

NEMO Feature Manual

Version 4.4.0

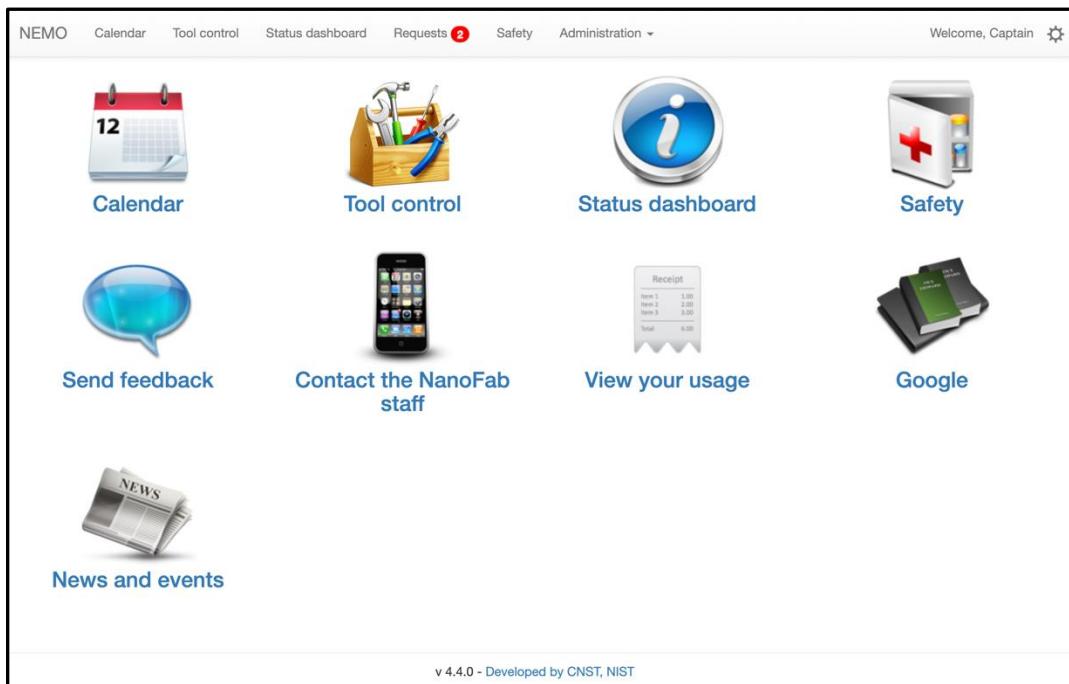

Table of Contents

1	Foreword.....	14
2	Introduction.....	15
3	How NEMO works.....	16
3.1	NEMO Infrastructure	16
3.2	User model.....	17
3.3	User roles.....	18
3.4	Tool model.....	20
3.5	Area model (optional)	21
3.6	Supply model (optional).....	22
3.7	Billing model	22
3.8	Controlling NEMO	23
4	NEMO user authentication	24
4.1	Web address.....	24
4.2	Usage.....	24
4.3	Mobile device authentication.....	25
4.4	Authentication customizations.....	26
5	Navigation Bar	27
5.1	User Navigation Bar.....	27
5.2	Staff Navigation Bar	27
5.3	Mobile device navigation bar	29
5.4	Navigation bar customizations	30
5.5	Landing Page	30
5.6	Web address.....	30
5.7	Upcoming reservations.....	31
5.8	Alerts and outages.....	31
5.9	Current NanoFab usage	32
5.10	Configurable Quick Links	34
5.11	Facility Tutorial.....	35
5.12	Mobile device landing page	36
5.13	Landing page customizations	37
6	Calendar.....	38
6.1	Web address.....	38
6.2	Calendar Side bar.....	38

6.3	Calendar header bar	45
6.4	Reservations.....	49
6.5	Showing NanoFab usage	64
6.6	Show specific user activity (staff only).....	69
6.7	Mobile device calendar	72
6.8	Calendar customizations	80
7	Tool control.....	81
7.1	Web address.....	81
7.2	Side bar.....	81
7.3	Tool page header bar.....	84
7.4	Summary Tab	84
7.5	Details Tab.....	107
7.6	Usage Data History	115
7.7	Config History	117
7.8	Report a problem Tab.....	118
7.9	Post a comment Tab.....	122
7.10	Mobile device tool control.....	124
7.11	Tool control customizations.....	127
8	Status dashboard.....	129
8.1	Web address.....	129
8.2	Area occupancy tab	129
8.3	Tool status & usage tab	130
8.4	Staff status tab.....	133
8.5	Mobile device status dashboard	140
8.6	Status dashboard customizations	142
9	Requests.....	143
9.1	Buddy Board.....	143
9.2	Access requests	149
10	Jumbotron	157
10.1	Web address	157
10.2	Usage	157
10.3	Mobile device jumbotron.....	159
10.4	Jumbotron customizations	159
11	Safety items.....	160

11.1	Usage	160
11.2	Web address	162
11.3	Mobile device safety items page	162
11.4	Safety items customizations.....	162
12	Safety issues.....	163
12.1	Safety message	163
12.2	View resolved safety issues	163
12.3	Report a new safety issue.....	164
12.4	View open safety issues.....	165
12.5	Resolve or update a safety issue (staff only)	167
12.6	Notifications (staff only).....	169
12.7	Web address	169
12.8	Mobile device safety page	169
12.9	Safety page customizations.....	170
13	Safety data sheets	171
13.1	Search for a chemical	171
13.2	Document/URL	172
13.3	Export Safety data sheets.....	172
13.4	Web address	173
13.5	Mobile device news and events page	173
13.6	Safety data sheets customizations	173
14	Send feedback	174
14.1	Web address	174
14.2	Usage	174
14.3	Mobile device send feedback page.....	175
14.4	Send feedback page customizations	175
15	Contact staff	177
15.1	Fields	177
15.2	Web address	178
15.3	Mobile device contact staff page.....	178
15.4	Contact staff page customizations	179
16	View usage.....	180
16.1	Select date range.....	180
16.2	Usage select project (for Principal Investigators only)	181

16.3	Usage	181
16.4	Billing Information.....	184
16.5	Web address	184
16.6	Mobile device view usage page	184
16.7	View usage page customizations.....	185
17	News and events.....	186
17.1	Recent news	186
17.2	Archived news.....	187
17.3	Publish new news (staff only).....	188
17.4	Update news article (staff only)	190
17.5	Notifications.....	192
17.6	Web address	193
17.7	Mobile device news and events page	193
17.8	News and events customizations.....	193
18	Sensor data	194
18.1	Setup	194
18.2	Usage	194
18.3	Web address	199
18.4	Mobile device sensor data page	200
18.5	Sensor page customizations	200
19	User Preferences.....	201
19.1	Usage	201
19.2	Web address	203
19.3	Mobile device user preferences page	204
19.4	User preferences page customizations.....	204
20	Administration menu (staff only).....	205
21	Abuse (managers only).....	206
21.1	Web address	206
21.2	Mobile device abuse page	206
21.3	Abuse page customizations.....	206
22	Accounts and projects (user office, accounting and managers only).....	207
22.1	Search for existing accounts or projects	207
22.2	Account and project status.....	209
22.3	Manage users on a project	209

22.4	Create an account	210
22.5	Create a project.....	212
22.6	Web address	215
22.7	Mobile device accounts and projects page	215
22.8	Accounts and projects page customizations	215
23	Alerts (staff and user office only)	216
23.1	Create an alert	216
23.2	Delete an alert	218
23.3	Edit an alert	218
23.4	Web address	219
23.5	Mobile device alerts page	220
23.6	Alerts page customizations	220
24	API (admin only).....	221
25	Area Access (staff and user office only)	222
25.1	Create an access record.....	222
25.2	View access records	224
25.3	Web address	227
25.4	Mobile device area access page	227
25.5	Area access page customizations	227
26	Configuration agenda (staff only)	228
26.1	Usage	229
26.2	Web address	231
26.3	Mobile device configuration agenda page.....	231
26.4	Configuration agenda page customizations	231
27	Email (any staff role).....	232
27.1	Usage	232
27.2	Web address	238
27.3	Mobile device email page	238
27.4	Email page customizations	238
28	Impersonate (admin only).....	239
28.1	Usage	239
28.2	Web address	240
28.3	Mobile device impersonate page.....	240
28.4	Impersonate page customizations.....	240

29	Maintenance (staff only).....	241
29.1	Pending tasks.....	241
29.2	Closed tasks.....	248
29.3	Web address	250
29.4	Mobile device maintenance page	250
29.5	Maintenance page customizations.....	250
30	Qualifications (staff only).....	251
30.1	Tool qualifications.....	251
30.2	Usage	251
30.3	Web address	254
30.4	Mobile device qualifications page.....	254
30.5	Qualifications page customizations.....	254
31	Recurring charges (user office & managers only)	255
31.1	Usage	255
31.2	Web address	260
31.3	Mobile device recurring charges page.....	260
31.4	Recurring charges page customizations.....	260
32	Remote work (staff only).....	261
32.1	Usage	261
32.2	Web address	263
32.3	Mobile device remote work page	263
32.4	Remote work page customizations.....	264
33	Resources (staff only).....	265
33.1	Resource discussion.....	265
33.2	Resource Detail	266
33.3	Web address	275

1 Foreword

The National Institute of Standards and Technology (NIST), Center for Nanoscale Science and Technology (CNST) NanoFab provides researchers with rapid access to state-of-the-art, commercial nanoscale measurement and fabrication tools and methods, along with associated technical expertise, at economical hourly rates. It is well equipped to process and characterize a wide range of nanoscale materials, structures, and devices.

In November 2013, CNST replaced its original lab management software with an in-house designed and developed web application. The NanoFab Equipment Management & Operations (NEMO) web application is laboratory logistics software that strives to be intuitive and easy to use, making life easier in the lab. NEMO manages tool reservations, controls access to areas and tools, and streamlines logistics and communication. The program is being actively developed with new features, improvement, and bug releases approximately once a month.

The code is open source and free so that other labs can benefit. NEMO is hosted at <https://github.com/usnistgov/NEMO>. The web application is written in the Python programming language and uses the Django web framework. It is system independent (can run on Linux, Windows, or Mac) and does not require special hardware to operate.

Users can customize NEMO for their own laboratory, enabling any customer with a network connected desktop or mobile device to reserve tools, view the operating status of instruments, and seek assistance from laboratory staff.

The CNST hopes to foster a developer community to collaborate on new features and improvements to NEMO. Source code contributions are welcome via GitHub pull requests. The CNST will compile and evaluate these suggestions, modifying NEMO as needed.

2 Introduction

This manual provides an overview of NEMO and detailed information on each webpage and describes how to configure NEMO to add or remove content to suit the end user's needs. The manual is organized to progress through NEMOs web pages in the order presented to a user accessing the website through the navigation bar and landing page.

The manual starts with a description of how NEMO works, then progresses through logging into the website, the site navigation bar and landing page, then details each user accessible page, then each staff accessible page, and finally each site administrator page. Most of the pages are accessible through the navigation bar however, to keep NEMO highly customizable, some pages must be added through the landing page if desired.

Every page description provides details of the pages direct access web address, how the page is used, how to configure optional features, any differences between the desktop view and mobile device view, and any customizations. To minimize the need for direct code changes, many of NEMOs features automatically hide if they have not been configured.

3 How NEMO works

To better understand the features presented in this manual, an overview of NEMO and the key relationships and terms used throughout the manual will be provided.

3.1 NEMO Infrastructure

NEMO is a scalable web application whose features can be run as a distributed application across multiple servers and devices or condensed to run on a single server without additional features. The NEMO components shown below detail the required and optional network connected parts of NEMO (Figure 1). A basic implementation of NEMO can be run with a web server, database, and user authentication as a single standalone server.

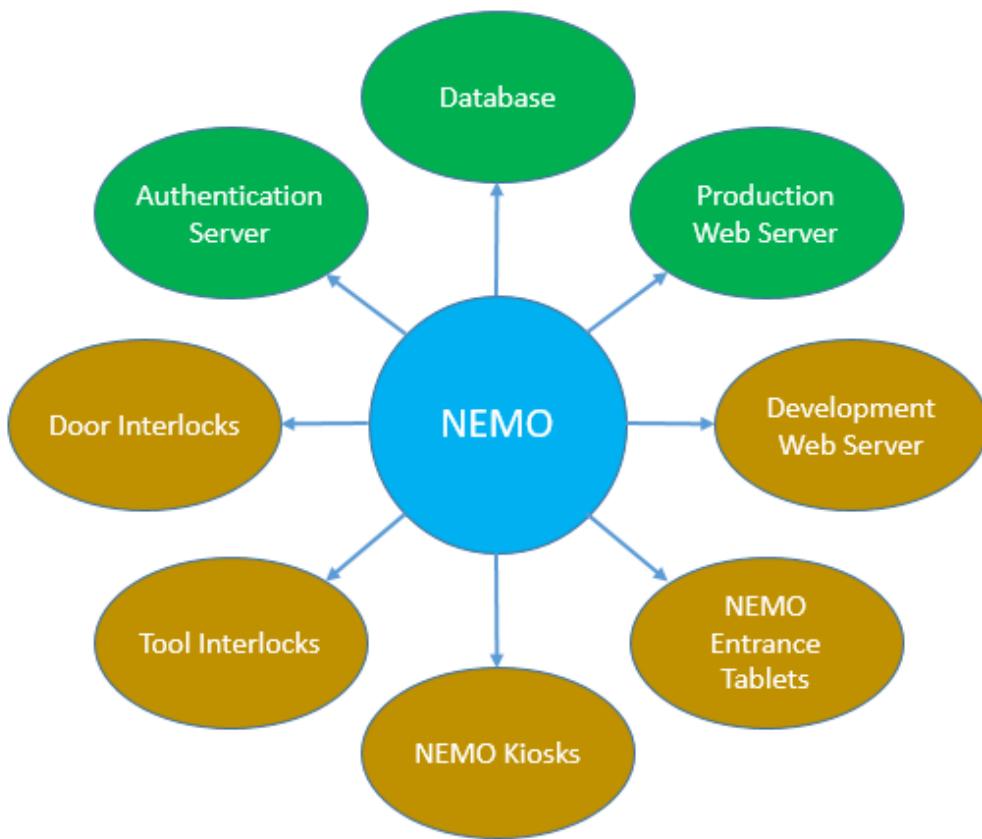

Figure 1 NEMO topographical map

- Production web server – (required) runs NEMO code.
- Database – (required) stores NEMO data.
- Authentication server – (required) authenticates users allowed to access NEMO.
- Development web server – (optional) write and test custom code changes without impacting the production environment
- NEMO entrance tablets – (optional) use NEMO to control access to labs in conjunction with door interlocks.
- NEMO kiosks – (optional) allow users quick access to NEMO via badge reader to enable/disable tools and make reservations.

- Tool interlocks – (optional) physically disable tools to prevent unauthorized access. This is typically disabling a keyboard and mouse, monitor, or tool interlock via relay control.
- Door interlocks – (optional) use NEMO to trigger door strikes on access-controlled doors via relay control.

3.2 User model

The user model begins with an account. Accounts are the highest level grouping and can be thought of in terms of who the bill is sent to. An account could be a business using the lab, a school in a university, or some other operational unit. Accounts are discussed in the [accounts and projects](#) section on page 207.

Each account will have one or more projects. Projects allow the account to distinguish what department, group, or project leader is using the account. All activity in NEMO is charged to a project. Projects are discussed in the [accounts and projects](#) section on page 207.

Each project will have one or more users. Users can be associated with multiple projects and even projects from different accounts (Figure 2). Users are discussed in the [users](#) section on page 293.

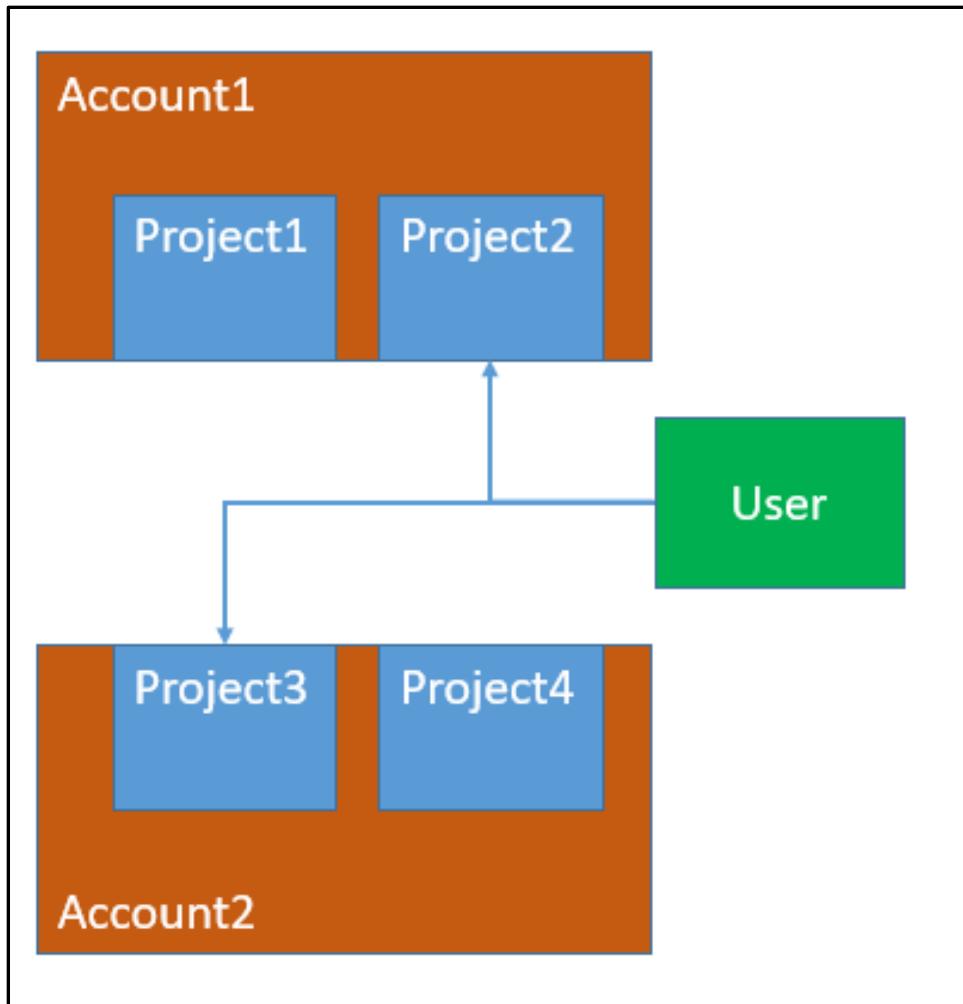

Figure 2 User model

3.3 User roles

NEMO has six types of distinct users to limit access to only the pages needed by the user. User roles can be set in the users table of the database, discussed in the [Detailed administration → Users](#) section on page 540.

- The first role is “user” which has basic access to a predefined set of features and functions that allow a user to do work in the lab.
- The second role is “staff” which has all of the basic access of a “user” but can override certain rules that restrict a user as well as an additional set of features specific to staff working in the lab.
- The third role is “user office” which has all of the basic access of a “user” but can also manage user’s information, accounts, projects, and see billing, withdraw consumables etc.
- The fourth role is “accounting officer” which has all of the basic access of a “user” but can also manage accounts, projects, and billing information.

- The fifth role is “facility manager” which has all of the basic access of a “user” but can also check abuse, manage staff status and absences in the status dashboard, users, and billing information. They also receive all task updates for all the tools.
- The sixth level is “administrator” which has all of the access of a “staff” along with admin access to configuration and database administration. NEMO must have at least one user with “administrator” role that can setup customizations and configure the website.

The following is a (non-exhaustive) list of features and permissions for each user role (Figure 3).

Feature\Role	User	Staff	User Office	Accounting	Manager	Admin
Make reservations	✓	✓	✓	✓	✓	✓
Control qualified tools	✓	✓	✓	✓	✓	✓
Request temporary access	✓	✓	✓	✓	✓	✓
Create buddy request	✓	✓	✓	✓	✓	✓
Check status dashboard	✓	✓	✓	✓	✓	✓
Check sensor data	✓	✓	✓	✓	✓	✓
Detailed admin (with specific model permission)		✓	✓	✓	✓	✓
Email broadcast		✓	✓	✓	✓	✓
User information (view)		✓	✓	✓	✓	✓
Publish news		✓	✓	✓	✓	✓
Create alerts		✓	✓			✓
Manage area access		✓	✓			✓
Supplies		✓	✓			✓
Record training		✓				✓
Configuration agenda		✓				✓
Check/update maintenance		✓				✓
Qualifications		✓				✓
Start staff charges		✓				✓
Manage resources		✓				✓
Check user/project billing			✓	✓	✓	✓
Create accounts			✓	✓	✓	✓
Create projects			✓	✓	✓	✓
User information (edit)			✓		✓	✓
Recurring charges			✓		✓	✓
Abuse					✓	✓
Manage staff absences					✓	
Approve temporary access					✓	
Receive all task updates					✓	
Access API						✓
Access customization						✓
Impersonate other users						✓

Figure 3 User roles

3.4 Tool model

Tools are the things a user will use, and that the lab is interested in keeping track of. There are many features associated with tools and most are optional (Figure 4). Tools are defined in the tool table of the database discussed in the [Detailed administration → Tools](#) section on page 504.

