user accesses a page with a notification within that time, there will be a notification indicating new content since their last visit. The safety notifications are reset upon visiting the safety page. Notifications are detailed in [Detailed administration → Notifications](#) on page 424.

If the safety page has a link on the landing page, a red number that represents the number of new safety issues reported since the user last visited the safety page will appear to the right of the link name (Figure 317). Setup details can be found under [Detailed administration → Landing page choices](#) on page 402.

Figure 317 Landing page safety notification

The next time the safety page is visited, any new issues that have been created since the user last visited the safety page will have a special “new” icon to highlight the concern (Figure 318).

A screenshot of a safety page showing a red oval badge with the word "New" in white, positioned next to the word "Concern" in blue.

Figure 318 Safety page new issues

11.7 Web address

The safety page is accessible at site-address/safety/. For example, www.nemo.com/safety/. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

11.8 Mobile device safety page

There are no mobile device views for the safety page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

11.9 Safety page customizations

11.9.1 Safety email address and email template

Safety email address and email template are detailed in the [Customization](#) section starting on page 282.

11.9.2 Safety introduction message

A customized html safety message can be loaded into NEMO through the [Customizations → Safety introduction message](#) detailed on page 297.

12 Send feedback

The send feedback provides users a dialog to send general comments and suggestions to staff that are not safety related (Figure 319).

Submit feedback about the NanoFab

We're continually working to improve the NanoFab experience for everyone.
Do you have an idea to make the NanoFab better? Send us your feedback!

Send feedback

Figure 319 Send feedback page

If either the email address or email template have not been configured, a warning message the feature has not been customized will be displayed instead of the feedback page (Figure 320). Configuration is detailed in the [Customization](#) section starting on page 282.

The Feedback page has not been customized yet

Feedback is emailed to an address specified by the NEMO site administrator. Use the [customizations page](#) to enter an email address, then all users will be able to send feedback.

Figure 320 Send feedback not configured

12.1 Web address

The send feedback page is accessible at site-address/feedback/. For example, www.nemo.com/feedback/. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

12.2 Usage

To send user feedback:

- Provide a detailed narrative in the dialog box (Figure 321).

We're continually working to improve the NanoFab experience for everyone.
Do you have an idea to make the NanoFab better? Send us your feedback!

Figure 321 Feedback dialog box

- Click the send feedback button (Figure 322).

Send feedback

Figure 322 Feedback send button

- The dialog is checked for size. If the dialog is empty, the user is prompted to add information (Figure 323).

Figure 323 Feedback empty dialog prompt

- If the dialog is too long, it is truncated without warning.
- Feedback is sent to the configured feedback email address using the configured email template.

12.3 Mobile device send feedback page

There are no mobile device views for the send feedback page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

12.4 Send feedback page customizations

12.4.1 Feedback email address and email template

Safety email address and email template are detailed in the [Customization](#) section starting on page 282.

12.4.2 Feedback message length

The maximum length of the feedback message is 5000 characters and can be changed in the constants.py file.

13 Contact staff

The contact staff page can be used to provide information to help users get in touch with staff members (Figure 324). Contact information can be grouped into categories and the displayed in any order. Contacts are managed in the [Detailed administration → Contact information](#) section described on page 399.

13.1 Fields

Each contact can have the following information. Any optional fields that are left blank will not be displayed.

- Picture (optional) – pictures are automatically resized to 266 pixels high by 200 pixels wide and can be any common picture format such as png, tiff, jpg, etc.
- Name (required) – contact first and last name
- Email (optional) – any valid email address. The email address is displayed as a link to send email.
- Office phone (optional) – any valid phone number. The phone number is displayed as a link to make a call on a mobile device.
- Mobile phone (optional) – any valid phone number. The phone number is displayed as a link to make a call on a mobile device. In addition, a link to send a text message from a mobile device can be enabled.
- Office location (required) – description to find the contact, limited to 200 characters.

There are no mobile device views for the contact staff page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

13.4 Contact staff page customizations

There are no contact staff page customizations

14 View usage

The view usage page allows a user to review all records for a selectable period (Figure 325). When the page is first opened, it displays any records for the current month.

Usage and billing information between August 1st, 2020 and August 31st, 2020

This page presents a monthly report of your NanoFab usage and billing information. Approved adjustments are reflected in the billing information data but not in the usage data.

Select month

or from to

Adjustment activities **are not included** in the usage information.

There was no usage between August 1st, 2020 and August 31st, 2020.

Figure 325 View usage and billing

14.1 Select date range

The date range may be selected from either the select month dropdown (Figure 326) or entered in the from and to dialogs. Clicking the from or to dialog will open a calendar view to select the dates (Figure 327).

Figure 326 Usage month dropdown

Figure 327 Usage date selection

Click update to search for records in the selected date range (Figure 328).

Figure 328 Usage date update

14.2 Usage select project (for Principal Investigators only)

Principal Investigators can select a project they managed in the dropdown (Figure 329). Upon clicking update, all the activities for that project will be displayed, regardless of the user being billed. This allows PIs to check their project's users activities for example.

Figure 329 View usage select project

14.3 Usage

The usage tab will display usage data for the selected period (Figure 330). Clicking 'Usage' will highlight and activate the tab.

Figure 330 View usage, usage tab

If no usage records exist for a given period, it is indicated. If usage records exist, they are categorized in the following order:

- Missed reservations – the tool, date, time, and project information are provided (Figure 331).

Figure 331 View usage missed reservations

- Supplies and consumables – the supply, quantity, seller, date, time, and project are provided (Figure 332). If the supply is related to a tool usage charge, the user will also be the seller.

Figure 337 Usage data export

14.4 Billing Information

The billing information tab will display charge data for the selected period (Figure 338). Clicking ‘Billing information’ will highlight and activate the tab.

Figure 338 View usage, billing information tab

The billing information tab can be used to display actual charges for a user through a customized interface to your institutions billing and project data. An example is shown in the views/usage.py file under the billing_dict function. It is beyond the scope of this manual to describe how to customize this feature for your institution. If the feature has not been configured a message will appear (Figure 339).

Figure 339 View usage billing information error

14.5 Web address

The view usage page is accessible at site-address/usage/ and the view billing at site-address/billing/. For example, www.nemo.com/usage/ or www.nemo.com/billing/. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

14.6 Mobile device view usage page

There are no mobile device views for the view usage page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

14.7 View usage page customizations

14.7.1 Billing information

Billing information data access must be customized for each institution. An example is shown in the views/usage.py file under the billing_dict function. It is beyond the scope of this manual to describe how to customize this feature for your institution.

15 News and events

The news and events page provides a convenient way for the lab staff to communicate with users about non-emergency topics. For example, new equipment on order, tool installation progress, future plans, etc. Each time NEMO is updated, news articles are automatically generated and describe the new features, improvements, and bug fixes implemented in the new release.

15.1 Recent news

The news and events page shows recent news articles by default (Figure 340).

The screenshot shows a 'Recent news' section with a green 'Publish new news' button in the top right. Below it is a message: 'Click a news story title to publish an update or archive it.' A note says 'Stories that were updated recently appear first.' and a link 'You can also view archived news.' A green box highlights a 'New update' status next to the article title 'New ICP etch system coming soon'. The article details its publication on May 4th, 2020, by Captain Nemo, noting the arrival of a new ICP fluorine etch system. It also mentions an update on May 4th, 2020, stating the tool has arrived and will be brought into the cleanroom next week.

Figure 340 News and events recent news

Staff can create new news articles by clicking the Publish new news button (Figure 341). The button will not be visible to non-staff users.

Publish new news

15.5 Notifications

When news and events are created or updated, the notification status is set for all users. It automatically expires after one month. If a user accesses a page with a notification within that time, there will be a notification indicating new content since their last visit. The notifications are reset upon visiting the news and events page. Notifications are detailed in [Detailed administration → Notifications](#) on page 424.

If the news and events page has a link on the landing page, a red number that represents the number of articles created or updated since the user last visited the news and events page will appear to the right of the link name (Figure 362). Setup details can be found under [Detailed administration → Landing page choices](#) on page 402.

Figure 362 Landing page news notification

The next time the news and events page is visited, any new or updated articles will have a special “new update” icon to highlight the update (Figure 363).

Figure 363 News update icon

15.6 Web address

The news and events page is accessible at site-address/news/. For example, www.nemo.com/news/. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

15.7 Mobile device news and events page

There are no mobile device views for the news and events page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

15.8 News and events customizations

A news story is published when a new NEMO release is installed with links to the release notes and the feature manual. This feature can be disabled by setting NEW_VERSION_NEWS = False in settings.py.

16 User Preferences

The user preferences page provides a dialog to enable user specific reservation notifications with meeting invites (Figure 364).

The figure shows a 'User Preferences' dialog box. The 'Reservations' section contains two checkboxes: 'Check this box to receive ICS calendar invitation when creating reservation' (unchecked) and 'Check this box to receive ICS calendar invitation when cancelling a reservation' (unchecked). The 'Buddy System' section contains three checked checkboxes: 'Check this box to see notification badges for new buddy requests', 'Check this box to see notification badges when users reply to buddy requests you replied to', and 'Check this box to receive an email notification when users reply to buddy requests you replied to'. A blue 'Update' button is located at the bottom left of the dialog.

- Selections will be updated in the database as discussed in [Detailed administration → User preferences](#) on page 500.
- Email templates must be created for User reservation created email and User reservation cancelled email for this feature to work. Details are provided in the [Customization → User reservation email](#) sections starting on page 337.

16.2 Web address

The user preferences page is accessible at site-address/user_preferences/. For example, www.nemo.com/user_preferences/. The page is accessible from the navigation bar by clicking the  link or in mobile view selecting preferences.

16.3 Mobile device user preferences page

There are no mobile device views for the safety page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

16.4 User preferences page customizations

16.4.1 Email templates

Email templates must be created for the User reservation created email and the User reservation cancelled email for this feature to work. Details are provided in the [Customization →User reservation email](#) sections starting on page 337.

17 Administration menu (staff only)

The administration menu provides the interfaces to manage accounts, projects, users, tools, areas, training, and maintenance as well as customize NEMO setups and access the NEMO database (Figure 372). Only staff have access to the administration menu and pages. Some administration pages also require super-user privilege.

Figure 372 Administration menu

18 Abuse (staff only)

The abuse page can take various inputs to score users on their missed reservations and last-minute cancellations (Figure 373).

Reservation abuse

This page ranks users that abuse reservation privileges. Abuse is defined as cancelling, moving, or extending a reservation shortly before the reservation would have started. A point penalty is calculated per abuse. Point penalties increase the shorter the notice of a reservation change. (That is, cancelling a reservation right before it would have started will incur a high amount of points, while cancelling it 6 hours before would incur fewer points).

The weight & details of what constitutes abuse can be configured (though reasonable defaults have been chosen).

Cancellation horizon	6	hours
Cancellation penalty	Up to	points
Evaluate for the	Entire NanoFab	▼
Starting	04/01/2020	Ending 04/29/2020
Generate report		

Figure 373 Reservation abuse page

18.1 Web address

The abuse page is accessible at site-address/abuse/. For example, www.nemo.com/abuse/. The page is also accessible from the navigation bar by clicking Administration then clicking Abuse.

18.2 Mobile device abuse page

There are no mobile device views for the abuse page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

18.3 Abuse page customizations

There are no customizations for the abuse page.

19 Accounts and projects (staff only)

The accounts and projects page provides the interface to administer accounts, projects, and user permissions on projects.

An account is at the top of the hierarchy. This is where you send the bill. An account can have many projects.

Projects are used to identify different efforts by the same account. This is what department or group is charging the account. Each project can have many users.

A user can be active on any number of projects under any number of accounts.

Many accounts will have one project with one or more users, but NEMO has the flexibility to accommodate any mode of operation.

Upon entering the page, there are buttons to add accounts, add projects, search for accounts or projects, and a list of all accounts and projects (Figure 374). The accounts and projects

Accounts and projects

Start Date: 06/03/2020

Figure 381 Accounts and projects project view

19.2 Account and project status

Accounts and projects can be either active or inactive and their status is indicated by an icon. Changing an account to inactive will cause all of its associated projects to inherit the inactive state regardless of individual project statuses. Although a project will inherit its account inactive status, the individual project statuses are not changed. Projects that are inactive, either directly or inherited from account, cannot be selected on any lab use activity.

Clicking the icon will toggle the status.

Active

Account or project is active

Inactive

Account or project is inactive

On the list view, account or project status can be toggled by clicking on the green icon to deactivate, or the red icon to reactive an account/project.

Any change in account or project status is recorded in the activity histories table of the database detailed in the [Detailed administration → Activity histories](#) section on page 361.

19.3 Manage users on a project

Users can be added and removed to any project regardless of associated accounts through the Accounts and project page or the [Users](#) page which is detailed on page 270.

To manage users on a project:

- Search for a project or select one from the list view using the details icon (🔍)
- Click the (↗) on a project listing to expand the project dialog and include qualified users (Figure 382).

Figure 382 Accounts and projects expanded dialog

- To add a user, click in the search dialog box (Figure 383).

Figure 383 Accounts and projects search for user

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking the name on the list (Figure 384).

Figure 384 Accounts and projects add user

- The selected user is added immediately without confirmation and the list of users displayed is updated.
- Click the (✖) to remove a user from a project. The removal is immediate without confirmation and the list of users displayed is updated.
- Adding or removing a user on a project is recorded in the membership history table of the database detailed in the [Detailed administration → Membership histories](#) section on page 418.
- Clicking the (▼) will collapse the project dialog.

19.4 Create an account

To create an account:

- Click the new account button on the accounts and projects page (Figure 385).

A green rectangular button with the text "New account" in white.

Figure 385 Accounts and projects new account button

- The new account dialog will open (Figure 386).

A modal dialog box titled "New account". It contains fields for "Name" (with placeholder "Name"), "Type" (with placeholder "-----" and a dropdown arrow), "Start date" (with placeholder "Choose a date"), and a checked checkbox for "Active". At the bottom are two buttons: a green "Create new account" button and an orange "Abandon account creation" button.

Figure 386 Accounts and projects new account dialog

- Enter the account name in the dialog box (Figure 387).

A simple dialog box with a "Name" label and a text input field containing the placeholder "Name".

Figure 387 Accounts and projects new account name dialog box

- If account types are defined, you have the option to select the type (Figure 388).

A dialog box with a "Type" label and a dropdown menu containing the placeholder "-----".

Figure 388 Accounts and projects new account type selector

- Enter the start date of the account (optional) (Figure 389).

A dialog box with a "Start date" label and a dropdown menu containing the placeholder "Choose a date".

Figure 389 Accounts and projects new account start date

- The active checkbox is checked by default. It can be unchecked for inactive status (Figure 390).

Figure 390 Accounts and projects new account active checkbox

- Click the create new account button (Figure 391).

Figure 391 Accounts and projects new account create button

- The new account is recorded in the accounts table of the database detailed in the [Detailed administration → Accounts](#) section on page 357.
- The page will return to the accounts and projects page with the new account selected (Figure 392).

Figure 392 Accounts and projects new account finished

- If a duplicate account name is entered, an error will appear (Figure 393).

Figure 393 Accounts and projects new account error

- To cancel without saving, click the cancel button instead of the create new account button (Figure 394).

Figure 394 Accounts and projects new account cancel button

19.5 Create a project

To create a project:

- Click the new project button on the accounts and projects page (Figure 395).

New project

Figure 395 Accounts and projects new project button

- The new project dialog will open (Figure 396).

The New project dialog box contains the following fields:

- Name: A text input field.
- Account: A text input field.
- Application identifier: A text input field.
- Start date: A text input field with a placeholder "Choose a date".
- A checkbox labeled "Active" is checked.
- Two buttons at the bottom: "Create new project" (green) and "Abandon project creation" (orange).

Figure 396 Accounts and projects new project dialog

- Enter the project name in the name dialog box (Figure 397).

The Name dialog box contains a single text input field labeled "Name".

Figure 397 Accounts and projects new project name

- Enter the account name in the account dialog box (Figure 398).

The Account dialog box contains a single text input field labeled "Account".

Figure 398 Accounts and projects new project account search

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking the name on the list (Figure 399).

The Account list dialog box shows a list of names. The first item, "Cleanroom Staff", is highlighted with a blue selection bar. The input field above the list also has "c" typed into it.

Figure 399 Accounts and projects new project account list

- Enter the application identifier in the application dialog box (Figure 400).

The dialog box has a title bar with the text 'Application identifier'. Below it is a single text input field.

Figure 400 Accounts and projects new project application identifier

- Enter the start date of the project (optional) (Figure 401).

The dialog box contains two buttons side-by-side: 'Start date' on the left and 'Choose a date' on the right.

Figure 401 Accounts and projects new project start date

- The active checkbox is checked by default. It can be unchecked for inactive status (Figure 402).

The dialog box contains a single checkbox labeled 'Active' which is checked.

Figure 402 Accounts and projects new project active checkbox

- Click the create new project button (Figure 403).

Create new project

Figure 403 Accounts and projects new project create button

- The new project is recorded in the projects table of the database detailed in the [Detailed administration → Projects](#) section on page 424.
- The page will redirect to the project details page (Figure 404).

The dialog box displays the following information:
New test project Active
 Account: [New test account](#)
 Identifier: Proj.2021.03
 Users:
 Search for a user to add
 This project does not have any members.
 Principal Investigators:
 Search for a PI to add
 This project does not have any principal investigators.

- To cancel without saving, click the cancel button instead of the create new account button (Figure 406).

Abandon project creation

Figure 406 Accounts and projects new project cancel button

19.6 Web address

The accounts and projects page is accessible at site-address/accounts_and_projects/. For example, www.nemo.com/accounts_and_projects/. The page is also accessible from the navigation bar by clicking Administration then clicking Accounts and projects.

19.7 Mobile device accounts and projects page

There are no mobile device views for the accounts and projects page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

19.8 Accounts and projects page customizations

There are no customizations for the accounts and projects page.

20 Alerts (staff only)

The alerts page creates notifications to all users and can have a scheduled start date and time as well as a scheduled end date and time. Any existing alerts are displayed at the bottom of the page and can be edited or deleted. (Figure 407). Existing alerts display the title, details, start date/time and end date/time.

The screenshot shows the 'Alerts' page. At the top, a heading says 'You can create and edit alerts that will be visible to everyone. The alert will only be visible after the debut time and will be deleted after the expiration time.' Below this is a 'Create a new alert' section. It includes fields for 'Title' (with an input field containing a single character), 'Type' (a dropdown menu showing 'Select an alert type'), 'Contents' (an empty text area), 'Debut time' (set to '05/04/2020 9:28 PM'), and 'Expiration time' (an empty field). A green 'Create alert' button is at the bottom. In the bottom right corner of the page, there is a red box containing an alert message: 'Sputter tool annual PM next week' with edit and delete icons, followed by the text 'The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users.', 'Debuts on Monday, April 13th, 2020 @ 1:52 PM', and 'This alert will never expire'.

Figure 407 Alerts page

20.1 Create an alert

To create an alert:

- Enter an alert title (Figure 408). The title is displayed in bold at the top of the alert message.

A screenshot of a 'Title' dialog box. It has a label 'Title' above an input field, which is currently empty.

Figure 408 Alerts title dialog box

- Select an alert type (Figure 409). The alert type will only display if alert types have been defined in the alert categories table of the database detailed in the [Detailed administration → Alert categories](#) section on page 363. Categorizing alerts can be useful for binning alerts aiding in future analysis and trending.

Figure 409 Alerts type dropdown

- Provide details to share with users (Figure 410).

Figure 410 Alerts details dialog box

- Select a start date and time (Figure 411). The default is now.

Figure 411 Alerts start date and time

- Select an end date and time (Figure 412). To prevent alert expiration, leave this blank.

Figure 412 Alerts end date and time

- Clicking in the start or end date/time area will bring up the calendar/clock selection dialog (Figure 413). Click to the appropriate date and time. The date/time dialog will update as you click.

Figure 413 Alerts calendar/clock dialog

- Click the create alert button (Figure 414).

Figure 414 Alerts create button

- Upon creation, the alert will be saved in the database and is detailed in the [Detailed administration → Alerts](#) section on page 365.
- The new alert will be displayed at the bottom of the alerts page and on the [landing page](#) described on page 30.

20.2 Delete an alert

An alert can be deleted by clicking the (X) icon in the alert of interest at the bottom of the alerts page (Figure 415). The deletion is immediate without confirmation. The alert is still saved in the database but marked as deleted and will no longer be displayed.

Figure 415 Alerts existing alert dialog

20.3 Edit an alert

To edit an alert:

- Click the (pencil) icon in the alert dialog of interest.
- The alert edit page will open (Figure 416).

Alerts

You can create and edit alerts that will be visible to everyone. The alert will only be visible after the debut time and will be deleted after the expiration time.

Edit this alert

Figure 417 Alerts edit abandon changes button

- To save the update click the save changes button (Figure 418).

Save changes

Figure 418 Alerts edit save changes button

20.4 Web address

The alerts page is accessible at site-address/alerts/. For example, www.nemo.com/alerts/. The page is also accessible from the navigation bar by clicking Administration then clicking Alerts.

20.5 Mobile device alerts page

There are no mobile device views for the alerts page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

20.6 Alerts page customizations

20.6.1 Alert categories

The alert type will only display if alert types have been defined in the alert categories table of the database detailed in the [Detailed administration → Alert categories](#) section on page 363.

21 API (admin only)

This topic is discussed in more details in the [API access](#) section on page 511.

22 Area Access (staff only)

The area access page can be used to manually create an area access record and view area access (Figure 419).

The screenshot shows a page titled "Area access". It contains the text: "You can manually create an area access record under extraordinary circumstances." Below this, it says "View area access records for:" followed by a list: "Today", "Yesterday", and "Or, enter a custom date range". There are two input fields labeled "start" and "end", and a button labeled "View access records".

Figure 419 Area access page

22.1 Create an access record

An area access record can be manually created due to a door access hardware or network failure. However, the preferred method to bypass area access requirements is to enable users to log themselves in and out of areas from the [landing page](#) which is setup in [Customizations → Application settings](#) section described on page 287.

To create an area access record:

- Click the manually create an access record link (Figure 420).

You can manually create an area access record under extraordinary circumstances.

Figure 420 Area access new record link

- The new area access record page will open (Figure 421).

The screenshot shows a page titled "New area access record". It contains the text: "Only use this form under extraordinary circumstances (such as when tablet login is not working). This form is not intended to be used regularly." Below this is a search bar with the placeholder text "Search for a customer".

Figure 421 Area access new record page

- Enter the user name in the dialog box (Figure 422).

Search for a customer

Figure 422 Area access new record search dialog

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking the name on the list (Figure 423).

Figure 423 Area access new record search list

- If the user has multiple projects, select which project to bill time against (Figure 424).

Figure 424 Area access new record multiple projects

- If the user has only one project, it will be selected automatically (Figure 425).

Area access will be billed to the customer's only project, "Project 1"

Figure 425 Area access new record one project

- If the user has access to multiple areas, select which area to log the user into (Figure 426).

Staff Cleanroom (staff) has access to the following areas. Which would you like to bill for access?
 Cleanroom anytime
 CMP Anytime

Figure 426 Area access new record multiple areas

- If the user has access to only one area, it will be selected by default (Figure 427).

The customer only has access to the cleanroom anytime. Access will be billed for that area.

Figure 427 Area access new record single area

- Click the create area access record (Figure 428).

Figure 428 Area access new record create button

- The area access policy will be checked to determine if the user may access the selected area. If there is a failure, the user will be prompted with the problem (Figure 429).
 - The user must be active
 - The user must be associated with an active project
 - The user must have access to the area
 - The user must have current unexpired physical access to the lab
 - The user must not be currently logged into an area
 - The user must have a physical access level that permits access at the login time
 - The area must not be shut down as a resource
 - The area must not be over its occupancy limit
 - If the area requires a reservation, the user must have a reservation that encompasses the area access start time.

Oops! Something went wrong. The new area access record was not created because:
Ned Land (ned) is already billing area access to another area. The user must log out of that area before entering another.

Figure 429 Area access new record error dialog

- Upon success, a new area access record will be created in the area access table of the database and a success message will be displayed (Figure 430).

Ned Land (ned) is now logged in to the cleanroom.

Figure 430 Area access new record success message

22.2 View access records

Area access records can be viewed for any custom date range however, two shortcuts for today and yesterday are provided (Figure 431).

View area access records for:

- Today
- Yesterday
- Or, enter a custom date range

Figure 431 Area access view access records

To view area access records:

- Set a date range.
 - Click the 'Today' quick link to populate the start and end date with the current date (Figure 432). The view will automatically update with any records.

Figure 432 Area access view record today link

- Click the 'Yesterday' quick link to populate the start and end date with the previous days date (Figure 433). The view will automatically update with any records.

Figure 433 Area access view record yesterday link

- Manually enter a start and end date (Figure 434).

Figure 434 Area access view record manual date range

- Click in the start and end date dialog boxes directly to bring up the calendar dialog and navigate to the desired start and end date (Figure 435).

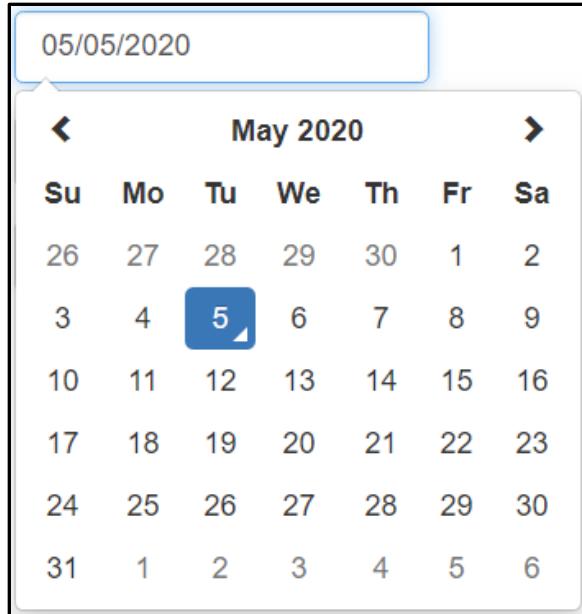

Figure 435 Area access view record calendar dialog

- Click view access records button (Figure 436).

View access records

Figure 436 Area access view record button

- The page will update with access records from the selected date range (Figure 437). Fields returned are the record identifier, user name, project, start date/time and end date/time. If a user is currently logged into an area, the end will be indicated as "In progress".

Identifier	User	Project	Start	End
54	Ned Land (ned)	Project 2	Tuesday, May 5th, 2020 @ 12:18 PM	In progress
53	Ned Land (ned)	Project 2	Tuesday, May 5th, 2020 @ 12:17 PM	Tuesday, May 5th, 2020 @ 12:17 PM
52	Captain Nemo (captain)	Cleanroom Eng	Tuesday, May 5th, 2020 @ 12:10 PM	Tuesday, May 5th, 2020 @ 12:10 PM

Figure 437 Area access view record data

22.3 Web address

The area access page is accessible at site-address/area_access/. For example, www.nemo.com/area_access/. The page is also accessible from the navigation bar by clicking Administration then clicking Area access.

22.4 Mobile device area access page

There are no mobile device views for the area access page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

22.5 Area access page customizations

There are no customizations for the area access page.

23 Configuration agenda (staff only)

The configuration agenda is an organizational tool for staff to view all required configurations for each configurable tool on the same page and allows the configuration steps to be accomplished without navigating to other pages (Figure 438). Two views are available, the default current day and a near future that shows the next business day. Each tool requiring configuration is displayed and if the current day is a Friday, the near future view will show Saturday, Sunday, and Monday.

Tools that require staff to configure a tool for a user or when the type of usage needs to be tracked can have configurations created. Configurations are created in the configurations table of the database discussed in the [Detailed administration → Configurations](#) section starting on page 388. A history of configurations can be found in the configuration history table of the database discussed in the [Detailed administration → Configuration histories](#) section starting on page 386.

Configuration agenda for today

Below is a list of reservations which require tool configurations. The reservations are grouped by tool and ordered by start time. Reservations that have a red background were created on short notice, thus there is no guarantee the tool will be configured properly when the user arrives. Reservations that have already started or have no configuration information are excluded. You can also [view reservations in the near future](#) that will require configuration changes.

Evaporator	
Staff Cleanroom (staff) Tuesday, May 5th, 2020 @ 7:00 PM Tuesday, May 5th, 2020 @ 8:00 PM Pocket 1 Source needs to be set to Ti. Pocket 2 Source needs to be set to Au.	Pocket 1 Source: <input type="text" value="Ti"/> Pocket 2 Source: <input type="text" value="Ti"/> <input type="button" value="Enable the tool for myself"/>
Sputter	
Conseil Aronnax (conseil) Project 2 Tuesday, May 5th, 2020 @ 7:00 PM Tuesday, May 5th, 2020 @ 8:00 PM Gun 1 Target needs to be set to Ti. Gun 2 Target needs to be set to Au. <input type="button" value="Enable the tool on behalf of Conseil"/>	Gun 1 Target: <input type="text" value="User provided target"/> Gun 2 Target: <input type="text" value="Au"/> <input type="button" value="Enable the tool for myself"/>
Ned Land (ned) Project 1 Tuesday, May 5th, 2020 @ 9:00 PM Tuesday, May 5th, 2020 @ 10:00 PM Gun 1 Target needs to be set to Cr. Gun 2 Target needs to be set to Au. <input type="button" value="Enable the tool on behalf of Ned"/>	

Figure 438 Configuration agenda page with today view

23.1 Usage

All configurations required in a day are displayed for each tool in order of nearest to latest. This allows planning without the need to closely monitor the reservation calendar of each tool that requires configuration. To switch to the near future view, click the link in the dialog at the top of the page (Figure 439).

You can also [view reservations in the near future](#) that will require configuration changes.

Figure 439 Configuration agenda future view link

From the near future view, you can switch to the today view by clicking the link in the dialog at the top of the page (Figure 440 Configuration agenda today view link).

You can also view reservations for today that will require configuration changes.

Figure 440 Configuration agenda today view link

Each tool displays the reservations on the left and the current tool configuration on the right. The tool name heading is a link to that tools calendar page.

Configurations can only be changed while the tool is idle. The configurations will be listed with a drop down and a tool enable button will be provided to facilitate quick access (Figure 441). Select the new configuration as needed from the drop downs. Updates are automatic and immediate.

Figure 441 Configuration agenda idle tool

If a tool is enabled, the configuration will be locked, and a disable tool button will be displayed (Figure 442). The tool must be disabled to change the configuration however caution should be used to not impair a tool that may be currently running a process.

Figure 442 Configuration agenda tool in use

In some cases, it might be desirable to charge users for tool configuration changes. The user reservation dialog provides a short cut button to enable the tool on behalf of a user while the configuration is in progress (Figure 443).

Figure 443 Configuration agenda user reservation info

23.2 Web address

The configuration agenda page is accessible at site-address/configuration_agenda/. For example, www.nemo.com/configuration_agenda/. The page is accessible from the navigation bar by clicking Administration then clicking Configuration agenda.

23.3 Mobile device configuration agenda page

There are no mobile device views for the configuration agenda page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

23.4 Configuration agenda page customizations

There are no customizations for the configuration agenda page.

24 Email (staff only)

The email page provides staff with an interface to send emails to users. The user groups available are all users qualified on a tool, all users working on a project, or all users working under an account (Figure 444).

The figure shows a screenshot of the 'Email broadcast' interface. At the top, the title 'Email broadcast' is displayed in a large, bold, dark font. Below the title, a sub-instruction reads 'Compose an email to all users who...'. A bulleted list follows, with each item in blue text: 'have an account in NEMO', 'are qualified for a tool', 'have access to an area', 'are working on a project', and 'bill to an account'.

Figure 444 Email page

24.1 Usage

The email broadcast process starts with selecting the group of users to email, making some recipient selections, adding email content, then sending as detailed in the sections below.

24.1.1 Group selection

Click one of the user group links (Figure 445).

The figure shows a list of five user group selection options, each in blue text, enclosed in a rectangular border: 'have an account in NEMO', 'are qualified for a tool', 'have access to an area', 'are working on a project', and 'bill to an account'.

Figure 445 Email groups

A search dialog will open below the group list. Enter the tool, area, project, or account depending on the link selected (Figure 446).

The figure shows a search dialog box with a single input field containing the placeholder text 'Which tool?'. The dialog has a light gray background and a thin black border.

Figure 446 Email selection

Results are returned as characters are typed and the item of interest can be selected at any time by clicking on the list (Figure 447).

Figure 447 Email selection list

Upon selecting the item of interest, the compose email page will be opened (Figure 448).

24.1.5 Send Email

Clicking the send button will send the message to all recipients selected (Figure 461).

Figure 461 Email send button

Upon successful completion, a message will be displayed (Figure 462). Click the continue button to return to the landing page.

Figure 462 Email send success

24.2 Web address

The configuration agenda page is accessible at site-address/email_broadcast/. For example, www.nemo.com/email_broadcast/. The page is accessible from the navigation bar by clicking Administration then clicking Email.

24.3 Mobile device email page

There are no mobile device views for the email page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

24.4 Email page customizations

24.4.1 Generic email template

Emails require a generic email template that is used to format messages. The email template is configured in the [Customization → Generic email](#) page detailed starting on page 315.

25 Maintenance (staff only)

The maintenance page provides staff with a list of all pending and recently closed tasks on a single page which is useful for determining priorities across the lab. When first opening the page, it defaults to the pending tasks tab.