Figure 4 Tool model

- Training – users must be qualified to use a tool. Training and tool qualification is discussed in the [training](#) section on page 289.
- Reservations – qualified users can make reservations for tools with customizable rules to limit reservation abuse. Reservations are discussed in the [Calendar → Reservations](#) section on page 49. Reservation rules are defined for each tool in the tool table of the database discussed in the [Detailed administration → Tools](#) section on page 504.
- Tasks – allow users to report problems with tools and documents repairs. Tasks are discussed in the [tool control](#) section starting on page 81.
- Resources – (optional) allows a tool to depend on common facilities which allows shutting down multiple tools by disabling a resource. Resources are discussed in the [resource](#) section starting on page 265.
- Configuration – (optional) allows users to select the required configuration of a tool at reservation time and communicates the configuration request to staff. Configurations are discussed in the [Configuration Agenda](#) section on page 228.

- Consumable – (optional) allows lab to charge users for consumables used during a process through questions after usage. Consumables are discussed in the [supplies](#) section starting on page 284.
- Area – (optional) allows limiting tool use unless user is currently logged into a specific area. Areas are configured in the areas table of the database discussed in the [Detailed administration → Areas](#) section starting on page 384.
- Interlock – (optional) allows physical disabling of tool when not logged into by a qualified user. Interlocks are configured in the interlocks table of the database discussed in the [Detailed administration → Interlocks](#) section starting on page 423.

3.5 Area model (optional)

Areas can optionally be defined in NEMO to group tools in common places. An area can optionally have doors associated with it and permission for the door can be given to users as physical access levels to control when they can access an area (Figure 5). Areas can optionally be configured to restrict access to doors and tools unless the user has a current area reservation. Areas are configured in the areas table of the database discussed in the [Detailed administration → Areas](#) section starting on page 384.

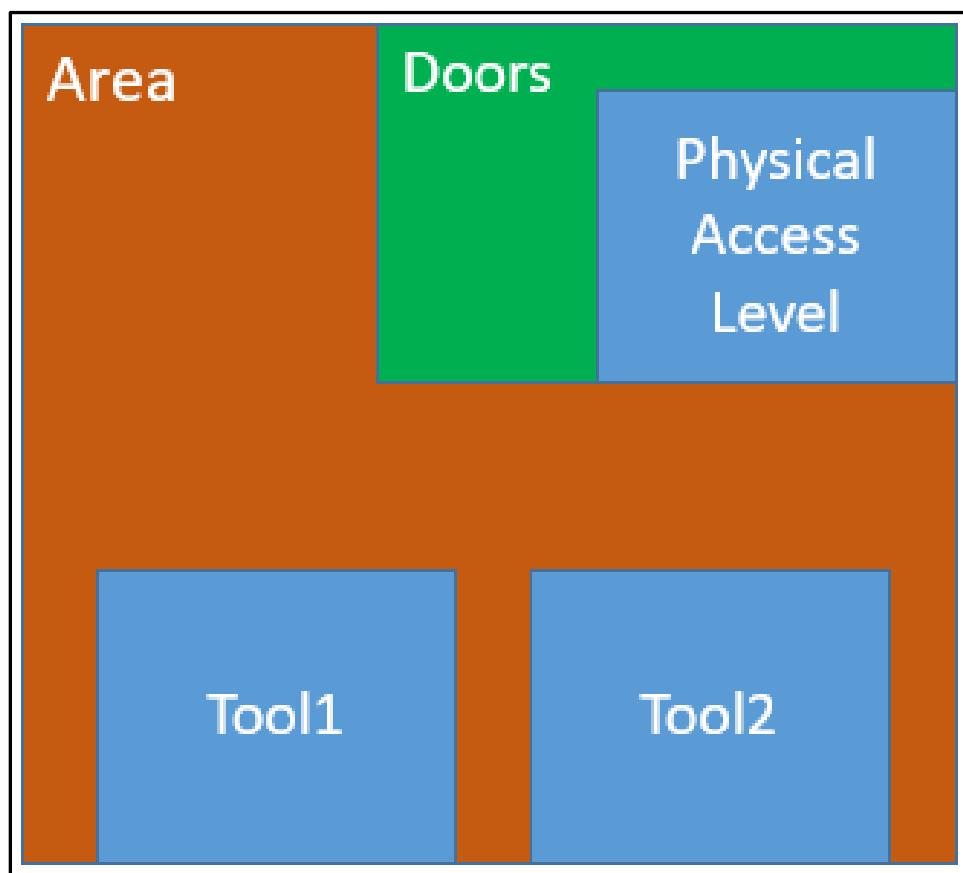

Figure 5 Area model

3.6 Supply model (optional)

NEMO has the ability to track supplies and their distribution to users. In addition, the supply model is used to track consumables used during tool runs (Figure 6). Consumables and supplies are discussed in the [supplies](#) section starting on page 284.

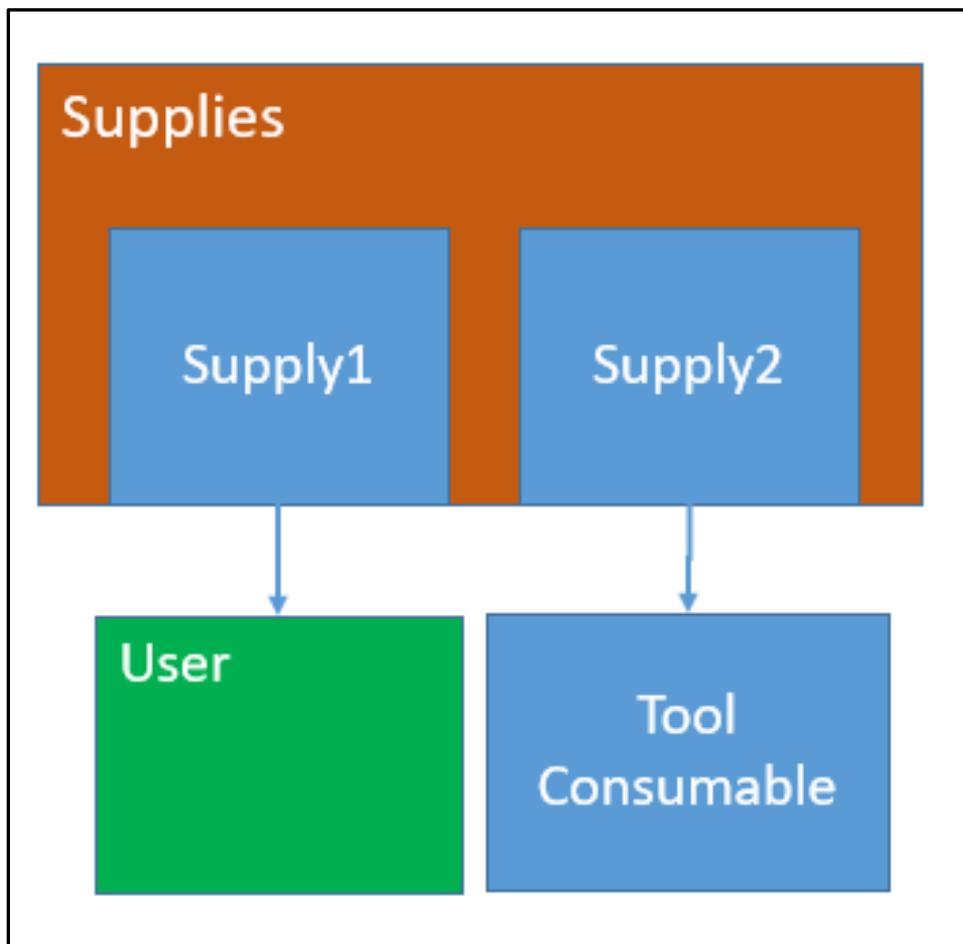

Figure 6 Supply model

3.7 Billing model

NEMO tracks 6 types of billing by default. The data is accessible directly from the database tables or through the API interface. The database tables are discussed in the [Detailed administration](#) section starting on page 363. The API is discussed in the [API access](#) section starting on page 550.

- Tool usage – Tool usage is tracked in the usage events table of the database.
- Area access – Area access is tracked in the area access records table of the database.
- Consumables – Consumables, both supplies sold to users and supplies consumed during tool runs are tracked in the consumable withdraws table of the database.
- Staff charges – Staff charges, where a staff member performs work on behalf of a user, are tracked in the staff charges table of the database.

- Missed reservations – Missed reservation, where a user fails to show up for a reservation before a grace period expires, are tracked in the reservations table of the database.
- Training sessions – Training sessions are tracked in the training sessions table of the database.

3.8 Controlling NEMO

NEMO is a web application is written in the Python programming language and uses the Django web framework. All NEMO functionality is available using any common web browser by logging into the website to perform any needed actions. In addition, NEMO provides two dedicated interfaces to access NEMO controlled doors (Entrance tablet) and to provide a quick interface to access and reserve tools (Kiosk). The [entrance tablet](#) feature is discussed starting on page 588. The kiosk features are discussed in the [kiosk](#) section starting on page 575.

4 NEMO user authentication

The first step to accessing the NEMO website is the authentication log in. A successful log in requires authentication against the institutions' account system and an active user name in NEMO. NEMO user creation and user status is discussed in the [Users](#) section on page 293.

4.1 Web address

The login page is accessible at site-address/login. For example, www.nemo.com/login/. The logout page is accessible at site-address/logout. For example, www.nemo.com/logout/.

4.2 Usage

4.2.1 LDAP authentication

If LDAP is used for authentication, the log in page (Figure 7) is displayed. Enter a valid user name and password, then click ‘Log in’.

Welcome to the NanoFab Equipment Management & Operations website

User name

Password

Log in

Welcome to our lab!

If you are having trouble with your user name or password, please see a user office staff member.

Figure 7 NEMO LDAP Login Page

Upon successful log in, the user will be redirected to the [landing page](#).

If invalid user credentials are entered, the user will be prompted in red with, “The user name or password was not valid” (Figure 8). In this case, enter a valid user name and password to continue.

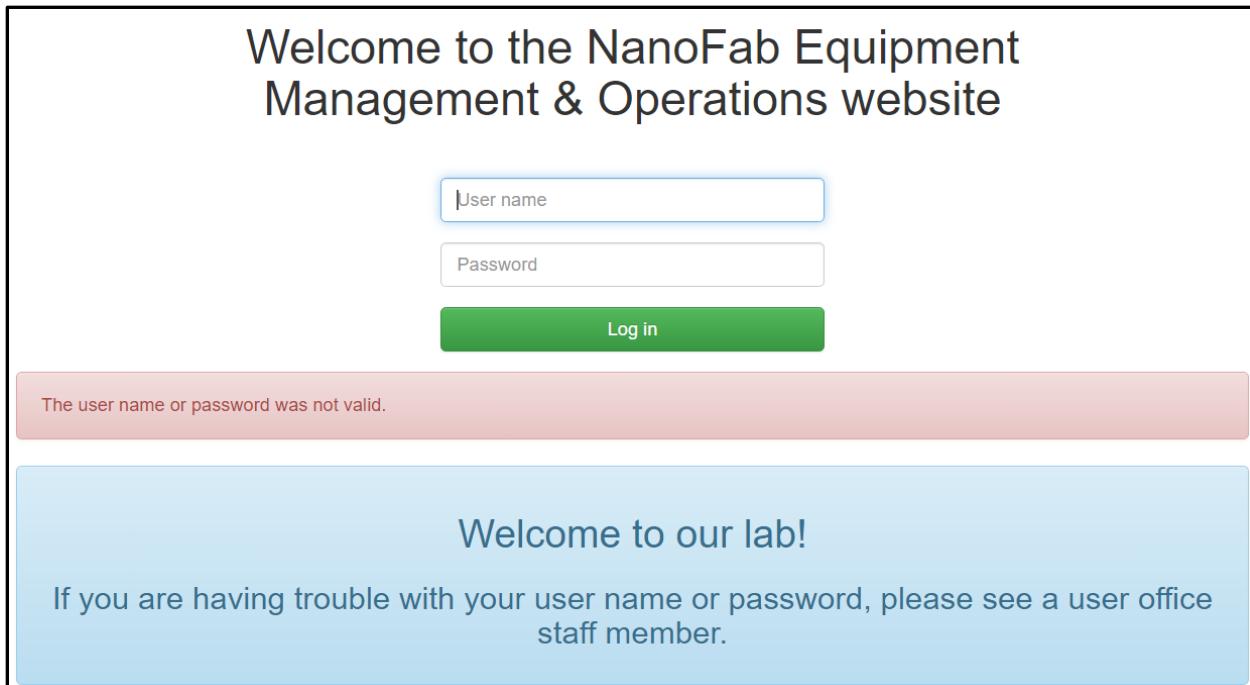

Figure 8 NEMO LDAP Authentication Failed

4.2.2 Remote user authentication

If a remote user authentication such as Kerberos is used, authentication is handled behind the scenes and users **will not** be prompted for a username and password.

Upon successful log in, the user will be redirected to the [landing page](#).

If the user does not have an active NEMO account, they will be denied access to NEMO (Figure 9). This message is customizable and is described in the [Customization → NanoFab failed login](#) section on page 318.

You do not have a NEMO user account or your user account has been deactivated. Please contact the NanoFab User Office for assistance.

Figure 9 Remote User Authentication Failure Message

4.3 Mobile device authentication

There are no special user authentication views for mobile devices. The authentication procedures above should be followed.

4.4 Authentication customizations

4.4.1 Authentication

Authentication is configured to set LDAP or Remote User log in via the settings.py file described in the [Configuring NEMO settings → Authentication Backends](#) on page 603.

4.4.2 Customizable Login Banner

The log in page has a customizable html banner as shown above in blue. If a banner file has not been loaded, nothing will be shown. Customization of the login banner is described in the [Customization → Login banner](#) section on page 231.

4.4.3 Remote User Authorization Failure Message

If NEMO uses remote user authentication and a user is denied access to NEMO because they do not have an active user name, a failure message is displayed. This message is customizable and is described in the [Customization → NanoFab failed login](#) section on page 318.

5 Navigation Bar

The navigation bar is available at the top of every NEMO user page. Users that are designated as staff have visibility to more features than non-staff users. The distinction between staff and non-staff is set in the [Detailed administration → Users](#) dialog described on page 371.

5.1 User Navigation Bar

The default navigation bar (Figure 10) provides users with useful information and quick links to the most common NEMO features.

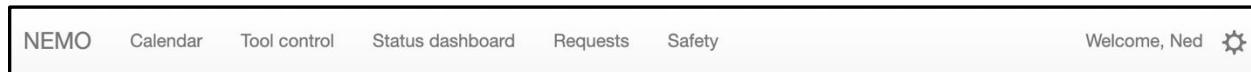

Figure 10 Navigation bar with default features

NEMO – Link to NEMO [landing page](#) described on page 30.

Calendar – Link to [calendar page](#) described on page 38.

Tool Control – Link to [tool control page](#) described on page 81.

Status dashboard – Link to [status dashboard page](#) described on page 127.

Requests – This link is optional and is only visible if configured. Link to [requests page](#) described on page 143.

Safety – Link to [safety page](#) described on page 160.

Welcome – Identifies the user currently logged into NEMO. This can help reduce confusion in labs where users share computers to access NEMO.

Preferences – Link to [user preference page](#) described on page 193.

Logout – Clicking this link will log the current user out of NEMO and return to the [login page](#) described on page 18. The logout link will only be displayed if LDAP authentication is used, and the button is enabled (see [customizations](#) below).

5.2 Staff Navigation Bar

The navigation bar for staff (Figure 11) includes the same information for users and adds the Administration menu and an indicator if a staff member is charging time to a user.

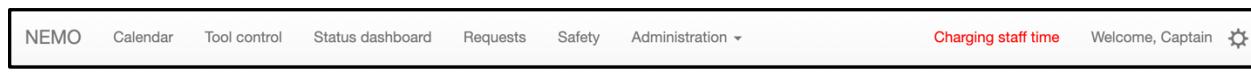

Figure 11 Navigation bar with additional staff features

Administration – Drop down link list to the NEMO administration features that require staff or super user rights to access (Figure 12). Details of the administration pages begin on page 204.

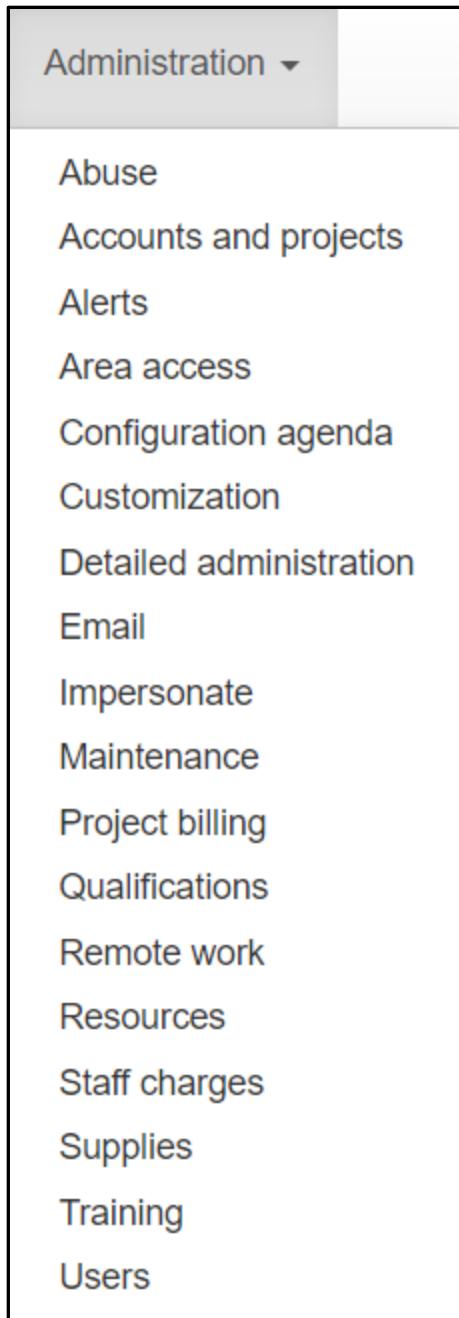

Figure 12 Navigation bar administration menu

Charging Staff Time – If a staff member is charging staff time to a user, it is noted in red on the navigation bar, so the staff member remains aware of accumulating charges. Hovering over ‘Charging staff time’ will show details of the staff charge including who, what project, and when the charges started (Figure 13). Clicking ‘Charging staff time’ will take you to the [Staff charges page](#) which is detailed on page 276.

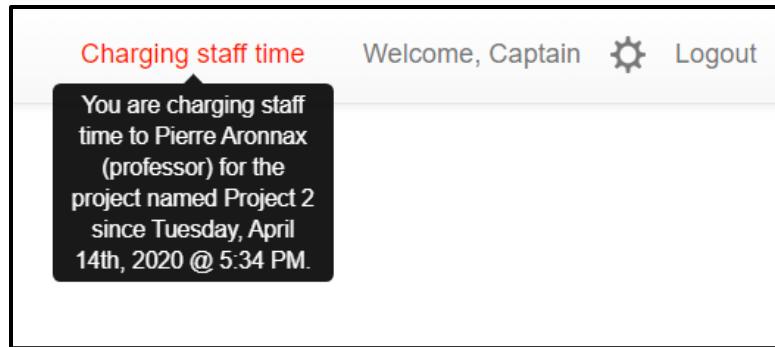

Figure 13 Charging staff time details

5.3 Mobile device navigation bar

The navigation bar will automatically change to a mobile-type menu icon drop down (Figure 14) if the window width is too small to display all information. The links provided for users and staff are maintained. However, there is no indication of charging staff time and the user name is not indicated. In addition, the preferences icon will change to a menu item.

Figure 14 Navigation bar for small windows with menu icon

Clicking on the menu icon will drop down the menu (Figure 15).

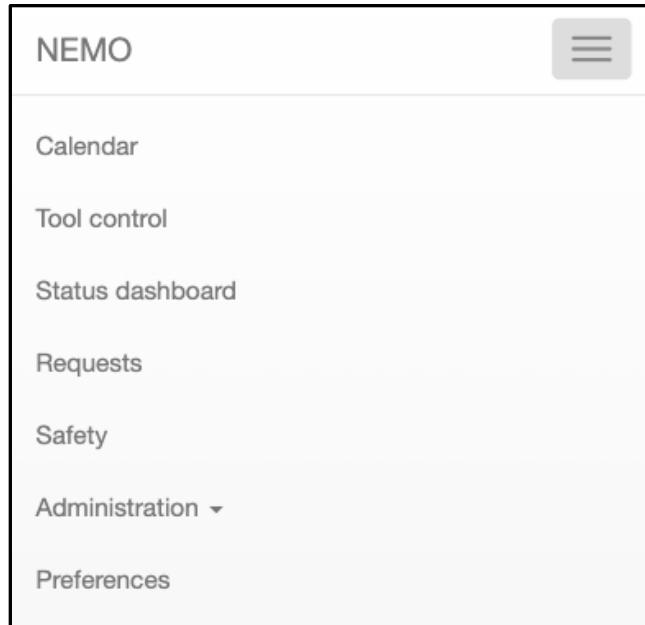

Figure 15 Mobile device drop down menu

5.4 Navigation bar customizations

5.4.1 Logout button

The logout button is configured to display or hide via the settings.py file described in the [Configuring NEMO settings → Templates](#) on page 603.

5.5 Landing Page

The landing page (Figure 16) is the home page for NEMO. It provides users and staff with important information as well as quick links that are fully configurable by your organization. In addition, first time lab users are prompted to complete a lab rules tutorial to reinforce important policies.

The screenshot shows the NEMO landing page with the following layout:

- Top navigation bar:** NEMO, Calendar, Tool control, Status dashboard, Administration ▾, Welcome, Captain, Logout.
- Upcoming reservations:** You're late for your Ellipsometer reservation! (Yellow box)
Starting on Thursday, April 16th @ 5:00 PM
Ending on Thursday, April 16th @ 10:00 PM
- Alerts & outages:** Sputter tool annual PM next week (Red box)
The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users.
Resource outage: O2 (Red box)
We are out of oxygen and expect more next week.
- Current NanoFab usage:** You are using the Chlorine Etch for the project named Cleanroom Staff since Tuesday, April 14th, 2020 @ 7:58 PM.
You are using the Fluorine Etch for the project named Project 2 since Tuesday, April 14th, 2020 @ 5:34 PM.
- Information boxes:** PECVD (Green box)
Starting on Friday, April 17th @ 4:00 AM
Ending on Friday, April 17th @ 5:00 AM
- Quick links:**
 - Calendar (Icon: calendar with 12)
 - Tool control (Icon: toolbox)
 - Status dashboard (Icon: info circle)
 - Safety (Icon: red first aid kit)
 - Send feedback (Icon: speech bubble)
 - Contact the NanoFab staff (Icon: smartphone)
 - View your usage (Icon: receipt)
 - Google (Icon: books)

Figure 16 NEMO landing page

5.6 Web address

The landing page is accessible as the home page of NEMO. For example, www.nemo.com/. The page can also be accessed from the navigation bar menu item “NEMO”.

5.7 Upcoming reservations

The landing page will list the next three reservations in two background colors, yellow or green. Each reservation box details the tool, start date/time, and end date/time. Details about reservations and how to make them can be found in the [Calendar page → Reservations section](#) starting on page 49.

Clicking on an upcoming reservation will take you to the [Tool control page](#) for the reserved tool which is described on page 81.

Yellow – indicates that you are late for your reservation (Figure 17). Once you log into a late reservation, it will no longer show up on the list. If you log out before your reserved end time, it may reappear.

You're late for your Ellipsometer reservation!
Starting on Thursday, April 16th @ 5:00 PM
Ending on Thursday, April 16th @ 10:00 PM

Figure 17 Late reservation dialog box

Green – indicates a future reservation that has not started yet (Figure 18).

PECVD
Starting on Friday, April 17th @ 4:00 AM
Ending on Friday, April 17th @ 5:00 AM

Figure 18 Future reservation dialog box

5.8 Alerts and outages

On occasion, the lab staff need to communicate important information to users. Alerts and outages (Figure 19) are shown in red to indicate their importance. Alerts and outages are configured through the [Alerts page](#) detailed on page 216.

Sputter tool annual PM next week
The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users.

Figure 19 Alert notification dialog box

Lab resource outages are also indicated in red (Figure 20). Resources are fully definable by the organization and associated with tools. Details of the resource feature and how it is used can be found on the [Resources page](#) on page 265.

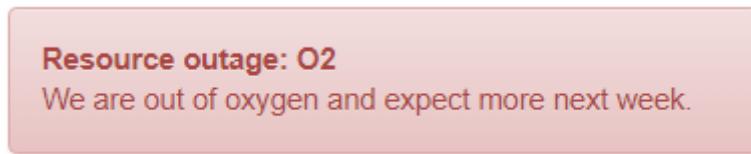

Figure 20 Resource outage notification dialog box

5.9 Current NanoFab usage

The landing page will list all current tool usage and lab area access in blue background boxes.

5.9.1 Tool Usage

Each tool usage dialog box (Figure 21) details the tool and start date/time. Clicking on a tool in use dialog box will take you to the [Tool control page](#) of the tool which is described on page 81.

Figure 21 Tool usage dialog box

5.9.2 Staff Charges

If a staff member is actively charging staff time to a user the details are displayed including the user, project, and start time. Clicking on the staff time dialog box will take you to the [Staff charges page](#) which is described on page 276.

Figure 22 Staff charge dialog box

5.9.3 Lab area access

The lab area access dialog details which lab you are in and which project your lab time is billed to. Area access history is maintained in the database. Lab areas are configured through the [Detailed administration → Areas page](#) detailed on page 371.

5.9.3.1 Manual area log in

NEMO can be configured to accommodate manual area log in through the landing page. If manual login is enabled, a green box under Current NanoFab usage provides the interface to log in to an area (Figure 23).

Figure 23 Manual area login dialog box

Clicking anywhere on the box will take you to the self-log-in dialog (Figure 24).

- If you have multiple projects, a radio button list will appear, select a project
- If you only have one project, your active project will be selected automatically
- If there are multiple areas, a radio button list will appear, select an area
- Click Log in to log into the area.

A screenshot of a white dialog box with a black border. At the top, the title "Log in to an access controlled area" is centered in a large, bold, dark font. Below the title, the text "Charge area access to which project?" is displayed. There are three radio buttons: "Cleanroom Eng", "Cleanroom Maint", and "Cleanroom Training". Underneath, the text "Log in to which area?" is displayed. There are two radio buttons: "Cleanroom" and "CMP lab". At the bottom left, there is a green rectangular button with the text "Log in" in white.

Figure 24 Self log in dialog

Upon success, the user will be logged in to the selected area using the selected project. There are several reasons a user may be denied log in including expired user accounts, no active projects, area closures, resource outages, and more. Additional details about log in errors can be found in the [Entrance tablet → Log in errors](#) section starting on page 597.

5.9.3.2 Changing projects

If you have multiple projects, there will be a link to bill your area access time to a different project (Figure 25) than the one you initially selected when logging in.

You are logged in to the [cleanroom](#) (logout). Usage time is being billed to the project named **Cleanroom Staff**. Click here to bill to a different project at any time.

Figure 25 Area usage dialog box

Clicking the link ‘Click here to bill to a different project at any time’ will take you to the change project page (Figure 26). Click the project name button to change the project. Projects are configured on the [Accounts and projects](#) section detailed on page 207.

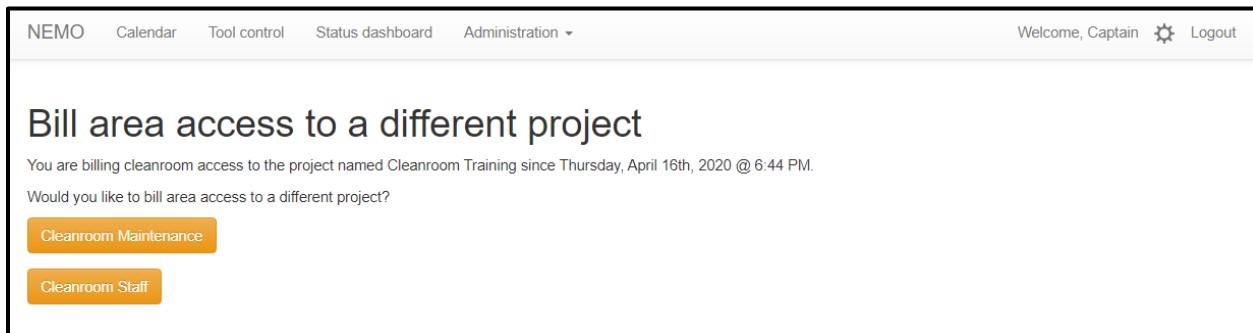

Figure 26 Bill area access to a different project

5.9.3.3 Manual area log out

NEMO can be configured to accommodate manual area log out through the landing page. If manual area log out is enabled, a logout link will appear next to the area name (Figure 27). Click the link to log out of the area (Figure 27).

You are logged in to the [cleanroom](#) (logout). Usage time is being billed to the project named **Project 2**.

Figure 27 Area manual log out dialog box

5.10 Configurable Quick Links

The NEMO landing page can be configured with custom icon links (Figure 28) that point to commonly used features of NEMO, organizational internal web pages, and external internet pages. Links can be configured with a custom icon, description, how to open, staff only, and desktop or mobile device rendering. Landing page quick links can be configured with a custom icon, description, how to open, staff only, and desktop or mobile device rendering. Setup details can be found under [Detailed administration → Landing page choices](#) on page 423.

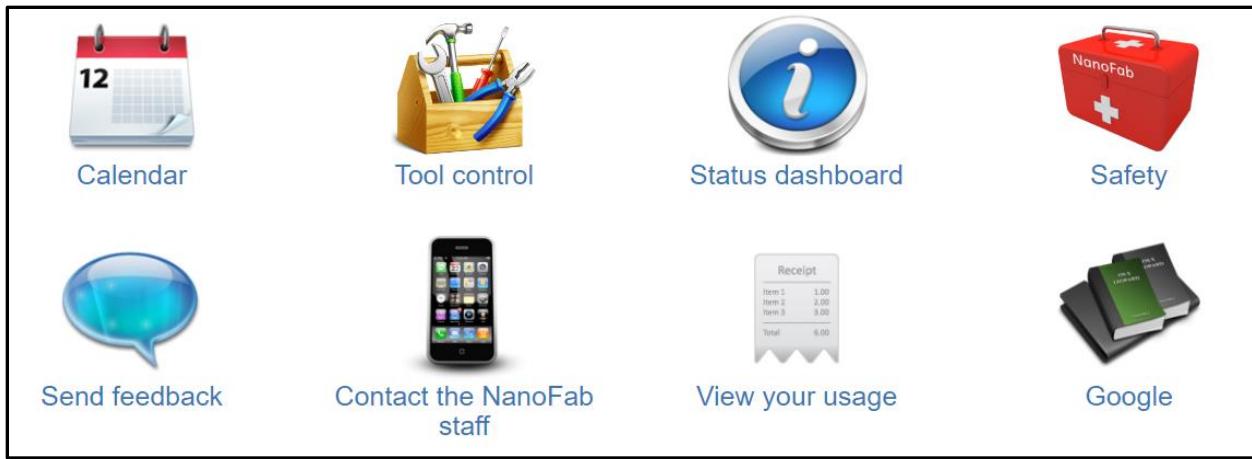

Figure 28 Landing page quick links

5.11 Facility Tutorial

The facility rules tutorial is an opportunity to provide new users with a tutorial about your lab operating procedures and rules. However, it is an optional and fully configurable tutorial that can be triggered in a user's profile. In addition, it is setup to be self-completing so after a user successfully completes it, the trigger will be unchecked. If triggered, it will not allow any reservations or tool log ins until complete. The trigger is set in the user's profile and by default is set upon user creation. NEMO user profiles are discussed in the [Users](#) section on page 293. Details for creating the tutorial, tutorial completion email template, and email address can be found in the [customization](#) section starting on page 307.

Each time a user with the tutorial trigger set logs into NEMO, they will receive a prompt to begin the tutorial (Figure 29). Clicking anywhere in the dialog box will start the tutorial. The tutorial page can also be reached at any time regardless of the training required setting. The tutorial page is accessible at site-address/facility_rulesTutorial/. For example, http://www.nemo.com/facility_rules_tutorial/.

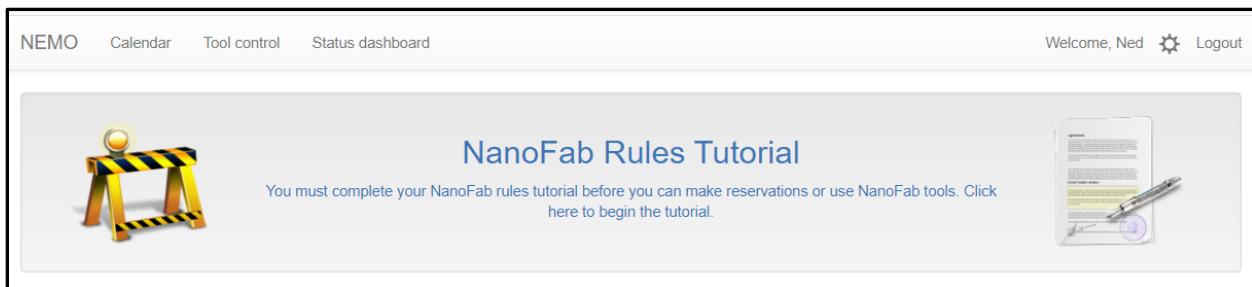

Figure 29 NanoFab rules tutorial dialog box

If the tutorial has not been configured but a user has been checked, an error message will be returned stating, "The NanoFab rules tutorial has not been customized for your organization yet."

Upon completion of the tutorial, the training required checkbox in the user profile will be cleared and an email will be sent if the abuse email address has been configured and the tutorial summary email template has been configured. The user will be prompted with a completion dialog (Figure 30). Click the continue button to return to the landing page.

Tutorial complete!

Tool usage and reservation privileges have been enabled on your user account.

[Continue to NEMO home screen](#)

Figure 30 Landing page tutorial complete dialog

5.12 Mobile device landing page

The landing page will automatically change to a mobile display by stacking information into a single scrollable column (Figure 31). Information is prioritized in the order of upcoming reservations, alerts & outages, current NanoFab usage, then quick links. Functionality remains the same. The landing page quick links can be configured to only display on mobile devices or only on desktop computers.

The mobile device view of the NEMO landing page is presented in a single column. At the top left is the 'NEMO' logo. To its right is a three-line menu icon. Below the logo is a section titled 'Upcoming reservations' containing a green box for a 'Chlorine Etch' reservation. Underneath this is a section titled 'Alerts & outages' with two red boxes: one for a 'Sputter tool annual PM next week' and another for a 'Resource outage: O2'. Below these is a section titled 'Current NanoFab usage' with a blue box stating the user is using the 'Chlorine Etch' for the project 'Cleanroom Staff' since April 20th, 2020. To the right of this main column is a sidebar with a light blue header bar containing the message: 'You are logged in to the **cleanroom** (logout). Usage time is being billed to the project named **Cleanroom Staff**. Click here to bill to a different project at any time.' Below this are four quick links: 'Calendar' (calendar icon), 'Tool control' (toolbox icon), 'Status dashboard' (info icon), and 'NanoFab' (red suitcase icon).

Figure 31 Mobile device view of landing page

5.13 Landing page customizations

5.13.1 Area manual log in and log out

The landing page can be configured to allow manual area log in and/or manual area log out. Setup details can be found under [Customization → Application settings](#) on page 310.

5.13.2 Configurable quick links

Landing page quick links can be configured with a custom icon, description, how to open, staff only, and desktop or mobile device rendering. Setup details can be found under [Detailed administration → Landing page choices](#) on page 423.

5.13.3 Lab tutorial setup

The lab tutorial is a custom JavaScript enabled html page. Details of how to setup and load the tutorial can be found under [Customization → NanoFab rules tutorial](#) on page 320.

6 Calendar

The calendar page is the main interface for making area and tool reservations, viewing reservation schedules, and reviewing usage. The page features a side bar to quickly navigate between areas and tools and shows each tools status as well as links to review your reservation schedule and actual usage; and the calendar which can be set for day, week, or month resolution to graphically show your reservation and usage information. Several reservation policies are implemented to limit abuse and ensure fair access to all users. The calendar page will automatically refresh every 30 seconds updating the current calendar view and all tool status icons.

6.1 Web address

The calendar page is accessible at site-address/calendar/. For example, www.nemo.com/calendar/. The page can also be accessed from the navigation bar menu item “Calendar”.

6.2 Calendar Side bar

The side bar allows the calendar mode and an area or tool to be selected and the personal schedule to be selected (Figure 32). If calendar overview options are enabled in the [Customization → Calendar settings](#) page, those links will be displayed in the sidebar as well.

Area Notes:

- The area section of the side bar is only visible if an area is configured to require a reservation for access.
- Area categories are optional.
- Area creation and configuration are discussed in the [Detailed administration → Areas](#) section on page 384.

Tool Notes:

- The tool section of the side bar is only visible if tool have been configured.
- Tool categories are required.
- Tool creation and configuration are discussed in the [Detailed administration → Tools](#) section on page 504.

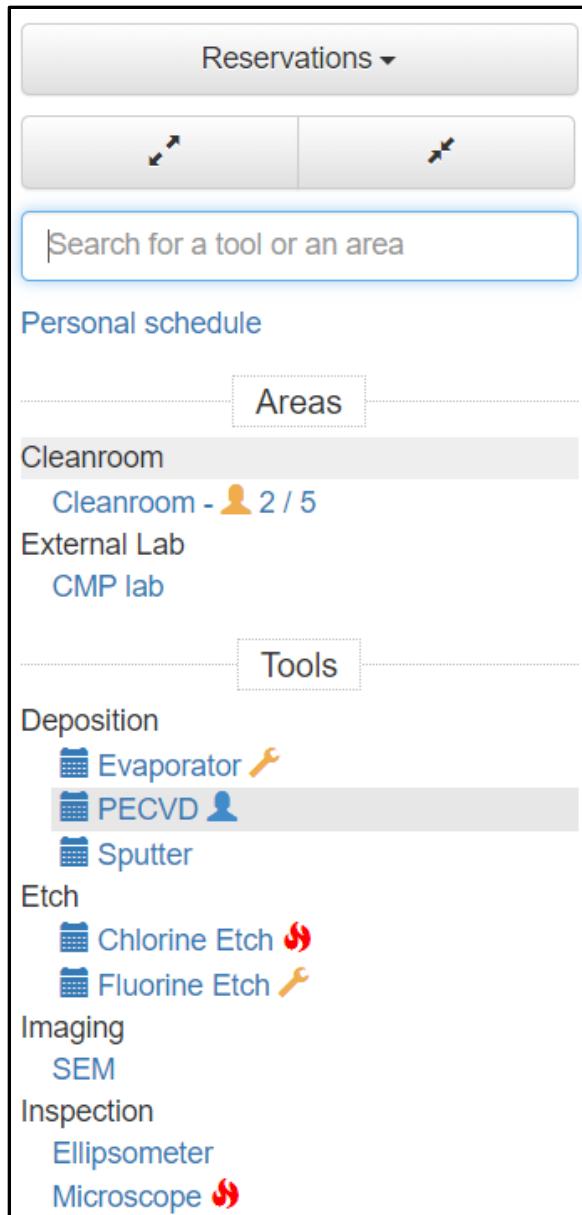

Figure 32 Calendar side bar

6.2.1 Calendar Mode

The top button on the side bar controls what information the calendar displays, and which calendar functions are available (Figure 33). Each mode is detailed in the following sections starting on page 49.

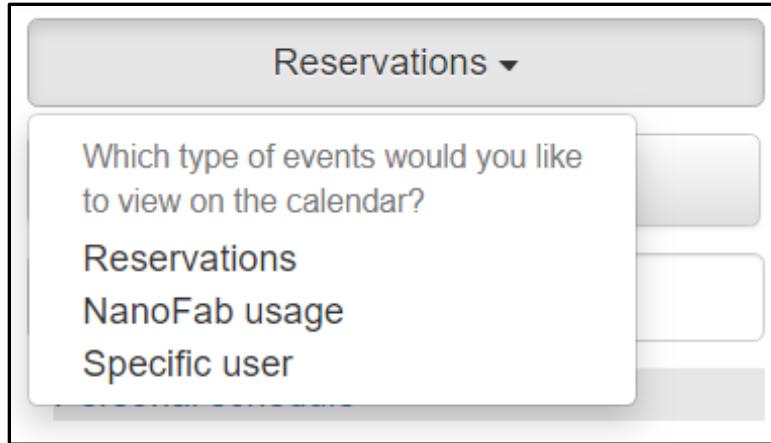

Figure 33 Calendar mode selection

6.2.2 Find the area or tool of interest

The expand and contract buttons (Figure 34) provide a shortcut to open or close the area and tool list.