25.1 Pending tasks

The pending tasks tab displays urgency, severity, tool name, problem category, the last update, date created, and description for each pending task (Figure 463). The listing is ordered by urgency then by date created, oldest first. The list can be sorted by any heading except description by clicking the heading name.

Maintenance						
			Pending	Closed		
Urgency	Severity	Tool	Category	Last updated	Created	Description
High	🔥	Ellipsometer			2 weeks, 5 days ago	Measurements incorrect.
High	🔥	Microscope		1 week, 2 days ago by Captain	2 weeks, 5 days ago	Smoke coming from lamp housing when on.
High	🔥	Contact Aligner	Tool Error		1 week, 2 days ago	it doesnt work
High	🔥	Spinner	Process problem		53 seconds ago	Wafers are flying off the spinner.
Normal	🔧	PECVD	Wafer handling problem	1 week, 2 days ago by Captain	2 weeks, 5 days ago	Wafers floating on platen.
Normal	🔧	Evaporator			2 weeks, 2 days ago	test problem
Normal	🔧	Fluorine Etch	Tool Error		a minute ago	The tool errors with temperature alarms when idle

Figure 463 Maintenance pending tasks

Clicking on the row of any pending task will display the task details on the right side of the screen (Figure 464). The task details view provides important links and information about the current task to streamline access for updates.

High	🔥	Sputter	Process problem	Thursday, April 23rd, 2020 @ 3:51 PM	Monday, April 27th, 2020 @ 10:30 AM	Cant get the RF to strike, looks like bad vacuum
Normal	🔧	Sputter	Wafer handling problem	Friday, April 24th, 2020 @ 4:59 PM	Monday, April 27th, 2020 @ 10:30 AM	Stuck in vacuum transfer

Figure 496 Maintenance closed tasks

Clicking on the row of any closed task will display the task details on the right side of the screen (Figure 497).

PECVD task

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:30 PM (2 weeks, 5 days ago).

Urgency: normal

Problem category: wafer handling problem

Problem description

Wafers floating on platen.

images:

- [2020-04-27_pecvd_01.png](#)

Progress

On Monday, April 20th, 2020 @ 8:53 PM Captain Nemo (captain) updated this task:

Tested pump down curve. Need new soft pump valve, on order will arrive 5/6/2020.

On Monday, April 27th, 2020 @ 2:13 PM, Captain Nemo (captain) set the status of this task to "Triage".

Resolved by Captain Nemo (captain) on Wednesday, May 6th, 2020 @ 9:39 PM

Resolution category: repairs complete

Parts arrived and were installed. System tested and operating normally.

Figure 497 Maintenance closed task details

All details and updates are listed including the initial task information, problem description, progress updates, and resolution information. Any images associated with the task are linked and can be open by clicking the links.

25.3 Web address

The maintenance page is accessible at site-address/maintenance/. For example, www.nemo.com/maintenance/. The page is accessible from the navigation bar by clicking Administration then clicking Maintenance.

25.4 Mobile device maintenance page

There are no mobile device views for the maintenance page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

25.5 Maintenance page customizations

25.5.1 Number of closed tasks to return

The number of closed tasks returned is set in the maintenance.py file, maintenance function, closed_tasks = statement. Change [:20] to the number of closed tasks to return.

26 Qualifications (staff only)

The qualifications page provides a convenient interface for performing batch qualification or disqualification for one or more users on one or more tools (Figure 498).

Batch qualifications

Use this form to qualify one or more users on one or more tools. You may select as many users or tools as you like. User and tool names are automatically searched for when you type in the text boxes below. All of the selected users will be qualified or disqualified for all of the selected tools. You can remove a selected user or tool by clicking on the representative button.

Qualify users Disqualify users

Search for user Search for tool

Figure 498 Qualifications page

26.1 Tool qualifications

Users can be qualified on tools through several interfaces within NEMO. Each has its particular value.

- [Tool control page](#) discussed on page 112 – users may be qualified or disqualified one at a time on the tool displayed. If the selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- [Qualifications page](#) discussed on page 233 – many users may be qualified or disqualified on many tools at the same time. If a selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- [Training page](#) discussed on page 266 – many users may be qualified on many tools at the same time. In addition, training type and time will be recorded. If a selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- [Users page](#) discussed on page 270 – the selected user may be qualified or disqualified on one tool at a time. The users physical access level is not updated.
- [Tool table in the database](#) discussed on page 466 – many users may be qualified or disqualified on a single tool. The users physical access level is not updated.

26.2 Usage

26.2.1 Select users

- Select one or more users by typing the first users name in the search for user dialog (Figure 499).

Figure 499 Qualifications user search dialog

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking on the list (Figure 500).

Figure 500 Qualifications user search dialog return list

- After clicking the user will be listed below the search dialog (Figure 501).

Figure 501 Qualifications user search name added

- If a user is selected by mistake, click the users name below the search dialog to remove them from the list (Figure 502).

Figure 502 Qualifications user search name button

- Repeat for each user to be qualified or disqualified.

26.2.2 Select tools

- Select one or more tools by typing the tool name in the search for tool dialog (Figure 503).

Figure 503 Qualifications tool search dialog

- Results are returned as characters are typed and the tool of interest can be selected at any time by clicking on the list (Figure 504).

Figure 504 Qualifications tool search return list

- After clicking the tool will be listed below the search dialog (Figure 505).

Figure 505 Qualifications tool search tool added

- If a tool is selected by mistake, click the tool name below the search dialog to remove it from the list (Figure 506).

Figure 506 Qualifications tool search name button

- Repeat for each tool to be qualified or disqualified.

26.2.3 Qualify or disqualify users

- Qualify users – click the qualify users button to qualify the selected users on the selected tools (Figure 507). If a tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated. Granting access levels for tools is discussed in the [Detailed administration → Tools](#) section on page 466.

Qualify users

Figure 507 Qualifications qualify button

- Disqualify users – click the disqualify users button to disqualify the selected users on the selected tools (Figure 508).

Disqualify users

Figure 508 Qualifications disqualify button

- Change status – upon selection of either qualify or disqualify, the selected updates will be made. A success message will be shown (Figure 509). Click the continue button to

return to the NEMO home page. Note: to be successful, at least one user and one tool must be selected. If not, the user will be prompted to correct the problem.

Figure 509 Qualifications success message

26.3 Web address

The qualifications page is accessible at site-address/qualifications/. For example, www.nemo.com/qualifications/. The page is accessible from the navigation bar by clicking Administration then clicking Qualifications.

26.4 Mobile device qualifications page

There are no mobile device views for the qualifications page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

26.5 Qualifications page customizations

There are no customizations for the configuration agenda page.

27 Remote work (staff only)

The remote work page allows staff to review and validate any work performed by staff on behalf of a user (Figure 510). Work can be reviewed for any staff member or all staff members and the month/year is selectable. Staff can validate work performed to confirm charges before billing.

Remote work

This page displays remote work done by NanoFab staff on behalf of users. You can filter by which staff member performed the work, and when, by using the dropdown boxes below. Each charge can be validated, which means that you have confirmed that the charge is legitimate and correct, and no adjustment needs to be made to it. Press the green 'Validate' button on an individual row to validate a charge. Charges that have already been validated are highlighted in green. Do not validate a charge if part or all of it is incorrect. Instead, visit the user office so an adjustment can be entered into the billing system. Furthermore, please visit the user office if there is a charge that you forgot to enter.

27.2 Web address

The remote work page is accessible at site-address/remote_work/. For example, www.nemo.com/remote_work/. The page is accessible from the navigation bar by clicking Administration then clicking Remote work.

27.3 Mobile device remote work page

There are no mobile device views for the remote work page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

27.4 Remote work page customizations

There are no customizations for the remote work page.

28 Resources (staff only)

The resources page lists all resources, grouped by category. Resources in green are currently available while resources in red are unavailable (Figure 521).

The screenshot shows a web-based interface for managing resources. At the top, a large heading 'Resources' is displayed. Below it, a descriptive text block explains the purpose of the page: 'Below is a list of resources, grouped by category. Resources in green are currently available while resources in red are unavailable. Click on a resource to modify its availability, status message or to schedule an outage. When a resource is unavailable, users are blocked from using tools or login to areas that fully depend on that resource.' Under this text, there is a section titled 'Gases' which contains a list of resources. The resources listed are: 2% SiH4 (green), Ar (green), CF4 (green), CHF3 (green), Cl2 (green), N2 (green), N2O (green), NH4 (green), and O2 - Gas bottle change (red). The red color of 'O2 - Gas bottle change' indicates that it is currently unavailable.

Figure 521 Resources page

28.1 Resource discussion

Resources provide a method to define tool dependencies such as gases, facility spaces, and utilities that can be associated with tools are either required or non-required resources. When a resource is unavailable, users are blocked from using tools or areas that require the resource and notified on tools that with a non-required association.

Example 1, if ‘oxygen’ is defined as a resource and shutdown, all tools that have ‘oxygen’ as a required dependency will also be shutdown. All tools that have ‘oxygen’ as a non-required dependency will be noted. This can be useful for gas bottle changes.

Example 2, if ‘cleanroom’ is defined as a resource and all tools require ‘cleanroom’ then shutting down the ‘cleanroom’ resource will shut down every tool. This can be useful for weather closures or lab wide closures.

Example 3, if ‘cleanroom’ is defined as a resource and the area ‘lab’ requires the ‘cleanroom’ resource, then shutting down the ‘cleanroom’ resource will prevent users logging in to the area ‘lab’. If the area also has physical access defined, the doors for the area will not open for non-staff.

Resources can optionally be grouped by category to visually organize common resources. Resource categories are defined in the [Detailed administration → Resource categories](#) section discussed on page (444).

Resources are defined in the [Detailed administration → Resources](#) section discussed on page (446). Areas are associated with resources here.

Tools may optionally have required resources and/or non-required resources assigned. Tools are defined in the [Detailed administration → Tools](#) section discussed on page (466).

28.2 Resource Detail

To access the details of a resource, click the resource name (Figure 522).

Figure 522 Resources example of resource name

The resource details page will open and list tools and areas that fully or partially depend on the resource (Figure 523). In addition, there are buttons to modify resource availability and to schedule resource outages.

N2 (Gases)

This resource is available.

Tools that fully depend on N2

- Acid Hood
- CMP tool
- Chlorine Etch
- Contact Aligner
- Develop Hood
- Evaporator
- Fluorine Etch
- PECVD

28.2.1 Modify a resource

Resource status and status messages can be managed through the modify resource dialogs. A resource can be shut down and details provided to users, and a resource can be brought back to available. Information about impacted tools and areas is also provided.

28.2.1.1 Shut down an available resource

- From the resource page, click the resource name (Figure 527).

Figure 527 Resources item name

- Click the modify availability button (Figure 528).

A blue rounded rectangle button with the text "Modify availability" in white.

Figure 528 Resources modify availability button

- The modify a resource dialog will open (Figure 529).

Modify N2 resource

N2 is currently **available**. Enter a status message to mark the resource as unavailable.

When a resource is unavailable:

- The status message will be displayed on the landing page and tool control page of each affected tool
- Tools that fully depend on this resource will be **unavailable to users**
- Areas that depend on this resource will be **unavailable to users**
- Tools that partially depend on this resource will be available to users, however it is the user's responsibility to determine if their fabrication process will succeed without the resource available

Why is the resource unavailable?

Warning: the following tools fully depend on this resource and are in use. You must disable the tools individually to block **current** use. It is recommended that you disable these tools before making the resource unavailable.

- Chlorine Etch

Modify resource

Nevermind

Figure 529 Resources modify resource dialog shutdown

- Provide a reason the resource will be unavailable (Figure 530).

Why is the resource unavailable?

Figure 530 Resources shutdown reason

- If any tools that require the resource are currently in use, a warning will be displayed (Figure 531).

Warning: the following tools fully depend on this resource and are in use. You must disable the tools individually to block **current** use. It is recommended that you disable these tools before making the resource unavailable.

- Evaporator

Figure 531 Resources shutdown tool in use warning

- Click the modify button to shut down the resource or, click the never mind button to return to the resource page (Figure 532).

Modify resource **Nevermind**

Figure 532 Resource shutdown buttons

- Return to the resources page, if the resource was shutdown, it will now be red with the outage reason listed (Figure 533).

N2 - Nitrogen gas bottle change underway, should be completed today.

Figure 533 Resource shutdown listing

- The outage will be listed in the alerts and outages section of the landing page (Figure 534).

Resource outage: N2
Nitrogen gas bottle change underway, should be completed today.

Figure 534 Resource shutdown landing page message

- The outage will be listed in the tool control summary tab of each impacted tool
 - Required resource outage will cause the tool to be shut down (Figure 535).

 **This tool is shut down.**
A required resource is unavailable: N2 (Gases) Nitrogen gas bottle change underway, should be completed today.

Figure 535 Resource shutdown tool shutdown message

- Non-required resource outage will list a warning (Figure 536).

 **This tool is operational but not all resources are available.**
An optional resource is unavailable: N2 (Gases) Nitrogen gas bottle change underway, should be completed today.

Figure 536 Resource outage tool problem message

28.2.1.2 Enable a previously shutdown resource

- Click the red resource name (Figure 537). Note: only the red text is a link.

N2 - Nitrogen gas bottle change underway, should be completed today.

Figure 537 Resource example of red shutdown resource listing

- Click the modify availability button (Figure 538).

Modify availability

Figure 538 Resources modify availability button

- The modify a resource dialog will open (Figure 539).

Modify O2 resource

O2 is currently **unavailable**. What would you like to do?

- Make the resource available
- Change the status message for the resource outage

Modify resource

Nevermind

Figure 539 Resources modify resource dialog enable

- Select make available or change message radio button (Figure 540). The make resource available button is checked by default.

N2 is currently **unavailable**. What would you like to do?

- Make the resource available
- Change the status message for the resource outage

Figure 540 Resources enable selection

- If change message selected, update dialog box (Figure 541).

What would you like the new status message to say?
Nitrogen gas bottle change underway, should be completed today.

Figure 541 Resources update status message dialog box

- Click modify button to finish or click never mind to return to the resource page (Figure 542).

Figure 542 Resource enable buttons

- Return to the resources page, if the resource was enabled, it will now be green (Figure 543).

Figure 543 Resource enabled listing

- All alerts and tool restrictions are removed.

28.2.2 Scheduled resource outages

Resource outages can be scheduled when the start and end time is known. Examples include gas bottle changes or facility maintenance that will happen in a predictable manner. Outages automatically start and end. Once the end time is past, the outage will be hidden. A history of scheduled outages is maintained in the [scheduled outages table](#) of the database as discussed on page 453.

28.2.2.1 Create a scheduled resource outage

- From the resource page, select the resource of interest (Figure 544).

Figure 544 Resource item name link

- Click the Schedule outage button on the resource detail page (Figure 545).

Figure 545 Resource scheduled outage button

- The scheduled resource outage dialog page will open (Figure 546).

Schedule N2 outage

You can schedule a resource outage to occur for a specific time window. This prevents users from using affected tools and areas, **but will not kick users off if they're already logged in to an area or using a tool**. It is the staff's responsibility to ensure that all tools and areas that use the resource are properly shutdown.

When a resource is unavailable:

- The status message will be displayed on the landing page and tool control page of each affected tool
- Tools that fully depend on the resource will be **unavailable to users**
- Areas that depend on the resource will be **unavailable to users**
- Tools that partially depend on the resource will be available to users, however it is the user's responsibility to determine if their fabrication process will succeed without the resource available

The screenshot shows a dialog box titled 'Create a new N2 outage'. At the top, there is a note: 'Outage category - is there a category for this outage? This is useful for data and trend analysis'. Below this is a dropdown menu. The next section is labeled 'Details' with a text area asking 'What is the reason for the outage? What other details will be relevant for users to know?'. Below this are two input fields for 'Start time' and 'End time'. At the bottom is a green 'Create outage' button.

Figure 546 Resource scheduled outage page

- Select the optional outage category if scheduled outage categories have been defined (Figure 547). If scheduled outage categories have not been defined, this dialog will not appear. Scheduled outage categories are defined in the [Detailed administration → Scheduled outage categories](#) section discussed on page (446).

Figure 547 Resource scheduled outage category dropdown

- Provide details about the outage (Figure 548).

The screenshot shows a text area labeled 'Details' with the placeholder text 'What is the reason for the outage? What other details will be relevant for users to know?'.

Figure 548 Resource scheduled outage details

- Select a start time and end time (Figure 549). Clicking in the start time or end time dialog will open the clock/calendar dialog (Figure 550). The date and time will update automatically as the clock/calendar is clicked.

Start time	End time

Figure 549 Resource start and end dialog

Figure 550 Resource clock/calendar dialog

- Click the create outage button (Figure 551).

Create outage

Figure 551 Resource scheduled outage button

- Scheduled outages are saved in the scheduled outage table of the database which is described in the [Detailed administration → Scheduled outages](#) section on page (453).
- The details of the scheduled outage will be displayed at the top of the resource detail page (Figure 552).

N2 (Gases)

This resource is available.

- Acid Hood
- CMP tool
- Chlorine Etch - in use by  Captain Nemo (captain)
- Contact Aligner

Figure 552 Resource detail page scheduled outage details

28.2.2.2 Delete a scheduled resource outage

A scheduled resource outage can be deleted by clicking the () icon in the outage of interest at the top of the resource detail page (Figure 553). The deletion is immediate without confirmation. The outage is still saved in the database but marked as deleted and will no longer be displayed.

O2 scheduled outage

Outage category: Preventative maintenance

Starts on Monday, May 18th, 2020 @ 8:00 AM

Ends on Monday, May 18th, 2020 @ 12:00 PM

Gas bottle change

Figure 553 Resource existing scheduled outage dialog

28.2.2.3 Edit a scheduled resource outage

To edit a scheduled outage:

- Click the () icon in the alert dialog of interest at the top of the resource detail page.
- The scheduled outage page will populate the details of the selected outage (Figure 554).

The screenshot displays a web-based form titled "Edit this outage". The "Resource" field contains "O2". The "Outage category" dropdown is set to "Preventative maintenance". The "Details" input field contains "Gas bottle change". The "Start time" is "05/18/2020 8:00 AM" and the "End time" is "05/18/2020 12:00 PM". At the bottom are two buttons: an orange "Abandon changes" button and a green "Save changes" button.

Figure 554 Resource edit existing scheduled outage

- Edit any fields that need updating. The process is identical to creating a scheduled outage above.
- To cancel click the abandon changes button (Figure 555).

Abandon changes

Figure 555 Resource scheduled outage edit abandon changes button

- To save the update click the save changes button (Figure 556).

Save changes

Figure 556 Resource scheduled outage edit save changes button

28.3 Web address

The resources page is accessible at site-address/resources/. For example, www.nemo.com/resources/. The page is accessible from the navigation bar by clicking Administration then clicking Resources.

28.4 Mobile device resources page

There are no mobile device views for the resources page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

28.5 Resources page customizations

There are no customizations for the resources page.

29 Staff charges (staff only)

The staff charges page provides an interface to manage work performed by staff on behalf of users. The page can take several forms depending on what a staff member is currently doing on behalf of a user.

29.1 Usage

- If a staff member is not performing any work on behalf of a user, a dialog will be displayed to select a user (Figure 557).

The screenshot shows a web page titled "Staff charges". A descriptive text block says: "Use this form to charge a user for staff time and area access time when you are working on a project on their behalf. You may only work on one user project at a time for a customer." Below this is a "Customer" label and a search input field with placeholder text "Search for a customer".

Figure 557 Staff charge page, staff not currently working on behalf of user

- Enter a user name in the search dialog (Figure 558).

The screenshot shows a search dialog with a "Customer" label and a search input field containing the placeholder text "Search for a customer".

Figure 558 Staff charge user search dialog

- A list of users is returned as characters are typed (Figure 559). The user can be selected from the return list at any time by clicking the name.

The screenshot shows a dropdown menu with a "Customer" label. It contains a single character "C" in a search input field. Below it is a list of user suggestions: "Conseil Aronnax (conseil)", "Staff Cleanroom (staff)", and "Tech Cleanroom (tech)".

Figure 559 Staff charge user search return list

- If the user has only one project, it will be listed and automatically selected (Figure 560).

Staff charges

Customer: Conseil Aronnax (conseil)

Staff time will be billed to the customer's only project, "Project 1"

Begin billing staff time

Figure 560 Staff charge user with one project

- If the user has multiple projects, a list of projects will be returned to select from (Figure 561). Click one of the available projects to select it (Figure 562).

Staff charges

Customer: Ned Land (ned)

Which of the customer's projects would you like to bill?

- Project 1
- Project 2

Begin billing staff time

Figure 561 Staff charge user with multiple projects

Which of the customer's projects would you like to bill?

- Project 1
- Project 2

Figure 562 Staff charge user project selection

- Click the begin billing button to start charging staff time (Figure 563). The user, project, and start time will be recorded in the staff charges table of the database which is discussed in the [Detailed administration → Staff charges](#) section on page 456.

Begin billing staff time

Figure 563 Staff charge begin billing button

- The navigation bar will display the charging staff time indicator in red (Figure 564).

Charging staff time

Figure 564 Staff charge navigation bar indicator

- Hovering over the charging staff time indicator will provide user and project details (Figure 565).

Charging staff time

You are charging staff time to Ned Land (ned) for the project named Project 1 since Wednesday, May 13th, 2020 @ 4:43 PM.

Figure 565 Staff charge navigation bar indicator details

- The staff member is now working on a project on behalf of a user. The staff charges page will provide dialog to stop working on the project and, if areas have been defined, provide a dialog to also begin charges for area access. In addition, if the staff member is logged into a tool on behalf of a user, it will be listed as well (Figure 566).

Staff charges

You are charging staff time to Ned Land (ned) for the project named Cleanroom Eng since Sunday, January 30th, 2022 @ 12:22 AM.

Charge note: Save

Here is a summary of the current charges:

Type	Start	End
Dicing saw usage	Sunday, January 30th, 2022 @ 12:22 AM	
Start time charge	Sunday, January 30th, 2022 @ 12:22 AM	

I have finished working on this project

I have entered a billable area on behalf of this user:

- Campus
- Cleanroom

Begin billing for area access

Figure 566 Staff charge page, staff working on project, not billing area access

- To add a charge note, simply click on the text area and enter the note (Figure 567), then click on the save button (Figure 568).

Charge note:

Figure 567 Staff charge note text area

Save

Figure 568 Staff charge text area save button

- To stop working on a project, click the finished working button (Figure 569). This will write the end time to the staff charges table of the database, turn off the charging staff time indicator, and return to the initial customer search dialog.

I have finished working on this project

Figure 569 Staff charge finished working button

- To begin billing for area access, click the area to work in (Figure 570) then click the area access button (Figure 571). The area, user, project, and start time will be recorded in the area access records table of the database which is discussed in the [Detailed administration → Area access records](#) section on page 368.

I have entered a billable area on behalf of this user:

- CMP lab
- Cleanroom

Begin billing for area access

Figure 571 Staff charge area access button

- The staff member is now working on a project on behalf of a user and charging area access time. The staff charges page will provide a dialog to stop working in the area (Figure 572).

Staff charges

You are charging staff time to Ned Land (ned) for the project named Cleanroom Eng since Sunday, January 30th, 2022 @ 12:22 AM.

Charge note: Save

Here is a summary of the current charges:

Type	Start	End
Cleanroom access	Sunday, January 30th, 2022 @ 12:26 AM	
Dicing saw usage	Sunday, January 30th, 2022 @ 12:22 AM	
Start time charge	Sunday, January 30th, 2022 @ 12:22 AM	

I am no longer in the Cleanroom on behalf of this user

Figure 572 Staff charge page, staff working on project and billing area access

- To stop charging area access, click the no longer in area button (Figure 573). This will write the end time to the area access records table of the database and return to the staff member is now working on a project on behalf of a user dialog.

I am no longer in the cleanroom on behalf of this user

Figure 573 Staff charge no longer in area button

- The dialog will return to the staff charge dialog however will include the area access billed (Figure 574). At this time another area can be entered, or staff charges can be ended.

Staff charges

You are charging staff time to Ned Land (ned) for the project named Cleanroom Eng since Sunday, January 30th, 2022 @ 12:22 AM.

Charge note: Save

Here is a summary of the current charges:

Type	Start	End
Cleanroom access	Sunday, January 30th, 2022 @ 12:26 AM	Sunday, January 30th, 2022 @ 12:27 AM
Dicing saw usage	Sunday, January 30th, 2022 @ 12:22 AM	
Start time charge	Sunday, January 30th, 2022 @ 12:22 AM	

I have finished working on this project

I have entered a billable area on behalf of this user:

- Campus
- Cleanroom

Begin billing for area access

Figure 574 Staff charge with area usage summary

29.2 Web address

The staff charge page is accessible at site-address/staff_charges/. For example, www.nemo.com/staff_charges/. The page is accessible from the navigation bar by clicking Administration then clicking Staff charges.

29.3 Mobile device staff charges page

There are no mobile device views for the staff charges page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

29.4 Staff charges page customizations

29.4.1 Staff charge reminders

Email reminders that staff charges are underway can be sent periodically and require an email template that is used to format messages. The email template is configured in the [Customization → Staff charge reminder email](#) page detailed starting on page 331. In addition, a timed service app must be properly configured and running which is described in [NEMO timed services](#) on page 549.

30 Project billing (staff only)

The project billing page provides staff with an interface to search for usage by account, application, or project (Figure 575).

If the billing service is not set or unavailable, this page will redirect to the [project usage page](#).

This screenshot shows the 'Usage and billing information' page for May 2020. It includes a dropdown for 'Select month' (May, 2020), date range inputs ('or from 05/01/2020 to 05/31/2020'), a search field ('For Search for an account, application or project'), and an 'Update' button.

Figure 575 Project billing page

30.1 Usage

The project billing page offers an additional search dialog to display all records for an account, application, or project (Figure 576).

This screenshot shows a search dialog with a label 'For' and a search input field containing 'Search for an account, application or project'.

Figure 576 Project billing search dialog

A list of items is returned as characters are typed (Figure 577). The item of interest can be selected from the return list at any time by clicking the name.

This screenshot shows a search return list for the query 'acc'. It lists several accounts with their names and the word 'account' repeated below each name. The list includes: Account 1, account; Account 2, account; Account 3, account; and New test account, account.

Figure 577 Project billing search dialog return list

The rest of the project billing page usage and return information is identical to the [view usage page](#) detailed on page 172.

30.2 Web address

The project billing page is accessible at site-address/project_billing/. For example, www.nemo.com/project_billing/. The page is accessible from the navigation bar by clicking Administration then clicking Project billing.

30.3 Mobile device project billing page

There are no mobile device views for the project billing page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

30.4 Project billing page customizations

There are no customizations for the project billing page.

31 Supplies (staff only)

The supplies page provides staff with an interface to record distribution of consumable items and supplies to users (Figure 578). Supplies are setup in the consumables table of the database detailed in the [Detailed administration → Consumables](#) section on page 396. The consumables table facilitates tracking of quantities in stock and can trigger a notification if the stock is low.

The screenshot shows a web-based application titled "Withdraw consumables". A sub-instruction at the top says "Use this form to charge users for consumable items & supplies." Below this, there are two input fields: "Customer" with a placeholder "Search for a customer" and "Project" with a dropdown menu. Under "Consumables", there are two entries: "2 inch wafer tray" and "Tweezers (Cost \$5.00)". Each entry has a small green circular icon with a plus sign next to it.

Figure 578 Supply page

31.1 Usage

To withdraw a consumable item or supply:

- Enter a user name in the customer dialog (Figure 579).

A screenshot of a search interface. It has a "Customer" label and a "Search for a customer" input field.

Figure 579 Supply customer dialog

- A list of users is returned as characters are typed (Figure 580). The user can be selected from the return list at any time by clicking the name.

A screenshot showing a dropdown list of user names. The text "cd" is typed into the search bar, and the result "Conseil Aronnax (conseil)" is displayed below it.

Figure 580 Supply customer dialog return list

- If the wrong name is selected, clicking the selected users name will reset the form.

- If the selected user does not have an active project, an error is displayed and the withdraw will not be allowed (Figure 581).

Figure 581 Supply no active project

- If the selected user has one project, it is automatically selected (Figure 582).

Figure 582 Supply single project

- If the selected user has multiple projects, click the dropdown and choose a project to bill (Figure 583).

Figure 583 Supply multiple projects

- Click on the consumable item or the + icon (+) in the list to bring up the quantity popup (Figure 584).

Figure 584 Supply select consumable

- The consumable item list can be organized by categories which are described in the [Detailed administration → Consumable categories](#) section on page 392.
- The cost of each consumable can be optionally listed by uploading rate information as discussed in the [Customizations → Tool rates](#) section on page 343.
- Enter an integer quantity in the quantity dialog (Figure 585).

Figure 585 Supply quantity

- Click the “Add to order” button or simply press <Enter> (Figure 586)

Figure 586 Supply add to order

- The item is added to the “current order” on the right side of the screen (Figure 587)

Withdraw consumables

Use this form to charge users for consumable items & supplies.

Customer	Captain Nemo (captain)		
Project	Cleanroom Eng		
Consumables			
2 inch wafer tray (Cost \$15.00) +			
Tweezers (Cost \$5.00) +			
Current order:			
Customer	Project	Consumable	Quantity
Captain Nemo (captain)	Cleanroom Eng	Tweezers	3

Clear **Confirm**

Figure 587 Supply current order

- You can keep adding more items to the current order, for the same or for a different customer (Figure 588)

Current order:

Customer	Project	Consumable	Quantity
Captain Nemo (captain)	Cleanroom Eng	Tweezers	3
Captain Nemo (captain)	Cleanroom Eng	2 inch wafer tray	10
Ned Land (ned)	Cleanroom Eng	Tweezers	2

Clear

Confirm

Figure 588 Supply multiple items order

- You can click the clear button (Figure 589) to clear the current order.

Clear

Figure 589 Supply clear button

- Click the confirm button (Figure 590).

Confirm

Figure 590 Supply confirm button

- If the withdraw was successful
 - The transaction is recorded in the consumable withdraws table of the database described in the [Detailed administration → Consumable withdraws](#) section on page 394.
 - The total quantity in stock is updated in the consumables table of the database.
 - A success message is displayed at the top of the page (Figure 591).

The withdrawal of 2 of Tweezers for Ned Land (ned) was successfully logged and will be billed to project Cleanroom Eng. X

Figure 591 Supply success message

- If the withdraw was not successful
 - A failure reason is provided at the top of the page (Figure 592).

Oops! Something went wrong. Please correct the errors highlighted below.

Figure 592 Supply fail message

- Any missing information is highlighted next to the dialog box (Figure 593).

This field is required.

Figure 593 Supply missing information

- If a non-integer is entered for the quantity, it is noted at the quantity dialog (Figure 594).

Figure 594 Supply integer error

- Correct any errors and try again.

31.2 Web address

The supplies page is accessible at site-address/consumables/. For example, www.nemo.com/consumables/. The page is accessible from the navigation bar by clicking Administration then clicking Supplies.

31.3 Mobile device supplies page

There are no mobile device views for the supplies page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

31.4 Supplies page customizations

31.4.1 Supply rates

Supply rates can be displayed next to each supply in the consumable list and are discussed in the [Customizations → Tool rates](#) section on page 343.

32 Training (staff and tool superusers only)

The training page provides staff and tool superusers with an interface to record user training and qualify users (Figure 595).

The screenshot shows a web-based training interface titled "Training". The page includes instructions: "Use this form to charge users for training sessions.", "You can add participants to a training session by clicking the 'Add another participant' link. Remove a participant or blank row by clicking the circled X on that row.", and "When a user has successfully completed a training session you have the option to check the "Qualify" box, which qualifies the user for that tool." Below these instructions is a table with columns: Trainee, Tool, Project, Duration (in minutes), Training type, and Qualify. A single row is visible, showing fields for Trainee, Tool, Project, Duration, and Training type, with a checked checkbox in the Qualify column. Below the table is a link "Add another participant". At the bottom left is a button labeled "Record training sessions".

Figure 595 Training page

32.1 Usage

To record user training:

- Enter the user name in the trainee dialog box (Figure 596).

The screenshot shows a "Trainee" dialog box with a single input field. The field is currently empty.

Figure 596 Training trainee dialog

- A list of users is returned as characters are typed (Figure 597). The user can be selected from the return list at any time by clicking the user name.

The screenshot shows a "Trainee" dialog box with an input field containing the letters "ned". Below the input field is a dropdown menu listing "ned" and "Ned Land (ned)".

Figure 597 Training trainee dialog return list

- If the incorrect user is selected, click the users name in the trainee dialog box to clear the entry and retry.
- Enter the tool in the tool dialog box (Figure 598).

Figure 598 Training tool dialog

- A list of tools is returned as characters are typed (Figure 599). The tool can be selected from the return list at any time by clicking the tool name. Staff can select any tool, superusers can only select the tools they are superusers for.

Figure 599 Training tool dialog return list

- If the incorrect tool is selected, click the tool name in the tool dialog box to clear the entry and retry.
- If the user has only one project, it will be selected automatically (Figure 600).

Figure 600 Training single project

- If the user has multiple projects, click the dropdown and choose a project to bill (Figure 601).

Figure 601 Training multiple projects

- Enter the training time in the duration dialog box in minutes (Figure 602).

A rectangular input field with a black border. At the top, the text "Duration (in minutes)" is centered in a bold, black font. Below the label is a single-line text input area.

Figure 602 Training duration

- Select the training type from the dropdown (Figure 603).

Figure 603 Training type

- If the user should not be qualified on the tool at this time, uncheck the qualify checkbox (Figure 604).