Figure 34 Expand (left) and contract (right) buttons

Clicking expand will fully expand the area and tool list so all categories, sub-categories, areas, and tools are listed (Figure 32).

Clicking contract will close the area and tool list so only top categories are listed (Figure 35).

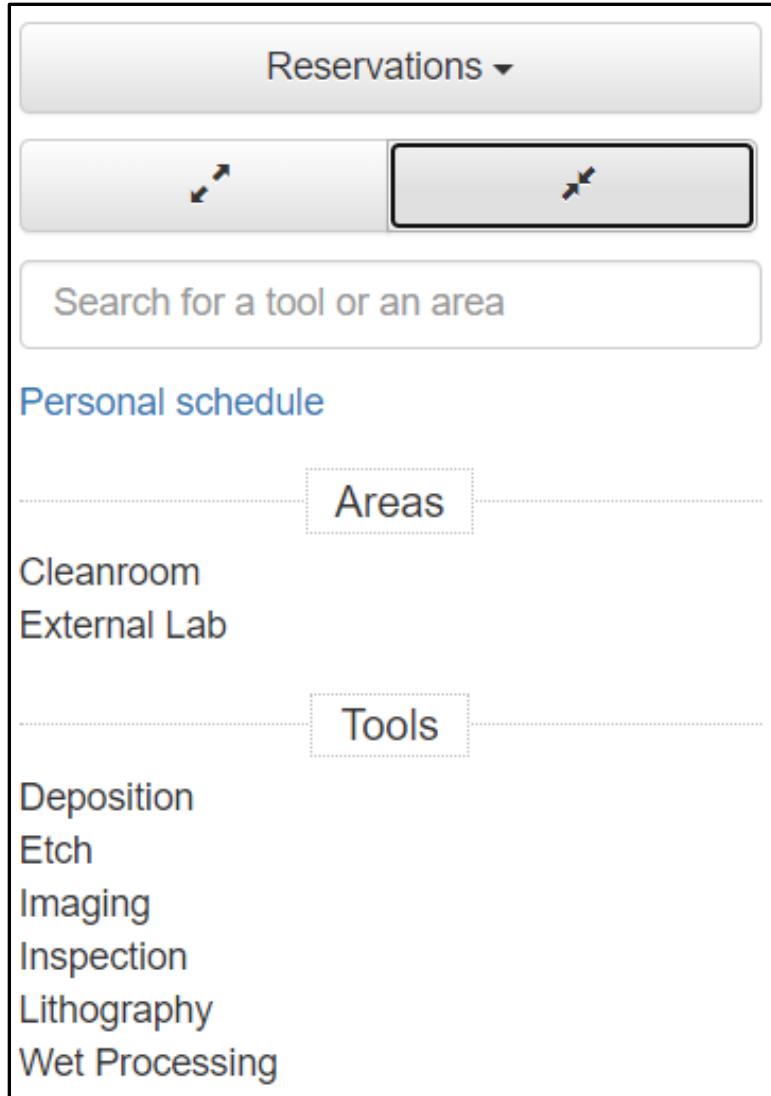

Figure 35 Tool list contracted

To find an area or tool directly, enter the name in the search dialog (Figure 36) then select the name of the list returned. The return list updates automatically as typed, and a tool can be clicked from the list at any time (Figure 37). Once clicked, the list is expanded to show the area or tool clicked and that area or tool is selected.

Figure 36 Tool search dialog

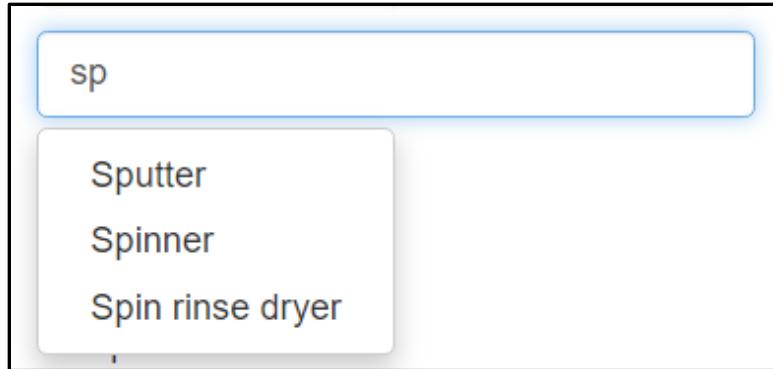

Figure 37 Tool search return list

6.2.3 Personal schedule

The personal schedule link appears as the first item in the tool list and provides a way to show reservations or usage across all tools for the current user. Note that since a specific tool is not selected while viewing a personal schedule, reservations cannot be made in this mode.

6.2.4 Overview options

Overview options can be enabled in the [Customization → Calendar settings](#) page detailed starting on page 312. Once enabled, you will have the options to see “All tools”, “All areas” and “All tools and areas” and non staff users can have a “Only show qualified tools” extra button depending on the settings you decide to enable.

As their name indicates, those options will allow the user to see all tools, areas or both in the calendar. Those links will also work with both the “Reservations” and “Facility usage” event feeds (Figure 38).

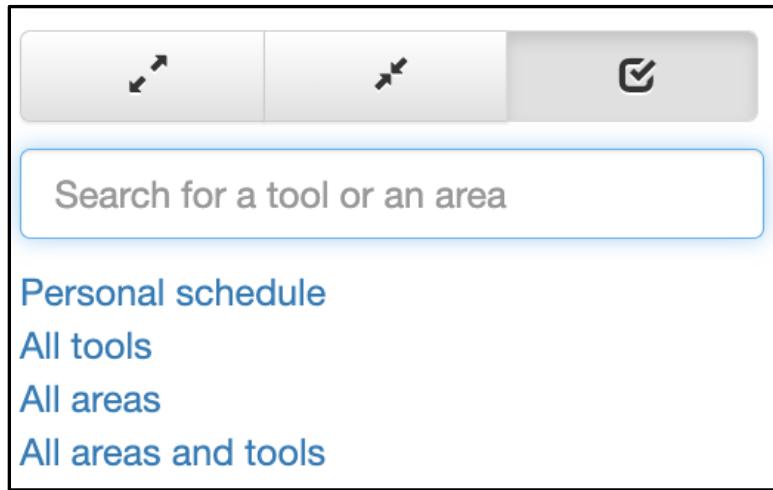

Figure 38 Tool overview options

6.2.5 Hierarchy of the area and tool list

The area and tool list are displayed in alphabetical order by top level category, then by second level category, etc. If both areas/tools and sub-categories exist at any level, areas/tools are listed first in alphabetical order, then sub-categories are listed in alphabetical order (Figure 39). All

tools must have at least one top level category. Area categories are optional and set in the area table discussed in the [Detailed administration → Areas](#) section on page 384. Tool categories are set in the tool table and are discussed in the [Detailed administration → Tools](#) section on page 504.

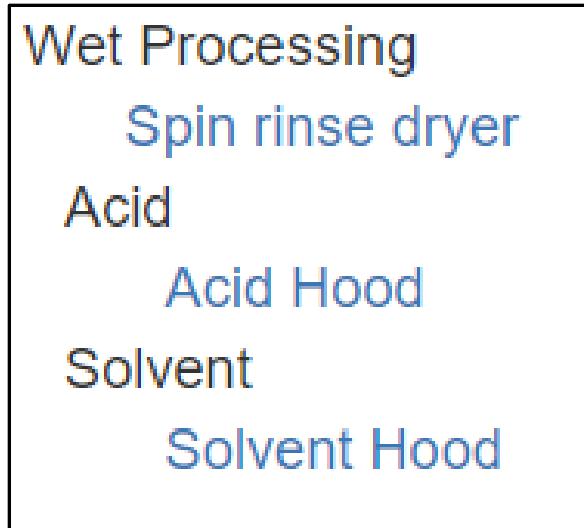

Figure 39 Example of category and tool mixed listing

6.2.6 Area list icons

Each area lists information to determine the status of the area. A person icon indicates the occupancy status according to color. A fraction follows indicating the number of occupants versus the total number allowed (Figure 40).

Figure 40 Example Area with icons

- The occupancy of this area is low and additional users will be allowed into the area. Hovering over the icon shows a list of current users.
- The occupancy is close to the limit. Hovering over the icon shows a list of current users.
- The occupancy is at or above the limit and users will not be allowed to enter. Hovering over the icon shows a list of current users.

The list of current users is color coded by role. Users in white, staff in green, and service personnel in orange (Figure 41).

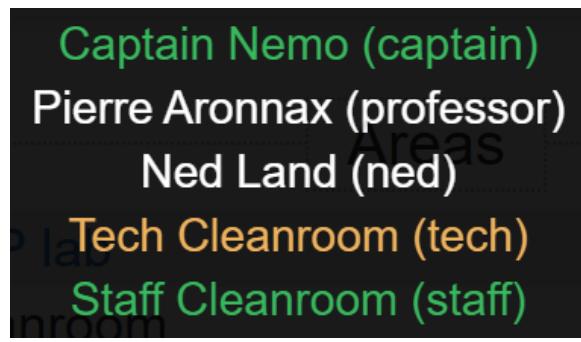

Figure 41 Hover over occupant listing

3 / 5 Fraction indicating the number of users currently logged in to the area versus the total number of users allowed. Hovering over will display the number of users, staff, and service personnel.

Note: The occupancy limits can be configured to include or exclude staff and service personnel in the total occupant count. In that case, they will be listed separately from the occupant count. The occupancy limit and counting staff and service personnel are set in the area table discussed in the [Detailed administration → Areas](#) section on page 384.

6.2.7 Tool list icons

Each tool can list icons to give a quick reference to visually note the operating status. Hovering over an icon will give a description of its purpose in case the icons meaning isn't known.

- The tool requires an area reservation. Before a user can make a reservation on the tool, they must first make an area reservation that will encompass the start time of the tool reservation.
- A user is currently logged into the tool. Hovering over the icon will show the logged in user's name.
- A delayed logoff is in effect. The tool is not available for users.
- A scheduled outage is in effect for this tool. The tool is not available to users.
- A scheduled outage of an option resource is in effect for this tool. The tool is available but may not be fully functional.
- A required resource is unavailable. The tool is not available to users.
- An optional resource is unavailable. The tool is available to users, but the tool may not be fully functional. The optional resource unavailable icon is only displayed if the required resource unavailable icon is not displayed.
- The tool is shut down because of a serious problem. The tool is not available to users.
- The tool has a problem that may impact usage or results. The tool is available to users, but the tool may not be fully functional. The tool problem icon is only displayed if the tool shut down icon is not displayed.

6.2.8 Area and tool qualification

By default, users can not see the areas they are not qualified to access. However, that is configurable in the [Customization → Calendar settings](#) page detailed starting on page 312. If enabled, areas that users are not qualified to access will be greyed out in the same manner as tools.

Tools that users are qualified to access will appear dark on the list while tools that a user is not qualified to access will appear greyed out (Figure 42). User tool qualifications are detailed in [Qualifications](#) on page 251.

Figure 42 Tool list showing user qualifications

6.3 Calendar header bar

The default calendar header bar is displayed above the calendar and provides users an interface to navigate dates and switch views (Figure 43). By default, the calendar displays a one-week view which can be changed to a one-day view or one-month view. The default view is customizable and detailed in the [Customization → Calendar settings](#) page detailed starting on page 312.

Figure 43 Default calendar header

6.3.1 Arrow buttons

Clicking the left or right arrows will increment or decrement the current view. For example, in the week view, the left arrow will move to the previous week and the right arrow will move to the following week.

6.3.2 Today button

Clicking the “Today” button will change the display to include the current day in the selected view. In any view, when the current day is in the view, the background is highlighted in beige (Figure 44).

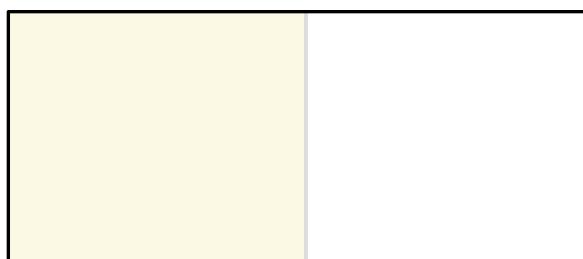

Figure 44 Background for current day (left) and other day (right)

6.3.3 Login to the area button

Clicking the login to the area button will log the user into the area selected if they have a current reservation. The login to the area button is only visible if area reservations are required, an area is selected, and the allow area login/logout in the calendar view option is set in the [Customization → Application settings](#) section detailed on 310.

The log in process follows the same steps outlined in the [landing page](#) section starting on page 33.

There are several reasons a user may be denied log in including expired user accounts, no active projects, area closures, resource outages, and more. Additional details about log in errors can be found in the [Entrance tablet → Log in errors](#) section starting on page 597.

6.3.4 Current day/time indicator

The current day is highlighted in each calendar view. On calendar views with the time displayed (day and week views), the current time can optionally be displayed with a red pointer (Figure 45). This option is set in the [Customization → Calendar settings](#) page detailed starting on page 312.

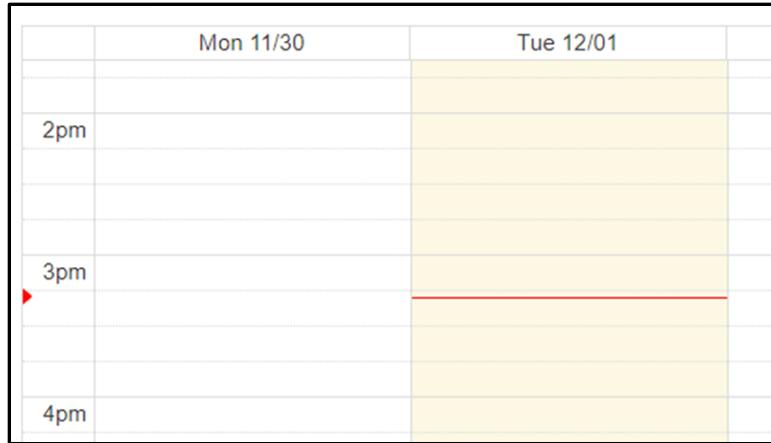

Figure 45 Calendar day and time highlights

6.3.5 Day view button

Clicking “Day” will show a single day view calendar. The top of the calendar will show the date in the form of ‘day of week mm/dd/yyyy’ (e.g. Monday 04/20/2020) (Figure 46). The default date format is customizable and detailed in the [Customization → Calendar settings](#) page detailed starting on page 312.

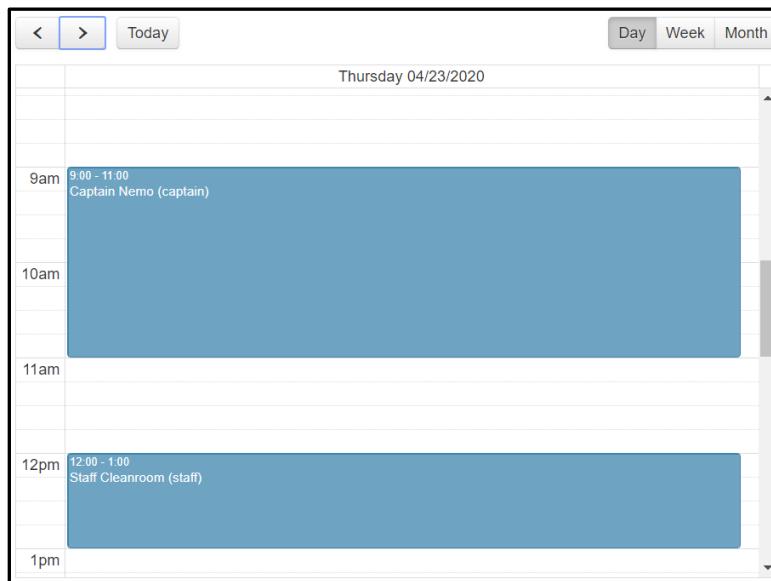

Figure 46 Calendar day view

6.3.6 Week view button

Clicking “Week” will show a single week view calendar. The date for each day will be displayed at the top of the calendar in the form of ‘day of week mm/dd’ (e.g. Mon 4/20) (Figure 47). The default date format is customizable and detailed in the [Customization → Calendar settings](#) page detailed starting on page 312.

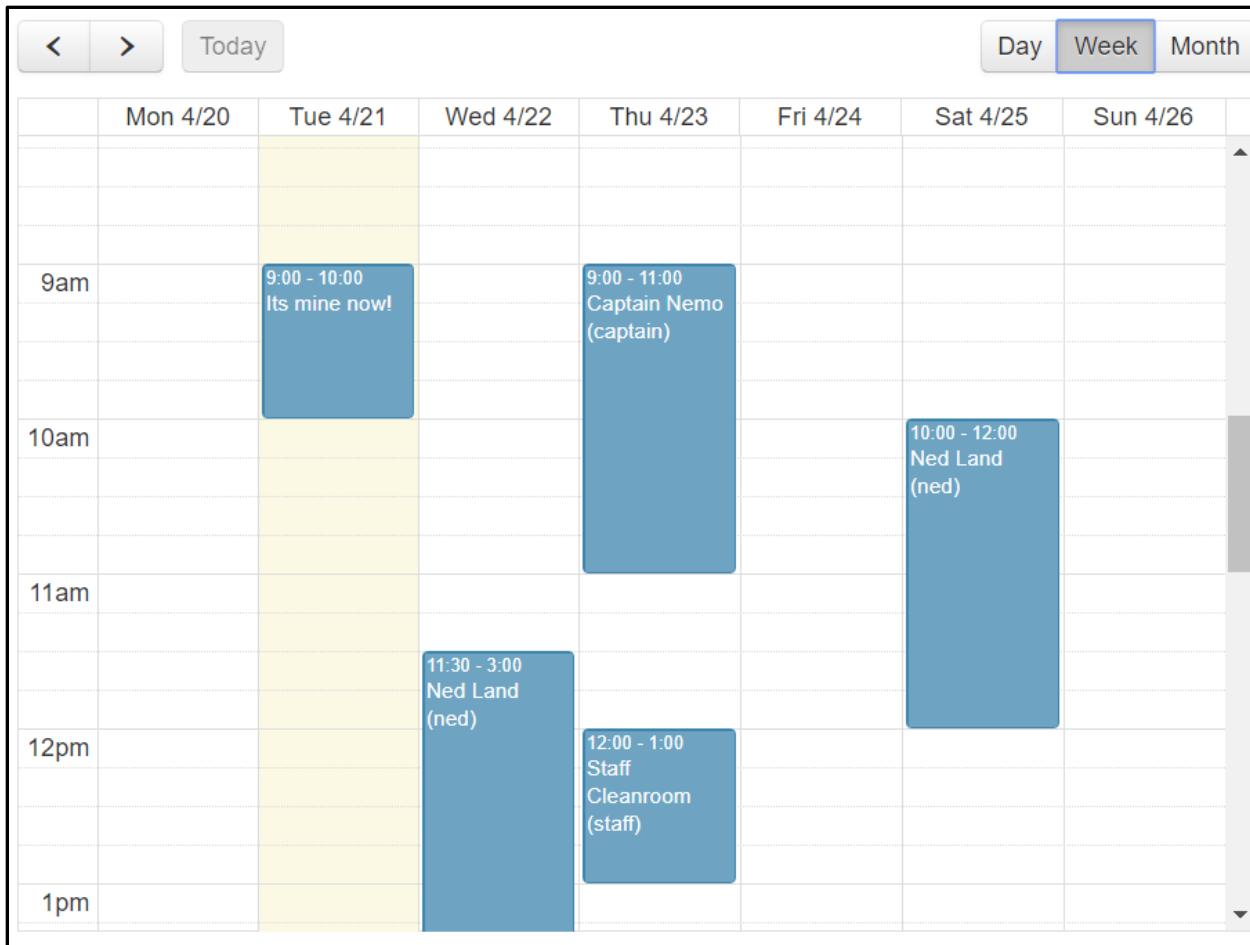

Figure 47 Calendar week view

6.3.7 Month view button

Clicking “Month” will show a single month view calendar with leading and trailing day from prior and future months. The calendar header will show the month and year, the top of the calendar will show the days of the week, and each day will show the day of the month (Figure 48). The default date format is customizable and detailed in the [Customization → Calendar settings](#) page detailed starting on page 312.