Figure 604 Training qualify

- More training sessions can be added by clicking the add participant link (Figure 605). Each training row is independent so multiple training sessions do not need to be related in any way.

Add another participant

Figure 605 Training add participant

- If a training session row needs to be removed, click the  next to the trainee name.
- Click the record button to complete the training (Figure 606).

Figure 606 Training record button

- If the training was recorded successfully
 - A training record will be written in the training sessions table of the database described on the [Detailed administration → Training sessions](#) page detailed on page 493.

- If the qualify box was checked, the membership histories table in the database is updated. The membership history table is described on the [Detailed administration → Membership histories](#) page detailed on page 418. If the selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- A success dialog will be displayed (Figure 607). Click continue to return to the NEMO landing page.

Figure 607 Training success message

- If the training was not recorded successfully, an error message is displayed (Figure 608). Correct any missing information and retry.

Figure 608 Training error message

32.2 Web address

The training page is accessible at site-address/training/. For example, www.nemo.com/training/. The page is accessible from the navigation bar by clicking Administration then clicking Training.

32.3 Mobile device training page

There are no mobile device views for the training page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

32.4 Training page customizations

There are no customizations for the training page.

33 Users (staff only)

The users page provides an interface to add new users and update existing users (Figure 609). Users can be associated with projects, tools, and physical access areas from this dialog. However, this feature exposes a limited number of parameters of the user table that are necessary to create users. A role beyond user must be defined in the users table of the database discussed in the [Detailed administration → Users](#) section on page 502.

The screenshot shows the 'Users' page in the NEMO application. At the top, there is a navigation bar with links for 'NEMO', 'Calendar', 'Tool control', 'Status dashboard', 'Administration', 'Welcome, Captain', and a gear icon. Below the navigation is a search bar labeled 'Search for a user'. On the right side of the header is a green 'New user' button. The main content area displays a table of users with columns for 'First Name', 'Last Name', 'Username', 'Active', 'Staff', and 'Admin'. The table contains three rows of data:

First Name	Last Name	Username	Active	Staff	Admin
Pierre	Aronnax	professor	✓		
Ned	Land	ned	✓		
Captain	Nemo	captain	✓	✓	✓

At the bottom right of the table is a dropdown menu set to '25' results per page. The footer of the page indicates 'Page 1 of 1'.

Figure 609 Users page

33.1 Create new user

To create a new user:

- Click the new user button (Figure 610).

New user

Figure 610 Users new user button

- The new user form will open (Figure 611). The items displayed on the form depend on the functionality that has been defined in NEMO.

 Cleanroom normal business hours

Create user

Figure 611 Users new user form

- Required: enter first name in dialog box (Figure 612).

First name

Figure 612 New user first name dialog box

- Required: enter last name in dialog box (Figure 613).

Last name

Figure 613 New user last name dialog box

- Required: enter user name in dialog box (Figure 614).

User name

Figure 614 New user user name dialog box

- Required: enter email address in dialog box (Figure 615).

E-mail address

Figure 615 New user email address dialog box

- Select user type from dropdown (Figure 616). User types are defined in the user types table of the database on the [Detailed administration → User types](#) page detailed on page 500.

Type

Staff

Figure 616 New user user type dialog box

- Enter a badge number that is associated with the user for accessing doors and kiosks (Figure 617). This is easily accomplished by having a badge reader on a computer where user profiles are created. Click inside of the dialog box then scan the badge.

Badge number

Figure 617 New user badge number dialog box

- Enter an access expiration date (Figure 618). This can be useful to track safety training end dates or project expiration dates and will automatically turn off the users access on the designated date. Leave blank for no expiration.

Access expiration

Figure 618 New user access expiration dialog box

- Clicking the one year from now will automatically set the date (Figure 619).

One year from now

Figure 619 New user access expiration one-year quick link

- Clicking in the date dialog box will display the calendar dialog (Figure 620).

Figure 620 New user access expiration calendar dialog

- Navigate the calendar and click the date to update the dialog box.
- Make user active or not active by checking the checkbox (Figure 621). By default, a new user is active. A user that is not active cannot access NEMO or have reservations or tool usage performed on their behalf. Any change in a user status is recorded in the activity histories table of the database detailed in the [Detailed administration → Activity histories](#) section on page 361.

Active

Figure 621 New user active checkbox

- Select training required or not required by checking the checkbox (Figure 622). By default, training is required for new users. This will display the [lab tutorial](#) described on page 34 and block user tool reservations and tool login.

Training required

Figure 622 New user training required checkbox

- If the identity service is in use, select the domain the user belongs to (Figure 623). If only one domain has been defined, it will be selected automatically (Figure 624). The identity service is discussed in the [Configuring NEMO settings → Identity service](#) section on page 549.

Figure 623 New user domain selection

Figure 624 New user single domain

- Enter projects to associate the user with (Figure 625).

Figure 625 New user project dialog box

- A list of projects is returned as characters are typed (Figure 626). The project can be selected from the return list at any time by clicking the project name. Repeat for all projects.

Figure 626 New user projects return list

- The selected project will appear under the dialog (Figure 627). Click the (X) to remove the user from the project.

Figure 627 New user project added

- Enter tools the user is qualified on (Figure 628).

Figure 628 New user tool qualification dialog box

- A list of tools is returned as characters are typed (Figure 629). The tool can be selected from the return list at any time by clicking the tool name. Repeat for all tools.

Figure 629 New user tool qualification return list

- The selected tool will appear under the dialog (Figure 630). Click the (X) to remove a tool qualification.

Figure 630 New user tool qualification added

- If NEMO will control area access permissions, a dialog for physical access levels will be displayed (Figure 631).

Figure 631 New user physical access levels

- Check the box for the access levels for the user (Figure 632). The physical access levels are a combination of physical areas and access schedules which are defined in the [Detailed administration → Physical access levels](#) table detailed on page 424. Areas may also have doors associated with them that are accessed through [entrance tablets](#) which are detailed on page 533.

Figure 632 New user NEMO controlled doors

- Doors and access periods that are controlled by an external access control system can be setup to communicate permissions through the identity service. Any physical access levels available for NEMO to set user permissions on will be listed as badge-reader controlled (Figure 633).

Figure 633 New user external access control

- Select physical access levels to assign to the user by checking the checkboxes.
- Click the create user button to save the user information (Figure 634).

Create user

Figure 634 New user create user button

- If the user was recorded successfully
 - Any externally controlled door accesses are updated through the identity service.
 - A record is written in the users table of the database creating the user.
 - Any tool qualifications selected are written to the membership table.
 - Any physical access levels granted are written to the membership table.
 - Any projects selected are written to the membership table.
- If the user was not recorded successfully
 - If required fields are left blank, a notice message will be displayed at the field (Figure 635).

Figure 635 New user blank field error

- If an invalid email address is entered, a warning message will appear at the top of the page (Figure 636) and an error message will be displayed at the email address dialog box (Figure 637).

Oops! Something went wrong. Please correct the errors highlighted below.

Figure 636 New user error message

Enter a valid email address.

Figure 637 New user bad email address message

33.2 Modify existing user

To modify an existing user:

- From the users page, enter a user name in the search dialog (Figure 638).

Figure 638 User page search dialog

- A list of users is returned as characters are typed (Figure 639). The user can be selected from the return list at any time by clicking the user name.

Figure 639 User page search return list

- You can also click on the edit icon (of the users list (Figure 640).

First Name	Last Name	Username	Active	Staff	Admin	
Pierre	Aronnax	professor	✓			

Figure 640 User list edit

- Upon selecting the user, the modify user page will be displayed (Figure 641).

The screenshot shows a 'Modify user' form with the following fields:

- First name:** Ned
- Last name:** Land
- User name:** ned
- E-mail address:** ned.land@nautilus.com
- Type:** Staff (dropdown menu)
- Badge number:** (empty field)

Figure 641 Modify user page

- Above the modify user header, there are three quick links.
 - Search for another user (Figure 642). Clicking this link returns to the main users page.

[Search for another user](#)

Figure 642 Modify user search for another user link

- View user history (Figure 643).

[View user history](#)

Figure 643 Modify user view history link

- Clicking the link opens the membership history page for this user (Figure 644).
- The membership history tracks several user actions, who took them, and when. Records are stored in the membership histories table of the database detailed in the [Detailed administration → Membership histories](#) section on page 418.
 - Activated or deactivated user
 - Joined or removed from a project
 - Joined or removed from a tool qualification
 - Joined or removed from a physical access level.

History for Ned Land (ned)

Date & time	User	Action
Thursday, April 9th, 2020 @ 2:38 PM	Captain Nemo (captain)	This user now belongs to physical access level "Cleanroom anytime".
Monday, April 13th, 2020 @ 2:43 PM	Captain Nemo (captain)	This user no longer belongs to project "Project 2".
Monday, April 13th, 2020 @ 2:43 PM	Captain Nemo (captain)	This user no longer belongs to project "Project 3".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	User deactivated.
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	This user no longer belongs to tool "PECVD".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	This user no longer belongs to physical access level "Cleanroom anytime".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	This user no longer belongs to project "Project 1".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	User activated.
Tuesday, April 14th, 2020 @ 11:01 PM	Captain Nemo (captain)	This user now belongs to physical access level "Cleanroom anytime".
Tuesday, April 14th, 2020 @ 11:03 PM	Captain Nemo (captain)	This user now belongs to project "Project 1".
Thursday, April 16th, 2020 @ 5:34 PM	Captain Nemo (captain)	This user now belongs to tool "PECVD".
Thursday, April 16th, 2020 @ 5:34 PM	Captain Nemo (captain)	This user now belongs to tool "Sputter".

Figure 644 Modify user history detail

- Safely deactivate this user (Figure 645). This is only displayed if an active user was selected. Safely deactivating a user will ensure no additional billable activity can be accumulated once the user is deactivated.

Safely deactivate this user

Figure 645 Modify user safe deactivation link

- Clicking the link checks to be sure it is safe to deactivate a user by checking for current billable tasks such as:
 - Future reservations
 - Tools currently in use
 - Currently in an access-controlled area
 - Staff charges currently in progress
- Any current activity is displayed by category (Figure 646).
- Checkboxes are selected by default to remove any current billable tasks. Uncheck them to skip removing a category of tasks.
- Clicking the deactivate user button will cancel any reservations and end any current charges for checked usage categories.

Safe deactivation for Ned Land (ned)

Upcoming reservations

There are two reservations for Ned that are upcoming or in progress.

Cancel all future reservations for Ned

Tool	Project	Start	End
Fluorine Etch	Project 1	Friday, May 22nd, 2020 @ 11:00 AM	Friday, May 22nd, 2020 @ 1:00 PM
Sputter	Project 1	Friday, May 22nd, 2020 @ 10:00 AM	Friday, May 22nd, 2020 @ 12:00 PM

Tool usage

Ned is using two tools.

Disable all tools for Ned

Tool	Project	Start

Ellipsometer	Project 1	Thursday, May 21st, 2020 @ 5:44 PM

Area access

Ned is currently in the CMP lab.

Force Ned to log out of the CMP lab

Staff charges

Captain Nemo (captain) is working on the project named "Project 1" for Ned Land (ned) since Thursday, May 21st, 2020 @ 5:44 PM.

End all staff charges

Deactivate user

Figure 646 Modify user safe deactivate page

- Modify user
 - The modify user dialog reads the information currently saved user profile including project associations, tool qualifications, and physical access levels. They can be changed under the same process detailed in the create user section above. Once changes are complete, click the save changes button at the bottom of the page (Figure 647).

Save changes

Figure 647 Modify user save button

33.3 Web address

The users page is accessible at site-address/users/. For example, www.nemo.com/users/. The page is accessible from the navigation bar by clicking Administration then clicking Users.

33.4 Mobile device configuration agenda page

There are no mobile device views for the users page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

33.5 Users page customizations

33.5.1 Identity service

The identity service requires custom programming to provide a bridge between NEMO and outside systems such as multiple LDAP servers for different types of users, and external access control systems to authorize users to access doors. It is beyond the scope of this manual to provide programming examples for bridge software, but details of the NEMO settings can be found in the [Configuring NEMO settings → Identity service](#) section on page 549.

34 Impersonate (admin only)

The impersonate feature allows an admin user to impersonate any active user (Figure 648). This feature is useful to replicate problems a user may be having accessing different features of NEMO.

This form allows you to impersonate any active user.

Search for a user to impersonate

Impersonate

Figure 648 Impersonate page

34.1 Usage

To impersonate a user:

- Enter the users name in the search dialog box (Figure 649).

Search for a user to impersonate

Figure 649 Impersonate search dialog

- A list of users is returned as characters are typed (Figure 650). The user can be selected from the return list at any time by clicking the users name.

ned

Ned Land (ned)

Figure 650 Impersonate search dialog return list

- If the incorrect user is selected, use the backspace to delete characters and names will be returned with each character deleted.
- Click the impersonate button to begin impersonating the selected user (Figure 651).

Figure 651 Training record button

- NEMO will return to the landing page and a header will appear at the top of each page indicating that you are currently impersonating another user (Figure 652). NEMO will act as if the selected user is currently logged in.

Figure 652 Impersonate page header

- Click the switch back button on the impersonate page header to return to normal operation (Figure 653).

Figure 653 Impersonate header switch back button

34.2 Web address

The impersonate page is accessible at site-address/impersonate/. For example, www.nemo.com/impersonate/. The page is accessible from the navigation bar by clicking Administration then clicking Impersonate.

34.3 Mobile device impersonate page

There are no mobile device views for the impersonate page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

34.4 Impersonate page customizations

There are no customizations for the impersonate page.

35 Projects (PIs only)

35.1 Usage

This page simply displays the projects the user is a Principal Investigator on. Project Investigators can be set in the [Projects Administration](#) page.

It will display basic information about the project as well as users on the project (Figure 654).

35.2 Web address

The projects page is accessible at site-address/projects/. For example, www.nemo.com/projects/. The page is accessible from the navigation bar by clicking Administration then clicking Projects (Figure 655).

Figure 655 Projects view address

35.3 Mobile device

There are no mobile device views for the users page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

35.4 Projects page customizations

There are no customizations for the impersonate page.

36 Customization (admin only)

The customization section can be used to tailor NEMO to the needs of a particular lab. Customizations include where NEMO will send emails, what the emails should look like, page customizations, and functional settings. HTML content creation and formatting are beyond the scope of this manual. Many resources can be found online. However, sample email templates can be found on the NEMO repository on GitHub at <https://github.com/usnistgov/NEMO/tree/master/resources/emails>

36.1 Email Addresses

NEMO has the ability to send email messages in support of a variety of features (Figure 656). The email address customization provides the capability to send different types of email messages to different people or departments in the organization.

The screenshot shows a configuration interface for email addresses. It has a title 'Email addresses' and a 'Save email addresses' button. Below the title are four entries, each consisting of a label and an email address in a box, followed by a descriptive text block:

Label	Email Address	Description
Feedback	feedback@example.org	User feedback from the Feedback page is sent to this email address.
Safety	safety@example.org	Safety suggestions and observations are sent to this email address.
Abuse	abuse@example.org	Alerts about user activities that could constitute 'abuse' are sent to this email address. Examples include missed reservations and unauthorized tool access.
User office	information@example.org	The main point of contact for users to obtain NanoFab information. Automated emails sent from NEMO are typically 'from' this address.

Figure 656 Customization email addresses

Feedback – emails generated by the send feedback page are sent to this email address. The send feedback feature is described in the [send feedback](#) section on page 166. The send feedback feature requires both the email address and email template to be configured in the customizations. The feedback email customization is described in the [feedback email](#) section below on page 312.

Safety – emails generated by the safety page are sent to this email address. The safety page is described in the safety section on page 157. Safety email notifications require both the email address and email template to be configured in the customizations. The safety email customization is described in the [safety issue email](#) section below on page 330.

Abuse – emails generated by either a missed reservation, unauthorized tool login attempt, or tutorial completion are sent to this email address. The missed reservation feature is described in the [reservation](#) section on page 62. The [tool login](#) feature is described on page 101. The

[rules tutorial](#) feature is described on page 34. Both the email address and email template must be configured in the customizations. The [missed reservation email](#) customization is described in the missed reservation email section below on page 317. The [unauthorized tool login email](#) customization is described below on page 334. The [tutorial completion email](#) customization is described below on page 318.

User office – all emails initiated by NEMO will be from this email address. For example, reservation reminders, missed reservations, and tool in use reminders. Emails initiated by a user will be from the user that initiated the email. For example, feedback emails, staff canceling a user's reservation, and safety.

36.2 Calendar settings

The calendar settings can be configured to set the default calendar view, first day of the week, default calendar start time, and to customize how dates are displayed for international support (Figure 657).

Calendar settings

Default view: Week view Month view Day view

First day of the week: Monday Sunday

Start of the day The time the day starts in the calendar view (24h format).

Outage recurrence limit days The maximum number of days a recurring scheduled outage can be set in advance.

The following settings allow to customize the date format in the different calendar views. See [FullCalendar documentation](#) for more information on the syntax.

Day column format The column date format for the day view.

Week column format The column date format for the week view.

Month column format The column date format for the month view.

Show current time indicator on the calendar

Also show areas (for reservations) that the user doesn't have access too (they will be grayed out)

Overview options: Enable all tools option Enable all areas option Enable all tools & areas option

Save settings

Figure 657 Customization calendar settings

The default view can be changed between week view, month view, or day view by checking the desired radio button (Figure 658).

Default view: Week view Month view Day view

Figure 658 Customization calendar default view

The first day of the week displayed on the week view and month view can be changed between Monday and Sunday by checking the desired radio button (Figure 659).

A dialog box with a title 'First day of the week:' followed by two radio buttons: 'Monday' (selected) and 'Sunday'.

Figure 659 Customization calendar first day of week

The number of days in advance to create recurring outages can be set by entering an integer number (Figure 660).

A dialog box with a title 'Outage recurrence limit' containing the value '90' and a unit 'days'.

Figure 660 Customization calendar recurring outage days in advance

The start time in the week view and day view can be set by entering a time in 24-hour format (Figure 661).

A dialog box with a title 'Start of the day' containing the time '07:00:00'.

Figure 661 Customization calendar start time

The date format for the day column can be customized by entering the format string in the dialog box (Figure 662). See the [Full Calendar documentation](#) for more information on the syntax.

A dialog box with a title 'Day column format' containing the format string 'dddd MM/DD/YYYY'.

Figure 662 Customization calendar day column format

The date format for the week column can be customized by entering the format string in the dialog box (Figure 663). See the [Full Calendar documentation](#) for more information on the syntax.

A dialog box with a title 'Week column format' containing the format string 'ddd M/DD'.

Figure 663 Customization calendar week column format

The date format for the month column can be customized by entering the format string in the dialog box (Figure 664). See the [Full Calendar documentation](#) for more information on the syntax.

Month column format	ddd
------------------------	-----

Figure 664 Customization calendar month column format

The calendar will highlight the current day and can optionally display a red pointer to indicate the current time on day and week calendar views. Display the red pointer to indicate the time by checking the show current time indicator checkbox (Figure 665).

<input checked="" type="checkbox"/> Show current time indicator on the calendar

Figure 665 Customization calendar time indicator

The calendar will show a user the areas they specifically have permission to enter. However, a user can be given access to see the reservations for all areas by checking the Also show areas checkbox (Figure 666).

<input checked="" type="checkbox"/> Also show areas (for reservations) that the user doesn't have access too (they will be grayed out)
--

Figure 666 Customization calendar show all areas checkbox

The calendar can show options to display reservation/usage for all tools, all areas or all tools and areas (Figure 667).

Overview options:	<input type="checkbox"/> Enable all tools option	<input type="checkbox"/> Enable all areas option	<input type="checkbox"/> Enable all tools & areas option
-------------------	--	--	--

Figure 667 Customization calendar show overview options

When changes are complete, click the save button save the new application settings (Figure 668).

Save settings

Figure 668 Customization calendar settings save button

36.3 Application settings

The application settings can be configured to allow users to manually log into and out of areas and to set the facility name, site title, and the project selection template (Figure 669). The log in and log out features are useful for labs that use NEMO for door control in the event of an outage and also for labs that do not use door control but want to track lab access. Tools can be configured to require a user to be logged into an area before they will be allowed to activate the tool. Customizing the facility name and site title can be used to tailor the application to your institution. Customizing the project selection template allows for custom project information to be displayed when users are selecting a project to associate a reservation/usage with.

Application settings

Allow users to log themselves into access controlled areas from landing page
 Allow users to log themselves out of access controlled areas from landing page
 Show access controlled area login/logout button on calendar view header (requires login and/or logout feature enabled above)

Also show areas the user doesn't have access to in status dashboard

Facility name	NanoFab	The name of the facility to use in all templates.
Site title	NEMO	The name of the site to use in all templates/headers.
Project selection template	<code>{{ project.name }}</code>	The django template used for rendering project selection when enabling tools and making reservations. The context variable <code>project</code> is provided.

Save settings

Figure 669 Customization application settings

- If the “allow users to log themselves into access controlled areas” checkbox is checked, the log in dialog is displayed (Figure 670) on the [NEMO landing page](#) as described on page 32.

Figure 670 Landing page log in dialog box

- If the “allow users to log themselves out of access controlled areas” checkbox is checked, the log out dialog is displayed (Figure 671) on the [NEMO landing page](#) as described on page 33.

Figure 671 Landing page log out dialog box

- If the “allow login/logout in the calendar view checkbox” is checked, the area login/logout button is displayed (Figure 672) on the [NEMO calendar page header](#) when an area is selected as described on page 45. This feature requires that the allow area login and/or allow area logout features above are enabled.

Figure 672 Calendar page login button

- The default facility name is “NanoFab” and will be displayed in all templates (Figure 673). To edit, click in the dialog box and enter the desired facility name.

Facility Name	NanoFab
---------------	---------

Figure 673 Customization application setting facility name

- The default site title is “NEMO” and will be displayed in all templates and headers (Figure 674). To edit, click in the dialog box and enter the desired site name.

Site Title	NEMO
------------	------

Figure 674 Customization application setting site title

- The default project selection template is “{{ project.name }}”. To edit, click in the dialog box and enter the desired message (Figure 675). The syntax follows Django templating engine. Conditions and other tags can be used.
For example, entering “{{ project.account.name }} – {{ project.name }}” will result in the account name followed by the project name to be displayed when users need to select a project to associate with a reservation, usage etc.
Note that carriage returns will be displayed to ease visual organization of information.

Project selection template	<code>{{ project.name }}</code>
----------------------------	---------------------------------

Figure 675 Customization application setting project selection template

- When changes are complete, click the save button save the new application settings (Figure 676).

Save settings

Figure 676 Customization application setting save button

36.4 Interlock settings

The Interlock settings can be configured to display a custom message when an interlock command fails. Interlocks can be used for both doors and tools, and you can customize the message for each (Figure 677).

Interlock settings

Tool interlock failure message	Communication with the interlock failed	The message to display when a tool interlock command fails.
Door interlock failure message	Communication with the interlock failed	The message to display when a door interlock command fails.

Check this box to offer users the option to bypass lock/unlock command when there is an interlock error.

Save settings

Figure 677 Interlock settings

- The default message for tool interlock failure is “Communication with the interlock failed”. To edit, click in the dialog box and enter the desired message (Figure 678). Note that carriage returns will be displayed to ease visual organization of information.

Tool interlock failure message	Communication with the interlock failed
--------------------------------	---

Figure 678 Interlock settings tool failure message

- The default message for door interlock failure is “Communication with the interlock failed”. To edit, click in the dialog box and enter the desired message (Figure 679). Note that carriage returns will be displayed to ease visual organization of information.

Door interlock failure message	Communication with the interlock failed
--------------------------------	---

Figure 679 Interlock settings door failure message

- Additionally, you can enable an option for users to bypass the interlock error by clicking the checkbox (Figure 680), meaning they can still enable/disable a tool or enter a billable area in NEMO.
In reality this means that if interlock commands fail but tools or doors can be manually enabled by staff, the user can select that option to have NEMO keep track of time as it otherwise would.

Check this box to offer users the option to bypass lock/unlock command when there is an interlock error.

Figure 680 Interlock settings bypass

36.5 User requests settings

The User requests settings include the buddy requests and access requests features. The title of each tab can be set, as well as a description message for each of the features, to provide users with instructions particular to your facility.

The [buddy board](#) is detailed starting on page 139.

The [access requests](#) feature is detailed starting on page 145.

User requests settings		
Buddy request tab title	Buddy requests board	The title for the buddy request tab of the user requests page.
Buddy board description		The description/instructions to display on the buddy board page.
Access request tab title	Access requests	The title for the access request tab of the user requests page.
Access requests description		The description/instructions to display on the access requests page.
Access requests minimum users	2 users	The minimum number of users (creator included) needed for an access request to be valid.
Access requests display maximum	requests	The maximum number of requests to display in each section (approved, denied, expired). Leave blank for all.
Weekend access notification email(s)	weekend_access@example.org	The email(s) to notify for weekend access. A comma-separated list can be used.
Weekend access notification cutoff	:	The cutoff day and hour after which an email is sent if there is no approved weekend access for the week (in 24hrs format). If left blank the "no weekend access" will NOT be sent.

36.8 Facility rules tutorial page

The customization for the facility rules tutorial page can be configured using html to display lab specific tutorial information to users and is uploaded and viewed through this dialog (Figure 711). The rules tutorial is optional however there is no default content therefore users with training required while no rules tutorial has been configured will require staff to uncheck the users training required status. More information about the rules tutorial can be found in the [landing page](#) section on page 34.

"NanoFab rules tutorial" page

The NanoFab rules tutorial is an opportunity to provide new users with a tutorial to your lab operating procedures and rules. The HTML you upload is rendered with the Django template engine. You can use JavaScript (including jQuery) within the page. Completion of the HTML form should be POSTed to the 'nanofab_rules' URL. Upon completion, the user's "training required" attribute is set to false, and they are able to make reservations and control tools.

Choose File

Upload NanoFab rules tutorial

Figure 711 Customization rules tutorial

The tutorial is triggered by a flag in a user's profile and by default is set to require training upon user creation. NEMO user profiles are discussed in the [Users](#) section described on page 270. A notification is displayed on the landing page and is the user access point for completing the tutorial which is described in the [landing page](#) section on page 34.

To create a custom rules tutorial

- Use any html editor to create the desired content
- The HTML uploaded is rendered with the Django template engine.
- JavaScript (including jQuery) can be used within the page.
- To mark the training as complete, the form must be POSTed to the 'facility_rules' URL to enable the user to make reservations and control tools.
- Example

- The html in Figure 712

```
<h1>NanoFab Rules</h1>

<form action="{% url 'facility_rules' %}" method="post">
    {% csrf_token %}

    <div id="introduction">
        <h4>Introduction</h4>
        <p>The NanoFab operates as a shared resource for both internal and external users. Please work with other users to ensure everyone is as productive as possible.</p>
        <p>Don't over reserve tools and if you no longer need a reservation, cancel it as soon as possible. Please be sure that you log in as soon as you begin using each tool and log out only after the tool is available for the next user.</p>
        <p><strong>Most important, clean up after yourself</strong></p>
        <button type="button" class="btn btn-success" onclick="$( '#introduction' ).hide(); $('#conclusion').show(); window.scrollTo(0,0); ">I understand and agree</button>
    </div>

    <div id="conclusion" style="display:none">
        <p>Ultimately, the staff want to make your NanoFab experience as productive and fun as possible. We hope these rules will make everyone's life better.<br></p>
        <button type="submit" style="white-space: normal" class="btn btn-success">Click here to officially complete your training</button>
    </div>
</form>
```

Figure 738 Customization watermark behind jumbotron

36.11 Access request notification email

The customization for the access request notification email template can be configured using html to render a specific message when a user creates or updates an access request, and when a facility manager approves or denies a request (Figure 739). Basically, any creation or updates of an access request will trigger this email to be sent. The access requests feature is described in the [access requests](#) section on page 145. The access request notification template is optional and if not defined email notifications will not be sent.

Access request notification email

This email is sent to the person who created the request when an access request is created or updated. The other users present on the request as well as the facility managers are cc'ed.

The following context variables are provided when the email is rendered:

- **template_color** - the color: green if approved, red if denied, blue otherwise
- **access_request** - the user's access request that was created or updated
- **status** - the status of the request: received, updated, approved or denied
- **access_requests_url** - the URL to the access requests page

Figure 739 Customization access request notification email

To create a custom access request email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - template_color – the color to be used in the template, green for an approved request, red for a denied request, and blue otherwise
 - access_request – the access request that was created or updated
 - status – the request status: received, updated, approved, or denied
 - access_requests_url – the access requests URL
- The email subject is “Your access request for the <area> has been <received,updated,approved,denied>”. For example, “Your access request for the Cleanroom has been received”
- The email will be from the user office email.

To upload an access request notification email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘access_request_notification_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 740).

Access request notification email

This email is sent to the person who created the request when an access request is created or updated. The other users present on the request as well as the facility managers are cc'ed.

The following context variables are provided when the email is rendered:

- **template_color** - the color: green if approved, red if denied, blue otherwise
- **access_request** - the user's access request that was created or updated
- **status** - the status of the request: received, updated, approved or denied
- **access_requests_url** - the URL to the access requests page

[access_request_notification_email.html](#)

- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.12 Cancellation email

The customization for the cancellation email template can be configured using html to render a specific message when a staff member cancels a user's reservation (Figure 741). The cancel user reservation feature is described in the [reservations](#) section on page 49. The cancellation email template is optional and if not defined cancellation emails will not be sent.

Cancellation email

This email is sent to a user when a staff member cancels the user's reservation. The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation that was cancelled
- **staff_member** - the user object of the staff member who cancelled the reservation
- **reason** - the reason the staff member provided for cancelling the reservation

Figure 741 Customization cancellation email

To create a custom cancellation email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **reservation** – the reservation object of the canceled reservation
 - **staff_member** – the user object of the staff member who canceled the reservation
 - **reason** – the reason the staff member provided for canceling the reservation
- The email subject is always, “Your reservation was canceled”.
- The email will be from the staff member that canceled the reservation

To upload a cancellation email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘cancellation_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 742).

Cancellation email

This email is sent to a user when a staff member cancels the user's reservation. The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation that was cancelled
- **staff_member** - the user object of the staff member who cancelled the reservation
- **reason** - the reason the staff member provided for cancelling the reservation

cancellation_email.html

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.13 Counter threshold reached email

The customization for the counter threshold reached template can be configured using html to render a specific message when the warning threshold value for a tool usage counter is reached (Figure 743). The counter threshold reached email template is optional and if not defined the emails will not be sent.

Counter threshold reached email

This email is sent to the counter's warning email when the value of an counter reaches the warning threshold. The following context variables are provided when the email is rendered:

- **counter** - the counter which value reached the warning threshold

Figure 743 Customization counter threshold reached email

To create a custom counter threshold reached email template

- Use any html editor to create the desired content

- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - counter – the tool usage counter which value reached the warning threshold
- The email subject is always, “Warning threshold reached for {tool.name} {counter.name} counter”.
- The email will be from the user office

To upload a counter threshold reached email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘counter_threshold_reached_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 744).

Counter threshold reached email

This email is sent to the counter's warning email when the value of an counter reaches the warning threshold. The following context variables are provided when the email is rendered:

- **counter** - the counter which value reached the warning threshold

counter_threshold_reached_email.html

- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.14 Feedback email

The customization for the feedback email template can be configured using html to render a specific message when a user fills out the feedback form (Figure 745). The send feedback feature is described in the [send feedback](#) section on page 166. The feedback feature requires both the feedback email template and feedback email address customizations or emails will not be sent. The feedback email address customization is described in the [email addresses](#) section above on page 286.

Feedback email

This email is sent when a user submits feedback. The feedback email address (at the top of this page) must also be configured for users to be able to do this. The following context variables are provided when the email is rendered:

- **contents** - the user's feedback
- **user** - the user object of the user who submitted the feedback

Figure 745 Customization feedback email

To create a custom feedback email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - contents – the user's feedback
 - user – the user object of the user who submitted feedback
- The email subject is always, “feedback from {username}”.
- The email will be from the user leaving feedback.

To upload a custom feedback email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘feedback_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 746).

Feedback email

This email is sent when a user [submits feedback](#). The feedback email address (at the top of this page) must also be configured for users to be able to do this. The following context variables are provided when the email is rendered:

- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.15 Generic email

The customization for the generic email template can be configured using html to render a specific message when a staff member fills out the email form (Figure 747). The email feature is described in the [email](#) section on page 216. The email feature requires the generic email template or emails will not be sent.

Generic email

A generic email that can be sent to qualified tool users, members of an account, or members of a project. Send these using the [email broadcast page](#). The following context variables are provided when the email is rendered:

- **title** - the user specified title of the email
- **greeting** - a greeting to the recipients of the email
- **contents** - the body of the email
- **template_color** - the color to emphasize

Figure 747 Customization generic email

To create a custom generic email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - title - the user specified title of the email
 - greeting - a greeting to the recipients of the email
 - contents - the body of the email
 - template_color - the title color to emphasize
- The email subject is the subject entered on the email feature page.
- The email will be from the user creating the email.

To upload a generic email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘generic_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 748).

Generic email

A generic email that can be sent to qualified tool users, members of an account, or members of a project. Send these using the [email broadcast page](#). The following context variables are provided when the email is rendered:

- **title** - the user specified title of the email
- **greeting** - a greeting to the recipients of the email
- **contents** - the body of the email
- **template_color** - the color to emphasize

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.16 Missed reservation email

The customization for the missed reservation email template can be configured using html to render a specific message when a user misses a reservation (Figure 749). The missed reservation feature is described in the [reservation](#) section on page 62. The missed reservation feature requires the missed reservation email template and the abuse email address described on page 286 or the email will not be sent.

Missed reservation email

This email is sent when a user misses a reservation. If a tool is not used for an amount of time after the user's reservation has begun, it is marked as missed and removed from the calendar. The following context variables are provided when the email is rendered:

- **reservation** - the reservation that the user missed

Figure 749 Customization missed reservation email

To create a custom missed reservation email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **reservation** – the reservation object of the missed reservation
- The email subject is always “Missed reservation for the {reservation.tool}.”
- The email will be from the user office email defined in the email addresses section above on page 286.
- The email will be addressed to the user that missed the reservation, the abuse email address, and the user office email address.

To upload a missed reservation email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘missed_reservation_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 750).

Missed reservation email

This email is sent when a user misses a reservation. If a tool is not used for an amount of time after the user's reservation has begun, it is marked as missed and removed from the calendar. The following context variables are provided when the email is rendered:

- **reservation** - the reservation that the user missed

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.17 Facility rules tutorial email

The customization for the Facility rules tutorial email template can be configured using html to render a specific message to staff when a user completes the tutorial (Figure 751). The rules tutorial feature is described in the [landing page](#) section on page 34. The rules tutorial email is optional and will only be sent if the email template is configured. The rules tutorial email requires the email template and the abuse email address described on page 286 or the email will not be sent.

NanoFab rules tutorial email

This email is sent when a user completes the NanoFab rules tutorial. It can contain a free-response answer (quiz question). If you do not upload a template then no notification email is sent to staff when a user completes the training tutorial. The following context variables are provided when the email is rendered:

- **user** - the user's model instance
- **making_reservations_rule_summary** - a free-response answer provided by the user. Normally, this is provided by the user to summarize their understanding of the NanoFab rules and procedures.

Figure 751 Customization rules tutorial email

To create a custom rules tutorial email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user object of the user who completed the tutorial
 - making_reservations_rule_summary – a free response answer that can be passed from the rules tutorial to the email.
- The email subject is always “<Facility Name> rules tutorial”.
- The email will be from the abuse email defined in the email addresses section above on page 286.
- The email will be addressed to the abuse email address.

To upload a rules tutorial email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘facility_rules_tutorial_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 752).

NanoFab rules tutorial email

This email is sent when a user completes the NanoFab rules tutorial. It can contain a free-response answer (quiz question). If you do not upload a template then no notification email is sent to staff when a user completes the training tutorial. The following context variables are provided when the email is rendered:

- **user** - the user's model instance
- **making_reservations_rule_summary** - a free-response answer provided by the user. Normally, this is provided by the user to summarize their understanding of the NanoFab rules and procedures.

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.18 New task email

The customization for the new task email template can be configured using html to render a specific message to users and staff when a task is created (Figure 753). The task feature is described in the tool control section on page 34. The new task email is optional and will only be sent if the email template is configured.

New task email

This email is sent when a new maintenance task is created for a tool. The following context variables are provided when the email is rendered:

- **user** - the user who created the task
- **task** - the task information
- **tool** - the tool that the task is associated with
- **tool_control_absolute_url** - the URL of the tool control page for the tool
- **template_color** - an HTML color code indicating the severity of the problem. Orange for warning, red for shutdown.

Figure 753 Customization new task email

To create a custom rules tutorial email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user object of the user who created the task
 - task – the task object information
 - tool – the tool object that the task is associated with
 - tool_control_absolute_url – the URL of the tool control page for the tool
 - template_color – an HTML color code indicating the severity of the problem. Orange for warning, red for shutdown.
- The email subject will identify the tool name, if the task is a safety hazard, and if the task is defined as a problem or shutdown.
- The email will be from the user reporting or updating the task
- The email will be addressed to the tool primary owner, backup owners, notification email defined in the tool table, and lab managers if defined in the settings.py file.

To upload a new task email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘new_task_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 754).

New task email

This email is sent when a new maintenance task is created for a tool. The following context variables are provided when the email is rendered:

- **user** - the user who created the task
- **task** - the task information
- **tool** - the tool that the task is associated with
- **tool_control_absolute_url** - the URL of the tool control page for the tool
- **template_color** - an HTML color code indicating the severity of the problem. Orange for warning, red for shutdown.

36.19 Out of time reservation email

The customization for the out of time reservation email template can be configured using html to render a specific message to users when a user is still logged in an area that requires reservations to access, but their reservation has expired (Figure 755). A grace period can be set when configuring the area that will delay the email.

Out of time reservation email

This email is sent when a user is still logged in an area but his reservation expired. A grace period can be set when configuring the area. The following context variables are provided when the email is rendered:

- **reservation** - the reservation that the user is out of time on

Figure 755 Customization out of time reservation email

To create a custom out of time reservation email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the `models.py` file.
 - `reservation` – the user's upcoming reservation object
- The email subject will always be "Out of time in the {area}".
- The email will be from the user office email defined in the email addresses section above on page 286.
- The email will be addressed to the user with the reservation and any users defined in the abuse email of the area table.

To upload an out of time email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed '`out_of_time_reservation_email.html`' and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 756).

Out of time reservation email

- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.20 Reorder supplies reminder email

The customization for the reorder supplies reminder email template can be configured using html to render a specific message to the supply owner when the supply stock drops below the minimum (Figure 757).

Reorder supplies reminder email

This email is sent to the item's reminder email when the quantity of an item falls below the reminder threshold and should be reordered. The following context variables are provided when the email is rendered:

- **item** - the item which quantity fell below the reminder threshold

Choose File

Upload reorder supplies reminder email

Figure 757 Customization reorder supplies reminder email

To create a custom reorder supplies reminder email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - item – the item (consumable) object which quantity fell below the reminder threshold
- The email subject will always be “Time to order more {consumable.name}”.
- The email will be from the user office email defined in the email addresses section above on page 286.
- The email will be addressed to the email set on the [Consumable table](#).

To upload a reorder supplies email reminder template:

- Click the choose file button to open the file selection dialog.

- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘reorder_supplies_reminder_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 758).

36.21 Reservation ending reminder email

The customization for the reservation ending reminder email template can be configured using html to render a specific message to users when a user is logged in an area and their reservation in that area is about to end (Figure 759). The reservation ending reminder email is optional and will only be sent if the reservation ending reminder email template is configured.

Reservation ending reminder email

This email is sent to a user that is logged in an area 30 and 15 minutes before their area reservation ends. The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation ending

Figure 759 Customization reservation ending reminder email

To create a custom reservation ending reminder email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the user's ending reservation object
- The email subject will always be "{area name} reservation ending soon".
- The email will be from the user office email defined in the email addresses section above on page 286.
- The email will be addressed to the user with the reservation.

To upload a reservation ending reminder email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed 'reservation_ending_reminder_email.html' and saved in the media folder of the NEMO website.

- The current file content will be displayed in a separate window.

36.22 Reservation reminder email

The customization for the reservation reminder email template can be configured using html to render a specific message to users when a reservation is approaching (Figure 761). The reservation reminder feature is described in the [reservation](#) section on page 49. The reservation reminder email is optional and will only be sent if both the reservation reminder email template and the reservation warning email template are configured. [The reservation warning email](#) template is described below on page 328.

Reservation reminder email

This email is sent to a user two hours before their tool reservation begins. The reservation warning email must also exist for this email to be sent. The following context variables are provided when the email is rendered:

- **reservation** - the user's upcoming reservation

Figure 761 Customization reservation reminder email

To create a custom reservation reminder email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **reservation** – the user's upcoming reservation object
- The email subject will always be "{tool name} reservation reminder".
- The email will be from the user office email defined in the email addresses section above on page 286.
- The email will be addressed to the user with the reservation.

To upload a reservation reminder email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.

- The selected file will be renamed ‘reservation_reminder_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 762).

Reservation reminder email

This email is sent to a user two hours before their tool reservation begins. The reservation warning email must also exist for this email to be sent. The following context variables are provided when the email is rendered:

- **reservation** - the user's upcoming reservation

reservation_reminder_email.html

- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.23 Reservation warning email

The customization for the reservation warning email template can be configured using html to render a specific message to users when a reservation is approaching and there is a problem with the tool they reserved (Figure 763). The reservation warning feature is described in the [reservation](#) section on page 49. The reservation warning email is optional and will only be sent if both the reservation reminder email template and the reservation warning email template are configured. The [reservation reminder email](#) template is described above on page 322.

Reservation warning email

This email is sent to a user two hours before their tool reservation begins and maintenance may interfere with the upcoming reservation. The reservation reminder email must also exist for this email to be sent. The following context variables are provided when the email is rendered:

- **reservation** - the user's upcoming reservation
- **fatal_error** - boolean value that, when true, indicates that it will be impossible for the user to use the tool during their reservation (due to tool maintenance or a missing required dependency)

Figure 763 Customization reservation warning email

To create a custom reservation warning email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **reservation** – the user's upcoming reservation object
 - **fatal_error** – when true, indicates that the tool is shutdown
- The email subject will always be "{tool name} reservation problem".
- The email will be from the user office email defined in the email addresses section above on page 286.
- The email will be addressed to the user with the reservation.

To upload a reservation warning email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed 'reservation_warning_email.html' and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 764).

- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.24 Safety issue email

The customization for the safety email template can be configured using html to render a specific message to users when a safety issue has been created (Figure 765). The safety issue feature is described in the [safety](#) section on page 157. The safety email is optional and will only be sent if both the safety email template and the safety email address are configured. The safety email address is defined in the email addresses section above on page 286.

Safety issue email

This email is sent when a new maintenance task is created for a tool. The following context variables are provided when the email is rendered:

- `issue` - the issue information
- `issue_absolute_url` - the URL for the detailed view of the issue

Figure 765 Customization safety email

To create a custom safety email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - `issue` – the issue object
 - `issue_absolute_url` – the URL to the detailed view of the issue
- The email subject will always be “Safety issue”.
- The email will be from the user reporting the safety issue unless the report is anonymous then the email will be from the safety email address defined in the email addresses section above on page 286.
- The email will be addressed to the safety email address defined in the email addresses section above on page 286.

To upload a safety email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed 'safety_issue_email.html' and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 766).

Safety issue email

This email is sent when a new maintenance task is created for a tool. The following context variables are provided when the email is rendered:

- **issue** - the issue information
- **issue_absolute_url** - the URL for the detailed view of the issue

- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.25 Staff charge reminder email

The customization for the staff charge email template can be configured using html to render a specific message to staff as a reminder they are currently charging a user (Figure 767). The staff charge feature is described in the [staff charge](#) section on page 253. The staff charge email is optional and will only be sent if the email template is configured.

Staff charge reminder email

This email is periodically sent to remind staff that they are charging a user for staff time. The following context variables are provided when the email is rendered:

- **staff_charge** - the staff charge that is in progress

Figure 767 Customization staff charge email

To create a custom staff charge email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **staff_charge** – the staff charge object
- The email subject will always be “Active staff charge since {staff_charge.start}”.
- The email will be from the user office email address defined in the email addresses section above on page 286.
- The email will be addressed to the staff member currently charging.

To upload a staff charge reminder email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘staff_charge_reminder_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 768).

- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.26 Task status notification email

The customization for the task status notification email template can be configured using html to render a specific message to staff when the status of a task is changed (Figure 769). The task status feature is described in the [tool control](#) section on page 95. The task status email is optional and will only be sent if the email template is configured.

Task status notification email

This email is sent when a tool task has been updated and set to a particular state. The following context variables are provided when the email is rendered:

- **template_color** - the color to emphasize
- **title** - a title indicating that the message is a task status notification
- **task** - the task that was updated
- **status_message** - the current status message for the task
- **notification_message** - the notification message that is configured (via the admin site) for the status
- **tool_control_absolute_url** - the URL of the tool control page for the task

Figure 769 Customization new task email

To create a custom task status email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **template_color** – an HTML color code indicating the title background color
 - **title** – a title indicating the message is a task status notification
 - **task** – the task object that was updated
 - **status_message** – the current status message for the task
 - **notification_message** – the notification message that is configured (via the admin site) for the status
 - **tool_control_absolute_url** – the URL of the tool control page for the task
- The email subject will always be “{tool.name} task notification”.
- The email will be from the user updating the task status
- The email will be addressed to the tool primary owner, backup owners, and/or notification emails defined in the tool table, if selected in the task status table.

To upload a custom task status email template:

- Click the choose file button to open the file selection dialog
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘task_status_notification.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 770).

Task status notification email

This email is sent when a tool task has been updated and set to a particular state. The following context variables are provided when the email is rendered:

- **template_color** - the color to emphasize
- **title** - a title indicating that the message is a task status notification
- **task** - the task that was updated
- **status_message** - the current status message for the task
- **notification_message** - the notification message that is configured (via the admin site) for the status
- **tool_control_absolute_url** - the URL of the tool control page for the task

task_status_notification.html

Figure 770 Customization new task email file loaded

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.27 Unauthorized tool access email

The customization for the unauthorized tool access email template can be configured using html to render a specific message to staff when a user tries to log into a tool that is in an area the user is not currently logged into (Figure 771). The unauthorized tool access feature is described in the [tool control](#) section on page 101. The unauthorized tool access email is

optional and will only be sent if the email template and the abuse email address described on page 286 is configured.

Unauthorized tool access email

This email is sent when a user tries to access a tool without being logged in to the area in which the tool resides. The following context variables are provided when the email is rendered:

- **operator** - the person who attempted to use the tool
- **tool** - the tool that the user was denied access to

Figure 771 Customization unauthorized tool access email

To create a custom unauthorized tool access email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - operator – the person who attempted to enable the tool
 - tool – the tool object of the tool the user was denied access to
- The email subject will always be “Area access requirement”.
- The email will be from the abuse email address
- The email will be addressed to the abuse email address

To upload an unauthorized tool access email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘task_status_notification.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 772).

Unauthorized tool access email

This email is sent when a user tries to access a tool without being logged in to the area in which the tool resides. The following context variables are provided when the email is rendered:

- **operator** - the person who attempted to use the tool
- **tool** - the tool that the user was denied access to

unauthorized_tool_access_email.html

Figure 772 Customization unauthorized tool access email file loaded

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.28 Usage reminder email

The customization for the usage reminder email template can be configured using html to render a specific message to users periodically when they are logged into areas or tools (Figure 773). The usage reminder feature is described in the [tool control](#) section on page 130. The usage reminder email is optional and will only be sent if the email template and the abuse email address described on page 286 is configured.

Usage reminder email

This email is periodically sent to remind a user that they have a tool enabled. The following context variables are provided when the email is rendered:

- **user** - the user who is using a tool or logged in to an area

Choose File No file chosen

Upload new task email

Figure 773 Customization usage reminder email

To create a custom usage reminder email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user object who is using a tool or logged in to an area
 - user.resources_in_use – a list of resources the user is currently using
- The email subject will always be “{facility name} usage”.
- The email will be from the user office email address
- The email will be addressed to the user

To upload a usage reminder email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘usage_reminder_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 774).

Usage reminder email

This email is periodically sent to remind a user that they have a tool enabled. The following context variables are provided when the email is rendered:

- **user** - the user who is using a tool or logged in to an area

No file chosen

Figure 774 Customization usage reminder email file loaded

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.29 User reservation created email

The customization for the user reservation created email template can be configured using html to render a specific message to users when they create a reservation that provides a calendar invite for common mail interfaces such as Outlook or Gmail as an attachment (Figure 775). The feature is described in the [user preference](#) section on page 185. The user reservation created email is optional and will only be sent if the email template and the user office email address described on page 286 are configured and the user has enabled the feature in their user preferences.

User reservation created email

This email is sent to a user when the user creates a reservation. The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation that was cancelled

Choose File

Upload created reservation email

Figure 775 Customization user reservation created email

To create a custom user reservation created email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the reservation object of the users reservation
- The email subject will always be “{facility_name} Reservation for the {tool_name}”.
- The email will be from the user office email address
- The email will be addressed to the user

To upload a user reservation created email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘reservation_created_user_email.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 776).

User reservation created email

This email is sent to a user when the user creates a reservation. The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation that was cancelled

reservation_created_user_email.html

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.30 User reservation cancelled email

The customization for the user reservation canceled email template can be configured using html to render a specific message to users when they cancel a reservation that provides a calendar invite for common mail interfaces such as Outlook or Gmail as an attachment (Figure 777). The feature is described in the [user preference](#) section on page 185. The user reservation canceled email is optional and will only be sent if the email template and the user office email address described on page 286 are configured and the user has enabled the feature in their user preferences.

User reservation cancelled email

This email is sent to a user when the user cancels his own reservation. The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation that was cancelled

Choose File

Upload cancelled reservation email

Figure 777 Customization user reservation canceled email

To create a custom user reservation cancelled email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the reservation object of the user's reservation
- The email subject will always be "{facility_name} Reservation for the {tool_name}".
- The email will be from the user office email address
- The email will be addressed to the user

To upload a user reservation cancelled email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed 'reservation_cancelled_user_email.html' and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 778).

User reservation cancelled email

This email is sent to a user when the user cancels his own reservation. The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation that was cancelled

Choose File reservation_cancelled_user_email.html

Upload cancelled reservation email

Show current content

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

36.31 Weekend access notification email

The customization for the weekend access notification email template can be configured using html to render a specific message to be sent to the weekend access emails provided in User request settings. The weekend access notification email is optional and will only be sent if the email template and the user office email address described on page 286 are configured.

Weekend access notification email

This email is sent to the [weekend access notification email\(s\)](#) as well as the facility manager(s) when:

- there is at least one approved access request that includes weekend time during the current week. (The email is sent when the first weekend access request is approved).
- there are no approved access requests that include weekend time during the current week. (the email is sent on the [cutoff day](#) at the [cutoff hour](#) provided in the user requests settings above).

The following context variables are provided when the email is rendered:

- **weekend_access** - true/false, whether there are approved weekend access requests for the current week.

[weekend_access_email.html](#)

Figure 779 Customization user reservation canceled email

To create a custom weekend access email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **weekend_access** – a Boolean (true/false) value representing whether there will be weekend access.

- The email subject will always be either “Weekend access for the {facility_name} {saturday_date} – {sunday_date}”
- The email will be from the user office email address
- The email will be addressed to the email(s) set in [User request settings](#) as well and all facility managers.

To upload a weekend access email template:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘weekend_access.html’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 778).

Weekend access notification email

This email is sent to the [weekend access notification email\(s\)](#) as well as the facility manager(s) when:

- there is at least one approved access request that includes weekend time during the current week. (The email is sent when the first weekend access request is approved).
- there are no approved access requests that include weekend time during the current week. (the email is sent on the [cutoff day](#) at the [cutoff hour](#) provided in the user requests settings above).

The following context variables are provided when the email is rendered:

- **weekend_access** - true/false, whether there are approved weekend access requests for the current week.

Choose File `weekend_access_email.html`

Upload weekend access email

Show current content

Figure 780 Customization user reservation canceled email file loaded

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.

- The current file content will be displayed in a separate window.

36.32 Tool Rates

The customization for the tool rates can be configured to display rates for tools and supplies (Figure 781). The tool rate configuration is optional, and no rate information will be displayed if not configured. More information about how the tool rates are displayed can be found in the [tool control](#) section on page 90. More information about how supply rates are displayed can be found in the [supply](#) section on page 261. NEMO comes with a default rate class defined which can be edited to suit your institution by modifying the rates.py file to create a custom rate class. NOTE: It is beyond the scope of this manual to provide details of programming changes.

Tool Rates

You can upload a json file to display tool rates. An example of a valid rates file can be found on [Github](#).

It should be a JSON array of elements, and the following key/values are supported for each element:

- **item_id** - the id of the tool or supply
- **table_id** - the type of rate, one of "inventory_rate" (for supplies), "primetime_eq_hourly_rate" (for tool), "training_individual_hourly_rate" (for individual training rate), "training_group_hourly_rate" (for group training rate)
- **rate_class** - the class, one of "full cost" or "cost shared"
- **rate** - the rate amount
- item - the name of the item (optional)

Figure 781 Configuration tool rates

To create a custom tool rate file for the default rate class

- Use any editor to create the desired json array of elements.
- The following key/values are supported for each element:
 - item_id - the id of the tool or supply that corresponds to the id value in the tool table or consumables table
 - item - the name of the item which is optional but useful to make the json file human readable.
 - table_id - the type of rate
 - "inventory_rate" (for consumables/supplies),
 - "primetime_eq_hourly_rate" (for tool),
 - "training_individual_hourly_rate" (for individual training rate),
 - "training_group_hourly_rate" (for group training rate)
 - rate_class - the class,
 - "full cost" (for tool, consumable/supply, individual and group training)
 - "cost shared" (for tool)
 - rate - the rate amount
- NOTE: only the rates defined will be displayed so every tool or supply does not need to be defined and every rate type and class do not need to be defined.

- Examples
 - Tool and training rates, full cost, cost shared tool rate and individual and group training.
 - The json code in Figure 782

```
[  
  {  
    "item_id": 4,  
    "item": "Sputter",  
    "table_id": "primetime_eq_hourly_rate",  
    "rate_class": "cost shared",  
    "rate": 50.0  
  },  
  {  
    "item_id": 4,  
    "item": "Sputter",  
    "table_id": "primetime_eq_hourly_rate",  
    "rate_class": "full cost",  
    "rate": 100.0  
  },  
  {  
    "item_id": 4,  
    "item": "Sputter",  
    "table_id": "training_individual_hourly_rate",  
    "rate_class": "full cost",  
    "rate": 150.0  
  },  
  {  
    "item_id": 4,  
    "item": "Sputter",  
    "table_id": "training_group_hourly_rate",  
    "rate_class": "full cost",  
    "rate": 75.0  
  }  
]
```

Figure 782 Configuration tool rates example 1 json

- Will provide the rate view on the tool control page in Figure 783

- Will provide the rate view on the supply page in Figure 787

Sample handling
Tweezers (Cost \$10.00)
Sample storage
2 inch wafer tray (Cost \$42.00)

Figure 787 Configuration tool rates example 3 view

To upload a custom rate json file:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed 'rates.json' and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 788).

Tool Rates

You can upload a json file to display tool rates. An example of a valid rates file can be found on [Github](#).

It should be a JSON array of elements, and the following key/values are supported for each element:

- **item_id** - the id of the tool or supply
- **table_id** - the type of rate, one of "inventory_rate" (for supplies), "primetime_eq_hourly_rate" (for tool), "training_individual_hourly_rate" (for individual training rate), "training_group_hourly_rate" (for group training rate)
- **rate_class** - the class, one of "full cost" or "cost shared"
- **rate** - the rate amount
- item - the name of the item (optional)

rates.json

Figure 788 Customization tool rates file loaded

To delete the currently loaded file:

- Click the upload watermark button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.

- The current file content will be displayed in a separate window.

37 Detailed administration (admin only)

The detailed administration page provides database table access to NEMO data where features can be configured, and usage data can be viewed (Figure 789).

The screenshot shows the NEMO administration interface. At the top, there's a dark blue header with the word 'NEMO' in yellow. Below it is a light blue navigation bar with the text 'WELCOME, CAPTAIN. [VIEW SITE](#) / [LOG OUT](#)'. Underneath is a breadcrumb trail 'Home > Nemo'. The main content area is titled 'Nemo administration' and contains a table of database tables with 'Add' and 'Change' buttons.

NEMO		
Accounts	 Add	 Change
Activity histories	 Add	 Change
Alert categories	 Add	 Change
Alerts	 Add	 Change
Area access records	 Add	 Change
Areas	 Add	 Change
Comments	 Add	 Change
Configuration histories	 Add	 Change
Configurations	 Add	 Change
Consumable categories	 Add	 Change
Consumable withdraws	 Add	 Change
Consumables	 Add	 Change

Figure 789 Detailed administration start of table list

Access to the detailed administration pages requires super-user status or special permissions. A super user can give access to non-super-users on a table-by-table basis from the users table of the database. The users table of the database discussed in the [Detailed administration → Users](#) section on page 502.

Users can return to the NEMO home page by clicking the “view site” link at the top of the page (Figure 790).

Figure 790 Detailed administration view site link

Users can log out of NEMO by clicking the “log out” link at the top of the page (Figure 791).

Figure 791 Detailed administration log out link

37.1 Common features in detailed administration

Each table can be accessed through the detailed administration page. There are several features that are common across all tables for adding and editing data. Features and details that are unique to a particular table will be discussed in the section specific to the table.

37.1.1 Adding data

Clicking the Add icon (Figure 792) on any table will open a dialog to input data that can be saved into the database.

Figure 792 Detailed administration add data icon

37.1.1.1 Common features when adding data

- The specific fields, their function, and usage will be detailed in each specific table section below. If the fields origin is data from another table in the database, the table name will be listed in italics. For example, *Accounts table*.
- Required fields are displayed in bold (Figure 793)

Name:
Parent tool:

Figure 793 Detailed administration bold and non-bold fields

- Saving records can be accomplished in three ways (Figure 794)
 - Click “save and add another” to save the current record and create another blank record.
 - Click “save and continue editing” to save the current record and stay on the current record for additional changes.
 - Click “save” to save the current record and return to the summary page for the table.

Figure 794 Detailed administration save buttons

37.1.2 Changing data

Clicking the Change icon (Figure 795) on any table will open a summary of the table rows that can be selected for editing (Figure 796). Clicking the table name will also open a summary.

Figure 795 Detailed administration change data icon

The screenshot shows a table titled "Select consumable withdraw to change". The table has columns: ID, CUSTOMER, MERCHANT, CONSUMABLE, QUANTITY, PROJECT, and DATE. There are 15 rows listed. A filter sidebar on the right allows filtering by date (All, Any date, Today, Past 7 days, This month, This year) and consumable (All, 2 inch wafer tray, Sputter gold, Tweezers).

Action:	ID	CUSTOMER	MERCHANT	CONSUMABLE	QUANTITY	PROJECT	DATE
<input type="checkbox"/>	15	Captain Nemo (captain)	Captain Nemo (captain)	Sputter gold	1	Cleanroom Eng	Wednesday, June 10th, 2020 @ 4:00 PM

Figure 796 Detailed administration example table summary

37.1.2.1 Common features when changing data

- Edit a record – to access a record for editing, the first column of the summary is a link to the data view (Figure 797). The ID field is often displayed in the summary page but is automatically assigned at record creation and is never editable.

The screenshot shows a table with columns: ID and CUSTOMER. There are four rows listed, each with a checkbox in the first column and a link to the record in the second column.

	ID	CUSTOMER
<input type="checkbox"/>	15	Captain Nemo (captain)
<input type="checkbox"/>	14	Ned Land (ned)
<input type="checkbox"/>	13	Ned Land (ned)

Figure 797 Detailed administration first column link to change data

- Click the link to open the change record view (Figure 798). The specific view will be discussed in the section for each table.

- A delete button will be displayed at the bottom of the page (Figure 802).

Figure 802 Detailed administration delete button

- Add record button – the top right side of the summary page will have a button to add new records (Figure 803).

ADD CONSUMABLE WITHDRAW +

Figure 803 Detailed administration add record button

- Search – some summary pages have a search dialog at the top of the page that can be used to quickly narrow results to records of interest (Figure 804). Enter a search term in the dialog box and click the search button. Partial names and wildcards can be used. Any matching results will be returned.

Figure 804 Detailed administration search dialog

- Filters can be used to narrow down the record list.
 - Filters may include a date range above the record list that can be clicked to filter results. A date range filter will start at a coarse range and continue to a narrower range. Anytime the date has been filtered, the first filter selection will be to unfilter to the previous filter level.
 - If there is multi-year data, the years with data will be displayed in the filter selection (Figure 805).

2013 2014 2015 2016 2017 2018 2019 2020

Figure 805 Detailed administration year filter

- Clicking a year filter will show data from that year and change the filter selection to the months with data (Figure 806).

< All dates January 2020 February 2020 March 2020

Figure 806 Detailed administration month filter

- Clicking a month filter will show data from that month and change the filter selection to the days of the month with data (Figure 807).

Figure 807 Detailed administration day filter

- Clicking a day filter will show data from the date selected (Figure 808).

Figure 808 Detailed administration date filter

- Other filters may be included on the right sidebar of the page and can change from page to page (Figure 809). However, their function is the same. Click on the filter level desired to narrow down the number of records displayed in the summary page until the records of interest are displayed.

Figure 809 Detailed administration side bar filters

- Actions can be used to execute a function on one or more records (Figure 810).

Action:	-----	▼	Go	0 of 15 selected
<input type="checkbox"/>	ID	CUSTOMER	MERCHANT	
<input type="checkbox"/>	15	Captain Nemo (captain)	Captain Nemo (captain)	
<input type="checkbox"/>	14	Ned Land (ned)	Captain Nemo (captain)	
<input type="checkbox"/>	13	Ned Land (ned)	Captain Nemo (captain)	

Figure 810 Detailed administration action menu

- Every table has a delete record action.
- To execute a function on one or more records
 - Select the records of interest by checking the checkbox on the left of the record. Checking the checkbox in the title bar will select all records (Figure 811).

<input type="checkbox"/>	ID
<input type="checkbox"/>	15
<input type="checkbox"/>	14

Figure 811 Detailed administration select records

- Select the action to execute from the drop-down list (Figure 812).

Action:	-----	Go
<input type="checkbox"/> ID	Delete selected consumable withdraws	CHANT

Figure 812 Detailed administration select action

- Click “go” (Figure 813).

Figure 813 Detailed administration action go button

- When deleting records, a list of impacts and related items will be displayed with a prompt to confirm or cancel the action (Figure 814).

Figure 814 Detailed administration delete confirmation dialog

- Click the yes button to continue or the no button to cancel (Figure 815).

Figure 815 Detailed administration delete confirmation buttons

- Sort – the summary list of records can be sorted by clicking on the column title (Figure 816).

MERCHANT	4 ▲ CONSUMABLE	3 ▼ QUANTITY	2 ▼ PROJECT	1 ▲
----------	----------------	--------------	-------------	-----

Figure 816 Detailed administration sort indicators

- An arrow next to the column title indicates sort direction. Down arrow indicates descending and up arrow indicates ascending.
- If multiple columns are clicked, then records are sorted in order of precedence with the last clicked column having the highest precedence. Lower numbers have higher precedence.
- Hovering over a sorted field heading will show an icon () to remove sorting from that column (Figure 817). Click the icon to remove sorting.

Figure 817 Detailed administration remove sorting

37.2 Account types

37.2.1 Usage

Account types are optional but can be useful for binning accounts aiding in future analysis and trending. Account types, if used, must be created in this table view and can be any text name. Any number can be defined. If no account types are defined, they are not displayed on the account page. Account types are discussed in the [account page](#) detailed on page 191.

37.2.2 Summary page

The summary page provides a listing of account types (Figure 818). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing account types. At the top, there is a breadcrumb navigation: Home > Nemo > Account types. Below the header, a message says "Select account type to change". There is a dropdown menu labeled "Action:" with a "Go" button next to it, and a status indicator "0 of 3 selected". A list of account types is displayed with checkboxes next to each name: ACCOUNT TYPE, Academia, Industry, and Internal. At the bottom of the list, it says "3 account types".

Figure 818 Account types summary page

37.2.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 819). [Common features in detailed administration](#) is detailed on page 350.

The screenshot shows a web-based application interface for adding a new account type. At the top, there is a breadcrumb navigation: Home > Nemo > Account types > Add account type. Below the header, the title "Add account type" is displayed. There is a form field labeled "Name:" followed by a text input box containing the value "Academia".

Figure 819 Account types add/edit page

- Name – the name can be up to 200 characters (required).

37.2.4 User access page

There is no user access page to create account types however, account types are discussed in the [account page](#) detailed on page 191.

37.3 Accounts

37.3.1 Usage

An account is at the top of the billing hierarchy. This is where you send the bill. An account can have many projects. Users make charges to projects which are carried to accounts. A detailed discussion of accounts can be found in the [Accounts and projects](#) section on page 191.

37.3.2 Summary page

The summary page provides a search dialog and filtering of the active field (Figure 820). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing accounts. At the top, there's a header bar with 'Home > Nemo > Accounts'. Below the header, a search bar contains the placeholder 'Select account to change' and a magnifying glass icon. To the right of the search bar is a button labeled 'ADD ACCOUNT +'. On the far right, there's a vertical sidebar titled 'FILTER' with three sections: 'By active' (with 'All' selected), 'By type' (with 'All' selected), and 'By start date' (with 'Any date' selected). The main content area displays a table with three rows of account data:

<input type="checkbox"/>	NAME	ID	ACTIVE	TYPE	START DATE
<input type="checkbox"/>	Account 2	2	<input checked="" type="checkbox"/>	Academia	-
<input type="checkbox"/>	Account 3	3	<input checked="" type="checkbox"/>	-	06/03/2020
3 accounts					

Figure 820 Accounts summary page

37.3.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 821). [Common features in detailed administration](#) is detailed on page 350.

Home > Nemo > Accounts > Add account

Add account

Name:

Type: ---- ▼ Pencil + X

Start date: Today Calendar

Active
Users may only charge to an account if it is active. Deactivate the account to block future billable activity (such as tool usage and consumable check-outs) of all the projects that belong to it.

Save and add another Save and continue editing SAVE

Figure 821 Accounts add/edit page

- Name – this is the name referred to for the account. It can be a maximum of 100 characters and must be unique (required).
- Type – this is the type for the account. Account types are discussed in [Account types](#) in page 357.
- Start date – the account start date.
- Active – this indicates if the account is available to be used. Users may only charge to an account if it is active. Deactivate the account to block future billable activity (such as tool usage, etc.) of all the projects that belong to it.