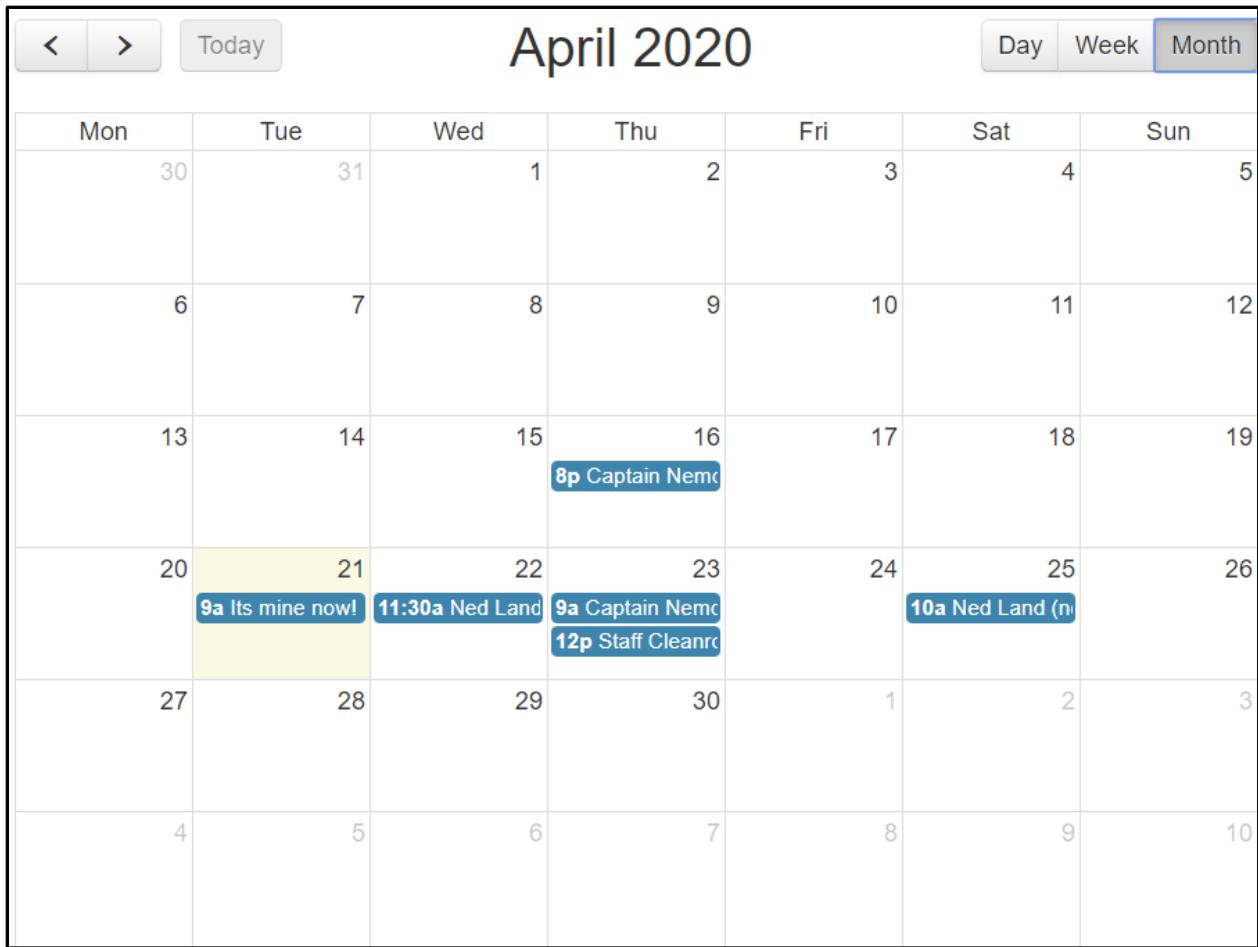

Figure 48 Calendar month view

6.4 Reservations

Selecting “Reservations” mode from the [calendar sidebar](#) will allow placement of area specific and tool specific reservations onto the calendar (Figure 49). All reservations are audited through system reservation policies as well as area specific and tool specific reservation policies. The calendar view is used to create a reservation, change a reservation, or view a personal schedule. All tools, all areas or all tools and areas can also be displayed if enabled in the [Customization → Calendar settings](#) page. A reservation history is maintained in the database including active, canceled, missed, moved, and resized reservations. Reservation records are discussed in the [Detailed Administration → Reservations](#) section on page 446.

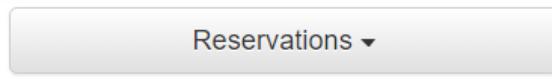

Figure 49 Calendar side bar in Reservations mode

6.4.1 Staff calendar header bar

In “Reservations” mode, the calendar header bar expands for staff (Figure 50) and adds reserving on behalf of someone else and scheduling an outage. The distinction between staff and non-staff is set in the [Detailed administration → Users](#) dialog described on page 371.

Figure 50 Staff calendar header bar in reservations mode

6.4.1.1 Reserve for someone else button

The ‘Reserve for someone else’ button starts a staff reservation on behalf of another user which is detailed on page 61.

6.4.1.2 Schedule an outage button

The ‘Schedule an outage’ button starts the scheduling of a one time or recurring shutdown of an area or tool which is detailed on page 62.

6.4.2 Calendar view

Reservations for all users and scheduled outages are viewable for the selected tool in the time window displayed (Figure 51). Reservations display in blue and show the start time, end time, and user that reserved the tool. Scheduled outages display in red and show the start time, end time, and outage title. NEMO automatically updates the reservations upon any navigation change for tool selection or time window. A scroll bar will appear on the right side of the calendar view to allow scrolling the time window. Clicking any reservation or scheduled outage will show additional details (Figure 52, Figure 53).

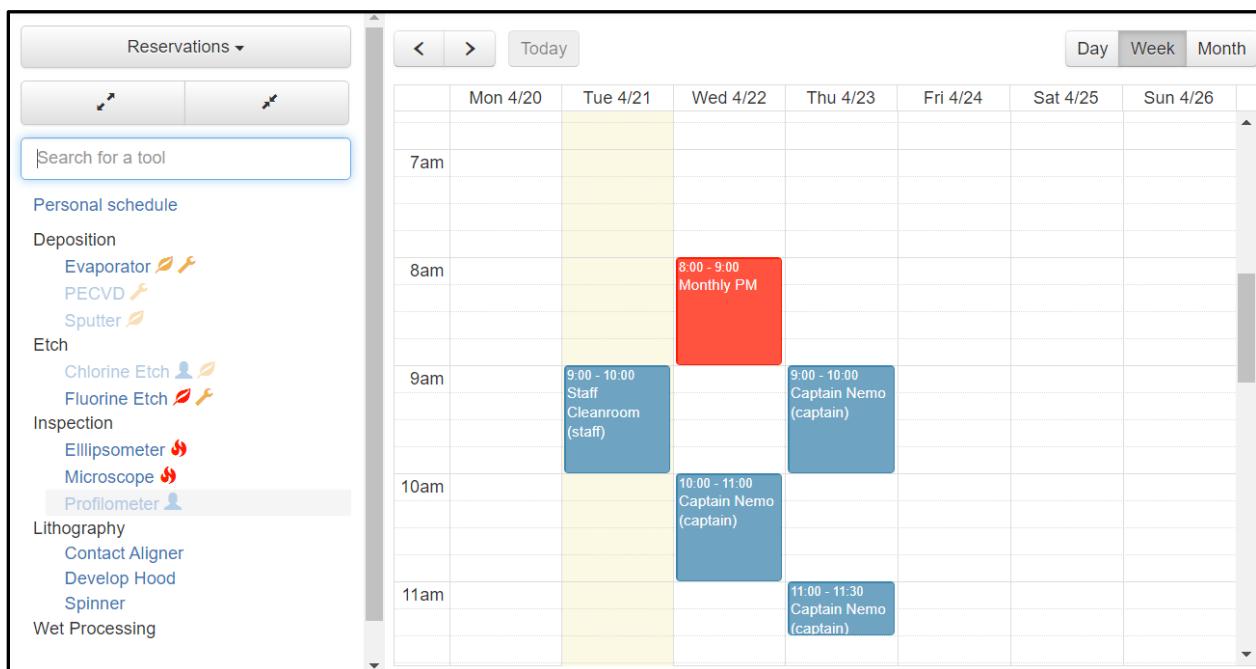

Figure 51 Tool specific calendar view

Figure 52 Scheduled outage details dialog

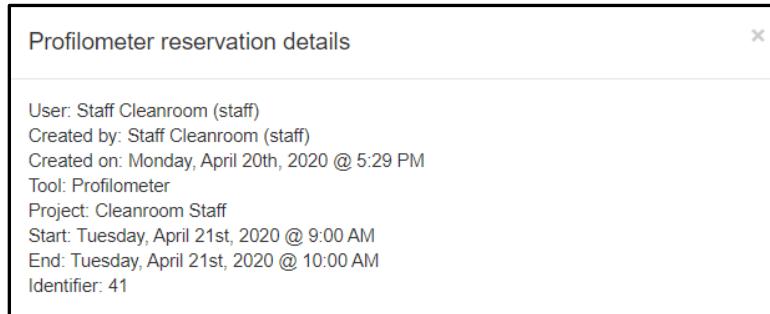

Figure 53 Reservation details dialog

6.4.3 Personal schedule view

The personal schedule view will display all reserved areas and tools for the user in the current time window. Personal schedule reservations display in green and show start time, end time, and the area or tool name (Figure 54). Reservations may be moved or deleted in this view. Clicking any reservation will show additional details (Figure 55).

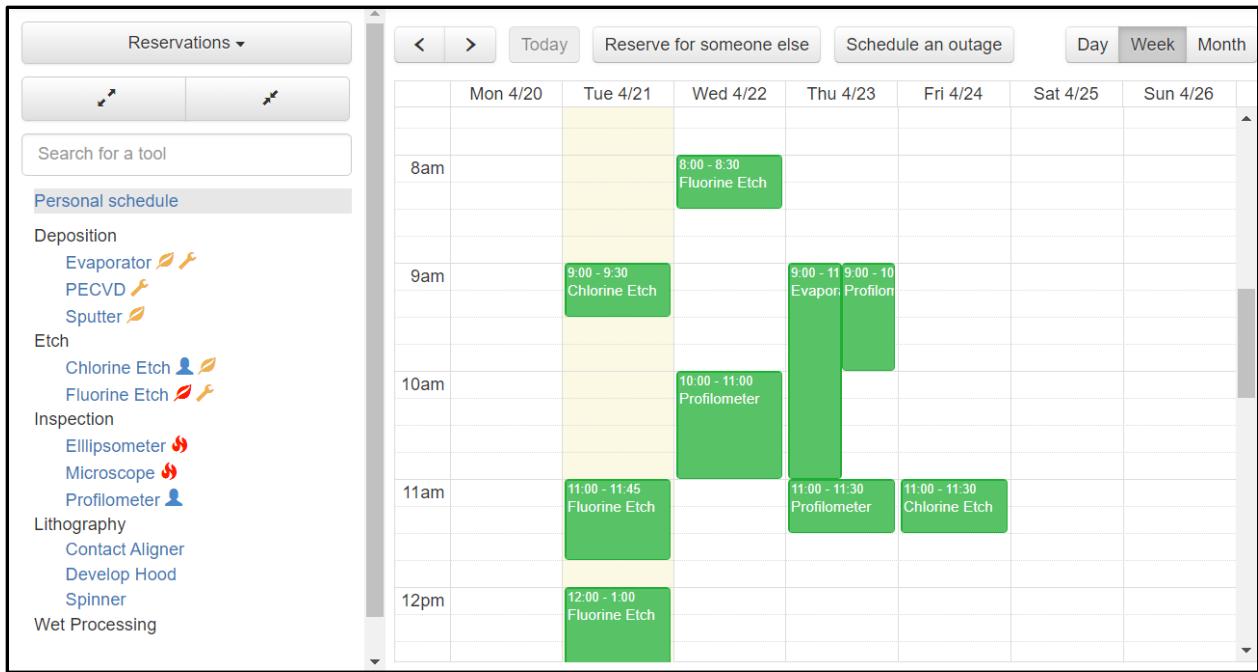

Figure 54 Personal schedule calendar view

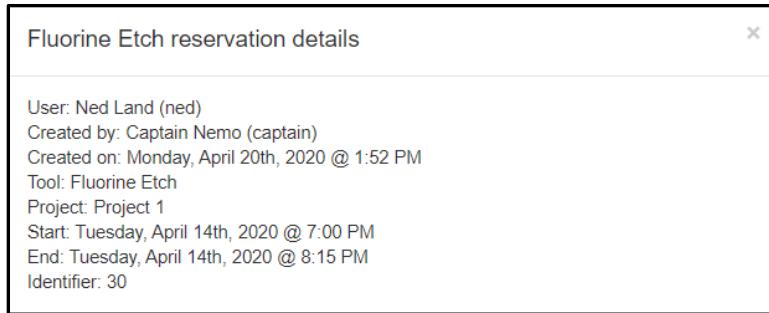

Figure 55 Personal schedule reservation details dialog

6.4.4 All tools, All areas and All tools and areas calendar views

Similar to the personal schedule, selecting “All tools” will allow the user to see all tool reservations (Figure 56). The same goes for “All areas” and “All areas and tools”.

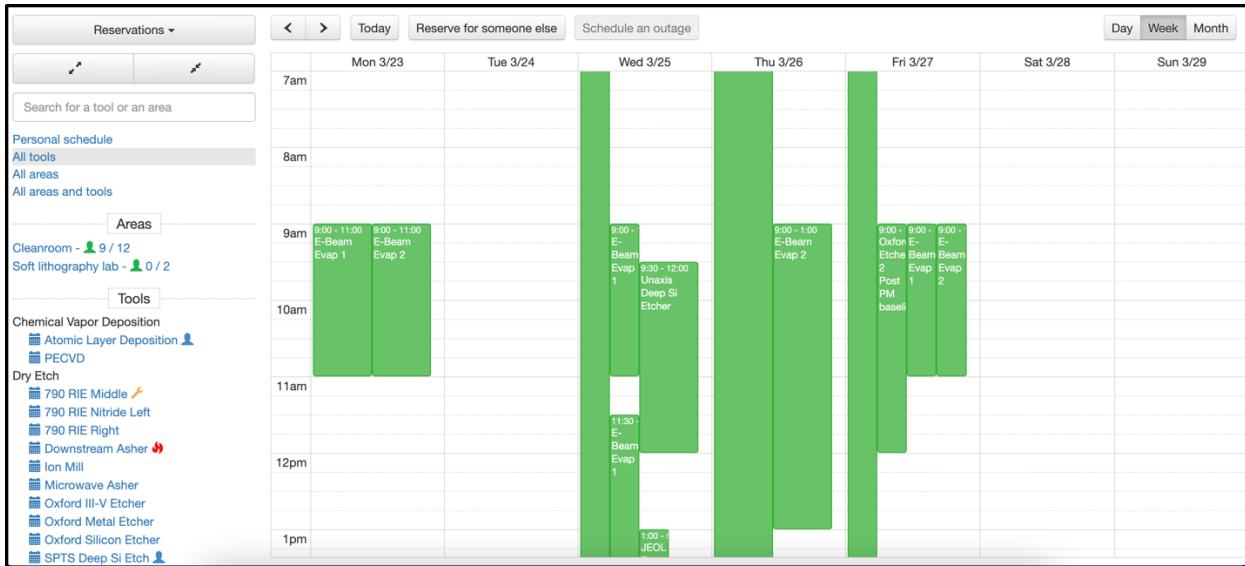

Figure 56 All tools calendar view

6.4.5 Reservation policy

Reservation policies fall into two categories. There are system reservation policies and area/tool specific reservation policies. The policies are intended to safeguard NEMO, ensure the integrity of the database, and provide a customizable profile to maximize tool availability to users. Staff are able to override many of the policies on behalf of a user to provide scheduling flexibility and promote staff awareness of special tool needs such as excessively long runs that might otherwise go undetected.

6.4.5.1 System reservation policies

The following system reservation policies must be met to allow a reservation to be created or modified. Staff **may not override** any of these policies.

- Reservations may not have a start time that is earlier than the end time.
- The user may not create, move, or resize a reservation to coincide with another reservation.
- The user may not create, move, or resize a reservation to coincide with a scheduled outage.
- Reservations that have been cancelled may not be changed.
- The user must belong to at least one active project to make a reservation. User project associations are discussed in [Users](#) on page 293.
- The user must associate their reservation with a project they belong to. If a user has only one project, this is automatic.

The following system reservation policies must be met to allow a reservation to be created or modified. Staff **may override** any of these policies on behalf of a user. If a staff member is making the reservation for themselves, these policies will not be checked.

- The user must complete NEMO training to create reservations.

- The user may not create or move a reservation to have a start time that is earlier than the current time.
- The user may not move or resize a reservation to have an end time that is earlier than the current time.
- The user must be qualified on the tool in question in order to create, move, or resize a reservation.
- If an area requires a reservation a tool reservation in that area may not be made without a corresponding area reservation where the tool start time is within the area reservation.
- An area reservation may not be moved or resized out of range of any tool reservations it originally contained.

6.4.5.2 Area and tool specific reservation policies

Area specific reservation policy setup is discussed in the [Detailed administration → Areas](#) section on page 384.

Tool specific reservation policy setup is discussed in the [Detailed administration → Tools](#) section on page 504.

Area and tool specific reservation policies can be configured to automatically override for all users based on the time of day and for weekends. This can help promote off hour and weekend usage for high demand tools that have restrictive policies to limit regular weekday hours monopoly of tools.

The following area and tool specific reservation policies must be met to allow a reservation to be created or modified. Staff **may override** any of these policies on behalf of a user. If a staff member is making the reservation for themselves, these policies will not be checked.

- The reservation may not be made more than the area or tool's reservation horizon number of days in advance.
- The reservation must be at least as long as the minimum block time for the area or tool.
- The reservation may not exceed the maximum block time for the area or tool.
- The user may not exceed the maximum number of reservations per user per day for the area or tool.
- The user may not make reservations without the minimum amount of time between reservations for the same user and same area or tool.
- The user may not make reservations exceeding the maximum amount of time they may reserve in the future for the area or tool.

6.4.6 Create a reservation

To create a reservation in NEMO:

- Navigate to the Calendar page
- Select the area or tool of interest from the tool list on the sidebar.
 - Note: when an area requires a reservation for access, tool reservations can only be made inside of an area reservation window, so make area reservations first.
- Navigate the calendar view to show the start day and time.
- Click the left mouse button and hold at the start day and time.

- While holding the left mouse button, drag to the end day and time.
- Release the left mouse button.
- The requested reservation will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation will not be made (Figure 57). Click ‘Continue’ to close the dialog. [Reservation policies](#) are discussed on page 52.

Figure 57 Reservation policy conflict dialog

- If a user has only one project, it will automatically be selected.
- If a user has multiple projects, they will be prompted to select a project from their list of projects (Figure 58). Details about projects can be found on the [Accounts and projects page](#) discussed on page 207.

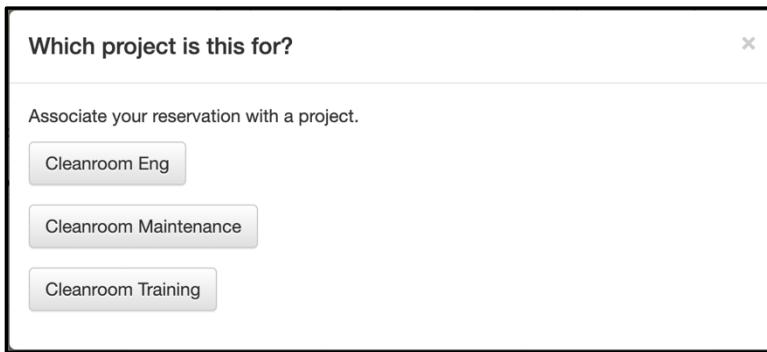

Figure 58 Reservation project selection

- If a tool/area has a “missed_reservation_threshold” set, a message will appear warning the user that a fee might be charged for missing the reservation (Figure 59):

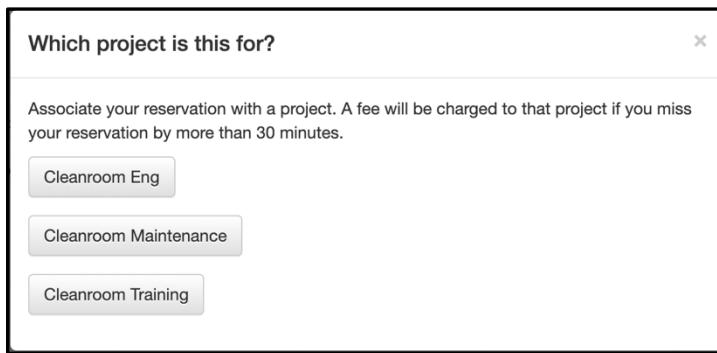

Figure 59 Reservation project selection with missed reservation message

- Project information is needed to implement missed reservation and tool configuration accounting. Staff are exempt and therefore will not be asked for a project when making reservations.
- If there are reservation questions, a form will appear asking the user to answer the questions. Reservation questions are discussed in the [Reservation Questions](#) section on page 458.
- If the tool is configurable, a configuration dialog will appear. Tool configurations collect information about how a tool will be run by the user and can be collected for informational purposes or to prompt staff to configure a tool for a user. Configuration history is saved in the database. Each tool configuration has a minimum advanced notice. If the reservation request is within the advance notice window, the user will be prompted in red at the top of the window that the staff may not be able to accommodate the request. Select the appropriate options and provide details as necessary (Figure 60). Configurations are discussed in the [Configuration Agenda](#) section on page 228.