37.3.4 User access page

Accounts are created and managed on the accounts and projects page detailed in the [Accounts and projects](#) section on page 191.

37.4 Activity histories

37.4.1 Usage

The activity histories table maintains a record of changes made to the active status of users, projects, and accounts. Records are written automatically, and manual entry or editing should not be necessary.

37.4.2 Summary page

The summary page provides date filtering (Figure 822). Click the activity history field in the row of interest to edit.

The screenshot shows a table titled "Activity histories" with the following columns: ACTIVITY HISTORY, CONTENT TYPE, OBJECT ID, ACTION, DATE, and AUTHORIZER. The table lists 31 entries, mostly for users, with actions like "activated" and "deactivated". All changes were made by "Captain Nemo (captain)".

ACTIVITY HISTORY	CONTENT TYPE	OBJECT ID	ACTION	DATE	AUTHORIZER
Account 7 deactivated	account	7	Deactivated	Monday, June 22nd, 2020 @ 4:01 PM	Captain Nemo (captain)
User 15 activated	user	15	Activated	Thursday, May 21st, 2020 @ 5:55 PM	Captain Nemo (captain)
User 3 activated	user	3	Activated	Thursday, May 21st, 2020 @ 5:53 PM	Captain Nemo (captain)
User 3 deactivated	user	3	Deactivated	Thursday, May 21st, 2020 @ 5:53 PM	Captain Nemo (captain)
User 14 activated	user	14	Activated	Thursday, May 14th, 2020 @ 5:18 PM	Captain Nemo (captain)
User 5 activated	user	5	Activated	Friday, May 8th, 2020 @ 11:53 AM	Captain Nemo (captain)
User 5 deactivated	user	5	Deactivated	Wednesday, May 6th, 2020 @ 6:47 PM	Captain Nemo (captain)
User 4 activated	user	4	Activated	Tuesday, May 5th, 2020 @ 3:39 PM	Captain Nemo (captain)
User 4 deactivated	user	4	Deactivated	Tuesday, May 5th, 2020 @ 3:37 PM	Captain Nemo (captain)
Project 9 activated	project	9	Activated	Monday, May 4th, 2020 @ 8:37 PM	Captain Nemo (captain)

Figure 822 Activity histories summary page

37.4.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 823). [Common features in detailed administration](#) is detailed on page 350. In addition, the history button will show any manual changes that were made to the record.

The screenshot shows a form titled 'Change activity history' for an account. The top navigation bar includes 'Home', 'Nemo', 'Activity histories', and 'Account 7 deactivated'. A 'HISTORY' button is located in the top right corner. The form fields are as follows:

- Content type:** account (dropdown menu)
- Object id:** 7
- Action:** Deactivated (dropdown menu)

The target state (activated or deactivated).
- Date:** 06/22/2020 (text input) | Today |
- Time:** 04:01 PM (text input) | Now |
- Authorizer:** Captain Nemo (captain) (dropdown menu)

The staff member who changed the active state of the account, project, or user in question.

At the bottom are four buttons: 'Delete' (red), 'Save and add another' (blue), 'Save and continue editing' (blue), and 'SAVE' (blue).

Figure 823 Activity histories add/edit page

- Content type – a large selection is available under the dropdown however, NEMO only uses accounts, projects, and users (required).
- Object id – this field is the id number of the account, project, or user (required).
- Action – this field is either activated or deactivated (required).
- Date – date and time the action was taken (required).
- Authorizer – user that initiated the action (required). *User table*

37.4.4 User access page

Activity histories are automatically recorded through actions initiated on accounts, projects, and users. Accounts and projects are detailed in the [Accounts and projects](#) section on page 191. Users are detailed in the [users](#) section on page 270.

37.5 Alert categories

37.5.1 Usage

Alert categories are optional but can be useful for binning alerts aiding in future analysis and trending. Alert categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no alert categories are defined, they are not displayed on the alerts page. Alert categories are discussed in the [Alerts](#) section detailed on page 200.

37.5.2 Summary page

The summary page provides a listing of alert categories (Figure 824). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing alert categories. The top navigation bar includes links for Home, Nemo, and Alert categories. Below the header, a search bar contains the placeholder text "Select alert category to change". A prominent "ADD ALERT CATEGORY" button with a plus sign is located in the top right corner. Underneath the search bar, there is a form with a dropdown menu labeled "Action: -----" and a "Go" button. To the right of the "Go" button, it says "0 of 3 selected". A scrollable list displays four alert categories, each preceded by a checkbox:

- NAME
- Facility outage
- Long PM
- Site closure

At the bottom left of the list area, it says "3 Alert categories".

Figure 824 Alert category summary page

37.5.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 825). [Common features in detailed administration](#) is detailed on page 350.

The screenshot shows the "Add alert category" page. The top navigation bar includes links for Home, Nemo, Alert categories, and Add alert category. The main content area has a heading "Add alert category". Below the heading is a form with a "Name:" label followed by a text input field containing a single vertical bar character. At the bottom of the page are three buttons: "Save and add another", "Save and continue editing", and a large blue "SAVE" button.

Figure 825 Alert category add/edit page

- Name – the name can be up to 200 characters (required).

37.5.4 User access page

Alert categories are discussed in the [Alerts](#) section detailed on page 200.

37.6 Alerts

37.6.1 Usage

Alerts are used to notify users of upcoming events that can impact lab or equipment availability. Alerts are discussed in the [Alerts](#) section detailed on page 200. Alerts are created and edited through a NEMO page and manual editing of this table should not be necessary.

37.6.2 Summary page

The summary page provides a listing of alerts (Figure 826). Click the title field in the row of interest to edit.

The screenshot shows a table titled 'Home - Nemo > Alerts'. The table has columns: TITLE, CATEGORY, CREATION TIME, CREATOR, DEBUT TIME, EXPIRATION TIME, USER, DISMISSABLE, EXPIRED, and DELETED. There are two rows of data:

Action:	Go	0 of 2 selected								
□	TITLE	CATEGORY	CREATION TIME	CREATOR	DEBUT TIME	EXPIRATION TIME	USER	DISMISSABLE	EXPIRED	DELETED
□	Sputter tool annual PM next week	Long PM	Monday, April 13th, 2020 @ 1:53 PM	Captain Nemo (captain)	Monday, April 13th, 2020 @ 1:52 PM	-	-	☒	☒	☒
□	Cleanroom closed this weekend		Thursday, June 21st, 2018 @ 4:40 PM	Captain Nemo (captain)	Thursday, June 21st, 2018 @ 4:39 PM	-	-	☒	☒	☒

2 alerts

Figure 826 Alerts summary page

37.6.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 827). [Common features in detailed administration](#) is detailed on page 350.

Home > Nemo > Alerts > Add alert

Add alert

Title:

Category:
A category/type for this alert.

Contents:

Creation time: Date: 06/23/2020 Today | Time: 04:09 PM Now |

Creator:

Debut time: Date: Today | Time: Now |
The alert will not be displayed to users until the debut time is reached.

Expiration time: Date: Today | Time: Now |
The alert can be deleted after the expiration time is reached.

User:
The alert will be visible for this user. The alert is visible to all users when this is empty.

Dismissible
Allows the user to delete the alert. This is only valid when the 'user' field is set.

Expired
Indicates the alert has expired and won't be shown anymore

Deleted
Indicates the alert has been deleted and won't be shown anymore

Save and add another **Save and continue editing** **SAVE**

Figure 827 Alerts add/edit page

- Title – title to be displayed for the alert, maximum of 100 characters.
- Category – category of the alert selected from alert categories. *Alert categories table*
- Contents – message to describe the alert, maximum of 500 characters (required).
- Creation Time – the date/time the alert was created (required).
- Creator – the user that created the alert. *Users table*
- Debut time – the time the alert will start displaying on the landing page (required).
- Expiration time – the time the alert will expire and stop being displayed on the landing page.
- User – the user targeted for the alert, this will be blank for all users. *Users table*
- Dismissible – only valid when a user is selected, allows user to delete the alert.
- Expired – indicates the alert has expired and will not be displayed any longer.
- Deleted – indicates the alert was deleted and will not be displayed any longer.

37.6.4 User access page

Alerts are discussed in the [Alerts](#) section detailed on page 200.

37.7 Area access records

37.7.1 Usage

The area access records table maintains the list of users that have accessed an area. Records are written automatically when a user enters/exits an area. Manual editing may be necessary to correct an access record if for example a user forgets to log out of an area.

37.7.2 Summary page

The summary page provides date filtering, filtering by area, and by start date (Figure 828). Click the id field in the row of interest to edit.

Home > Nemo > Area access records

- Project – drop down list of all projects (required). *Projects table*
- Start – the start date and time (required).
- End – the end date and time.
- Staff charge – the staff charge record id the area access record is associated with.

37.7.4 User access page

Area access records are automatically recorded when a user accesses a controlled area. Access is provided via the landing page by a user, the area access page by staff, or through a controlled door tablet. Areas are discussed in the next section.

37.8 Areas

37.8.1 Usage

The areas table contains the list of areas defined for a facility. Areas are optional and can be used to define spaces and group tools in common places. In addition, areas can optionally have occupancy limits set as well as require a reservation for access.

The times a user has access to an area are defined as physical access levels. Physical access levels are used to associate areas with time schedules and are discussed in the [Detailed administration → Physical access level](#) section on page 424.

An area can optionally have doors associated with it that NEMO controls through interlocks. Doors are discussed in the [Detailed administration → Doors](#) section on page 402.

User area access permissions are permissions to physical access levels and are discussed in the [Users](#) section on page 270.

Areas must be created and edited through accessing this table directly.

37.8.2 Summary page

The summary page provides a list of areas (Figure 830). Click the area field in the row of interest to edit. If parent/child areas are used, clicking the expand tree button will list all children under a parent and clicking collapse tree will hide all children under a parent.

The screenshot shows a table with columns: TITLE, NAME, PARENT AREA, CATEGORY, REQUIRES RESERVATION, MAXIMUM CAPACITY, RESERVATION WARNING, and ID. The Cleanroom row is selected, highlighted in yellow. The CMP lab row is unselected. The table shows 2 areas in total. A sidebar on the right contains a FILTER section with options for 'By requires reservation' (All, Yes, No) and 'By parent area' (All, Cleanroom, CMP lab).

	TITLE	NAME	PARENT AREA	CATEGORY	REQUIRES RESERVATION	MAXIMUM CAPACITY	RESERVATION WARNING	ID
<input type="checkbox"/>	+ Cleanroom	Cleanroom	-	Cleanroom	<input checked="" type="checkbox"/>	5	2	1
<input type="checkbox"/>	+ CMP lab	CMP lab	-	-	<input checked="" type="checkbox"/>	0	-	3

Figure 830 Areas summary page

37.8.3 Fields

The add/change page for this table lists the fields that can be edited. [Common features in detailed administration](#) is detailed on page 350. In addition, the history button will show any manual changes that were made to the record. The area table is listed in five sections that will be detailed below.

- General Information (Figure 831)
 - Name – the name of the area, maximum 200 characters (required)
 - Parent area – if parent/child relationships are desired, select the parent area from the drop-down list. *Areas table*
 - Category – to organize areas on the calendar sidebar, categories can be created to group by. Optional
 - Reservation email – An email will be sent to this address when users create or cancel reservations in the area or in children areas. A comma-separated list can be used. Optional
 - Abuse email – An email will be sent to this address when users overstay their reservation in the area or in children areas (logged in with expired reservation). A comma-separated list can be used. Optional

Change area HISTORY

Name:	<input type="text" value="Cleanroom"/>	What is the name of this area? The name will be displayed on the tablet login and logout pages.
Parent area:	<input style="width: 100px; height: 20px; border: 1px solid #ccc; padding: 2px;" type="text" value="-----"/> ▼ ✎ +	Select a parent area, (building, floor etc.)
Category:	<input type="text" value="Cleanroom"/>	Create sub-categories using slashes. For example "Category 1/Sub-category 1".
Reservation email:	<input type="text"/>	
	An email will be sent to this address when users create or cancel reservations in the area or in children areas. A comma-separated list can be used.	
Abuse email:	<input type="text"/>	
	An email will be sent to this address when users overstay in the area or in children areas (logged in with expired reservation). A comma-separated list can be used.	

Figure 831 Area general information

- Area access (Figure 832)
 - Requires reservation – check this box to require a reservation for this area before a user can login. Checking this box will cause this area to display on the calendar sidebar so it is accessible for reservations.
 - Logout grace period – number of minutes users have to logout of this area after their reservation expired before being flagged and abuse email is sent.
 - Welcome message – the welcome message will be displayed on the tablet login page. You can use HTML and JavaScript. Only required for tablet door access control.

- Buddy system allowed – this checkbox enables the buddy board for this area. The buddy board appears on the navigation bar and is described in the [buddy board](#) section starting on page 139.

Area access

Requires reservation
Check this box to require a reservation for this area before a user can login.

Logout grace period:
Number of minutes users have to logout of this area after their reservation expired before being flagged and abuse email is sent.

Welcome message:

```
<center><h1>Welcome to the cleanroom!</h1>
<h2>Scan your badge to log in</h2></center>
```

The welcome message will be displayed on the tablet login page. You can use HTML and JavaScript.

Buddy system allowed
Check this box if the buddy system is allowed in this area.

Figure 832 Area area access

- Occupancy (Figure 833)
 - Maximum capacity – The maximum number of people allowed in this area at any given time. Set to 0 for unlimited. (required)
 - Count staff in occupancy – Indicates that staff users will count towards maximum capacity. If not checked, staff occupancy will be listed separately on the status dashboard and jumbotron pages.
 - Count service personnel in occupancy – Indicates that service personnel will count towards maximum capacity. If not checked, service personnel occupancy will be listed separately on the status dashboard and jumbotron pages.
 - Reservation warning – The number of simultaneous users (with at least one reservation in this area) allowed before a warning is displayed when creating a reservation.

Occupancy

Maximum capacity:	<input type="text" value="5"/>
The maximum number of people allowed in this area at any given time. Set to 0 for unlimited.	
<input type="checkbox"/> Count staff in occupancy	
Indicates that staff users will count towards maximum capacity.	
<input type="checkbox"/> Count service personnel in occupancy	
Indicates that service personnel will count towards maximum capacity.	
Reservation warning:	<input type="text" value="2"/>
The number of simultaneous users (with at least one reservation in this area) allowed before a warning is displayed when creating a reservation.	

Figure 833 Area occupancy

- **Reservation (Figure 834)** – these parameters are only applicable if the ‘requires reservation’ check box is checked
 - Reservation horizon – Users may create reservations this many days in advance. Leave this field blank to indicate that no reservation horizon exists for this area.
 - Missed reservation threshold – The amount of time (in minutes) that an area reservation may go unused before it is automatically marked as "missed" and hidden from the calendar. The cancellation process is triggered by a timed job on the web server.

Reservation

Reservation horizon:	<input type="text" value="14"/>
Users may create reservations this many days in advance. Leave this field blank to indicate that no reservation horizon exists for this area.	
Missed reservation threshold:	<input type="text"/>
The amount of time (in minutes) that an area reservation may go unused before it is automatically marked as "missed" and hidden from the calendar. Usage can be from any user, regardless of who the reservation was originally created for. The cancellation process is triggered by a timed job on the web server.	

Figure 834 Area reservation

- **Policy (Figure 835)** – these parameters are only applicable if the ‘requires reservation’ check box is checked.
 - Policy off between times – Check this box to disable policy rules every day between the given times
 - Policy off start time – The start time when policy rules should NOT be enforced
 - Policy off end time – The end time when policy rules should NOT be enforced
 - Policy off weekend – Whether or not policy rules should be enforced on weekends
 - Minimum usage block time – The minimum amount of time (in minutes) that a user must reserve this area for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this area.

- Maximum usage block time – The maximum amount of time (in minutes) that a user may reserve this area for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this area.
- Maximum reservations per day – The maximum number of reservations a user may make per day for this area.
- Minimum time between reservations – The minimum amount of time (in minutes) that the same user must have between any two reservations for this area.
- Maximum future reservation time – The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

Policy

Policy off between times
Check this box to disable policy rules every day between the given times

Policy off start time: Now | The start time when policy rules should NOT be enforced

Policy off end time: Now | The end time when policy rules should NOT be enforced

Policy off weekend
Whether or not policy rules should be enforced on weekends

Minimum usage block time:
The minimum amount of time (in minutes) that a user must reserve this area for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this area.

Maximum usage block time:
The maximum amount of time (in minutes) that a user may reserve this area for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this area.

Maximum reservations per day:
The maximum number of reservations a user may make per day for this area.

Minimum time between reservations:
The minimum amount of time (in minutes) that the same user must have between any two reservations for this area.

Maximum future reservation time:
The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

Figure 835 Area policy

37.8.4 User access page

There are no user pages for creating areas. Accessing areas can be performed from the landing page if enabled, the area access page by staff, and the entrance tablets if used.

37.9 Badge readers

37.9.1 Usage

The badge reader table can be used to create custom badge reader behavior. The default behavior of NEMO is to expect the F2 character as the send key and the record key. It does not need to be explicitly defined but has been here to provide an example of how to record a new badge reader. When using the Kiosk or Area Access, add ?reader_id=<reader_id> to the URL to select a badge reader configuration.

37.9.2 Summary page

The summary page provides a listing of badge readers (Figure 836). Click the id field in the row of interest to edit.

Select badge reader to change				
Action:	-----		Go	0 of 1 selected
<input type="checkbox"/>	ID	NAME	SEND KEY	RECORD KEY
<input type="checkbox"/>	1	Standard badge reader	F2	F2
1 badge reader				

Figure 836 Badge reader summary page

37.9.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 837). [Common features in detailed administration](#) is detailed on page 350.

Add badge reader

Name:

Send key:

The name of the key which submits the badge number ('F2', 'Shift', 'Meta', 'Enter', 'a' etc.)

Record key:

The name of the key which starts badge number recording. If left blank, badge number recording starts when any input is received.

[Save and add another](#)

[Save and continue editing](#)

SAVE

Figure 837 Badge reader add/edit page

- Name – the name can be up to 200 characters (required).
- Send key – The name of the key which submits the badge number ('F2', 'Shift', 'Meta', 'Enter', 'a' etc.) (required)
- Record key – The name of the key which starts badge number recording. If left blank, badge number recording starts when any input is received.

37.9.4 User access page

There are no user access pages associated with badge readers. When using the Kiosk or Area Access, add ?reader_id=<reader_id> to the URL to select a badge reader configuration.

37.10 Buddy request messages

37.10.1 Usage

The buddy request messages table stores the responses entered on the [buddy board](#) feature described starting on page 139.

37.10.2 Summary page

The summary page provides a listing of buddy request messages (Figure 838). Click the ID field in the row of interest to edit. You can reach the parent buddy request by clicking the buddy request of interest.

HISTORY

Change configuration

Tool:

Evaporator

The tool that this configuration option applies to.

Name:

Pocket 2 Source

The name of this overall configuration. This text is displayed as a label on the tool control page.

Configurable item name:

Source

The name of the tool part being configured. This text is displayed as a label on the tool control page. Leave this field blank if there is only one configuration slot.

Advance notice limit:

24

Configuration changes must be made this many hours in advance.

Display priority:

2

The order in which this configuration will be displayed beside others when making a reservation and controlling a tool. Can be any positive integer including 0. Lower values are displayed first.

Prompt:

Please select the source you will need. If you will provide the target, provide the details in the comments.

The textual description the user will see when making a configuration choice.

Current settings:

Ag

The current configuration settings for a tool. Multiple values are separated by commas.

Available settings:

Ti,
Pt,
Cr,
Au,
Ag,
User provided source

The available choices to select for this configuration option. Multiple values are separated by commas.

Figure 847 Configurations add/edit page part 1

37.17 Consumables

37.17.1 Usage

The consumables can be defined as items manually distributable by staff to users or items automatically distributed to users triggered by tool usage. The total quantity in stock can be tracked and messages automatically sent to the responsible person at a set threshold.

37.17.2 Summary page

The summary page provides date filtering, filtering by visibility and consumable (Figure 853). Click the name field in the row of interest to edit.

Figure 854 Consumables add/edit page

- Name – Name of the consumable (required)
- Category – Select a category from the drop-down list. *Consumable categories table*
- Quantity – The integer number of items currently in stock
- Visible – Checkbox to indicate if item is on the supply list. This is usually unchecked for items automatically distributed based on tool usage.
- Reminder threshold – The quantity at which a restock reminder email should be sent
- Reminder email – The email address of the person responsible for ordering additional stock.
- Reminder threshold reached – Indicator if stock is below reminder threshold (not user settable)

37.17.4 User access page

There is no page for creating or maintaining consumables, it must be done on this page. However, quantity records are updated automatically when a staff member [checks out a supply](#)

to a user which is detailed on page 261, or a consumable withdraw is initiated by a [tool post usage](#) question which is detailed on page 466.

37.18 Contact information

37.18.1 Usage

Contact information can provide users information about how to find a staff member when needed. Contact information, if used, must be created in this table view. Any number can be defined. In addition, contacts can be associated with NEMO users to provide additional contact information on the tool detail pages. Contact information is discussed in the [contact staff section](#) detailed on page 169. Tool details are discussed in the [tool details section](#) starting on page 109.

37.18.2 Summary page

- Name – the name can be up to 200 characters and is not linked to a user in the user table (required).
- Image – an image of the contact can be uploaded to display on the contact page.
- Category – The group the contact should be in. (required if categories are defined)
- Email – email address of the contact
- Office phone – land line phone number of contact
- Office location – text box for office location, can provide directions, etc.
- Mobile phone – mobile number of contact

- SMS capable – If the mobile phone capable of receiving text messages a link will be displayed for users to click to send a text message to the recipient when viewing the 'Contact information' page.
- User – Select the NEMO user to associate with this contact. When a user and contact are associated, more contact information will be provided for the contact on the tool details page. Tool details are discussed in the [tool details section](#) starting on page 109.

37.18.4 User access page

Contact information, if used, must be created in this table view and can be any text name. Contact information is discussed in the [contact staff section](#) detailed on page 169.

37.19 Contact information categories

37.19.1 Usage

Contact information categories are optional but can be useful for grouping types of staff on the contact information page. Contact information categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no contact information categories are defined, all contacts will be listed in alphabetical order. Contact information categories are discussed in the [contact staff section](#) detailed on page 169.

37.19.2 Summary page

The summary page provides a listing of contact information categories (Figure 857). Click the name field in the row of interest to edit.

37.20 Doors

37.20.1 Usage

NEMO has the capability to control access to lab doors using a display with card reader and interlock relay to actuate a door lock solenoid. Doors are optional but can be useful for ensuring lab occupancy is tracked. Doors are discussed in more detail in the [entrance tablet section](#) on page 533.

37.20.2 Summary page

The summary page provides a listing of doors (Figure 859). Click the name field in the row of interest to edit. Once doors are defined, a URL is automatically available to access the door based on the row id number. In the doors summary page figure below, accessing www.nemo.com/welcome_screen/1/ will display the door access screen for the lab entrance door.

- Sender – the name of the sender, typically the User office email defined in the customization page.
- To – the user the email was sent to.
- Subject – the subject of the email.
- Content – the body of the email.
- Ok – indicated if the message was sent without error.
- Attachments – list of files attached.
- Content preview – a preview of the email if available.

37.21.4 User access page

Interlock card categories, if used, must be created in this table view and can be any text name. Interlock card categories are used in the interlock cards table to define how NEMO should communicate with the interlock.

37.22 Interlock card categories

37.22.1 Usage

Interlock card categories are used to link an interlock class in `interlocks.py` to interlock cards so NEMO knows how to talk to the interlock. An interlock card category should be created for each interlock class in `interlocks.py` that will be used to control tool access or door access.

37.22.2 Summary page

The summary page provides a listing of interlock card categories (Figure 863). Click the name field in the row of interest to edit.

The screenshot shows a web-based administrative interface for managing interlock card categories. At the top, a blue header bar displays the navigation path: Home > Nemo > Interlock card categories. Below the header, the main content area has a light gray background. A title 'Select interlock card category to change' is centered at the top of the content area. To the right of the title is a button labeled 'ADD INTERLOCK CARD CATEGORY +'. Below the title, there is a search bar with the placeholder 'Action: -----' and a dropdown arrow, followed by a 'Go' button and the text '0 of 4 selected'. A scrollable list of categories is displayed as a table. The first column contains checkboxes, and the second column contains the category names. The names listed are NAME, ProXr, Raspberry Pi Interlock, Stanford, and WebRelayHttp. The 'Raspberry Pi Interlock' entry is highlighted in blue, indicating it is currently selected. At the bottom left of the list area, the text '4 Interlock card categories' is visible. The entire interface is contained within a white rectangular frame.

Figure 863 Interlock card categories summary page

37.22.3 Fields

- Name – name can be up to 200 characters (required).
- Key – The key to identify this interlock category in interlocks.py (required)
 - The interlocks.py file has a dictionary that links this key name to each interlock class in interlocks.py. Users can create their own interlock class and access it in NEMO by updating the dictionary to include their custom class (Figure 865).

```
interlocks: Dict[str, Interlock] = {
    'stanford': StanfordInterlock(),
    'web_relay_http': WebRelayHttpInterlock(),
    'proxr': ProXrInterlock(),
    'rpi_interlock': RPiInterlock(),
}
```

Figure 865 Interlock card categories example dictionary in interlocks.py

37.22.4 User access page

Interlock card categories, if used, must be created in this table view and can be any text name. Interlock card categories are used in the interlock cards table to define how NEMO should communicate with the interlock.

37.23 Interlock cards

37.23.1 Usage

Interlock cards define the communication parameters with an interlock device. Regardless if single relay interlock devices are used or multi-relay interlock devices are used, each device will require definition as an interlock card. Information such as IP address, port number and interlock category define how NEMO will communicate with the device.

37.23.2 Summary page

The summary page provides a listing of interlock cards (Figure 866). Click the name field in the row of interest to edit.

- Title – this is the top-level title given to the news story.
- Pinned – checkbox to indicate whether or not this news story should stay at the top.
- Created – date and time story was initially posted.
- Original content - the content of the story when it was first published, useful for visually hiding updates 'in the middle' of the story.
- All content – the entire content of the story including all updates.
- Last updated – date and time the story was last updated.
- Last update content – the most recent update to the story useful for visually hiding updates 'in the middle' of the story.
- Archived – checkbox to indicate that the story has been removed from the Recent News page.
- Update count – integer number to indicate the number of times the story has been updated. When the number of updates is great than 2, only the original story and the latest update are displayed in the recent news page to save space. A reader would need to expand the story to see all of the content.

37.27.4 User access page

Normally, this table does not require direct editing. Adding and updating news stories is done on the [news and events page](#) detailed on page 178.

37.28 Notifications

37.28.1 Usage

The notifications table stores updates to news and safety events so notification alerts can be provided on a user-by-user basis on the landing page icons if used. If a new safety event or new news event is updated or published, the notifications will be triggered and stored in this table. Once a user visits the safety or news page, the notification is deleted from the table. Notifications are displayed as a number at the bottom right of the safety or new icon on the landing page. Safety notifications are discussed in the [safety](#) section starting on page 157. News notifications are discussed in the [news and events](#) section starting on page 178.

37.28.2 Summary page

The summary page provides a listing of notifications (Figure 876). Click the id field in the row of interest to edit.

37.28.4 User access page

Normally, this table does not require direct editing. Safety notifications are discussed in the [safety](#) section starting on page 157. News notifications are discussed in the [news and events](#) section starting on page 178.

37.29 Physical access exceptions

37.29.1 Usage

The physical access exceptions table is used to override a physical access level schedule to prevent access during the times defined. This feature is useful for creating holiday schedules and planned closures. During a physical access exception period, the selected physical access levels are not accessible to users.

37.29.2 Summary page

The summary page provides a listing of physical access exceptions (Figure 878). Click the name field in the row of interest to edit.

The screenshot shows a web-based administrative interface for managing physical access exceptions. At the top, there's a breadcrumb navigation: Home > Nemo > Physical access exceptions. Below the header, a message says "Select physical access exception to change". A "FILTER" sidebar on the right lists categories like "By area" (All, Chemical Receiving, Cleanroom, TEM specimen preparation lab, Nanoscale measurement lab, Soft lithography lab). The main content area displays a table with three rows of data:

<input type="checkbox"/>	NAME	START TIME	END TIME
<input type="checkbox"/>	New Years Holiday - Lab Closed	Friday, January 1st, 2021 @ 12:00 AM	Friday, January 1st, 2021 @ 11:59 PM
<input type="checkbox"/>	Christmas Holiday - Lab Closed	Friday, December 25th, 2020 @ 12:00 AM	Friday, December 25th, 2020 @ 11:59 PM
<input type="checkbox"/>	Emergency HVAC Maintenance - Lab Closed	Friday, December 4th, 2020 @ 12:00 PM	Friday, December 4th, 2020 @ 6:00 PM

At the bottom left, it says "3 physical access exceptions". On the far right, there's a "ADD PHYSICAL ACCESS EXCEPTION +"

Figure 878 Physical access exceptions summary page

37.29.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 879). [Common features in detailed administration](#) is detailed on page 350.

Change physical access exception

HISTORY

Name: Christmas Holiday - Lab Closed
 The name of this exception that will be displayed as the policy problem

Start time: Date: 12/25/2020 Today |
 Time: 12:00 AM Now |

The start of the exception, after which users will be denied access.

End time: Date: 12/25/2020 Today |
 Time: 11:59 PM Now |

The end of the exception, after which users will be allowed access again

Physical access levels:

Available Physical Access Levels

Chemical receiving during business hours
 Cleanroom anytime
 Soft lithography anytime - F102

- Name – descriptive name of physical access exception. This field is displayed in the message to users if someone tries to enter the area during the selected time (Figure 880) (required)

You do not have access to the Cleanroom at this time due to the following exception: Emergency HVAC Maintenance - Lab Closed. The exception ends on Friday, December 4th, 2020 @ 6:00 PM

Figure 880 Physical access exceptions message

- Start time – select from drop down list the area this access level is associated with. (required) *Areas table*
- End time – select from drop down list. Available options are Always, Weekdays, or Weekends. (required)

- Physical access levels – select available physical access levels that the exception will apply to and use the right arrow to add to the chosen users list. Multiple physical access levels can be selected using the control or shift keys. (required) *Physical access levels table*

37.29.4 User access page

There is no user page available to create physical access exceptions. Once created, users with the selected physical access level will not be able to access the associated area during the exception window.

37.30 Physical access levels

37.30.1 Usage

The physical access levels table associates areas with schedules. Schedules can be set for always, weekends, or weekdays between a set start and end time. User permissions to access areas are given as physical access levels to have the ability to limit the days and times users have access. Exceptions to a physical access level can be made using the physical access exception table detailed above. Exceptions could be a holiday schedule or other expected closures. User permissions are discussed on the [users](#) page detailed starting on page 270.

37.30.2 Summary page

The summary page provides a listing of physical access levels (Figure 881). Click the name field in the row of interest to edit.

- Physical access exceptions – select available exceptions and use the right arrow to add to the chosen list. Multiple exceptions can be selected using the control or shift keys. More details about exceptions can be found in [Detailed administration - Physical access exceptions](#).

37.30.4 User access page

There is no user page available to create physical access levels. Once created, permissions to access physical levels are given to users on the [users](#) page detailed starting on page 270.

37.31 Physical access logs

37.31.1 Usage

The physical access logs automatically record each time a door is accessed by a user at an entrance tablet and the access result. Doors are discussed in more detail in the [entrance tablet section](#) on page 533.

37.31.2 Summary page

The summary page provides a listing of physical access logs (Figure 884). Click the user field in the row of interest to edit.

The screenshot shows a web-based application interface for managing physical access logs. At the top, there's a navigation bar with 'Home > Nemo > Physical access logs'. Below the navigation is a search bar with a magnifying glass icon and a 'Search' button. To the right of the search bar is a blue 'ADD PHYSICAL ACCESS LOG +' button. On the far right, there's a 'FILTER' section with a 'By result' dropdown containing 'All', 'Yes', and 'No' options. The main area displays a table of access logs. The columns are labeled 'USER', 'DOOR', 'TIME', and 'RESULT'. There are six rows of data, all belonging to the user 'Captain Nemo (captain)' who accessed the 'Lab Entrance' at various times between April 2020 and September 2020, with the result being 'Allow' in all cases.

USER	DOOR	TIME	RESULT
Captain Nemo (captain)	Lab Entrance	Wednesday, September 23rd, 2020 @ 1:27 PM	Allow
Captain Nemo (captain)	Lab Entrance	Wednesday, September 23rd, 2020 @ 1:24 PM	Allow
Captain Nemo (captain)	Lab Entrance	Thursday, April 23rd, 2020 @ 12:11 PM	Allow
Captain Nemo (captain)	Lab Entrance	Thursday, April 23rd, 2020 @ 12:11 PM	Allow
Captain Nemo (captain)	Lab Entrance	Wednesday, April 22nd, 2020 @ 10:18 AM	Allow

Figure 884 Physical access logs summary page

37.31.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 885). [Common features in detailed administration](#) is detailed on page 350.

Change physical access log

HISTORY

User: Captain Nemo (captain) +

Door: Lab Entrance +

Time: Date: 09/23/2020 Today |
Time: 01:27 PM Now |

Result: Allow +

Details:
The user was permitted to enter this area, and already had an active area access record for this area.

Any details that should accompany the log entry. For example, the reason physical access was denied.

Figure 885 Physical access logs add/edit page

- User – drop down list of name of user accessing door. (required) *Users table*
- Door – drop down list of doors. (required) *Doors table*
- Time – date/time door was accessed. (required)
- Result – drop down list allow or deny. (required)
- Details – narrative of access event.

37.31.4 User access page

There is no user page available to create or edit physical access logs. Events are created automatically when a door is accessed at an entrance tablet. Doors are discussed in more detail in the [entrance tablet section](#) on page 533.

37.32 Projects

37.32.1 Usage

The projects table maintains the association of projects with a parent account and child users. For a user to access NEMO resources the user must be active on a project which is active on an account. A detailed discussion of projects can be found in the [Accounts and projects](#) section on page 191.

37.32.2 Summary page

The summary page provides a listing of projects (Figure 886). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing projects. At the top, a blue header bar displays the navigation path: Home > Nemo > Projects. Below the header, a search bar contains the placeholder text "Select project to change". To the right of the search bar is a button labeled "ADD PROJECT +". On the far right, there is a vertical sidebar titled "FILTER" with several dropdown menus:

- By active:
 - All
 - Yes
 - No
- By account:
 - All
 - Account 2
 - Account 3
 - Cleanroom Staff
- By start date:
 - Any date
 - Today
 - Past 7 days
 - This month
 - This year
 - No date

The main content area displays a table with the following data:

<input type="checkbox"/>	NAME	ID	APPLICATION IDENTIFIER	ACCOUNT	ACTIVE	START DATE
<input type="checkbox"/>	Cleanroom Eng	1	PROJ.2019.02	Cleanroom Staff	<input checked="" type="checkbox"/>	-
<input type="checkbox"/>	Project 2	2	PROJ.456	Account 2	<input checked="" type="checkbox"/>	-
<input type="checkbox"/>	Project 3	3	PROJ.789	Account 3	<input checked="" type="checkbox"/>	-

Below the table, a message indicates "3 projects".

Figure 886 Projects summary page

Figure 887 Projects add/edit page

- Name – descriptive name of project (required)
- Application identifier – the application identifier is not used by NEMO but is a convenient way to associate the project with external project tracking systems. (required)
- Account – select from drop down list. All charges for this project will be billed to the selected account. (required)
- Start date – the start date for this project.
- Allow consumable withdrawals – unselect to prevent consumable/supplies withdrawals for this project. Default is enabled.
- Active – users may only charge to a project if it is active. Deactivate the project to block billable activity (such as tool usage and consumable check-outs).
- Members – select available users and use the right arrow to add to the chosen users list. Multiple users can be selected using the control or shift keys.
- Principal Investigators – select available users and use the right arrow to add to the chosen users list. Multiple users can be selected using the control or shift keys
- Only allow tools – select available tools to limit billing options for this project. Users belonging to this project will only be able to reserve and enable those specific tools, and areas that this tool requires access to. Staff charges will only be available for those tools and areas they require. Training will also be limited to the tools as well.

37.32.4 User access page

Projects are administered in the [Accounts and projects](#) section detailed on page 191.

37.33 Reservation Questions

37.33.1 Usage

The reservation questions table provides a way to ask users questions when they are making a reservation.

37.33.2 Summary page

The summary page provides a listing of reservation questions (Figure 888). Click the id field in the row of interest to edit.

The screenshot shows a web application interface for managing reservation questions. At the top, there's a header bar with the text 'NEMO' on the left and 'WELCOME, CAPTAIN. VIEW SITE / LOG OUT' on the right. Below the header, a breadcrumb navigation shows 'Home > Nemo > Reservation questions'. The main content area has a title 'Select reservation questions to change' and a 'ADD RESERVATION QUESTIONS +' button. There's a search bar with the placeholder 'Action: _____' and a 'Go' button. A message '0 of 1 selected' is displayed. A table lists one item: 'RESERVATION QUESTIONS' with a checkbox next to it, and 'Test questions' in blue text. Below the table, a message says '1 reservation questions'.

Figure 892 Reservations add/edit page part 1

- User – select from drop down name of user the reservation is for (required) *Users table*
- Creator – select from drop down name of user that created the reservation. (required) *Users table*
- Creation time – date/time the reservation was created. (required)
- Tool – select from drop down name of tool reserved. (either a tool or an area must be selected) *Tools table*
- Area – select from drop down name of area reserved. (either a tool or an area must be selected) *Area table*
- Project – select from drop down name of project to bill reservation to. A missed reservation would be billed to this project.
- Start – date/time the reservation starts. (required)
- End – date/time the reservation ends. (required)

<input type="checkbox"/> Short notice	Indicates that the reservation was made after the configuration deadline for a tool. Staff may not have enough time to properly configure the tool before the user is scheduled to use it.
<input type="checkbox"/> Cancelled	Indicates that the reservation has been cancelled, moved, or resized.
Cancellation time:	Date: <input type="text"/> Time: <input type="text"/>
	Today
Cancelled by:	<input type="text"/>
<input type="checkbox"/> Missed	Indicates that the tool was not enabled by anyone before the tool's "missed reservation threshold" passed.
<input type="checkbox"/> Shortened	Indicates that the user finished using the tool and relinquished the remaining time on their reservation. The reservation will no longer be visible on the calendar and a descendant reservation will be created in place of the existing one.
Descendant:	<input type="text"/>
	Any time a reservation is moved or resized, the old reservation is cancelled and a new reservation with updated information takes its place. This field links the old reservation to the new one, so the history of reservation moves & changes can be easily tracked.
Additional information:	<input type="text"/>
<input type="checkbox"/> Self configuration	When checked, indicates that the user will perform their own tool configuration (instead of requesting that the staff configure it for them).
Title:	<input type="text"/>
	Shows a custom title for this reservation on the calendar. Leave this field blank to display the reservation's user name as the title (which is the default behaviour).

Figure 893 Reservations add/edit page part 2

- Short notice – indicates that the reservation was made after the configuration deadline for a tool. Staff may not have enough time to properly configure the tool before the user is scheduled to use it.
- Cancelled – indicates that the reservation has been cancelled, moved, or resized.
- Cancellation time – date/time the reservation was changed.
- Cancelled by – select from drop down name of user that changed the reservation
Users table
- Missed – indicates that the tool was not enabled by anyone before the tool's "missed reservation threshold" passed. Missed reservations require a threshold set in the tool

table and a timed job to check for missed reservations periodically. Missed reservations are discussed in the [reservations section](#) starting on page 62.

- Shortened – indicates that the user finished using the tool and relinquished the remaining time on their reservation. The reservation will no longer be visible on the calendar and a descendant reservation will be created in place of the existing one.
- Descendant – any time a reservation is moved or resized, the old reservation is cancelled and a new reservation with updated information takes its place. This field links the old reservation to the new one, so the history of reservation moves & changes can be easily tracked.
- Additional information – text that can be provided by a user when making a reservation on a configurable tool.
- Self-configuration – when checked, indicates that the user will perform their own tool configuration (instead of requesting that the staff configure it for them).
- Title – Shows a custom title for this reservation on the calendar. Leave this field blank to display the reservation's user name as the title (which is the default behavior).

37.34.4 User access page

Reservations are made and maintained on the [calendar](#) page and detailed starting on page 37.

37.35 Resource categories

37.35.1 Usage

Resource categories are optional but can be useful for grouping similar resources to make visualization easier. Resource categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no resource categories are defined, they are not displayed on the resources page. Resource categories are discussed in the [Resources](#) section detailed on page 241.

37.35.2 Summary page

The summary page provides a listing of resource categories (Figure 894). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing resource categories. At the top, there is a navigation bar with the path "Home > Nemo > Resource categories". Below the navigation bar, the main content area has a title "Select resource category to change" and a "ADD RESOURCE CATEGORY +" button. There is a dropdown menu labeled "Action:" with a "Go" button and a status message "0 of 3 selected". A list of resource categories is displayed in a table format. The first column contains checkboxes, and the second column contains the category names. The categories listed are "Gases", "Lab", and "Utilities". At the bottom of the list, it says "3 resource categories".

Figure 894 Resource category summary page

37.35.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 895). [Common features in detailed administration](#) is detailed on page 350.

The screenshot shows a web-based application interface for editing a resource category. At the top, there is a navigation bar with the path "Home > Nemo > Resource categories > Lab". Below the navigation bar, the main content area has a title "Change resource category" and a "HISTORY" button. There is a form with a single field labeled "Name:" containing the value "Lab".

Figure 895 Resource category add/edit page

- Name – the name can be up to 200 characters (required).

37.35.4 User access page

Resource categories must be setup in this table view but are discussed in the [Resources](#) section detailed on page 241.

37.36 Resources

37.36.1 Usage

Resources provide a method to define tool dependencies such as gases, facility spaces, and utilities that can be associated with tools are either required or non-required resources. When a resource is unavailable, users are blocked from using tools or areas that require the resource and notified on tools that with a non-required association. Resources are discussed in the [Resources](#) section detailed on page 241.

37.36.2 Summary page

The summary page provides a listing of resources (Figure 896). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing resources. At the top, there's a navigation bar with 'Home > Nemo > Resources'. Below it, a header says 'Select resource to change' with an 'ADD RESOURCE +' button. A search bar and a dropdown menu for 'Action' are also present. On the right, there's a 'FILTER' sidebar with sections for 'By available' (with 'All', 'Yes', and 'No' options) and 'By category' (with 'All', 'Gases', 'Lab', and 'Utilities' options). The main area contains a table with the following data:

<input type="checkbox"/>	NAME	CATEGORY	AVAILABLE
<input type="checkbox"/>	2% SiH4	Gases	✓
<input type="checkbox"/>	Ar	Gases	✓
<input type="checkbox"/>	Bay 1	Lab	✓
<input type="checkbox"/>	Bay 2	Lab	✓
<input type="checkbox"/>	Bay 3	Lab	✓
<input type="checkbox"/>	Bay 4	Lab	✓
<input type="checkbox"/>	Bay 5	Lab	✓
<input type="checkbox"/>	CF4	Gases	✓
<input type="checkbox"/>	CHF3	Gases	✓
<input type="checkbox"/>	CMP	Lab	✓
<input type="checkbox"/>	Cl2	Gases	✓
<input type="checkbox"/>	Cleanroom	Lab	✓

Figure 896 Resources summary page

37.36.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 897, Figure 898). [Common features in detailed administration](#) is detailed on page 350.

The screenshot shows the 'Change resource' page for an 'Exhaust' resource. The top navigation bar includes 'Home', 'Nemo', 'Resources', and 'Exhaust'. A 'HISTORY' button is in the top right. The main area has a title 'Change resource' and a 'Name:' field containing 'Exhaust'. A 'Category:' dropdown is set to 'Utilities', with edit, add, and delete icons next to it. A checked checkbox labeled 'Available' indicates the resource is available for use. Below this is a section for 'Fully dependent tools', showing a list of available tools like Ellipsometer, Microscope, Profilometer, SEM, and SEM Lithography mode, which can be chosen or removed. A 'Choose all' button is at the bottom. A note says these tools will be inoperable if unavailable. The 'Partially dependent tools' section shows a similar list for tools like Acid Hood, CMP tool, Chlorine Etch, Contact Aligner, and Develop Hood. Both sections have 'Choose all' and 'Remove all' buttons. The 'Chosen fully dependent tools' and 'Chosen partially dependent tools' sections are currently empty.

Figure 897 Resources add/edit page part 1

- Name – the name of the resource can be up to 200 characters (required).
- Category – drop down list used to group resources by similarity. *Resource categories table*
- Available – checkbox indicates whether the resource is available to be used.
- Fully dependent tools – These tools will be completely inoperable if the resource is unavailable. Hold down "Control", or "Command" on a Mac, to select more than one. *Tools table*

- Partially dependent tools – These tools depend on this resource but can operated at a reduced capacity if the resource is unavailable. Hold down "Control", or "Command" on a Mac, to select more than one. *Tools table*

Dependent areas:

Available dependent areas

Filter

Cleanroom
CMP lab

Choose all ✖

Remove all ✖

Users will not be able to login to these areas when the resource is unavailable. Hold down "Control", or "Command" on a Mac, to select more than one.

Restriction message:

The message that is displayed to users on the tool control page when this resource is unavailable.

Figure 898 Resources add/edit page part 2

- Dependent Areas – Users will not be able to login to these areas when the resource is unavailable. Hold down "Control", or "Command" on a Mac, to select more than one. *Areas table*
- Restriction message – The message that is displayed to users on the tool control page when this resource is unavailable.

37.36.4 User access page

Resources must be setup in this table view but are managed in the [Resources](#) page detailed on page 241.

37.37 Safety issues

37.37.1 Usage

The safety issues table maintains a list and status of all safety issues reported through the safety page. Normally this table will not need to be edited directly. The [safety](#) section is detailed starting on page 157.

37.37.2 Summary page

The summary page provides a listing of safety issues (Figure 899). Click the ID field in the row of interest to edit.

Figure 900 Safety issues add/edit page

- Reporter – drop down list select user who reported problem. (this is optional for anonymous reporting) *Users table*
- Location – text to report where the problem was observed. (required)
- Visible – checkbox, when unchecked, the issue is only visible to staff.
- Concern – narrative of safety issue found.
- Progress – narrative of actions in progress to address issue.
- Resolution – narrative of final action to address issue.
- Resolved – checkbox to indicate if the safety issue has been resolved.
- Resolver – drop down list select user who resolved the problem. *Users table*
- Creation time – information only, date/time issue was created.
- Resolution time – information only, date/time issue was resolved.

37.37.4 User access page

All safety functions are detailed in the [safety](#) section starting on page 157.

37.38 Scheduled outage categories

37.38.1 Usage

Scheduled outage categories are optional but can be useful for binning outages aiding in future analysis and trending. Scheduled outage categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no scheduled outage categories are defined, they are not displayed on the scheduled outages page. Scheduled outage categories are discussed in the [scheduled outages table](#) section detailed on page 453.

37.38.2 Summary page

The summary page provides a listing of scheduled outage categories (Figure 901). Click the name field in the row of interest to edit.

37.38.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 902). [Common features in detailed administration](#) is detailed on page 350.

Home > Nemo > Scheduled outage categories > Add scheduled outage category

Add scheduled outage category

Name:

Figure 902 Scheduled outage categories add/edit page

- Name – the name can be up to 200 characters (required).

37.38.4 User access page

There is no user access page for scheduled outage categories however, scheduled outage categories usage are discussed in the [scheduled outages table](#) section detailed on page 453.

37.39 Scheduled outages

37.39.1 Usage

Scheduled outages table records outages for tools, areas, and resources. A scheduled outage is a planned shutdown that triggers automatically at the designated time and will clear automatically at the designated end time. Scheduled outages are useful for planned activities such as gas bottle changes or tool maintenance that happens in a predictable way. Scheduled outages are created and maintained on the [calendar](#) which is detailed on page 63 and the [resource](#) pages which is detailed on page 241.

37.39.2 Summary page

The summary page provides a listing of scheduled outages (Figure 903). Click the id field in the row of interest to edit.

37.41.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 908). [Common features in detailed administration](#) is detailed on page 350.

Home > Nemo > Task categories > Facility problem

Change task category

Name:	Facility problem
Stage:	Completion ▾

Figure 908 Task categories add/edit page

- Name – the name can be up to 200 characters (required).
- Stage – drop down list select either initial or completion (required).

37.41.4 User access page

There is no user access page to create task categories however, task categories are discussed in the [Report a problem](#) tab of the Tool control page detailed on page 121.

37.42 Task statuses

37.42.1 Usage

Task statuses are optional but can be used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Task statuses, if used, must be created in this table view and number can be defined. If no task statuses are defined, they are not displayed on the tasks page. Task statuses are discussed in the [Report a problem](#) tab of the Tool control page detailed on page 121.

37.42.2 Summary page

The summary page provides a listing of task statuses (Figure 909). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing alert categories. At the top, there is a breadcrumb navigation: Home > Nemo > Alert categories. Below the header, a message says "Select alert category to change". On the right, there is a button labeled "ADD ALERT CATEGORY +". Underneath, there is a search bar with the placeholder "Action: -----" and a dropdown arrow, followed by a "Go" button and the text "0 of 3 selected". A table lists four alert categories, each with a checkbox next to it:

	NAME
<input type="checkbox"/>	Facility outage
<input type="checkbox"/>	Long PM
<input type="checkbox"/>	Site closure

At the bottom left of the table area, it says "3 Alert categories".

The add/change page for this table lists the fields that can be edited (Figure 910). [Common features in detailed administration](#) is detailed on page 350.

Home > Nemo > Alert categories > Add alert category

Add alert category

Name:

Figure 910 Task statuses add/edit page

- Name – the name can be up to 200 characters (required).

37.42.4 User access page

There is no user access page to create task statuses however, task statuses are discussed in the [Report a problem](#) tab of the Tool control page detailed on page 121.

37.43 Tasks

37.43.1 Usage

Tasks are used to track problems with tools statuses are optional but can be used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Task statuses, if used, must be created in this table view and number can be defined. If no task statuses are defined, they are not displayed on the tasks page. Task statuses are discussed in the [Report a problem](#) tab of the Tool control page detailed on page 121.

37.43.2 Summary page

The summary page provides a listing of tasks (Figure 911). Click the id field in the row of interest to edit.

ID	URGENCY	TOOL	CREATOR	CREATION TIME	PROBLEM CATEGORY
18	High	Chlorine Etch	Captain Nemo (captain)	Friday, June 5th, 2020 @ 2:41 PM	Process problem
17	High	Spinner	Captain Nemo (captain)	Wednesday, May 6th, 2020 @ 8:55 PM	Process problem
16	Normal	Fluorine Etch	Captain Nemo (captain)	Wednesday, May 6th, 2020 @ 8:54 PM	Tool Error
15	High	Contact Aligner	Ned Land (ned)	Monday, April 27th, 2020 @ 2:40 PM	Tool Error
14	Normal	Sputter	Captain Nemo (captain)	Friday, April 24th, 2020 @ 4:59 PM	Wafer handling problem
12	Normal	Chlorine Etch	Ned Land (ned)	Thursday, April 23rd, 2020 @ 6:58 PM	-
11	Normal	Sputter	Captain Nemo (captain)	Thursday, April 23rd, 2020 @ 6:50 PM	Process problem
10	Normal	Sputter	Ned Land (ned)	Thursday, April 23rd, 2020 @ 3:52 PM	Tool Error
9	High	Sputter	Ned Land (ned)	Thursday, April 23rd, 2020 @ 3:51 PM	Process problem

Figure 911 Task statuses summary page

37.43.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 912, Figure 913). [Common features in detailed administration](#) is detailed on page 350.

HISTORY

Change task

Urgency:

High

**Tool:**

Chlorine Etch

The tool that this task relates to.

 Force shutdown

Indicates that the tool this task relates to will be shutdown until the task is resolved.

 Safety hazard

Indicates that this task represents a safety hazard.

Creator:

Captain Nemo (captain)

The user who created the task.

Creation time:

Date:

06/05/2020

Today |

Time:

02:41 PM

Now |

The date and time when the task was created.

Problem category:

Process problem

**Problem description:**

The etch rate is nearly zero. Tried a conditioning run and the etch rate did not improve. No errors were noted during the runs.

Progress description:

On Friday, June 5th, 2020 @ 5:44 PM Captain Nemo (captain) updated this task:

Chamber clean completed. Found etch buildup in chamber that was likely suppressing the etch rate. Ready for testing.

Figure 912 Tasks add/edit page part 1

- Urgency – drop down list select high, medium, or low (required).
- Tool – drop down list select tool that the task relates to (required). *Tools table*
- Force shutdown – checkbox indicates that the tool this task relates to will be shut down until the task is resolved.
- Safety hazard – checkbox indicates that this task represents a safety hazard.
- Creator – drop down list select user that created the task. (required) *Users table*
- Creation time – date/time the task was created. (required)

- Problem category – drop down list select category if used. *Task categories table*
- Problem description – text description of initial problem.
- Progress description – text description of progress posted through updates.

Last updated:	Date: 06/05/2020	Today
	Time: 05:44 PM	Now
The last time this task was modified. (Creating the task does not count as modifying it.)		
Last updated by:	Captain Nemo (captain)	
The last user who modified this task. This should always be a staff member.		
Estimated resolution time:	Date: <input type="text"/>	Today
	Time: <input type="text"/>	Now
The estimated date and time that the task will be resolved.		
<input type="checkbox"/> Cancelled		
<input type="checkbox"/> Resolved		
Resolution time:	Date: <input type="text"/>	Today
	Time: <input type="text"/>	Now
The timestamp of when the task was marked complete or cancelled.		
Resolver:	-----	
The staff member who resolved the task.		
Resolution description:	<input type="text"/>	
Resolution category:	-----	

Figure 913 Tasks add/edit page part 2

- Last updated – date/time the task was last updated.
- Last updated by – drop down list select user that provided the last update. *Users table*
- Estimated resolution – date/time the problem is expected to be fixed.

- Cancelled – checkbox indicates that this task was cancelled.
- Resolved – checkbox indicates that this task was resolved.
- Resolution time – date/time the task was resolved.
- Resolver – drop down list select user that marked the problem resolved. *Users table*
- Resolution description – text description of steps taken to resolve the problem
- Resolution category – drop down list select category if used. *Task categories table*

37.43.4 User access page

Tasks are created and maintained in the [Report a problem](#) tab of the Tool control page detailed on page 121.

37.44 Temporary physical access requests

37.44.1 Usage

Temporary physical access requests are used so users can submit a request to obtain a physical access temporarily. For example, a user could request temporary access to the Cleanroom on a weekend when they don't otherwise have access. Access requests are discussed in the [access requests](#) page detailed on page 145.

37.44.2 Summary page

The summary page provides a listing of temporary physical access requests (Figure 914). Click the creator field in the row of interest to edit.

Action:	CREATOR	OTHER USERS	CREATION TIME	START TIME	END TIME	PHYSICAL ACCESS LEVEL

Figure 914 Temporary physical access requests summary page

37.44.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 915, Figure 916). [Common features in detailed administration](#) is detailed on page 350.

Home > Nemo > Temporary physical access requests > TemporaryPhysicalAccessRequest object (1)

Change temporary physical access request

Creator: Ned Land (ned) ▼ ✎ +

Last updated by: Ned Land (ned) ▼ ✎ + ✖
The last user who modified this request.

Physical access level: Cleanroom access ▼ ✎ +

Description:
The description of the request.

Start time: Date: 01/29/2022 Today ▼ 🕒
Time: 03:42 PM Now ▼ 🕒
The requested time for the access to start.

End time: Date: 01/30/2022 Today ▼ 🕒
Time: 03:43 PM Now ▼ 🕒
The requested time for the access to end.

Figure 915 Temporary physical access requests add/edit page part 1

- Creator – drop down list select user who created the request (required).
- Last updated by – drop down list select the user who last updated the record.
- Physical access level – drop down list select the physical access level that the user is requesting (required).
- Description – text description of the request.
- Start time – date/time the requested access should start (required).
- End time – date/time the requested access should end (required).

The screenshot shows a user interface for managing temporary physical access requests. On the left, under 'Other users:', there is a list titled 'Available other users' containing 'Captain Nemo (captain)' and 'Ned Land (ned)'. A 'Filter' input field is present. On the right, under 'Chosen other users', there is a list containing 'Pierre Aronnax (professor)'. Below these lists are two buttons: 'Choose all' and 'Remove all'. A note below the lists says: 'Select the other users requesting access. Hold down "Control", or "Command" on a Mac, to select more than one.' At the bottom, there are sections for 'Status:' (set to 'Pending'), 'Reviewer:' (a dropdown menu), and a checkbox for 'Deleted' which is unchecked. A note next to the checkbox says: 'Indicates the request has been deleted and won't be shown anymore.'

Figure 916 Temporary physical access requests add/edit page part 2

- Other users – select from available users and click the right arrow to add to chosen users. Multiple users can be selected at the same time using shift or control keys.
- Status – drop down list select the status of the request (required).
- Reviewer – drop down list select user who reviewed the request.
- Deleted – checkbox indicates that this request was deleted.

37.44.4 User access page

Access requests are created and maintained in the [access requests](#) page detailed on page 145.

37.45 Temporary physical access

37.45.1 Usage

Temporary physical access are used to temporarily give users access to an area.

37.45.2 Summary page

The summary page provides a listing of temporary physical access (Figure 917). Click the id field in the row of interest to edit.

Figure 918 Temporary physical access add/edit page

- User – drop down list select user who will have the access (required).
- Physical access level – drop down list select the physical access level to give the user (required).
- Start time – date/time the start time of the temporary access (required).
- End time – date/time the end time of the temporary access (required).

37.45.4 User access page

There is no user access page for Temporary physical access. However, they are created behind the scenes from the data in Temporary physical access request discussed in the [access requests](#) page detailed on page 145.

37.46 Tool usage counters

Tool usage counters are linked to numeric or float post usage questions and accumulate value with each tool logout based on the answer to the post usage question. This feature is useful for displaying how much a tool has been used, to track material usage, or to trigger preventative maintenance. Tool usage counters are displayed on the [tool control summary page](#) detailed on page 91.

37.46.1 Usage

The tool usage counters table lists each counter, the associated tool, the post usage question field, the current value, and last reset information. The tool usage counter must be created from this view.

- Tool usage counter setup
 - Prerequisites: the tool and a post usage question for that tool must exist.
 - Create tools and post usage questions for tools of interest in the [Detailed administration → Tools](#) table detailed starting on page 474.
 - For example, if we used the following post usage question on the “790 RIE Right” tool (Figure 919)

```
[  
 {  
     "type": "number",  
     "title": "How long did you etch?",  
     "max-width": 250,  
     "suffix": "minutes",  
     "required": true,  
     "default_choice": null,  
     "placeholder": 0,  
     "name": "etch_time"  
 }]  
]
```

Figure 919 Tool usage counter example post usage question

- Add a tool usage counter in the [Detailed administration → Tool usage counter](#) table in this section and save.
 - For example, if we create a tool usage counter based on the post usage question above:
 - **Name:** “Etch Time”
 - Description: “This is for the etch time in minutes.
PMs are performed every 100 minutes of use.”
 - NOTE: line breaks will be displayed on the tool summary page so limited formatting can be used to keep the page readable.
 - **Tool:** 790 RIE Right

- NOTE: selected from dropdown box.
- **Tool usage question: “etch_time”**
 - NOTE: “etch_time” is the name we gave the post usage question in the previous step. When saving, the post usage question name must be present, or an error will occur.
- When we log out of the 790 RIE Right tool, the following post usage question is displayed on the tool summary page before logout (Figure 920). The [Tool control → Summary](#) page is detailed starting on page 91.

The screenshot shows a user interface element for entering time. It consists of a text input field containing the placeholder text "How long did you etch?". To the right of the input field is a small rectangular button with the word "minutes" in it, which appears to be a dropdown menu or a unit selector.

Figure 920 Tool usage counter post usage input

- The counter is updated and displayed (Figure 921) on the [Tool control → Summary](#) page detailed starting on page 91.
If a warning threshold is set, the value will be green when it is less than the threshold, orange when it is equal to the threshold and red when the value is greater than the threshold.
 - NOTE: the reset button is only visible to staff.

The screenshot shows a tool usage counter display. On the left, it says "Etch Time: 100" next to a "Reset" button. To the right, there is a note in blue text: "This is for the etch time in minutes. PMs are performed every 100 minutes of use."

Figure 921 Tool usage counter display

37.46.2 Summary page

The summary page provides a listing of tool usage counters (Figure 922). Click the name field in the row of interest to edit.

The screenshot shows a summary page of tool usage counters. At the top, it says "Home > Nemo > Tool usage counters". Below that, it says "Select tool usage counter to change". There is a search bar with "Action: _____" and a "Go" button, followed by "0 of 2 selected". A table follows, with columns: NAME, TOOL, TOOL USAGE QUESTION, VALUE, WARNING THRESHOLD, LAST RESET, LAST RESET BY, and IS ACTIVE. Two rows are listed:

NAME	TOOL	TOOL USAGE QUESTION	VALUE	WARNING THRESHOLD	LAST RESET	LAST RESET BY	IS ACTIVE
Total etch time	790 RIE Right	etch_time	682.81	-	-	-	<input checked="" type="checkbox"/>
Etch Time	790 RIE Right	etch_time	534.81	510.0	Tuesday, December 1st, 2020 @ 4:48 PM	Jerry Bowser (jbowser)	<input checked="" type="checkbox"/>

At the bottom, it says "2 tool usage counters".

Figure 922 Tool usage counters summary page

37.46.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 923). [Common features in detailed administration](#) is detailed on page 350.

Change tool usage counter

Name:	<input type="text" value="Etch Time"/>	<small>The name of this counter</small>
Description:	<p>This is for the etch time in minutes. PMs are performed every 100 minutes of use.</p> <small>The counter description to be displayed next to it on the tool control page</small>	
Value:	<input type="text" value="534.81"/>	<small>The current value of this counter</small>
Tool:	<input type="text" value="790 RIE Right"/>	<small>The tool this counter is for.</small>
Tool usage question:	<input type="text" value="etch_time"/>	
Last reset value:	<input type="text" value="9.0"/>	
Last reset:	Date: <input type="text" value="12/01/2020"/>	Time: <input type="text" value="04:48 PM"/>

<input checked="" type="checkbox"/> Is active	<small>The state of the counter</small>	
Warning threshold reached:		

Figure 923 Tool usage counters add/edit page

- **Name** – the name of the counter. This name will be displayed on the tool summary page.
- **Description** – the counter description to be displayed next to the counter on the tool summary page.
- **Value** – the current value of the counter.
- **Tool** – the tool the counter is for. *Tools table*

- **Tool usage question** – the name of the post usage question used to increment the counter.
- Last reset value – the last value before the counter was last reset. When a counter is reset, a comment is also written for the associated tool that captures the last reset value, date, and who reset.
- Last reset – the date/time the counter was last reset.
- Last reset by – the user who last reset the counter.
- Warning threshold – the value which once reached will trigger an email to be sent to the warning email.
- Warning email – email address to send the tool usage counter threshold reached email to. For this feature to work, the counter_threshold_reached_email needs to be set in [Customization – Counter threshold reached email](#)
- Is active – checked indicates the counter is active and will be displayed on the tool summary page. Unchecked hides the counter.

37.47 Tools

37.47.1 Usage

The tools table lists each tool, its status, qualified users, usage rules, interlock information, reservation rules, and dependencies. While the attributes can be modified on various pages of NEMO, the tool must first be created from this view.

37.47.2 Summary page

The summary page provides a listing of tools (Figure 924). Click the name field in the row of interest to edit.

37.47.3 Fields

The add/change page for this table lists the fields that can be edited. [Common features in detailed administration](#) is detailed on page 350.

General Information (Figure 925)

- Name – text field of what the tool will be called throughout NEMO. (required)
- Parent tool – Select the parent tool from the dropdown list. If parent/child tools will be used, the child tools must identify which tool is the parent tool. If a parent tool is selected, the child tool will use all of the attributes of the parent tool except for the name. The parent/child tool relationship is useful when a single tool is used for multiple purposes that may be billed at different rates. For example, a dual beam focused ion beam tool may have one rate to use in SEM mode and another rate when used in FIB mode. *Tools table*
- Category – tools can be grouped together by location, type, or other grouping. These categories will be used to group tool in the calendar and tool control sidebars. Create sub-categories using slashes. For example, "Category 1/Sub-category 1". (required)
- Qualified users – select from available users and click the right arrow to add to chosen users. Multiple users can be selected at the same time using shift or control keys. Qualified users are managed on the users page, training page, or qualifications page. *Users table*

Figure 925 Tools general information

Post usage questions (Figure 926)

- Post usage questions – json formatted list can ask users for input at the end of their processes as either optional or required input using a radio button list, dropdown list, text entry (textbox or textarea), or numeric input (number or float). Only number inputs can trigger consumable purchases. The json script is validated when saving the tool record and error messages indicating format or missing required fields will be displayed. Responses to post usage questions are entered on the summary tab of the tool control page (page 106) and stored in the run data field of the usage events table as json formatted data (page 497). In addition, responses are displayed on the tool control page under usage data history detailed on page 118. Post usage questions can be configured so responses are either required or optional. In addition, questions can be grouped and repeated a configurable number of times to capture multiple processes in a single tool usage.

post usage questions:

```
[
  {
    "type": "number",
    "title": "How much gold was deposited?",
    "max-width": 250,
    "suffix": "nm",
    "required": true,
    "placeholder": "0",
    "name": "gold_used",
    "consumable": "Sputter gold"
  },
  {
    "type": "radio",
    "title": "Please rate your experience.",
    "choices": ["Great", "As expected", "Not terrible", "Disaster"],
    "name": "user_rating",
    "required": true,
    "default_choice": null
  },
  {
    "type": "textbox",
    "title": "Tell us about your run?",
    "name": "feedback",
    "max-width": 250,
    "required": true
  }
]
```

Upon logging off a tool, questions can be asked such as how much consumables were used by the user. This field will only accept JSON format

 - “**type**”: “dropdown”
 - “**title**”: title of the question (label)
 - “**name**”: name of the question for submit (unique)
 - “**max-width**”: max width of the input in px
 - “**required**”: whether the question is required. true or false
 - “**choices**”: list of choices enclosed in brackets
 - For example [“choice 1”, “choice 2”]
 - “**placeholder**”: input field placeholder, e.g. “Pick one”
 - “**title_html**”: html code to display instead of title
 - “**help**”: the question help text

```
[  
 {  
   "type": "dropdown",  
   "title": "What material did you etch?",  
   "placeholder": "Pick one",  
   "required": true,  
   "max-width": 250,  
   "choices": ["Silicon Oxide", "Silicon Nitride"],  
   "name": "etch_material"  
 }  
 ]
```

Figure 932 Tools post usage dropdown list example

- Group, allows creation of a group of questions that can be repeated. For example, when a user uses multiple processes on a tool, and we want to collect information about each one (Figure 933).
 - “**type**”: “group”
 - “**title**”: title of the group (label), use “\n” to force line breaks
 - “**name**”: name of the group for submit (unique)
 - “**max-number**”: maximum number of times the group of inputs can be repeated.
 - “**questions**”: list of questions, enclosed in brackets, to group together.
 - “**title_html**”: html code to display instead of title
 - “**group_add_button_name**”: name of “Add” button to display

```
[
{
  "type": "group",
  "title": "Tell us about the work you performed today.",
  "name": "group1",
  "max_number": 3,
  "questions": [
    {
      "type": "dropdown",
      "title": "What material did you etch?\n:",
      "placeholder": "Pick one",

      "name": "etch_notes"
    }
  ]
}
]
```

Figure 933 Tools post usage group example

- Post usage preview – after saving the tool record with post usage question json information, the post usage preview will display what users will see (Figure 934). This feature is useful for verifying the json input is correct and previewing the output. If there are errors in the json script, they will be indicated and suggestions to fix the issue will be given. The preview will show not valid if the required fields are not entered or in the specified range.