Choose tool configuration

Warning: 1 hours of advance notice is required when reserving this tool in order to configure it properly. You may still create a reservation right now, but there is no guarantee the tool will be properly configured when you arrive to use it.

Please select the target you will need. If you will provide the target, provide the details in the comments.

Target:

Select a target from the list.

Do you have anything else to add? (Optional)

Please provide any additional information regarding tool configuration for your reservation (using less than 3000 characters).

Create this reservation

Figure 60 Reservation tool configuration

- For tool reservations, if the area has a reservation warning person limit configured, the user will be prompted with a message to inform them of the number of people expected

in the area and to consider social distancing when making reservations (Figure 61). In addition, if multiple people are expected in the same location within an area that information is provided as well. Areas are defined in the area table of the database and discussed in the [Detailed administration → Areas](#) section on page 384. Locations are defined in the tool table of the data base and discussed in the [Detailed administration → Tools](#) section on page 504.

Figure 61 Reservation occupancy warning

- The reservation will be written to the Reservations table in the database which is discussed in the [Detailed administration → Reservations](#) section on page 446.
- The reservation will appear on the calendar.

6.4.7 Move a reservation

- Move the mouse pointer into the middle of the reservation to be moved. If you have permission to move the reservation, the mouse pointer will change from the arrow to a hand.
- Click the left mouse button and hold.
- While holding the left mouse button, drag the reservation to the new day and time.
- Release the left mouse button.
- The requested move will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation move will not be made (Figure 62). Click 'x' to close the dialog. [Reservation policies](#) are discussed on page 52.
- NOTE: An area reservation may not be moved out of range of any tool reservations it originally contained.
- Any time a reservation is moved, the old reservation is cancelled and a new reservation with updated information takes its place. The descendant field links the old reservation to the new one, so the history of reservation moves, and changes can be easily tracked.

Figure 62 Reservation move failed dialog

6.4.8 Resize a reservation

- Reservations may only be resized to change the end time. If the reservation needs to start at an earlier time, move the reservation to the new start time, then resize it.
- Move the mouse pointer over the bottom of the reservation to be resized. If you have permission to resize the reservation, the mouse pointer will change from the arrow to a double arrow and two stacked lines will appear at the bottom middle of the reservation (Figure 63).
- Click the left mouse button and hold.
- While holding the left mouse button, drag the reservation end time to the new day and time.
- Release the left mouse button.
- The requested resize will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation resize will not be made (Figure 64, Figure 57). Click 'x' to close the dialog. [Reservation policies](#) are discussed on page 52.
- NOTE: An area reservation may not be resized out of range of any tool reservations it originally contained.
- Any time a reservation is resized, the old reservation is cancelled and a new reservation with updated information takes its place. The descendant field links the old reservation to the new one, so the history of reservation changes can be easily tracked.

Figure 63 Reservation resizing bottom change

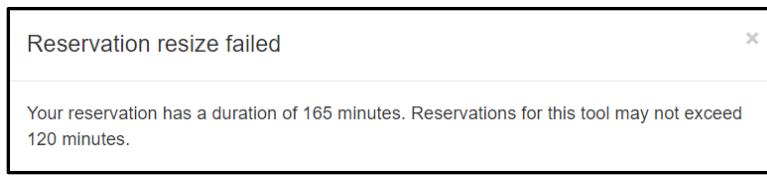

Figure 64 Reservation resize failed dialog

6.4.9 View details or delete a reservation

- Single click the center of the reservation.
- A reservation detail dialog will be displayed that provides additional information (Figure 68)
 - Who created the reservation, this is a link that once clicked will provide an email dialog through NEMO to contact the user.
 - When the reservation was created
 - The area or tool reserved, for tool reservations, the name is a link to the tool page.
 - The project
 - If the user has multiple projects the selected project can be changed.
 - Click the edit icon (pencil) on the right.
 - The project will change to the update dialog (Figure 65).

Figure 65 Reservation project change dialog

- Select the new project from the dropdown list (Figure 66).

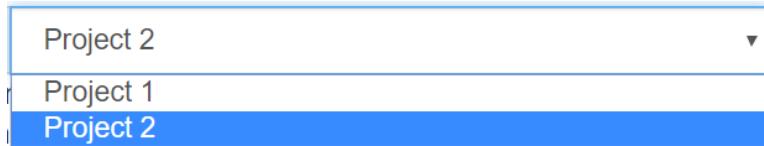

Figure 66 Reservation project change dropdown

- Click the change project button to complete (Figure 67).

Figure 67 Reservation project change button

- The start time and end time

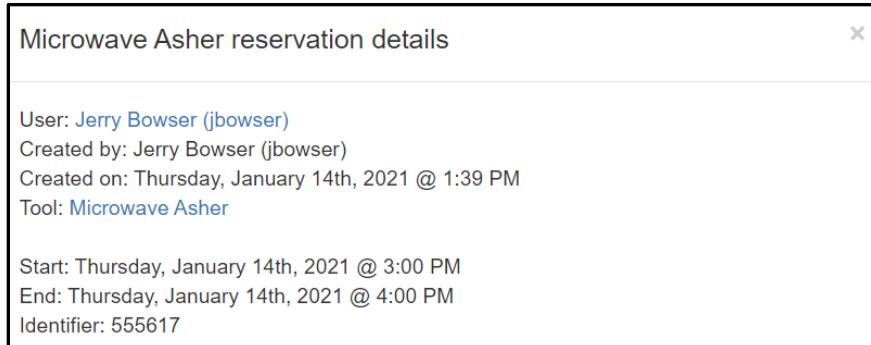

Figure 68 User reservation details dialog

- Staff Only – two additional fields are provided for staff (Figure 69)

- A title for the reservation can be set to users see a more descriptive reason for a staff reservation. This can be useful to indicate process qualifications or baselines. Type a title into the dialog box then click ‘Set title’.
- A cancelation reason box will appear next to the cancel if a staff member clicks on another user’s reservation including another staff member. Staff can delete any reservation however they must give a reason that will be emailed to the impacted user. Type a reason for canceling the reservation into the dialog box then click ‘Cancel this reservation’.

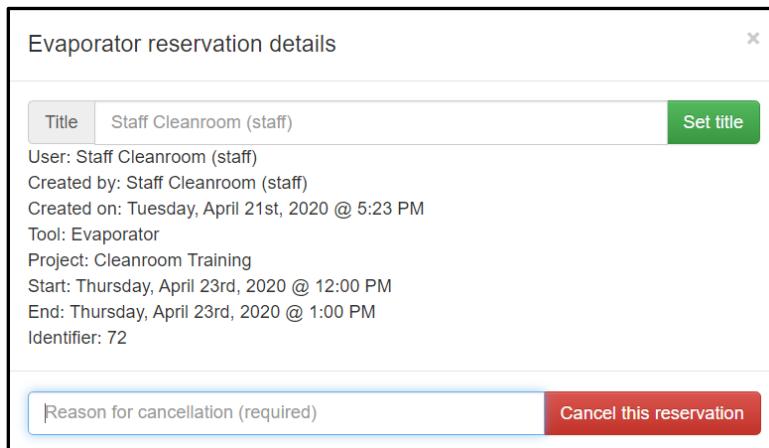

Figure 69 Staff reservation details dialog

- Click the ‘x’ to close the details without deleting the reservation
- Click the ‘Cancel this reservation’ button to cancel the reservation.
- Note: users may only cancel their own reservations that have not have not passed the end time.
- Any time a reservation is canceled, the canceled field in the reservation table is set.

6.4.10 Reservation email notifications

NEMO can send email notifications to staff and users

- There are user settable preferences to send reservation and cancelation emails with calendar invites. User preferences are discussed in the [User preferences section](#) on page 193.
- If staff cancels a user reservation, the user will receive an email notification regardless of user preference settings as described in [Customization → Cancellation email](#) detailed on page 323.
- Users are sent a reminder email approximately two hours prior to the start of a reservation. The email serves to not only remind user of upcoming reservations but also to alert them to any potential problems with the reserved tool as described in [Customization → Reservation reminder email](#) detailed on page 329 and [Customization → Reservation warning email](#) detailed on page 332.

6.4.11 Missed reservations

Each area and tool can be configured to automatically cancel a user's reservation if they are late logging in by more than the missed reservation threshold number of minutes. A missed reservation event requires three items to be setup.

1. A missed reservation threshold must be entered for any areas or tools that will trigger a missed reservation as discussed in the [Detailed administration → Areas](#) section on page 384 and in the [Detailed administration → Tools](#) section on page 504.
2. A missed reservation email can optionally be configured to notify the user and lab staff that a reservation was missed as described in [Customization → Missed reservation email](#) detailed on page 61.
3. A timed service app must be properly configured and running which is described in [NEMO timed services](#) on page 603.

If configured, once the missed reservation threshold is exceeded, the reservation will be canceled, marked as missed in the reservation table, and email notifications sent.

If an area or tool is shutdown, a missed reservation **will not** be triggered.

All staff reservations are exempt from this rule.

6.4.12 Reserve for someone else (staff only)

The reserve for someone else feature gives staff the ability to override reservation policies on behalf of a user. For example, reserving a tool for a user before they complete qualification on a tool or reserving further in advance due to special travel. The button is only visible if the user logged in is designated as staff.

Clicking the ‘Reserve for someone else’ button will display the selection dialog (Figure 70). Type the user’s name in the search box. The return list updates automatically as typed, and a tool can be clicked from the list at any time (Figure 71). Once clicked, the button dialog changes to “Reserving as [user]”. Proceed to make reservations.

Figure 70 Make a reservation for someone else dialog

Figure 71 User search return list

If a reservation made on behalf of another user violates the user reservation policy a dialog will be shown to prompt the staff member with a list of policy conflicts and buttons to override the policy or not create the reservation (Figure 72). Clicking override will make the reservation for the user and override any policy violations. Reservation policies are discussed below on page 50.

Figure 72 Reservation policy conflict

To end making reservations on behalf of the user, click the “Reserving as [user]” button on the calendar header. The button text will return to “Reserve for someone else”.

6.4.13 Schedule an outage (staff only)

The scheduled outage feature allows staff to make either single or recurring reservations that will automatically change an area or tools status to shut down. This prevents user login at automatic intervals which can be helpful for maintenance tasks such as changing tool configurations or executing pre-maintenance ‘behind the scenes’ tasks that could be impacted by users inadvertently operating a tool.

Clicking the ‘Schedule an outage’ button will remove the ‘Reserve for someone else’ button and change the ‘Schedule an outage’ button text to ‘I’ve finished creating scheduled outages’. After defining the start and end time as detailed on page 49, a dialog will appear (Figure 73).

Schedule an outage

Title
You must provide a title to create a scheduled outage

Category - is there a category for this outage? This is useful for data and trend analysis

Details
Please provide any additional details for the scheduled outage. Be descriptive so that users understand why there is a scheduled outage.

Create more than one occurrence of this outage

Schedule this outage

The dialog box is titled 'Schedule an outage'. It contains a 'Title' field with a placeholder 'You must provide a title to create a scheduled outage'. Below it is a 'Category' section with a note about being useful for data and trend analysis, followed by a dropdown menu. There's also a 'Details' section with a text area for additional information. A checkbox labeled 'Create more than one occurrence of this outage' is present. At the bottom is a green button labeled 'Schedule this outage'.

Figure 73 Scheduled outage dialog

A title is required and should provide a brief description of the why the area or tool is scheduled for an outage. An optional category will appear if any scheduled outage categories are defined. Categories can be useful for data analysis. An optional details box can be used to provide more in-depth information.

To create recurring outages, click the check box labeled ‘Create more than one occurrence of this outage’. A new dialog will appear (Figure 74) under the check box to enter the frequency and end time. Recurring outages can only be scheduled up to 90 days in advance. It is important to note that recurring outages become standalone reservations once they are created and cannot be modified as a group. However, individual occurrences can be deleted in the calendar or bulk deleted in Detailed Administration.

Schedule an outage

Schedule this outage

Figure 74 Scheduled outage recurrence

To complete the reservation, click the ‘Schedule this outage’ button. The scheduled outage will appear on the calendar in red listing the start and end time as well as the title provided. The example in (Figure 75) shows a scheduled shutdown that had a title of ‘Monthly PM’. The details can be seen by clicking the reservation on the calendar.

Figure 75 Example scheduled outage

6.5 Showing NanoFab usage

Selecting “NanoFab usage” mode from the [calendar sidebar](#) will display activity history on the calendar (Figure 76).

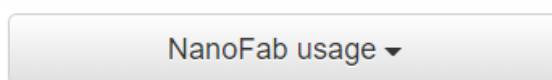

Figure 76 Calendar side bar in NanoFab usage mode

6.5.1 Calendar view

Area or tool activity and missed reservations for all users are viewable for the selected area or tool in the time window displayed (Figure 77). Tool usage displays in blue and shows the start time, end time, and user that used the tool. Area access displays in orange. Missed reservations display in red and show the user, start time, end time. NEMO automatically updates the view upon any navigation change for tool selection or time window. A scroll bar will appear on the right side of the calendar view to allow scrolling the time window. Clicking on any activity box will show additional details (Figure 78, Figure 79).

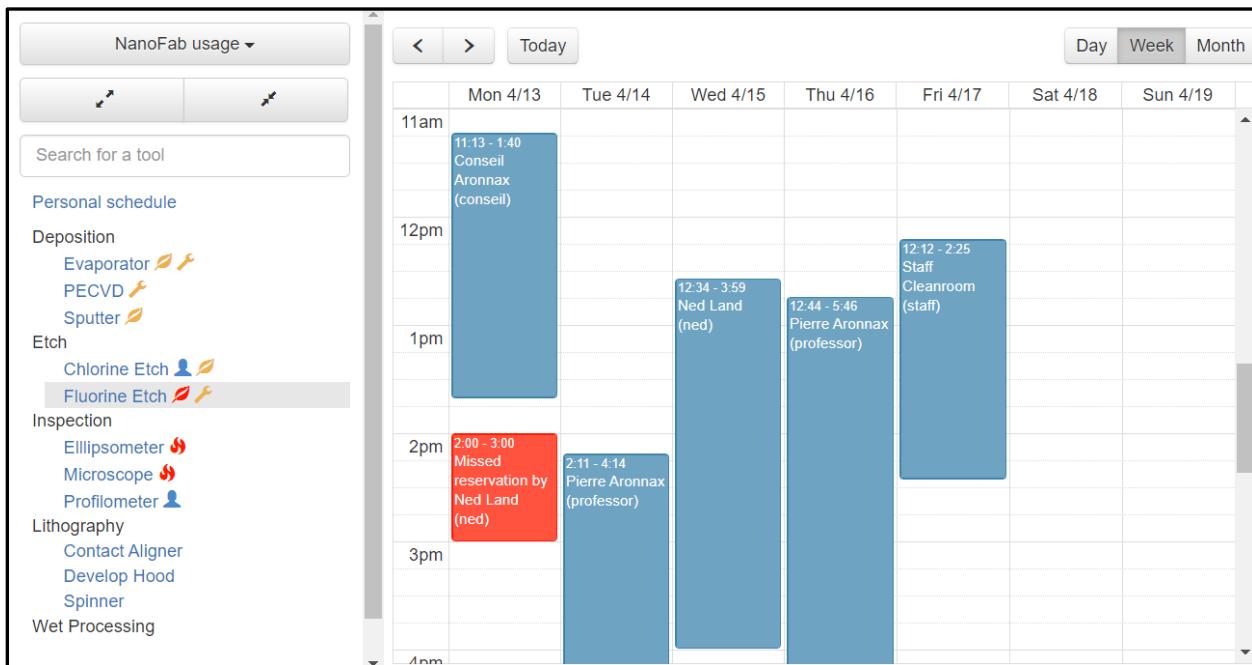

Figure 77 Calendar view usage of a tool

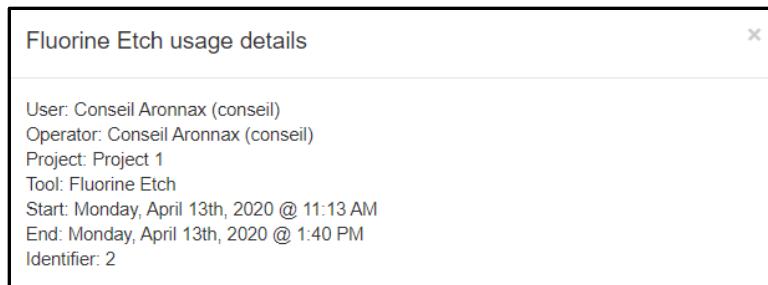

Figure 78 Tool usage details dialog

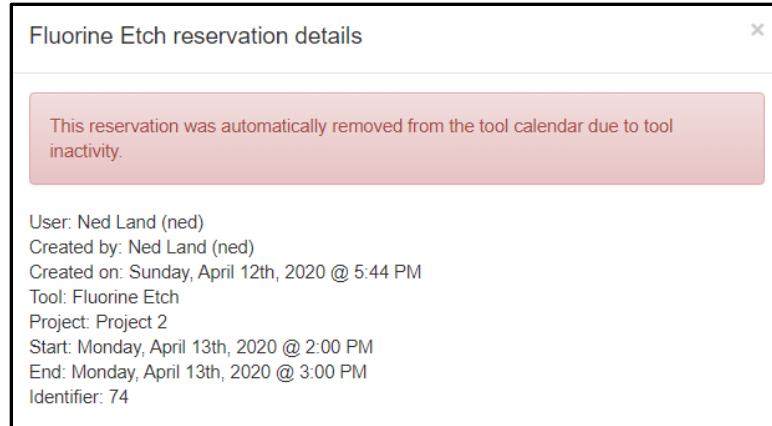

Figure 79 Missed reservation details dialog

6.5.2 Personal schedule view

The personal schedule view will display all activity for the user in the current time window (Figure 80). Tool usage displays in green and shows the start time, end time, and tool name. Missed reservations display in red and show start time, end time, and tool name. Area access displays in gold and shows start time, end time, and area name. Clicking on any activity box will show additional details (Figure 81, Figure 82, Figure 83).