- Results in the initial display (Figure 936)

Tell us about the work you performed
Click add to enter up to 3 processes

What material did you etch?

Pick one

How long did you etch?

15 minutes

Add

The form is invalid

A screenshot of a web-based form. At the top, there is a text input field with placeholder text "Tell us about the work you performed" and a note below it saying "Click add to enter up to 3 processes". Below this is a horizontal line. The next section asks "What material did you etch?" with a dropdown menu containing "Pick one". Underneath is another section asking "How long did you etch?" with a text input field containing "15" and a dropdown menu containing "minutes". A blue "Add" button is located below the dropdown. At the bottom of the form is a red rectangular box containing the text "The form is invalid".

Figure 936 Tools post usage groups initial

- Entering required information makes the form valid (Figure 937)

Figure 940 Tools additional information

Current state (Figure 941)

- Visible – checkbox to indicate whether the tool is visible to users. If not checked, the tool will not be displayed on the calendar or tool control sidebars.
- Operational – checkbox to indicate whether the tool is available to users. The operational status is managed by the report a problem tab on the tool control page.

Current state

Visible
Specifies whether this tool is visible to users.

operational
Marking the tool non-operational will prevent users from using the tool.

Figure 941 Tools current state

Contact Information (Figure 942)

- Primary owner – select from the drop down list the staff member who is responsible for the administration of the tool. The primary owner is listed on the details tab of the tool control page. (required)
- Backup owners - select from available users and click the right arrow to add to chosen users. Multiple users can be selected at the same time using shift or control keys. The backup owners are listed on the details tab of the tool control page.

- Superusers – select from available users and click the right arrow to add to chosen superusers. Multiple users can be selected at the same time using shift or control keys. The superusers are listed on the details tab of the tool control page and have the ability to train users on tools they are listed as superusers for.
- Notification email address – in addition to the primary and backup tool owners, comments, problems, and shutdown notices will be forwarded to this email address.
- Location – a text descriptor to identify the tools location. The location is displayed on the details tab of the tool control page. In addition, the kiosk uses the location to group nearby tools. Since this is a free form text input, make sure locations across tools are consistently listed. (required)
- Phone number – a text listing of the phone number. No phone number formatting is performed so extensions can be used as well as full phone numbers. The phone number is displayed on the details tab of the tool control page. (required)

Usage policy (Figure 944)

- Policy off between times – Check this box to disable policy rules every day between the given times
- Policy off start time – The start time when policy rules should NOT be enforced
- Policy off end time – The end time when policy rules should NOT be enforced
- Policy off weekend – Whether or not policy rules should be enforced on weekends
- Minimum usage block time – The minimum amount of time (in minutes) that a user must reserve this tool for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this tool.
- Maximum usage block time – The maximum amount of time (in minutes) that a user may reserve this tool for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this tool.
- Maximum reservations per day – The maximum number of reservations a user may make per day for this tool.
- Minimum time between reservations – The minimum amount of time (in minutes) that the same user must have between any two reservations for this tool.
- Maximum future reservation time – The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

Usage policy

37.47.4 User access page

There is no user access page to create tools. However, once created, several parameters can be updated in NEMO pages.

- Qualified users are managed on the [users page](#) detailed starting on page 270, the [training page](#) detailed starting on page 266, or the [qualifications page](#) detailed starting on page 233.
- Most tool attributes are displayed on the [tool control pages](#) detailed starting on page 82.
- Reservation and usage policy are discussed in the [reservations section](#) detailed starting on page 49.
- Dependency status is updated on the [resources page](#) detailed starting on page 241.

37.48 Training sessions

37.48.1 Usage

The training sessions table records the time and type of training provided. It is updated directly from the training page and under normal situations this table should not need to be directly modified. If a facility charges for training, this table contains the training to be billed and duration.

37.48.2 Summary page

The summary page provides a listing of training sessions (Figure 948). Click the id field in the row of interest to edit.

- User – drop down list select the user using the tool. This is the person being billed. (required) *Users table*
- Operator – drop down list select the user using the tool. This is the person using the tool so it could be the user or a staff member on behalf of the user. (required) *Users table*
- Project – drop down list select the project to charge usage to. (required) *Projects table*
- Tool – drop down list select the tool in use. (required) *Tools table*
- Start – data/time the usage event started. (required)
- End – data/time the usage event ended. Active usage has a blank end date/time.
- Validated – checkbox indicates if the staff member confirmed the usage was correct. Only applies to tool run on behalf of another user.
- Run data – contains the answers to any post usage questions in json format.

37.49.4 User access page

Training sessions are maintained on the [training page](#) detailed on page 266.

37.50 User preferences

37.50.1 Usage

The user preferences table records the preferences for each user that are settable in NEMO. User preferences are automatically created and updated from the [user preference page](#) detailed on page 186.

37.50.2 Summary page

The summary page provides a listing of user preferences (Figure 952). Click the user field in the row of interest to edit.

The screenshot shows a web-based application interface for managing user preferences. The top navigation bar includes links for Home, Nemo, and User preferences. Below this, a heading says "Select User preferences to change". A toolbar contains an "Action:" dropdown menu, a "Go" button, and a status indicator showing "0 of 5 selected". A list of users is displayed with checkboxes next to their names. The users listed are: USER, Conseil Aronnax (conseil), Pierre Aronnax (professor), jerry bowser (jerry), Captain Nemo (captain), and Ned Land (ned). At the bottom of the list, it says "5 User preferences".

Figure 952 User preference summary page

37.50.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 953). [Common features in detailed administration](#) is detailed on page 350.

Home › Nemo › User preferences › UserPreferences object (5)

Change User preferences

Created_reservation_invite
Whether or not to send a calendar invitation when creating a new reservation

Cancelled_reservation_invite
Whether or not to send a calendar invitation when cancelling a reservation

Figure 953 User preference add/edit page

- **Created_reservation_invite** – checkbox indicates whether or not to send a calendar invitation when creating a new reservation
- **Cancelled_reservation_invite** – checkbox indicated whether or not to send a calendar invitation when cancelling a reservation

37.50.4 User access page

User preferences are automatically created and updated from the [user preference page](#) detailed on page 186.

37.51 User types

37.51.1 Usage

User types are optional but can be useful for binning users aiding in future analysis and trending. User types, if used, must be created in this table view and can be any text name. Any number can be defined. If no user types are defined, they are not displayed on the user page. User types are discussed in the [users page](#) detailed on page 270.

37.51.2 Summary page

The summary page provides a listing of user types (Figure 954). Click the name field in the row of interest to edit.

Action:	-----	Go	0 of 3 selected
<input checked="" type="checkbox"/>	NAME		
<input type="checkbox"/>	NEMO_Services		
<input type="checkbox"/>	Staff		
<input type="checkbox"/>	User		

Figure 954 User types summary page

37.51.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 955). [Common features in detailed administration](#) is detailed on page 350.

Home > Nemo > User types > NEMO_Services

Change user type

Name:

Figure 955 User types add/edit page

- Name – the name can be up to 200 characters (required).

37.51.4 User access page

There is no user access page to create user types however, user types are discussed in the [users page](#) detailed on page 270.

37.52 Users

37.52.1 Usage

The users table lists each user, their permissions, important dates, and qualifications. Users are created and maintained from the [users page](#) detailed on page 270. However, some attributes may be updated from other pages and some attributes may only be set directly from this page. If an attribute can be set from a page other than the users page, it will be noted in the field details below.

37.52.2 Summary page

The summary page provides a listing of tools (Figure 956). Click the name field in the row of interest to edit.

37.52.3 Fields

The add/change page for this table lists the fields that can be edited. [Common features in detailed administration](#) is detailed on page 350.

Personal Information (Figure 957)

- First name – text field of the user's first name. (required)
- Last name – text field of the user's last name. (required)
- Username – text field of the user's username. This is the name the user authenticates with. (required)

- Email address – text field of the users email address. NEMO uses emails to provide useful updates and information to users. (required)
- Badge number – the badge number associated with this user. This field must correctly correspond to a user in order for the entrance tablet and kiosk systems to work properly.
- Type – drop down list select user type from list. This is an informational user type for grouping users for future data analysis.
- Domain – If the identity service is being used to validate users against multiple domains, enter the active directory domain that the account resides on. Not needed for single domain implementations.

Home > Nemo > Users > Captain Nemo (captain)

Change user

HISTORY

Personal information

First name:	Captain
Last name:	Nemo
Username:	captain
Email address:	captain.nemo@nautilus.com
Badge number:	12
The badge number associated with this user. This number must correctly correspond to a user in order for the tablet-login system (in the lobby) to work properly.	
Type:	----- <input type="button" value="▼"/> <input type="button" value="✎"/> <input type="button" value="+"/> <input type="button" value="✖"/>
Domain:	
The Active Directory domain that the account resides on	

Figure 957 Users personal information

Permissions (Figure 958)

- Active – checkbox designates whether this user can log in. Unselect this instead of deleting accounts.
- Staff – checkbox designates whether the user can log into this admin site. Can only be changed from this page.

- Facility manager – checkbox designates the facility manager(s). When checked, users will receive task status updates and will be able to approve/deny access requests. Can only be changed from this page.
- Technician – checkbox specifies how to bill staff time for this user. When checked, customers are billed at technician rates. Can only be changed from this page.
- Service personnel – checkbox designates this user as service personnel. Service personnel can operate qualified tools without a reservation even when they are shutdown or during an outage and can access authorized areas without a reservation. Can only be changed from this page.
- Administrator – checkbox designates that this user has all permissions without explicitly assigning them. Can only be changed from this page.
- Training required – checkbox when selected, the user is blocked from all reservation and tool usage capabilities.

Permissions	
<input checked="" type="checkbox"/>	Active Designates whether this user can log in. Unselect this instead of deleting accounts.
<input checked="" type="checkbox"/>	Staff Designates whether the user can log into this admin site.
<input type="checkbox"/>	Facility manager Designates this user as facility manager. Facility managers receive updates on all reported problems in the facility and can also review access requests.
<input checked="" type="checkbox"/>	Technician Specifies how to bill staff time for this user. When checked, customers are billed at technician rates.
<input type="checkbox"/>	Service personnel Designates this user as service personnel. Service personnel can operate qualified tools without a reservation even when they are shutdown or during an outage and can access authorized areas without a reservation.
<input type="checkbox"/>	Administrator Designates that this user has all permissions without explicitly assigning them.
<input type="checkbox"/>	Training required When selected, the user is blocked from all reservation and tool usage capabilities.

Figure 958 Users permissions

Additional Permissions (Figure 959)

- Groups – groups can be used to list common user permissions into a single item to make assignment easier. Select from available groups and click the right arrow to add to chosen groups. Multiple groups can be selected at the same time using shift or control keys. Groups can be created from the detailed administration groups page. Normally, groups do not need to be assigned to users. Can only be changed from this page.
- User permissions – user permissions pertain to either detailed administration access or behind the scenes activity such as doors and kiosks. Select from available user permissions and click the right arrow to add to chosen user permissions. Multiple user permissions can be selected at the same time using shift or control keys. Normally, user permissions do not need to be assigned to users. Can only be changed from this page.
- Physical access levels – physical access levels determine what area access a user has and when. Select from available physical access levels and click the right arrow to add to

chosen physical access levels. Multiple physical access levels can be selected at the same time using shift or control keys. *Physical access levels table*

The screenshot shows a user interface for managing permissions. It is divided into two main sections: "User permissions" and "Physical access levels".

User permissions: This section has a header "Available user permissions" with a "Filter" input field. Below it is a list of permissions, many of which begin with "NEMO |". The list includes:

- NEMO | activity history | Can delete activity history
- NEMO | activity history | Can view activity history
- NEMO | alert | Can add alert
- NEMO | alert | Can change alert
- NEMO | alert | Can delete alert
- NEMO | alert | Can view alert
- NEMO | alert category | Can add alert category
- NEMO | alert category | Can change alert category
- NEMO | alert category | Can delete alert category
- NEMO | alert category | Can view alert category
- NEMO | area | Can add area
- NEMO | area | Can change area
- NEMO | area | Can delete area

At the bottom of this section are "Choose all" and "Remove all" buttons.

Physical access levels: This section has a header "Available physical access levels" with a "Filter" input field. Below it is a list of access levels, also starting with "NEMO |". The list includes:

- CMP Anytime
- Cleanroom anytime
- Cleanroom normal business hours

At the bottom of this section are "Choose all" and "Remove all" buttons.

Figure 959 Users additional permissions

Important Dates (Figure 960)

- Date joined – date/time the user record was created. This field is automatically set and should not be changed.
- Last login – date/time the user last authenticated into NEMO. This field is automatically set and should not be changed.
- Access expiration – date/time the user will lose all access rights. Typically, this is used to ensure that safety training has been completed by the user every year and that users don't have perpetual access.

Important dates		
Date joined:	Date: 12/10/2012	Today
	Time: 11:43 AM	Now
Last login:	Date: 09/21/2020	Today
	Time: 11:50 AM	Now
Access expiration:	04/09/2021	Today
The user will lose all access rights after this date. Typically this is used to ensure that safety training has been completed by the user every year.		

Figure 960 Users important dates

Facility Information (Figure 961 & Figure 962)

- Qualifications – select from available tool qualifications and click the right arrow to add to chosen tool qualifications. Multiple tool qualifications can be selected at the same time using shift or control keys.
- Backup owner on tools – select from available tools and click the right arrow to add the chosen tool. Multiple tools can be selected at the same time using shift or control keys.
- Superuser on tools – select from available tools and click the right arrow to add the chosen tool. Multiple tools can be selected at the same time using shift or control keys.
- Projects - select from available projects and click the right arrow to add to chosen projects. Multiple projects can be selected at the same time using shift or control keys.
- Managed projects - select from available projects and click the right arrow to add to chosen projects. Multiple projects can be selected at the same time using shift or control keys.

Figure 961 Users facility information

Figure 962 Users facility information (continued)

37.52.4 User access page

Users are created and maintained from the [users page](#) detailed on page 270 or directly in this table view. The permissions that give elevated user status are only settable or updateable in this table view.

Once created, some parameters can be updated in NEMO pages other than the users page.

- Qualified users can also be managed on the [training page](#) detailed starting on page 266, or the [qualifications page](#) detailed starting on page 233.
- Projects can also be managed in the [Accounts and projects](#) section detailed on page 191.

38 API access

38.1 Usage

- The API base access page is accessible in the Administration menu under API. A list of available data tables will be displayed (Figure 963).
- Several tables are available through the API
 - accounts: "site-address /api/accounts/",
 - area_access_records: "site-address /api/area_access_records/",
 - areas: "site-address /api/areas/",
 - billing: "site-address /api/billing/",
 - The billing information is discussed in a separate later in this section.
 - projects: "site-address /api/projects/",
 - reservations: "site-address /api/reservations/",
 - resources: "site-address /api/resources/",
 - scheduled_outages: "site-address /api/scheduled_outages/",
 - staff_charges: "site-address /api/staff_charges/",
 - tasks: "site-address /api/tasks/",
 - tools: "site-address /api/tools/",
 - training_sessions: "site-address /api/training_sessions/",
 - usage_events: "site-address /api/usage_events/",
 - users: "site-address/api/users/"

The screenshot shows a web browser displaying the API access root. The title bar says "Api Root". Below it, a message says "The default basic root view for DefaultRouter". There are two buttons: "OPTIONS" and "GET". The main content area shows a JSON object representing various API endpoints:

```
HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

{
  "accounts": "http://localhost:8005/api/accounts/",
  "area_access_records": "http://localhost:8005/api/area_access_records/",
  "areas": "http://localhost:8005/api/areas/",
  "billing": "http://localhost:8005/api/billing/",
  "projects": "http://localhost:8005/api/projects/",
  "reservations": "http://localhost:8005/api/reservations/",
  "resources": "http://localhost:8005/api/resources/",
  "scheduled_outages": "http://localhost:8005/api/scheduled_outages/",
  "staff_charges": "http://localhost:8005/api/staff_charges/",
  "tasks": "http://localhost:8005/api/tasks/",
  "tools": "http://localhost:8005/api/tools/",
  "training_sessions": "http://localhost:8005/api/training_sessions/",
  "usage_events": "http://localhost:8005/api/usage_events/",
  "users": "http://localhost:8005/api/users/",
  "custom_charges": "http://localhost:8005/api/custom_charges/",
  "rates": "http://localhost:8005/api/rates/",
  "rate_types": "http://localhost:8005/api/rate_types/",
  "billing_data": "http://localhost:8005/api/billing_data/"
}
```

Figure 963 API access root

- Directly enter the web address or click on the address link of any table to access the data (Figure 964). The example below was reached with the address “site-address/api/users/”

Django REST framework Captain Nemo (captain)

Api Root / User List

User List

GET /api/users/

HTTP 200 OK
 Allow: GET, HEAD, OPTIONS
 Content-Type: application/json
 Vary: Accept

```
{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 1,
      "first_name": "Captain",
      "last_name": "Nemo",
      "username": "captain",
      "email": "captain.nemo@nautilus.com",
      "date_joined": "2012-12-10T11:43:37-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": true,
      "is_superuser": true,
      "is_technician": false,
      "is_service_personnel": false
    },
    {
      "id": 3,
      "first_name": "Ned",
      ...
    }
  ]
}
```

Figure 964 API access example data list view

- To remove all formatting and convert the data to a json output stream, add the parameter “format=json” or select the drop down in the top right corner then select json from the list (Figure 965).

Figure 965 API access change to json view

- The page output will now be in json format which can be parsed in many external software packages for analysis or billing (Figure 966). The example below was reached with the address “site-address/api/users/?format=json”

```
{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 1,
      "first_name": "Captain",
      "last_name": "Nemo",
      "username": "captain",
      "email": "captain.nemo@nautilus.com",
      "date_joined": "2012-12-10T11:43:37-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": true,
      "is_superuser": true,
      "is_technician": false,
      "is_service_personnel": false
    },
    {
      "id": 3,
      "first_name": "Ned",
      "last_name": "Land",
      "username": "ned",
      "email": "ned.land@nautilus.com",
      "date_joined": "2012-12-10T11:49:38-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": false,
      "is_superuser": false,
      "is_technician": false,
      "is_service_personnel": false
    },
    {
      "id": 2,
      "first_name": "Pierre",
      "last_name": "Aronnax",
      "username": "professor",
      "email": "pierre.aronnax@nautilus.com",
      "date_joined": "2012-12-10T11:48:43-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": false,
      "is_superuser": false,
      "is_technician": false,
      "is_service_personnel": false
    }
  ]
}
```

Figure 966 API access example data json view

38.2 Special parameters

The “expand” parameter can be used to request fully nested object in the response. For example, this is the view without expand. “site-address/api/projects/” (Figure 967)

```

HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 1,
      "name": "Cleanroom Eng",
      "application_identifier": "PROJ.2019.02",
      "start_date": null,
      "active": true,
      "allow_consumable_withdrawals": true,
      "account": 1,
      "only_allow_tools": []
    },
    ...
  ]
}

```

Figure 967 API access example projects

And this is an example with expand. “<http://localhost:8005/api/projects/?expand=account>” (Figure 968)

Django REST framework Captain Nemo (captain)

Api Root / Project List

Project List

GET /api/projects/?expand=account

HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

```
{
    "count": 3,
    "next": null,
    "previous": null,
    "results": [
        {
            "id": 1,
            "name": "Cleanroom Eng",
            "application_identifier": "PROJ.2019.02",
            "start_date": null,
            "active": true,
            "allow_consumable_withdrawals": true,
            "account": {
                "id": 1,
                "name": "Cleanroom Staff",
                "start_date": null,
                "active": true,
                "type": null
            },
            "only_allow_tools": []
        }
    ]
}
```

Figure 968 API access example projects with expand

The parameter “fields” can be used to select specific fields to be retrieved. For example “site-address/api/projects/?fields=name” will only retrieve the name of the projects (Figure 969)

Django REST framework Captain Nemo (captain)

Api Root / Project List

Project List

GET /api/projects/?fields=name

HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

```
{
    "count": 3,
    "next": null,
    "previous": null,
    "results": [
        {
            "name": "Cleanroom Eng"
        },
        {
            "name": "Project 2"
        },
        {
            "name": "Project 3"
        }
    ]
}
```

Figure 969 API access example projects with fields

Using the same syntax, “?omit=name” can be used to retrieve all fields except “name” (Figure 970)

The screenshot shows the Django REST framework's browsable API interface. At the top, it says "Django REST framework" and "Captain Nemo (captain)". Below that, it shows the URL "Api Root / Project List". On the right, there are buttons for "Filters", "OPTIONS", and "GET". The main content area displays the response to a GET request with "?omit=name". The response is as follows:

```
HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

{
    "count": 3,
    "next": null,
    "previous": null,
    "results": [
        {
            "id": 1,
            "application_identifier": "PROJ.2019.02",
            "start_date": null,
            "active": true,
            "allow_consumable_withdrawals": true,
            "account": 1,
            "only_allow_tools": []
        }
    ]
}
```

Figure 970 API access example projects with omit

38.3 Export formats

The API data can be exported in 2 different formats: JSON and XLSX.

JSON export format is enabled out of the box, however the XLSX format is not.

To enable XLSX format, the following setting must be used in the REST_FRAMEWORK section of the setting.py file:

```
'DEFAULT_RENDERER_CLASSES': ['rest_framework.renderers.JSONRenderer',
'rest_framework.renderers.BrowsableAPIRenderer',
'drf_renderer_xlsx.renderers.XLSXRenderer'],
```

38.4 Date/Time formats

The default date/time formats which are used to format date and times in the API can be set in the REST_FRAMEWORK section of the settings.py file, for example:

```
'DATETIME_FORMAT': '%m-%d-%Y %H:%M:%S',
'DATE_FORMAT': '%m-%d-%Y',
'TIME_FORMAT': '%H:%M:%S',
```

38.5 Access Errors

If an error is received, the user may not have permission to access the API interface (Figure 971). Users accessing the API must have either superuser status or have the “Can use billing API” permission.

Figure 971 API access permission error

The authentication class must be set for the method you plan to access the API, or you will receive an error (Figure 972). To use token authentication which is the easiest way for a program to retrieve data, the following setting must be used in the REST_FRAMEWORK section of the setting.py: 'DEFAULT_AUTHENTICATION_CLASSES': ('rest_framework.authentication.TokenAuthentication'). Then, a token must be created for the user that will access the API. When token authentication is enabled, tokens can be created in the detailed administration tokens table.

To allow web address access, add ('rest_framework.authentication.SessionAuthentication') to the authentication class tuple.

Figure 972 API access authentication error

38.6 Billing information

Billing information can be directly accessed in a date range through the billing API. The billing API requires a start date (start) and end date (end) to be passed as arguments.

Valid parameters are:

- **start** (required): date in format MM/DD/YYYY
- **end** (required): date in format MM/DD/YYYY
- **username**: username of a user to get billing for
- **account_name**: name of the account to get billing for
- **account_id**: id of the account to get billing for
- **project_name**: name of the project to get billing for
- **project_id**: id of the project to get billing for
- NOTE: If valid start and end dates are not given, an error will be returned (Figure 973).

39 Kiosk

Kiosks provide a quick and convenient way for users to access tools and reservations. The kiosk can run on any device with web access but requires a card reader and NEMO user with permission to act as a kiosk.

39.1 Setup

The use of a kiosk tablet requires a tablet or computer configured to interface with NEMO and send the appropriate messages.

39.1.1 Kiosk user

A dedicated NEMO user should be setup for kiosk tablets. That user must have the following permissions which are set in the users table of the database:

- NEMO|user|Kiosk services

39.1.2 Card reader

The kiosk tablet uses a badge reader to identify the user. Usually, an identity card that users of the facility already have can be utilized, but there are also tokens that can be used. NEMO defaults to expecting the F2 character to start recording the badge number and another F2 character to end and submit the badge number similar to what is provided by a pcProx Plus card reader (Figure 976). NIST does not endorse this product but the information is provided as an example of the type of reader that can be used.

Figure 976 Kiosk card reader example

If your card reader uses different characters, a custom badge reader configuration can be setup in the [badge reader table](#) detailed starting on page 376.

Once the card reader is setup, it can be tested by opening notepad or other computer text editor software then scan a badge. A serial number should be seen (Figure 977).

Figure 977 Kiosk card reader test example

39.1.3 User setup

Now that the card reader is setup, each user needs to have their badge number entered into their user profile. This is easily accomplished by setting up a card reader on a computer that has access to NEMO by a staff member. Then follow these steps:

- Navigate to the Administration → Users page (Figure 978)

Figure 978 Kiosk card reader users page

- Enter the user name of interest and click their name when it appears or create a new user if needed (Figure 979).

Figure 979 Kiosk user name

- Click in the badge number dialog box and ensure there are no characters already entered (Figure 980).

A screenshot of the 'Modify user' form. The user details are as follows:

- First name: Captain
- Last name: Nemo
- User name: captain
- E-mail address: captain.nemo@nautilus.com
- Type: (dropdown menu)
- Badge number: (empty input field)
- Access expiration: 04/09/2021, One year from now

Figure 980 Kiosk update user

- Then, scan the users badge. The badge number will fill in and the user dialog will close (Figure 981).

- Once the kiosk tablet is confirmed to be operational, repeat the badge update for all users.

39.1.4 Web page

The list of kiosk locations can be found on the kiosk summary page, site-address/kiosk/ (Figure 983). The list is enumerated from the location field in the tool table. Since the field is a text input, it is important to make how locations are entered consistent (e.g. cleanroom is not the same as Cleanroom). This location is important for capturing near-by tools.

Kiosk locations

- Clicking a tool category on the main page will open the tool selection page for the selected category (Figure 994).
 - Icons are displayed next to each tool to provide status information. [Tool status icons](#) are described on page 84.
 - Click the tool button to open the tool detail page for the selected tool.
 - Click the 'Go back' button to return to the main page.
 - The page will revert to the idle screen after 60 seconds of no activity.

Figure 994 Kiosk tool selection

39.2.3 Tool detail

- Tool usage features are the same as the mobile view tool control features and are detailed in the [tool control section](#) starting on page 129.
- Tool reservation features are the same as the mobile view reservation features and are detailed in the [reservations section](#) starting on page 75.
- The tool detail page provides the tool status and buttons to use the tool and to reserve the tool (Figure 995).

Figure 995 Kiosk tool detail idle tool

- If a tool is currently in use, usage information, a stop usage button, and a make reservation button are provided (Figure 996).

Figure 996 Kiosk tool detail tool in use

- If the tool has numeric input post usage questions configured (Figure 997), clicking in the dialog box will open a keypad for the user to enter the response (Figure 998).

The dialog box is titled "Post usage questions" and contains the following text:
Tell us about the work you performed
Click add to enter up to 3 processes

Below this, there are two questions:
What material did you etch?
How long did you etch?

For the etching material question, there is a dropdown menu labeled "Pick one".
For the etching time question, there is a text input field followed by a unit selector labeled "minutes".
At the bottom left is a "Add" button.

Figure 997 Kiosk post usage questions

Figure 998 Kiosk post usage question and delayed logout numeric input keypad

- If the tool has delayed logout configured, clicking in the dialog box will open a keypad for the user to enter the delay time to prevent other users login (Figure 999).

Delayed logoff

Use the following field to prevent others from using the tool for minutes after disabling the tool. [What's this?](#)

Figure 999 Kiosk delayed logout dialog

- If a user clicks on a tool they are not qualified to use, information about how to get trained is provided (Figure 1000).

The dialog shows a yellow 'Go back' button at the top right. Below it is the tool name 'PECVD'. A green checkmark icon followed by the text 'This tool is **operational** and **idle**' is displayed. A message states: 'You have not been qualified to use this tool yet. Please contact the primary tool owner, Captain Nemo (captain), if you would like to receive training for tool qualification.' It also says: 'If you are unable to reach Captain Nemo (captain) then please contact one of the backup tool owners:' followed by a bulleted list: '• Staff Cleanroom (staff)' and '• Tech Cleanroom (tech)'.

Figure 1000 Kiosk tool detail not qualified for tool

40 Entrance tablet

The entrance tablets are used to provide an interface for users to access the lab and choose the appropriate project to bill lab time against. Entrance tablets are associated with door that have been defined in the doors table of the database. This method allows multiple entrance and exit tablets to be associated with one area but multiple doors and locks. Tablets or computers can be configured to allow users to sign into an area and open the door (entrance tablet) as well as sign them out when they leave (exit tablet).

40.1 Setup

The use of an entrance or exit tablet requires a door that is tied to an interlock that will unlock a door and an entrance tablet configured to interface with NEMO and send the appropriate messages.

40.1.1 Door setup

Doors are setup in the [doors table](#) of the database detailed on page 404. The doors table associates areas with interlocks.

[Physical access levels](#) must be established to provide users with a time schedule that they can access a door and are detailed on page 426. Users are given physical access level permission on the users page.

Areas are created in the [areas table](#) of the database detailed on page 370 and are used to group tools into common spaces. When a tool is located in an area, the requires area access field in the tools table for the tool of interest should be updated to require the active area access. This will prevent users enabling or disabling the tool unless they are currently logged into the area.

Interlocks are created in the [interlocks table](#) detailed on page 413. An interlock must be associated with an interlock card which are created in the interlocks card table.

40.1.2 Entrance tablet user

A dedicated user should be setup for entrance tablets. That user must have the following permissions which are set in the users table of the database:

- NEMO|area access record|Can add area access record
- NEMO|area access record|Can change area access record

40.1.3 Card reader

The entrance tablet uses a badge reader to identify the user. Usually an identity card that users of the facility already have can be utilized, but there are also tokens that can be used. NEMO defaults to expecting the F2 character to start recording the badge number and another F2 character to end and submit the badge number similar to what is provided by a pcProx Plus

card reader (Figure 1001). NIST does not endorse this product but the information is provided as an example of the type of reader that can be used.

Figure 1001 Entrance tablet card reader example

If your card reader uses different characters, a custom badge reader configuration can be setup in the [badge reader table](#) detailed starting on page 376.

Once the card reader is setup, it can be tested by opening notepad or other computer text editor software then scan a badge. A serial number should be seen (Figure 1002).

Figure 1002 Entrance tablet card reader test example

40.1.4 User setup

Now that the door and card reader are setup, each user needs to have their badge number entered into their user profile and be given permission to access the door. This is easily

accomplished by setting up a card reader on a computer that has access to NEMO by a staff member. Then follow these steps:

- Navigate to the Administration → Users page (Figure 1003)

Figure 1003 Entrance tablet card reader users page

- Enter the user name of interest and click their name when it appears or create a new user if needed (Figure 1004).

Figure 1004 Entrance tablet user name

- Scroll down and update the physical access level for the user (Figure 1005). Note: staff and super users may already have access by default if the physical access level was set up to allow staff access. In that case, the checkboxes will be checked but greyed out.

Figure 1005 Entrance tablet physical access

- Click in the badge number dialog box and ensure there are no characters already entered (Figure 1006).

- If the occupancy parameter is set for the area (e.g. site-address/farewell_screen/1/?occupancy=Cleanroom), occupancy will be displayed as well (Figure 1029).

Scan your badge to log out of the Cleanroom.

Staff members are highlighted in green.

Service personnel are highlighted in orange.

Users with expired reservations are highlighted in red.

Cleanroom		1 / 3 people (+ 2 staff and 1 service personnel)
User	Since	Working on project...
Ned Land	Friday @ 10:08 AM	Project 1
Captain Nemo	Friday @ 9:30 AM	Cleanroom Maint
Tech Cleanroom	Thursday @ 5:58 PM	Cleanroom Maint
Staff Cleanroom	Thursday @ 5:58 PM	Cleanroom Eng

Figure 1029 Exit tablet farewell screen with area occupancy

- Scan your badge at the card reader to begin the log out process.
 - Each time a badge is scanned, the badge number is displayed on the screen greyed out (Figure 1030). This is useful when determining why a user's badge isn't working properly.