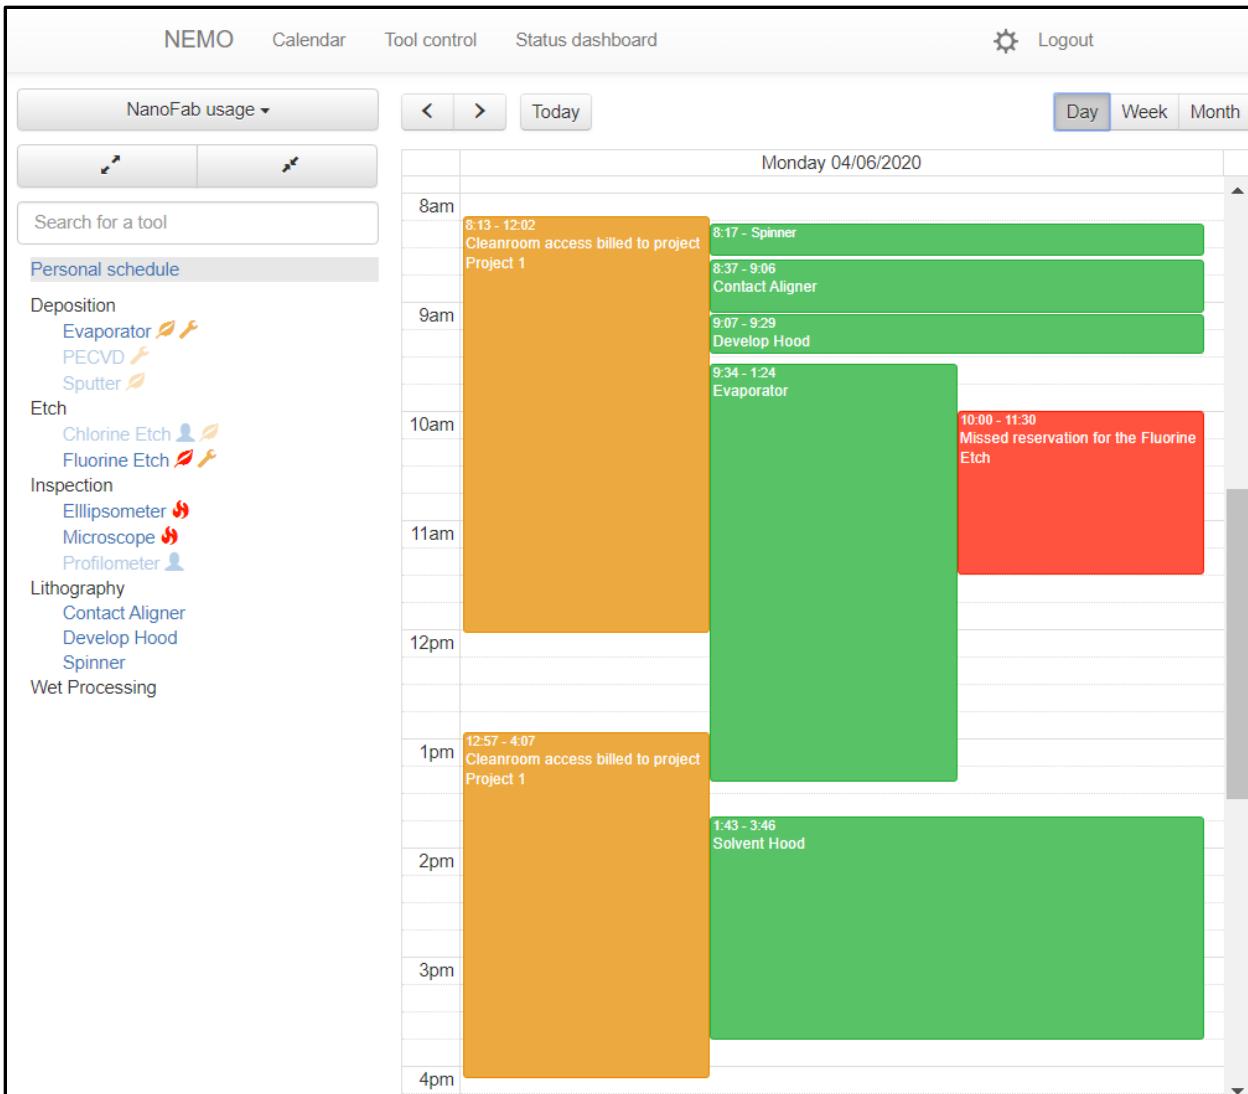

Figure 80 Personal schedule usage view

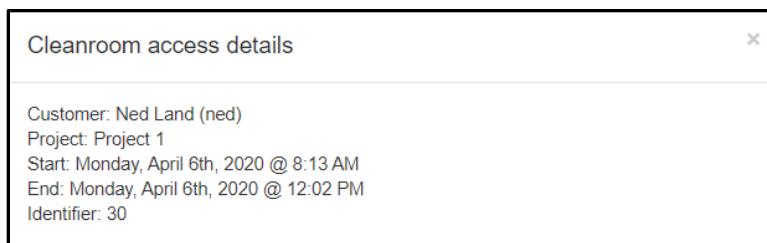

Figure 81 Area access details dialog

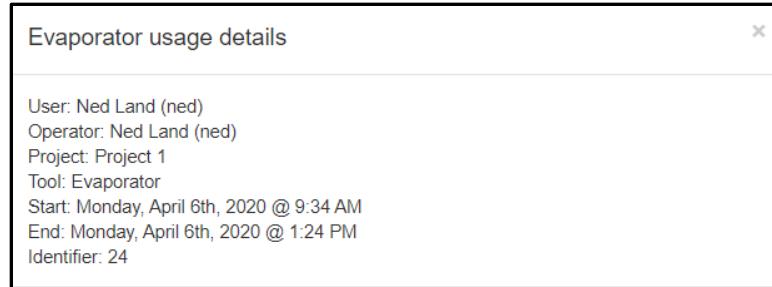

Figure 82 Tool usage details dialog

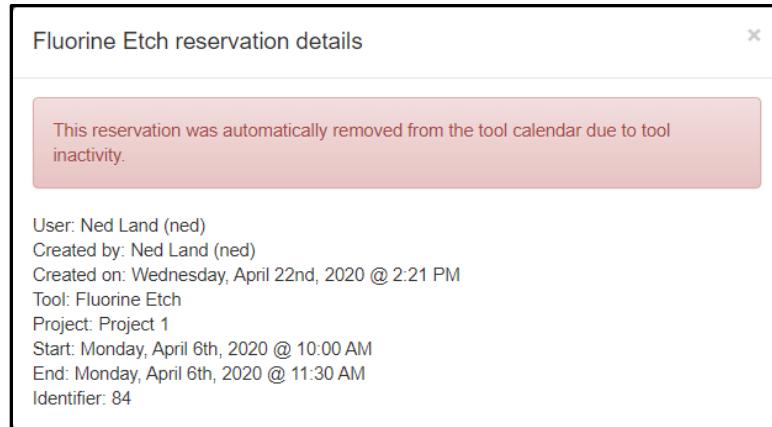

Figure 83 Missed reservation details dialog

6.5.3 All tools, All areas and All tools and areas views

Similar to the personal schedule, selecting “All tools” will allow the user to see all tool usages (Figure 84). The same goes for “All areas” and “All areas and tools”.

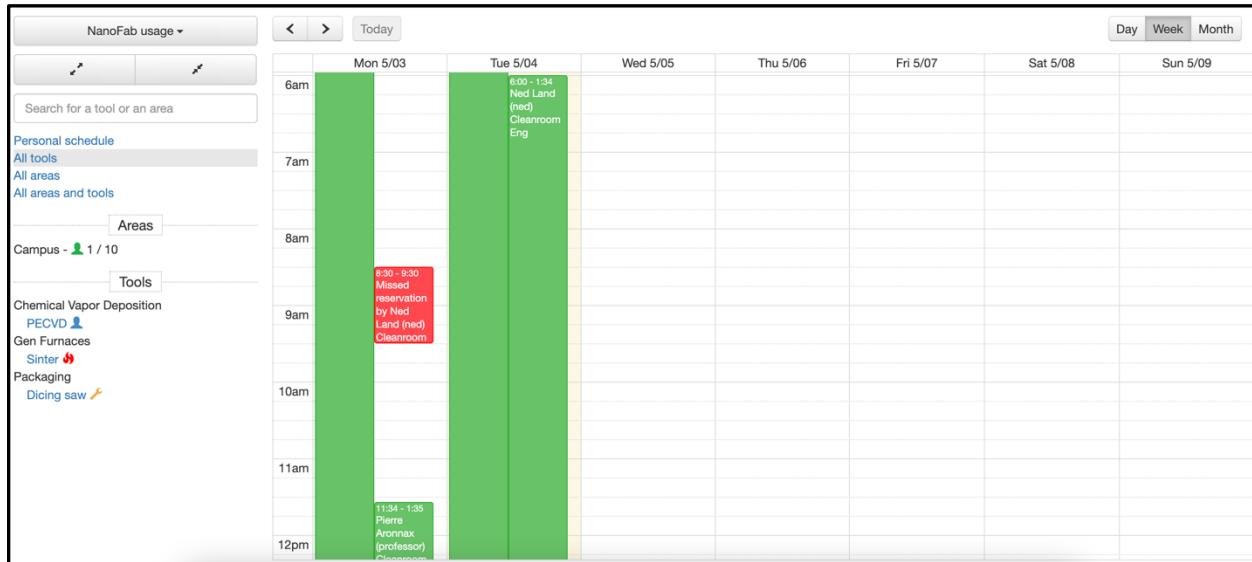

Figure 84 All tools usage view

6.6 Show specific user activity (staff only)

Selecting “Specific User” mode from the [calendar sidebar](#) will display activity and reservation history of the selected user on the calendar (Figure 85).

Figure 85 Calendar side bar in Specific user mode

To find a user, enter any character sequence of the username, first name, or last name in the search dialog on the side bar (Figure 86) then select the name of the list returned.

Figure 86 Specific user activity search dialog

The return list updates automatically as typed, and a user can be clicked from the list at any time (Figure 87).

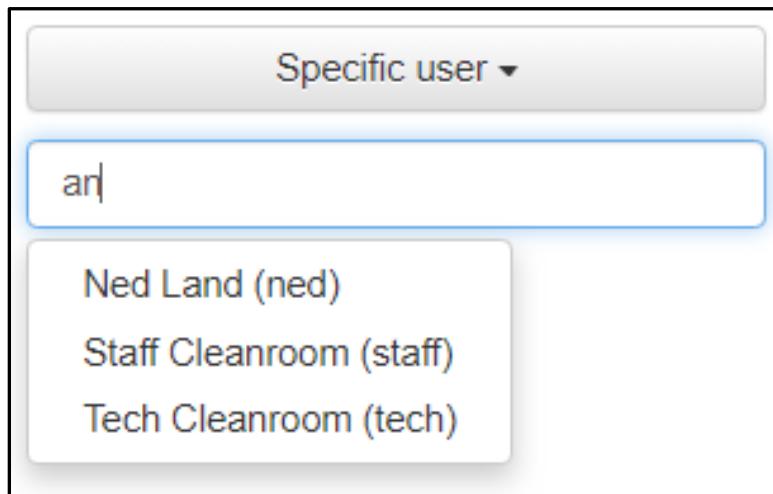

Figure 87 User search return list

Once clicked, the search box changes to a button with the selected users name (Figure 88) and the users information is displayed in the calendar view (Figure 89). To switch to another user, click the button showing the current users name and the dialog will switch back to the search box.

Figure 88 Search dialog now shows user

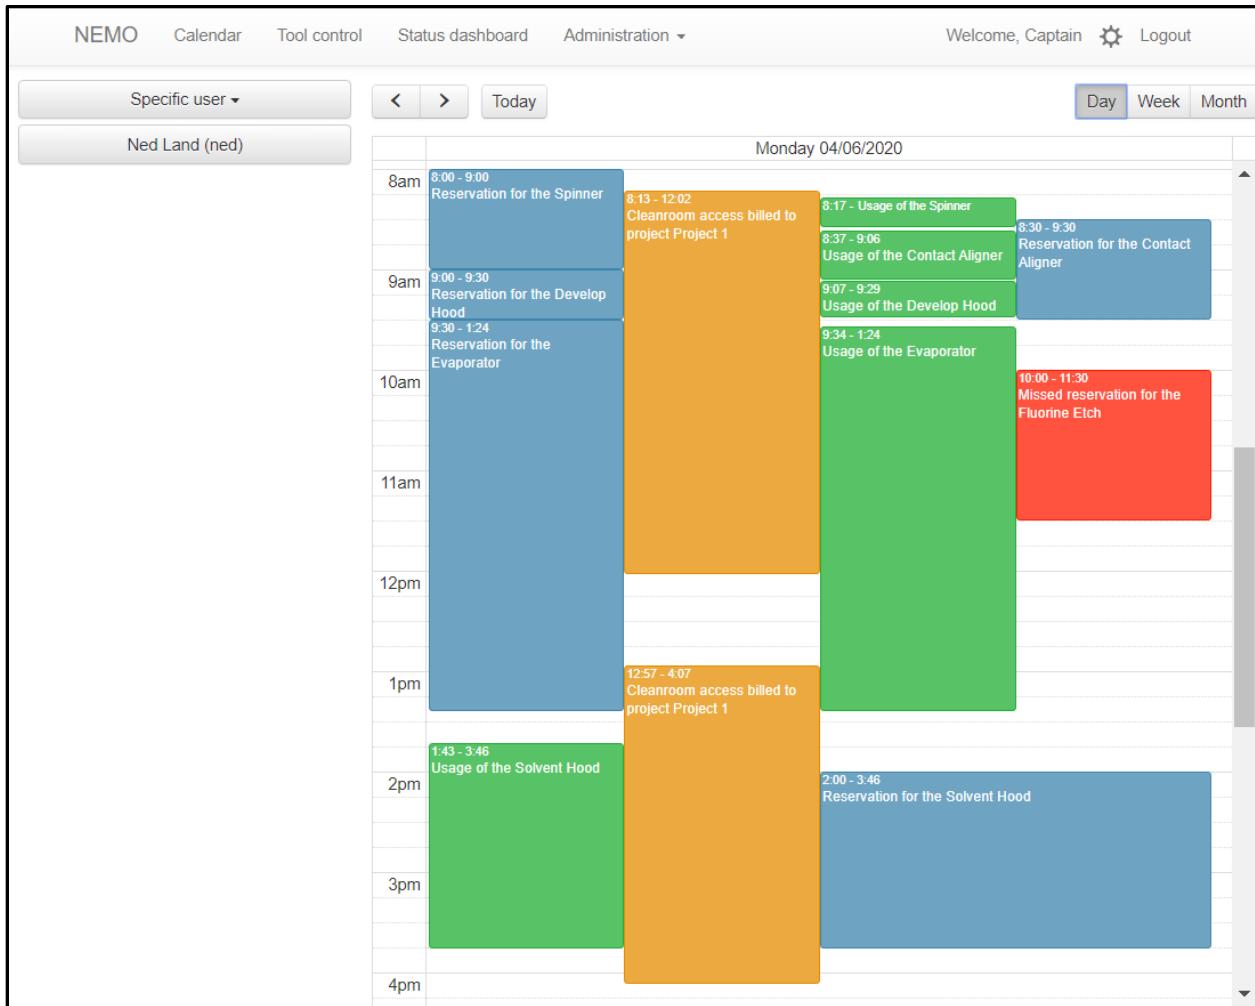

Figure 89 Specific user activity and reservation view

Tool usage displays in green and shows the start time, end time, and tool name. Missed reservations display in red and show start time, end time, and tool name. Area access displays in gold and shows start time, end time, and area name. Reservations displays in blue and shows start time, end time, and tool name. Clicking on any activity box will show additional details (Figure 90, Figure 91, Figure 92, Figure 93).

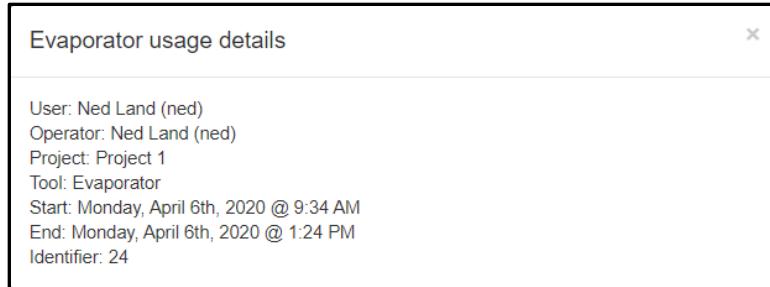

Figure 90 Tool usage details dialog

Figure 91 Missed reservation details dialog

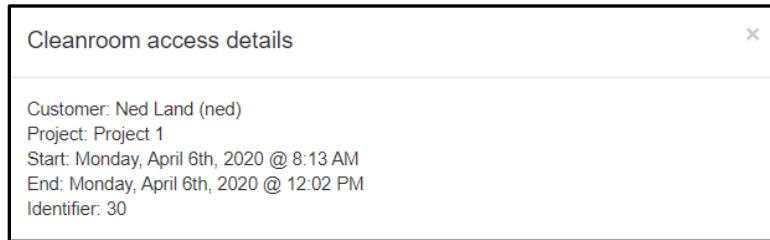

Figure 92 Area access details dialog

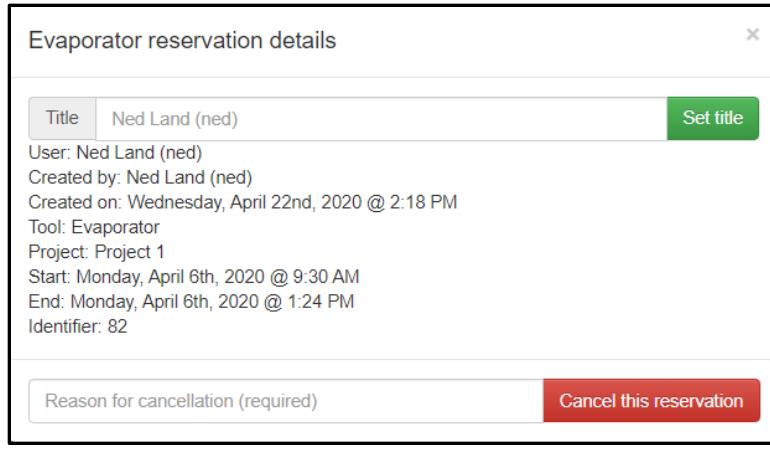

Figure 93 Reservation details dialog

6.7 Mobile device calendar

The calendar page will automatically change to a mobile display by stacking information into a single scrollable column (Figure 94). A subset of features is available while in mobile view. To start, directly enter the name of the area or tool in the search dialog or select a tool by category. All categories and sub-categories are listed.

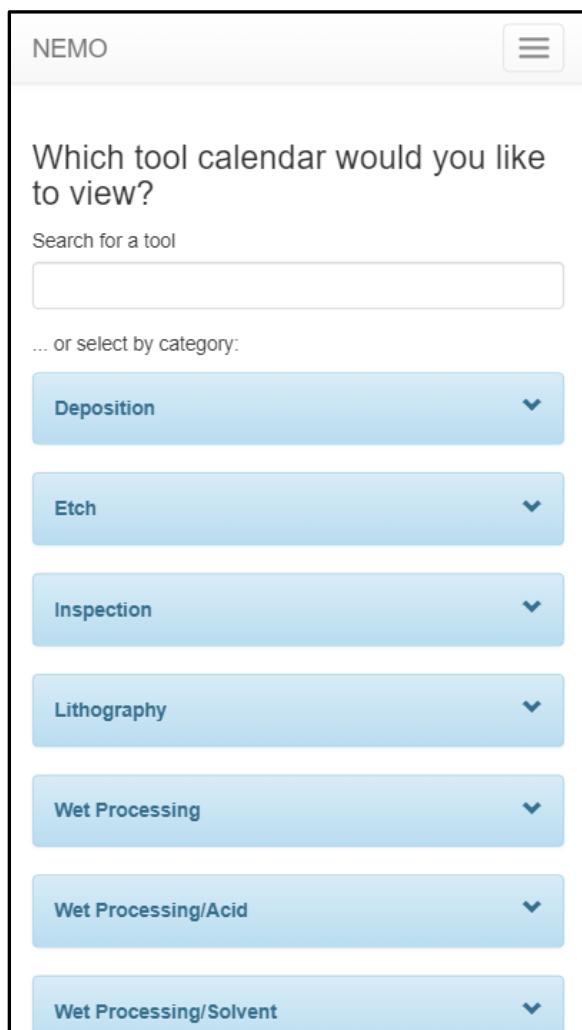

Figure 94 Mobile calendar page

6.7.1 Search for an area or tool

To search for an area or tool, start typing in the search dialog box. A button list will appear below the search dialog as characters are entered but at least two characters must be entered (Figure 95). Once the area or tool of interest appears, click the button of interest to go to the mobile reservation page detailed below on page 74.

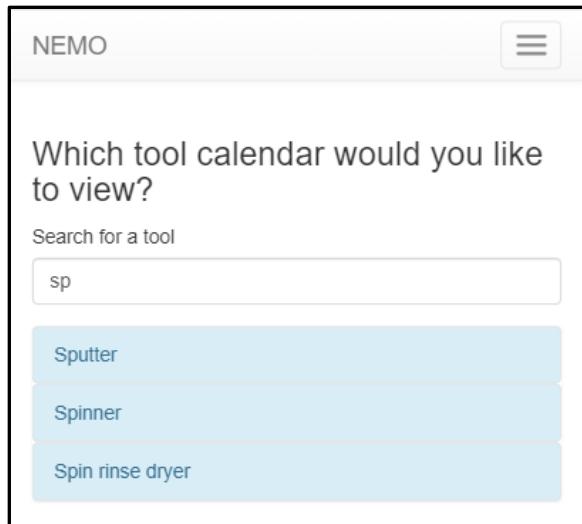

Figure 95 Mobile calendar search box and results

6.7.2 Select a tool by category

To select a tool by category, click the category button then click the tool link in the drop down. If the tool of interest is not on the list, click another category button (Figure 96). Note: it is possible to have more than one category at a time expanded. However, the page resets each time it is opened. Once the tool of interest appears, click the button of the tool of interest to go to the mobile tool reservation page detailed below on page 74.