Figure 1030 Exit tablet badge scan

- If the user is a staff member and was logged in on behalf of another user, they will be automatically logged out as well.
- If the user is still logged into a tool in the area, a warning is displayed on an orange background along with a list of tools the user is currently logged into, and the user is logged out of the area (Figure 1031).

11:07 AM

You're now logged out of the Cleanroom,
Ned.

You are currently still logged in to the following tools:

- Sputter

41 Configuring NEMO

41.1 Configuring NEMO Settings

NEMO settings are maintained in the settings.py file. Additional information about the settings including examples is available on the NEMO GitHub site at www.github.com/usnistgov/NEMO

41.1.1 Authentication Backends

The AUTHENTICATION_BACKENDS key is used to select between a decoupled “REMOTE_USER” method such as Kerberos from a reverse proxy and LDAP authentication from NEMO itself.

41.1.2 Templates

The context processors in the templates section of settings.py determines if the logout button is displayed or not. Uncomment the desired processor.

'NEMO.context_processors.hide_logout_button', will hide the logout button on the navigation bar.

'NEMO.context_processors.show_logout_button', will show the logout button on the navigation bar.

41.1.3 Lab Managers

Lab managers can be defined in the settings.py file and will receive all shutdown and progress notices posted for tools.

41.2 Identity service

The identity service can be used to connect to external resources such as billing systems or access control systems. The identity service requires the user to create an intermediary service to act as a go between for NEMO and the service.

41.3 NEMO Timed Services

A few features require periodically polling NEMO to trigger events which can be done in two ways, by web request or management command.

41.3.1 Web request

The user that connects must have the ‘NEMO|user|Can trigger timed services’ permission or the connection will be refused. Make a GET request to trigger the service.

- Email usage reminders – typically run every hour, site-address/email_usage_reminders/
- Reservation reminders – typically run every 15 minutes, site-address/email_reservation_reminders/
- Reservation ending reminders – typically runs every 15 minutes, site-address/email_reservation-ending_reminders

- Missed reservations – typically run every minute, site-address/cancel_unused_reservations/
- Out of time – typically run every minute, site-address/email_out_of_time_reservation_notification/
- Weekend access – typically runs every hour, site-address/email_weekend_access_notification

41.3.2 Management command

Management commands can be run directly on the NEMO server and eliminate the authentication and http overhead. Run the required service using “python manage.py service name” or “django-admin service name”.

- Email usage reminders – typically runs every hour, send_email_usage_reminders
- Reservation reminders – typically runs every 15 minutes, send_email_reservation_reminders
- Reservation ending reminders – typically runs every 15 minutes, send_email_reservation_ending_reminders
- Missed reservations – typically runs every minute, cancel_unused_reservations
- Out of time – typically runs every minute, send_email_out_of_time_reservation_notification
- Weekend access – typically runs every hour, send_email_weekend_access_notification

For example, to process missed reservations, run: “python manage.py cancel_unused_reservations” or “django-admin cancel_unused_reservations”

41.3.3 Email logging

All emails sent by NEMO are logged for audit purposes and accessible in the detailed administration. If you are a developer, make sure to use the `send_email` function available in `utilities.py` to benefit from this feature.

42 NEMO Release notes

42.1 [Release 3.14.0](#)

42.1.1 Upgrade Notes

- NEMO now requires Python 3.7 since security support for 3.6 ended last month.
- The LAB_MANAGERS list in settings.py has been replaced by a permission on users called is_facility_manager. If you were using the LAB_MANAGERS setting, go to Detailed Administration -> Users and set the facility managers there after updating NEMO. Also please note that you need at least one facility manager to enable the new Access request feature.
- The qualified checkbox is now enabled by default when recording training sessions. Make sure to double check before confirming.
- The access request weekend access feature (more on this below) requires a cron job to be set hourly, calling docker exec -it nemo django-admin send_email_weekend_access_notification or sending a request to /email_weekend_access_notification

42.1.2 New Features

- Added temporary access. This allows admins to give users access for a limited time. For example, giving someone weekend cleanroom access for one weekend. It is available through in Detailed Administration only.
- Added user access requests:
 - Grouping Access Requests and Buddy Requests under one common "Requests" menu item.
 - Access requests (after-hours requests) need to be enabled by checking the "allow user request" box on a "Physical Access Level" in Detailed administration and by setting at least one Facility manager.
 - Added customizations for tab title, description message, minimum number of buddies, maximum number of requests to display, and weekend access emails and cutoff day and time (more on this below)
 - Once enabled, users can submit access requests by selecting a start and end time, an access level (if multiple are enabled) and a list of buddies. Facility managers (see below) are then notified and can approve/deny the request in NEMO. Upon approval, a corresponding temporary access will be created for all users in the request.
 - The request creator and buddies will receive a confirmation email, and buddies/facility managers will have a notification badge in NEMO on the requests tab indicating there is something new.
 - Facility managers can approve/deny a request and have the opportunity to update it before approving. This allows them to change the dates, update the description etc. before approving. This is useful if for example the request can only be approved for one day due to lack of staff on the second day, etc.

- A "weekend access" customizable email can be sent to a list of emails set in customization on the cutoff day and time set. If the email template is set, the email will be sent the within an hour of the first approved request that includes weekend time with a `weekend_access` value of True. If no access requests that include weekend time are approved by the cutoff day and time, the same email will be sent with a `weekend_access` value of false. The latter will not be sent if the cutoff day and time is not set.
- Added the facility manager role in Detailed administration -> Users to replace the `LAB_MANAGERS` settings. Facility managers receive all tasks related updates and approve/deny access requests.
- Added "Charge note". This is a text area field that can be set and updated after creating a Staff Charge. It will be displayed in "My usage", "Project billing" and "Remote work" pages as well as in the API.
- The project selection name can now be customized in the "Customization" page. It will use the Django templating engine, allowing the use of things like "`{{ project.account.name }} - {{ project.name }}`" which would display the account name followed by the project name. This is limited to project selection lists (in reservations, logging in an area, kiosk etc.)
- A standalone reservation view was added for linking from outside of NEMO, available at `/event_details/reservation/<reservation_id>/`. Thanks @jat255 for the contribution!
- Email templates to be used in customizations were added in the resources folder. Feel free to adapt them to your needs.

42.1.3 Improvements

- Date and time formats have been made more consistent across NEMO and follow django's format from `settings.py` instead of being hardcoded in certain places. Make sure `DATETIME_FORMAT`, `SHORT_DATETIME_FORMAT`, `DATE_FORMAT`, `SHORT_DATE_FORMAT` and `TIME_FORMAT` are set to your liking in `settings.py` otherwise Django's default will be used.
- Added an `EXPORT_DATE_FORMAT` and `EXPORT_TIME_FORMAT` to `settings.py` to allow a custom format to be used in filenames when exporting (in API, My Usage, Tool Usage Data etc.). If not set, they will default to "`m_d_Y`" and "`h_i_s`" respectively.
- Supplies/consumables withdrawals are now allowed in group post usage questions.
- Project information can now be shown and exported in "Tool Usage Data History" through a checkbox (unchecked by default).
- The qualified checkbox when recording a training session is now checked by default.
- Fixed styling issues in the Email logs feature in the detailed administration, and also updated Customization to open the content preview in a separate tab.

42.1.4 Bug fixes

- Fixed a bug dating back to 2018 in custom task status using `primary_tool_owner` instead of `primary_owner`. Thanks @rmwhite85 for noticing!
- Fixed a bug when exporting usage where it would use UTC dates in the CSV file.

- Fixed a bug when user having back-to-back reservations would have one of them marked as missed when they were in fact already logged in to the area (from the prior reservation).
- Updated the misleading message when selecting projects for reservation. It will now only mention missed reservation fees if the missed_reservation_threshold field is set on the tool/area and the message will mention what the threshold actually is.
- Fixed issue when billable items would not show up in API when crossing over the period. i.e. if a charge started before the end of the month and finished the next month, it would not show up. Changed the logic to show billables by end date only.

42.1.5 Libraries

- Updated Django to 2.2.26
- Updated django-filter to 21.1
- Updated djangorestframework to 3.13.1
- Updated django-mptt to 0.13.4
- Updated cryptography to 36.0.1
- Updated drf-flex-fields to 0.9.7
- Updated drf-renderer-xlsx to 0.4.4
- Updated python-dateutil to 2.8.2
- Updated ldap3 to 2.9.1
- Updated requests to 2.27.1
- Updated Pillow to 9.0.0

42.2 [Release 3.13.2](#)

42.2.1 Bug fix

- Fixed email broadcast error when sending to users having access to an area or when sending to all users

42.3 [Release 3.13.1](#)

42.3.1 Bug fix

- Fixed issue with mobile reservations breaking when the user has only one project

42.4 [Release 3.13.0](#)

42.4.1 New Features

- Added support for group questions in Reservation questions.
- Added option to send an email to all registered users.
- Rest API updates:
 - Added Excel export.
To enable it, it must be added to the DEFAULT_RENDERER_CLASSES of the REST_FRAMEWORK dictionary in settings.py, like the following:

- 'DEFAULT_RENDERER_CLASSES': ['rest_framework.renderers.JSONRenderer', 'rest_framework.renderers.BrowsableAPIRenderer', 'drf_renderer_xlsx.renderers.XLSXRenderer'],
- Added billing to the browsable API page.
- Added link to the API in the Administration menu. Only visible for admins.

42.4.2 Bug fix

- Fixed an issue where sorting tools by name in the detailed admin section would break.
- Fixed multi email field validation issue where rendering would break when there was a validation issue.
- Fixed multiple issues with reservation calendar invite in Outlook where the organizer cannot be the attendee. The organizer can now be set in settings.py using RESERVATION_ORGANIZER_EMAIL and RESERVATION_ORGANIZER for the email and the name of the organizer, respectively. see the settings page for details.
- Made Customizations page only accessible to admins.

42.4.3 Library updates

- Updated drf-flex-fields to 0.9.3
- Updated Pillow to 8.3.2

42.5 [Release 3.12.2](#)

42.5.1 Bug fix

- Fixed issue with badge number not working on area access pages (already logged in and choose project pages) and kiosk “Go back” button.

42.6 [Release 3.12.1](#)

42.6.1 Bug fix

- Fixed issue with badge number not working in area access if they start with 0 or have letter in it.

42.7 [Release 3.12.0](#)

42.7.1 New Features

- Added export of tool tasks and comments history to a text file.
Located in Tool Control -> Details -> Task and comment history.
- When creating recurring scheduled outages, the number of days in advance can now be customized in the Customization page.

42.7.2 Improvements

- In post usage group questions, the "Add" button text can be customized using property group_add_button_name

- Changed display of upcoming reservation on Kiosk so they don't need to be expanded to cancel. Clicking on a reservation will go to the corresponding tool.

42.7.3 Bug fix

- Fixed a bug in new version of Chrome where extra scrollbars would appear and flicker on the calendar page.
- Fixed an issue with recording training sessions, where a staff member who is also a tool superuser would not be able to record training on tools he is not superuser for.
- Fixed issue when double clicking on task/comment creation/update would create multiple instances.

42.7.4 Vulnerabilities

- Updated drf-flex-fields to version 0.9.1

42.8 [Release 3.11.0](#)

42.8.1 New Features

- Added reservation questions that are asked when a user makes a reservation. They can be added in the detailed admin section. Reservation questions can be set for tools and/or areas and can also be limited to specific tools, specific areas and/or specific projects.
- Added Areas, Resources, Staff Charges and Training Sessions to Rest API
- Added conditional nesting of related objects in Rest API as well as cherry picking of fields returned using [drf-flex-fields](#) (see link for details)
- Added a projects page for projects Principal Investigators who are not staff members. This allows them to see project information and users.

42.8.2 Improvements

- Added filtering by display and filtering by areas in Reservation admin page.
- Added filters to Rest API (for a complete list, see NEMO/views/api.py)
- Added a "pinned" field to news to have certain news stay at the top of the feed.
- Added optional start date for both projects and accounts. Added optional account type for accounts.
- Improved dynamic form (JSON formatted questions):
 - Added red asterisk when a field is required
 - Added "title_html" attribute to display html in title
 - Added "help" attribute (displaying help text for inputs)
 - Added "maxlength" attribute to textbox questions (max characters allowed in input)

42.8.3 Bug fix

- Fixed issues with reservation dates in ical invites not using UTC times.

42.9 [Release 3.10.0](#)

42.9.1 New Features

- Added "All tools", "All areas" and "All tools & Areas" overview options in the calendar. Thanks @bpedersen2 for the contribution!
- Added tool superusers who are allowed to train users on tools. They can be added in the detailed admin section, either in the user section or the tool section.
- Added a way to restrict projects to only certain tools, regardless of the users qualifications. This can be done in Detailed Administration/Project.
A project restricted to certain tools will:
 - allow reservations and usage of those tools only.
 - allow reservations and login on area that this tool requires.
 - allow staff charges on those tools and areas they require.
 - allow training on those tools only.
- Added a checkbox on projects to allow consumable withdrawals or not. Consumable withdrawals set through post usage questions are always allowed.
- Added warning threshold and warning email addresses for Tool usage counter. Added corresponding email template in customizations
- Added an area reservation ending reminder email 30 and 15 minutes before reservation ends and user is still logged in.

42.9.2 Improvements

- Changed user's badge number field to string (rather than integer) to get around integer max number but also to provide better flexibility with card readers.
- Added option to clear the list of consumable withdrawals.
- Added tools the user is a backup owner on, in detailed administration user page.
- Improved calendar support for making and cancellation reservations. Thanks @bpedersen2 for the suggestion.
- Moved the set PI on project feature to Detailed Administration only.
- Now sending task updated email when a task is cancelled.

42.9.3 Bug fix

- Fixed issue where writing in a post usage question of type textarea would not update the "stop using tool" button
- Fixed layout issues on pagination pages on mobile devices
- Fixed an issue when multiple coincident reservations could be created at the same time.
- Fixed NEMO install_systemd_service command.

42.10 [Release 3.9.2](#)

42.10.1 Bug fix

- Fixed badge number max digits issue by making it a char field instead of integer. It should also provide more flexibility with badge readers

42.10.2 Security vulnerability

- Fixed badge number max digits issue by making it a char field instead of integer. It should also provide more flexibility with badge readers

42.11 [Release 3.9.1](#)

42.11.1 Bug fix

- fixed a bug after updating LDAP library. TLS is not needed anymore since the LDAP connection security is set on the server connection through use_ssl (and it actually raises an error if set on an already secure server connection).

42.12 [Release 3.9.0](#)

42.12.1 New Features

- Added the ability to set Principal Investigators on projects. PIs are able to see all activities for the projects they manage in the "My usage" page.
- Added exporting of data in CSV format from "My usage" page.
- When forcing a user out of a tool, if there are any required unanswered post usage questions, the required questions will be sent in an email to the user, lab managers, tool owner & backup owner, and to the staff member who forced the user off. Blank answers are set in the usage history record until edited in detailed admin.
- Added float post usage question (with optional precision property) and textarea (with optional rows property)
- Added tool documents. (thanks to [4D Labs](#) for the contribution)

42.12.2 Improvements

- Added options for last 10, 25, 50 & 100 records and filtering by users in tool usage data history
- Added filtering by tool in Tool usage counter admin page
- Improved the import of plugin URLs to be more consistent

42.12.3 Bug fixes

- Fixed an issue where areas that don't require a reservation would not show up when using staff charges
- Updated to latest versions for all dependencies

42.13 [Release 3.8.0](#)

42.13.1 New Features

- Added list views for Accounts and Projects and Users pages (thanks to [4D Labs](#) for the contribution)
- Supplies/Consumables withdrawal can now be done in bulk. A flat list is displayed, and users can add supplies to their cart, and checkout all the items at once.
- Added a way to bypass interlock errors on both desktop and kiosk. If there is an error with an interlock command, the user will now be able to:
 - enable anyway (so that time tracking can still take place - when staff can override interlocks manually)
 - try again
 - cancel

The "enable anyway" option can be turned on or off in customizations, and the error messages for both tool and door interlock failures can be customized as well.

42.13.2 Improvements

- Billing pages (billing and project billing) will now redirect to usage/project usage if billing service is not defined or not available
- Added notification message when post usage questions are linked to consumables/supplies withdrawals so that the user is aware that they are being billed for those.
- Added 11:59pm time option for access level exception (end of the day)
- Updated resources page so resizing would not mess with the layout
- Made required tool fields bold and capitalized in detailed admin for consistency

42.13.3 Bug Fix

- Fixed issue with upcoming reservation showing when delayed logoff is in effect ([#60](#))
- Fixed an error when creating a user would fail if identity service was not defined
- Fixed an error when adding access level exception with blank start or end time would break (added validation)
- Added locking mechanism to enable/disable tools and area login to prevent race condition (enabling the same tool at the same time - through js or "double click")

42.13.4 Security

- Updated dependency version of cryptography library (due to vulnerability in previous version)

42.14 Release 3.7.0

42.14.1 New Features

- When a tool requires an area access, area access time will be charged when staff use tool for a remote project (so staff time, tool time and area time are all started at the same time)
- Staff charge for area access will stop when staff users log out of any area
- Added virtual keyboard for Kiosk text post usage questions
- Added keypad for delayed logoff on Kiosk
- Kiosk timeout will now reset on user input
- Added a way to contact other users from reservation details and to contact the current user of a tool on tool control page
- Added the Buddy Board, a simple message board for buddy requests:
 - At least one area need to be set to "allow buddy system" in detailed administration for this feature to be active
 - Users will be notified of new buddy requests with notification badge number on menu item (can be turned off in user preferences)
 - Users will be notified by notification badge number and via email when somebody also replies on a request they replied to (can be turned off in user preferences)
 - A disclaimer can be set in customizations. Use it to specify special instructions or rules for buddy system
 - Buddy requests expire at the end of the day on their end date
 - Only users who have completed training, have an active project and have access to the area can reply
- A news story will now be published when a new NEMO release is installed (with links to the release notes and the feature manual). This feature can be disabled by setting `NEW_VERSION_NEWS = False` in `settings.py`
- All emails sent by NEMO will now be logged for audit purposes and accessible in the detailed administration. If you are a developer, make sure to use the `send_email` function available in `utilities.py` to benefit from this feature.

42.14.2 Improvements

- News stories can now include HTML tags (link etc.)
- Added validation for physical access exceptions in detailed admin (end date must be later than start date)

42.14.3 Bug Fix

- Fixed a bug where project usage page was only showing results for the current logged in user.
- Fixed a bug on Kiosk when the keypad would stay open on Kiosk timeout.

42.15 [Release 3.6.0](#)

42.15.1 New Features

- Added "dropdown" type for tool post usage questions
- Added "group" type post usage question. This allows to create groups of questions that can be repeated. For example, when a user uses multiple processes on a tool, and we want to collect information about each one. More details can be found on the feature manual.
- Added "Usage Data History" tab in tool control, which displays the history of answers to post usage questions. The data can also be exported to CSV.
- Added Tool usage counters:
 - They are counters linked to a "number" type post usage question and keep a running total of some user inputs.
 - They can be added in the detailed administration and NEMO will check that the post usage question exists in the corresponding tool (with the correct type)
 - Counters are displayed in the tool summary page.
 - Counters can be reset by staff members. A comment will be added to the tool and an email will be sent to LAB_MANAGERS if that setting is enabled.
 - For example, you can use it to keep track of total etch time for maintenance purposes etc.
- Added a new setting in customization to display current time indicator in the calendar.
- Added Physical Access Exceptions which allows to set specific exceptions when access levels will be denied. This can be used for holiday closures, understaffed times etc.

42.15.2 Improvements

- Area reservations can now be extended even while user is logged in the area (but not moved or cancelled).
- Updated calendar area login/logout buttons to be shown only when relevant (instead of being grayed out if a tool is selected for instance)
- Updated billing/usage search to use Bootstrap date picker instead of pickadate
- Updated validation on post usage questions to check that consumable exists with the correct name, and that required attributes are provided
- Added management commands to run timed services. (you can now use manage.py or django-admin to run timed services actions)
- Added keypad for answering post usage questions of type number (only on Kiosk)

42.15.3 Bug Fixes

- Fixed an error when using the search feature in physical access log (in Detailed Administration)
- Fixed excessive load time when selecting a reservation in Detailed Administration
- Fixed [#43](#) unique constraint violation in Postgres, thanks to [@bpedersen2](#)

42.15.4 Security

- Updated dependency version of cryptography library (due to vulnerability in previous version)

42.16 [Release 3.5.0](#)

42.16.1 New Features

- Added a way to link contact information to an actual user (through Detailed Administration\Contact Information). When both are linked, in Tool Control details page, the contact information will be displayed (instead of simply the email) of the tool owner or backup owner.

42.16.2 Improvements

- Area reservation policies: user cannot cancel area reservation while logged in that area during that reservation. also, users won't be able to cancel or move an area reservation when they have tools reservations that require that area reservation.
- Added post usage question validation and better error message for required attributes.
- Consumables can now only be withdrawn if the post usage question is of type "number".

42.16.3 Bug Fixes

- Fixed a bug preventing tool synchronization feature to work.
- Fixed a bug in tool admin page, when missing required attributes of post usage questions would completely break the page.
- Fixed a bug where selecting Facility Usage in calendar view would display ALL tool usage even when selecting a particular area.
- Fixed a bug when a tool needed to be shutdown and the wrong email was sent to users.

42.17 [Release 3.4.0](#)

42.17.1 New Features

- Added the ability to create more badge reader configuration in detailed administration. When using the Kiosk or Area Access, add ?reader_id=<reader_id> to the URL to select a badge reader configuration.

42.17.2 Improvements

- Added ability to search by user in project billing
- Added user information on Usage Events in usage page.

- Hiding project billing if billing service isn't defined

42.17.3 Bug Fix

- Fixed an error when not all areas would show up on the email broadcast page
- Fixed out of time email being sent when customer has back to back reservations

42.18 [Release 3.3.0](#)

42.18.1 New Features

- Added service personnel to NEMO: service personnel can access **authorized** areas without having a reservation and use **qualified** tools even when shutdown or during outages
- Added checkbox to count service personnel in area capacity or not
- Added supply reminder email: a reorder email will be sent when supplies fall below the defined threshold.

42.18.2 Improvements

- Improved the staff charges page to show more details: customer being charged staff time, area access and tool usage on behalf of that user
- Improved resources page to be easier to navigate. Added a resource details page where the user can schedule an outage and modify the resource availability.

42.18.3 Security

- Updated Pillow library to latest stable version

42.18.4 Bug fix

- Reservations were not marked as missed if the email template wasn't defined. Fix it so that reservations would be marked as missed regardless.

42.19 [Release 3.2.7](#)

42.19.1 Bug Fix

- fixed a broken link when selecting tool on mobile

42.20 [Release 3.2.6](#)

42.20.1 Bug Fix

- fixed an issue in the kiosk where upcoming reservations would include area reservations and trying to display tool_id would fail

42.21 [Release 3.2.5](#)

42.21.1 Bug Fix

- Fixed an issue with platform specific formatting (was causing issues on Windows)
- Fixed an issue when enabling a tool would not work if the user id contained a specific number

42.22 [Release 3.2.4](#)

42.22.1 Bug Fix

- fixed an issue with overlapping reservations not being counted correctly towards capacity

42.23 [Release 3.2.3](#)

42.23.1 Bug Fix

- Fixed a small UI issue where calendar/tool control would not show up correctly when impersonating.
- Fixed an issue where Jumbotron would try to show tool usage info when no tools are set up

42.24 [Release 3.2.2](#)

42.24.1 Bug Fix

- fixed an issue with impersonating (couldn't go back in some conditions)

42.25 [Release 3.2.1](#)

42.25.1 Bug Fix

- fixed an issue when rest_framework isn't installed

42.26 [Release 3.2.0](#)

42.26.1 New Features

- (**superusers only**) added the ability to impersonate other users. Located in the administration dropdown menu. You'll need to add 'NEMO.middleware.ImpersonateMiddleware', to settings.py for this to work
- default user reservation preferences can be overridden in settings.py with USER_RESERVATION_PREFERENCES_DEFAULT = True

42.26.2 Bug Fix

- fixed a bug where access usage was not showing when clicking on areas in sidebar

42.26.3 Improvements

- removed hard coded URLs which cause issues when deploying using subpath
- added success message when saving user preferences
- fixed authentication issues when using multiple authentication backends (especially when mixing pre-auth backends and backends using login page)

42.27 [Release 3.1.2](#)

42.27.1 Bug Fix

- fixed an issue when staff cancels another user's reservation and the email is not sent to the additional reservation emails set on the area

42.28 [Release 3.1.1](#)

Re-releasing 3.1.0 as 3.1.1 to fix docker tag issue.

42.29 [Release 3.1.0](#)

42.29.1 New Features

- A reservation email (or a list) can now be set on areas. Any reservation created or cancelled will be sent to that email with an .ics calendar invite attached (in addition to the user).

- An abuse email (or a list) can now be set on areas. When a non-staff user overstays (reservation expired but still logged in the area) an email will be sent to that email (in addition to the user).

42.29.2 Improvements

- Now using foldable trees in views where areas can be selected (self login, area access login, and physical access in user form).
- Added email previews and link to download current content in customizations.

42.29.3 Note

For the abuse and reservation emails, NEMO will send the emails "all the way up the tree". So if you have a setup where Campus contains Buildings which contains Offices, then when a reservation is created in an office, the email will be sent to the email for the Office, and the email for the Building (if set) and the email for the Campus (again, if set) etc. same goes for overstays.

42.30 [Release 3.0.1](#)

42.30.1 Bug Fix

- fixed a bug when counting occupancy

42.31 [Release 3.0.0](#)

NEMO 3.0.0 is here with area reservations!

42.31.1 Before Updating

- **add mptt to INSTALLED_APPS in settings.py**
- **add timed services call to**
url /email_out_of_time_reservation_notification every minute
- **if you plan on using area reservations, update reservation email templates to check whether the reservation item is a tool or an**
area.reservation.tool, reservation.area or reservation.reservation_item and reservation.reservation_item_type can be used for that. (emails to update
area: reservation_reminder_email, reservation_warning_email, missed_reservation_email, cancellation_email, reservation_created_user_email, reservation_cancelled_user_email)
- **if you plan on using area reservations,**
update unauthorized_tool_access_email to use the new type variable. It can be either 'reservation' when a user tries to use a tool without a reservation

or 'access' when a user tries to use a tool without being logged in to the required area

42.31.2 New Area Features

- Added the ability to make reservations for Areas that have `requires_reservation` set to True
- Added icon on tools in the sidebar when they require access to an area that requires a reservation
- Tools cannot be reserved until a reservation is made on the required area (area reservation needs to exist at the start time of the tool reservation)
- Added Area capacity and policy rules for area reservations. Area capacity is checked when making reservation and logging in, parent area capacity is also checked. (Capacity can be set on buildings or campuses that have other areas in them as well)
- Warning will be shown to user when making a reservation if `reservation_warning` is set on an area
- Added categories to area
- Added `count_staff_in_occupancy` flag on areas. If unchecked, staff users will not count.
- Added customization setting to display all areas or only areas the user has access to
- Access levels can now be set directly when creating the access level.
- Access level can be given on parent areas (i.e. Buildings)
- Outages can be scheduled on Areas as well. Can also be set on parent area through the detailed administration
- Added tooltip showing all users logged in an area
- Added ability to log in and out of areas directly from the calendar view (enable with setting in customization)
- Logged in users without a reservation will be shown in red on status dashboard
- Area reservation are shortened when user logs out
- Added ability to email users authorized to access an area or parent area (building)
- Displaying scheduled outages and unavailable resources for areas in sidebar
- Added mobile calendar area reservations
- Added email to be sent when users are out of time (logged in area but reservation expired). A grace period can be set in area.

42.32 [Release 2.3.4](#)

42.32.1 Bug fix

- Fixed a bug preventing disabling tools from kiosk
- +++++

42.33 [Release 2.3.3](#)

42.33.1 Security vulnerability

- Updated django version

42.34 [Release 2.3.2](#)

42.34.1 Bug Fix

- fixed a bug with reservation warning

42.35 [Release 2.3.1](#)

42.35.1 Bug Fix

Fixed a bug with facility usage events not showing in calendar

42.36 [Release 2.3.0](#)

42.36.1 Before Updating

- Replace '`NEMO.context_processors.device`' with '`NEMO.context_processors.base_context`' in `context_processors` in `settings.py`
- Rename media file `nanofab_rules_tutorial.html` to `facility_rules_tutorial.html` and update form in file to post to `facility_rules` URL
- Rename media file `nanofab_rules_tutorial_email.html` to `facility_rules_tutorial_email.html`

42.36.2 New Features

- Added a reservation warning (number) field to Area. A "Busy time" warning will be displayed when reserving a tool in that Area when there already are a greater

number of users with reservations for that same area. (This can be used separately from the area capacity)

- Added a Boolean field in area to decide if staff should count towards max capacity. Updated pages to show a separate staff count if unchecked
- Post usage questions now support number type and min, max and pattern attribute.
- Post usage questions preview has been added as well.
- Consumable withdrawal now subtracts from quantity.
- In email page, subject and content are now required and the preview can now be updated before sending.
- Added area access record in remote work for staff charges.
- Self login button will now be shown all the time when enabled from customization. Errors will be displayed when user cannot login (rather than hiding the button)
- User type isn't required anymore. Confirmation of user creation/update has been added and another safely deactivate user link was added next to the active checkbox
- The facility name can now be configured from the customization page. Thanks **@dsbarth** for the original code!
- The site name can also be configured from the customization page.
- The calendar view can now be configured from the customization page (default view, first day of the week, start of the day, column date format for day, week, and month views). Thanks **@sbonaime** for the suggestions and help!

42.36.3 Improvements

- Added a spinner in tool control page when waiting after clicking on tools
- Past outages aren't shown on scheduled outage page anymore
- Added staff charges to billing api. Added detailed information for items.
- Made identity service optional in settings.py
- Made no_header feature sticky (per session): use parameter no_header=True in page URL to use NEMO without header bar, use no_header=False to turn it off.

42.36.4 Bug fixes

- Added consumable withdrawal on Kiosk after answering post usage questions.

42.37 [Release 2.2.3](#)

42.37.1 Bug Fix

- Fixes [#32](#) (mix up between access levels and areas in area access record page)

42.38 [Release 2.2.2](#)

42.38.1 Bug Fix

- fixes [#33](#)

42.39 [Release 2.2.1](#)

42.39.1 Bug Fix

- Fixes [#32](#)

42.40 [Release 2.2.0](#)

42.40.1 Improvements

- Improved LDAP settings to allow users to specify port, bind credentials, dn search and more
- Improved interlock implementation interface, allowing to validate both interlock card and interlock objects
- Updated tool autocomplete results to have better spacing.
- Updated Jumbotron to not display areas when none are defined

42.40.2 New Features

- Users can now change the project on an upcoming reservation
- Added comments that only staff can see (and create)
- Added ProXR interlock implementation (contribution by [@4Lowe](#) at the Minnesota Nano Center)
- Added rates to customizations. Labs can now upload a json file containing rates for tools
- Added authorization failed to customizations. Labs can personalize the error message shown when login failed
- Added jumbotron watermark to customizations.
- Made tasks and comments searchable

- Added notification icon and statement when scheduled non required resource is not available
- Added tool config history tab (in tool control)
- Added max capacity for areas

42.40.3 Bug fixes

- Fixed an issue where staff needed to select a project when making reservations on desktop site (didn't need to in mobile). Now it doesn't ask for project either way (staff are not charged for missed reservations, so no projects needed)
- Fixed a few typos here and there

42.41 [Release 2.1.1](#)

42.41.1 Bug Fix #24

- Fixed error when image was being resized and removed then saved again (when no changes were made on the file)

42.42 [Release 2.1.0](#)

42.42.1 New Features

- Added Tool image, serial and description. Thanks [@sbonaime](#) for the contribution!
- In Kiosk, categories and tools that a user is not qualified to use will be grayed out
- Added checkbox in Physical Access Level to grant access to staff without have to do it explicitly
- Added categories to alerts, and updated alerts to keep them after they are deleted or expired
- Only showing visible tools on resource pages

42.42.2 Improvements

- Updated Ldap authentication to provide better logging and not require certificate
- Updated NEMO's configuration to work without django admin installed
- Added version number to Jumbotron, Kiosk & Area Access pages

- LAB_MANAGERS will now receive an email when a task is created (not just updated)
- Added training sessions to billing API
- Updated plugin feature so that URLs are automatically added when plugin name starts with 'NEMO'
- Added name to interlock cards

42.42.3 Bug Fix

- Fixed user history when history item had been deleted

42.43 [Release 2.0.1](#)

42.43.1 Bug Fix

- fixed wrong migration filename

42.44 [Release 2.0.0](#)

42.44.1 NEMO 2.0 is here!

This major release is focused solely on internal improvements and library updates. no changes have been to features or user interface.

42.44.2 Plugin Development

- A big effort has been made to facilitate plugin development in NEMO. See the [Plugin Development](#) wiki page for detailed instructions and examples.

42.44.3 Improvements

- Updated to Django 2.2 (LTS version with extended support until April 2022), requests 2.22, django rest framework 3.11, and to latest version of all the other libraries (cryptography, django-filter, ldap, pillow and dateutil).
- Added JSON validation for post usage questions. Thanks [@sbonaime](#) for the contribution!

42.44.4 Before Updating

The Kiosk and Area Access features of NEMO have been moved into internal plugins. If you were using them, you'll need to add them to `INSTALLED_APPS` of your `settings.py` file:

- `'NEMO.apps.kiosk',`
- `'NEMO.apps.area_access',`