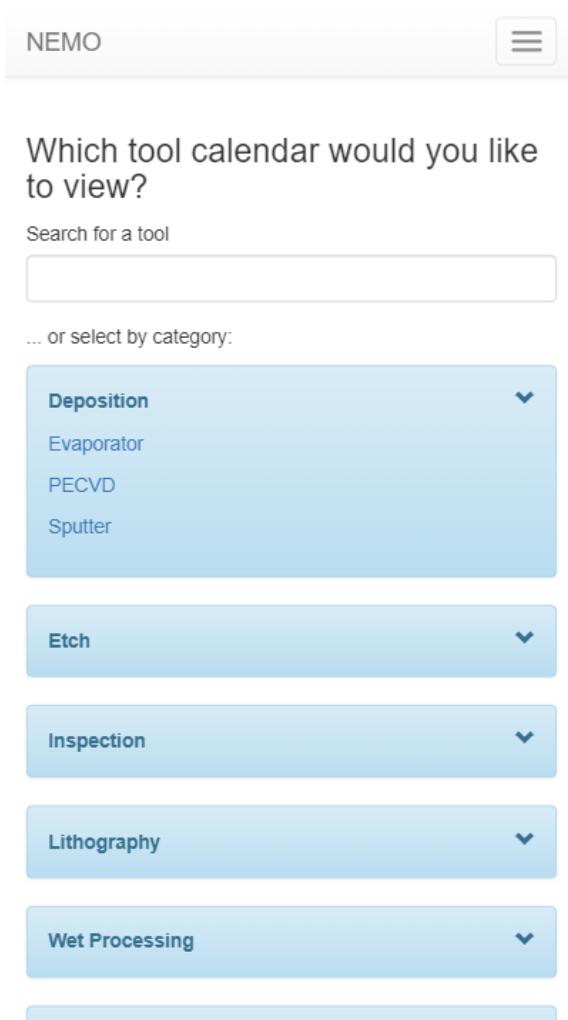

Figure 96 Mobile calendar category drop down

6.7.3 Mobile reservation page

The mobile reservation will show the current day reservations (Figure 97). Only a one-day view is available in mobile view.

Left () and right () arrows at the top of the page increment or decrement the day. Any reservations for the currently listed day are shown. An add reservation icon () is on the bottom right.

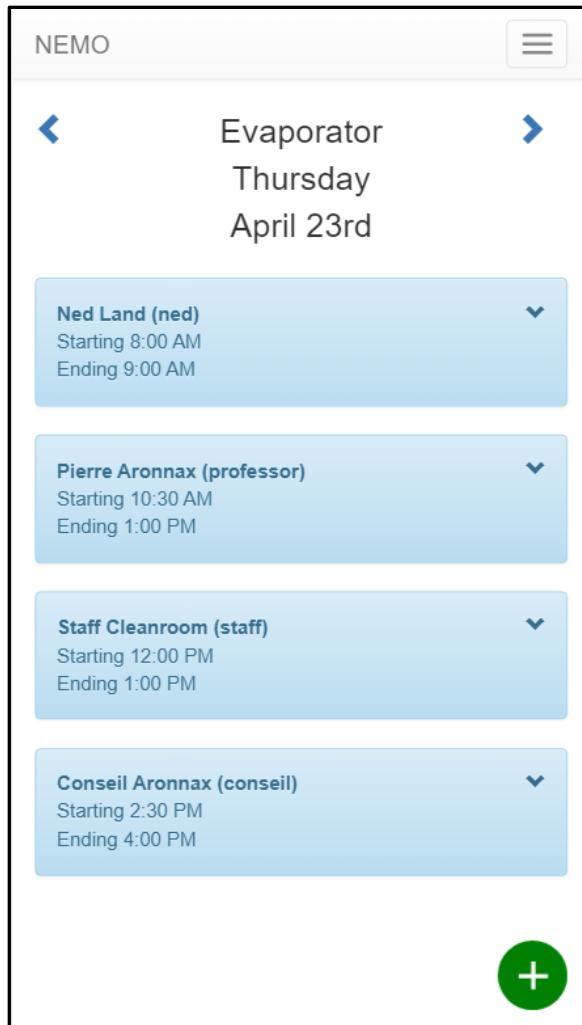

Figure 97 Mobile tool reservation page

6.7.4 View details or delete a reservation

Clicking the down arrow on a reservation shows details (Figure 98). A user may cancel their own reservation (Figure 99). Staff may cancel any reservation but must enter a reason for canceling another users reservation (Figure 100). A full discussion of viewing reservation details and canceling reservations can be found on page 59.

Figure 98 Mobile view another user's reservation

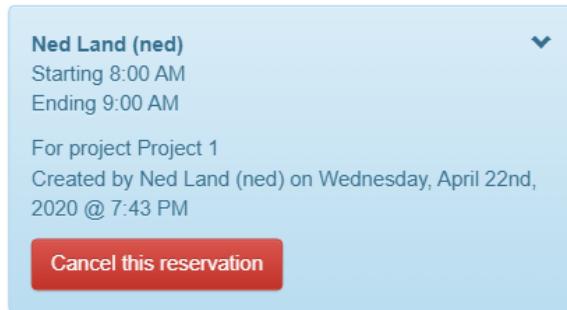

Figure 99 Mobile view a reservation you own

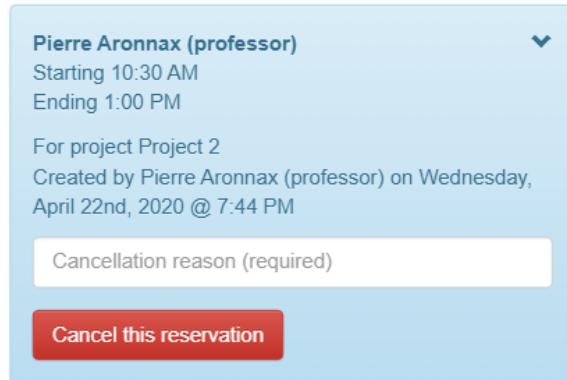

Figure 100 Mobile view another user's reservation (staff)

6.7.5 Creating a reservation

To create a reservation in NEMO through the mobile view:

- Navigate to the tool reservation page.
- Click the add reservation icon (+) on the bottom right of the screen to navigate to the top of the create a new reservation page (Figure 101).

Figure 101 Mobile create new reservation dialog

- If the user has multiple projects, a project dialog will appear just below the title (Figure 102). However, if a staff member has multiple projects, they will not be prompted for a project because they are exempt from missed reservation and tool configuration accounting. Select the project to use for the reservation. Details about projects can be found on the [Accounts and projects page](#) discussed on page 207.

Figure 102 Mobile reservation multiple project dialog

- If the tool selected has a configuration that can be selected by the user, a configuration dialog will appear next. Each tool configuration has a minimum advanced notice. If the reservation request is within the advance notice window, the user will be prompted in red at the top of the window and the staff may not be able to accommodate the request. Select the appropriate options and provide details as necessary (Figure 103).

The dialog box is titled "Choose tool configuration settings". It contains a note: "Please note: 1 hours of advance notice is required when reserving this tool in order to configure it properly. A tool is not guaranteed to be configured properly if a reservation is created or modified on short notice." Below the note, there is a text input field with placeholder text: "Please select the target you will need. If you will provide the target, provide the details in the comments." Underneath this is a "Target:" label followed by a dropdown menu with the placeholder "Select a target from the list.". Below these fields is a section titled "Do you have anything else to add? (Optional)" containing a text area with placeholder text: "Please provide any additional information regarding tool configuration for your reservation (using less than 3000 characters)."

Figure 103 Mobile reservation tool configuration dialog

- Next, select the date and time for the reservation

The dialog box is titled "When would you like to reserve the PECVD?". It contains three input fields: a date field showing "Wednesday, April 22", a start time field showing "Choose a start time", and an end time field showing "Choose an end time".

Figure 104 Mobile reservation date and time dialog

- If the date needs to be changed, click inside of the date box and a calendar will pop up (Figure 105). Select the date of interest. Clicking on the date on the calendar will close the pop up and fill in the new date.

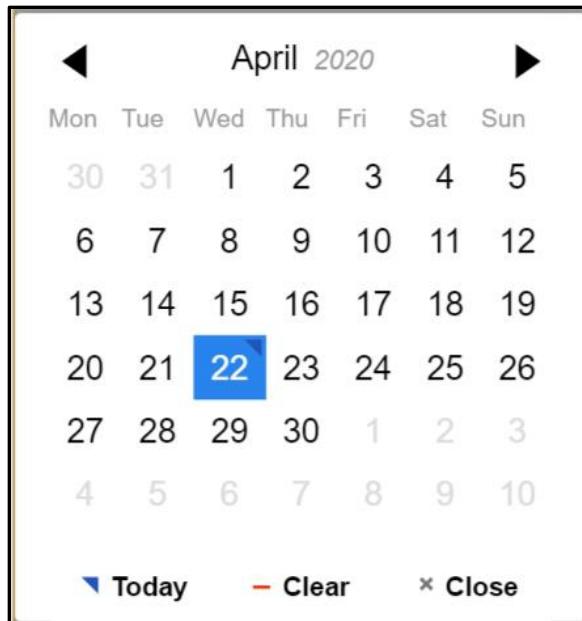

Figure 105 Mobile reservation date dialog

- Click the choose a start time box and a time wheel will pop up (Figure 106). Any times already reserved will be greyed out and noted with ‘already reserved’. Click on the available start time of your choice. The pop up will automatically close and fill in the start time. Repeat for the end time.

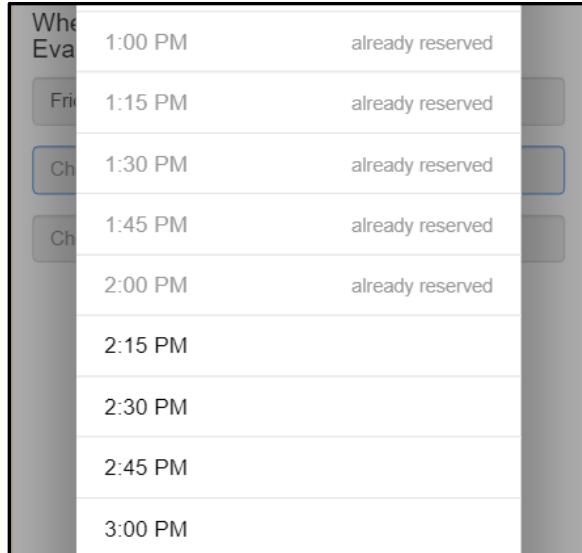

Figure 106 Mobile reservation start time and end time dialog

- Once all require information is entered, click the create this reservation button (Figure 107).

Figure 107 Mobile reservation create button

- The requested reservation will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation will not be made (Figure 108). [Reservation policies](#) are discussed in detail starting on page 52. If an error is encountered click the back to previous page link or return to homepage link to continue.

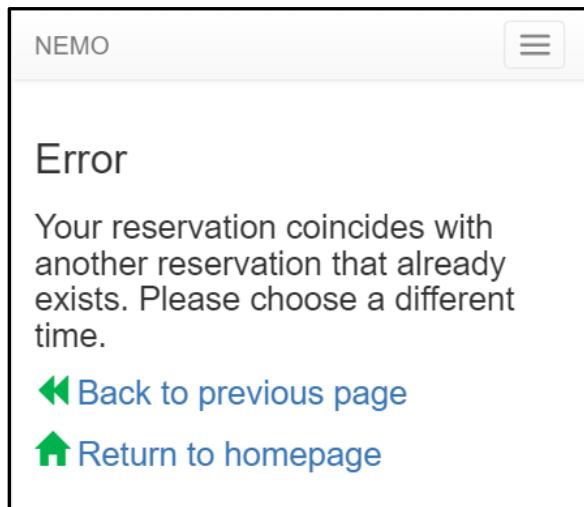

Figure 108 Mobile reservation policy conflict dialog

- Upon successful creation of the reservation, a confirmation dialog will appear (Figure 109). Click the return to homepage link or view the tool calendar link to continue.

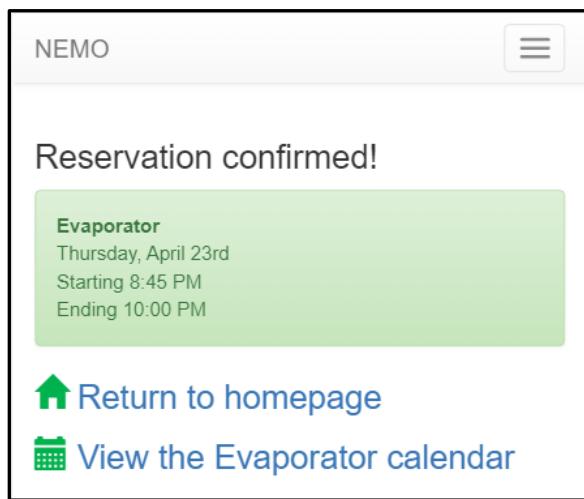

Figure 109 Mobile reservation confirmation dialog

- The reservation will appear on the calendar.

6.8 Calendar customizations

6.8.1 Notification emails

Several email notifications are possible associated with a reservation and must be configured to be functional.

- Missed reservations email template
- Reservation reminder email template
- Reservation warning email template
- Reservation cancelation email template
- User reservation creation email template
- User reservation cancel email template

All email templates are configured in the [Customization](#) page detailed starting on page 307.

6.8.2 Calendar view settings

The date format, default view, first day of week, calendar view start time, recurring outages days in advance and overview options can be configured in the [Customization → Calendar settings](#) page detailed starting on page 312.

6.8.3 Calendar view time grid resolution

The time grid resolution is 15 minutes. To change the value, edit the file calendar.html and change the constant in the slotDuration setting.

6.8.4 Reservation policies

The reservation policies are checked in the policy.py file. It is beyond the scope of this manual to discuss how to create a new policy however the policy.py file can be edited to turn off existing policies or change which policies can be bypassed by staff.

6.8.5 Calendar page refresh rate

The calendar page automatically refreshes every 30 seconds which updates the calendar and sidebar. To change the update interval, edit the calendar.html and change the setInterval constant (in milliseconds) in the on_load function.

7 Tool control

The tool control page is the main interface for finding information about a tool, using a tool, and commenting on or reporting problems with tools. The page features a side bar to quickly navigate between tools and visually determine each tools status; a summary tab to provide tool information, status, and login interface; a details tab to provide information about a tool such as the tool owner, its location, required resources, and task history; and tabs to report problems and post comments.

7.1 Web address

The tool control page is accessible at site-address/tool_control/. For example, www.nemo.com/tool_control/. The page can also be accessed from the navigation bar menu item “Tool control”.

7.2 Side bar

The side bar has a variety of features to help users visually identify tool and training status, as well as convenient navigation (Figure 110).

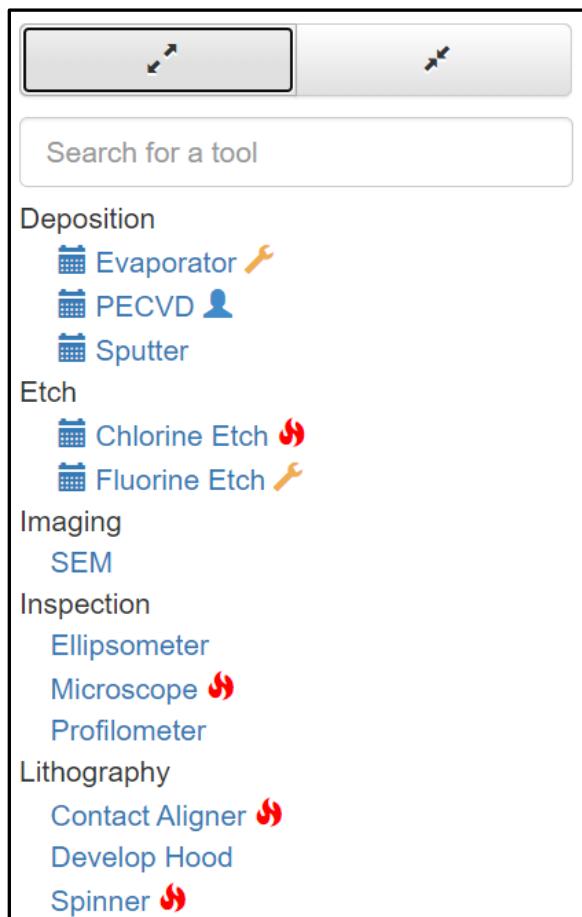

Figure 110 Tool control page side bar

7.2.1 Find the tool of interest

The expand and contract buttons (Figure 111) provide a shortcut to open or close the tool list.

Figure 111 Expand (left) and contract (right) buttons

Clicking expand will fully expand the tool list so all categories, sub-categories, and tools are listed (Figure 110).

Clicking contract will close the tool list so only top categories are listed (Figure 112).

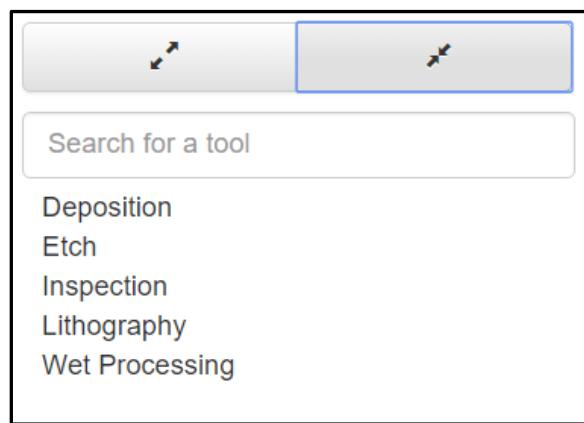

Figure 112 Tool list contracted

To find a tool directly, enter the name in the search dialog (Figure 113) then select the name of the list returned. The return list updates automatically as typed, and a tool can be clicked from the list at any time (Figure 114). Once clicked, the tool list is expanded to show the tool clicked and that tool is selected.

Figure 113 Tool search dialog

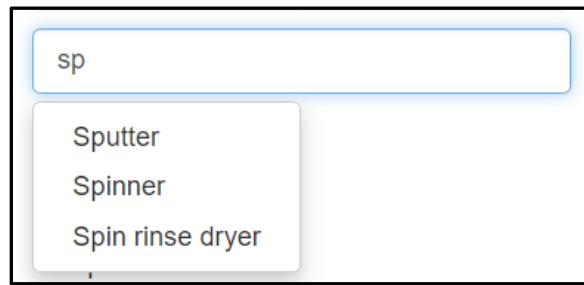

Figure 114 Tool search return list

7.2.2 Hierarchy of the tool list

The tool list is displayed in alphabetical order by top level category, then by second level category, etc. If both tools and sub-categories exist at any level, tools are listed first in alphabetical order, then sub-categories are listed in alphabetical order (Figure 115). All tools must have at least one top level category. Categories are set at the tool level and are discussed in the [Detailed administration → Tools](#) section on page 504.

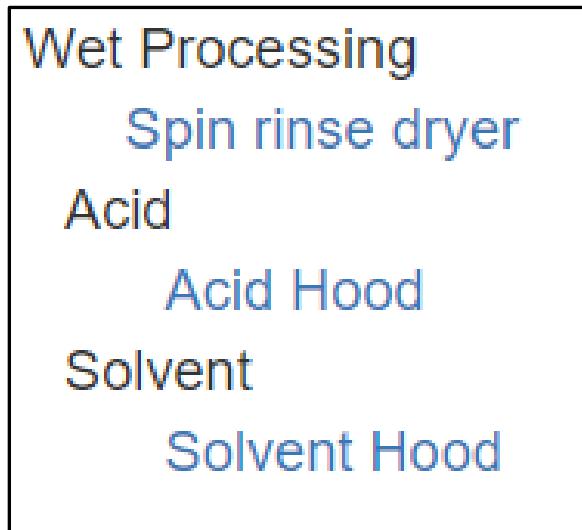

Figure 115 Example of category and tool mixed listing

7.2.3 Tool list icons

Each tool can list icons to give a quick reference to visually note the operating status. Hovering over an icon will give a description of its purpose in case the icons meaning isn't known.

 The tool requires an area reservation. Before a user can make a reservation on the tool, they must first make an area reservation that will encompass the start time of the tool reservation. Area reservations are optional and configured in the area table discussed in the [Detailed administration → Areas](#) section on 384.

 A user is currently logged into the tool. Hovering over the icon will show the logged in user's name.

 A delayed logoff is in effect. The tool is not available for users.

 A scheduled outage is in effect for this tool. The tool is not available to users.

 A scheduled outage of an option resource is in effect for this tool. The tool is available but may not be fully functional.

 A required resource is unavailable. The tool is not available to users.

 An optional resource is unavailable. The tool is available to users, but the tool may not be fully functional. The optional resource unavailable icon is only displayed if the required resource unavailable icon is not displayed.

 The tool is shut down because of a serious problem. The tool is not available to users.

 The tool has a problem that may impact usage or results. The tool is available to users, but the tool may not be fully functional. The tool problem icon is only displayed if the tool shut down icon is not displayed.

7.2.4 Tool qualification

Tools that users are trained and qualified on will appear dark on the list while tools that a user is not qualified on will appear greyed out (Figure 116).

If the “Show qualified tools button” setting is enabled from [Calendar settings](#), the user can decide to filter out tools he is not qualified for.

User tool qualifications are detailed in [Qualifications](#) on page 251.

Figure 116 Tool list showing user qualifications

7.3 Tool page header bar

The tool page header bar shows the currently selected tool selectable tabs used to navigate the tool pages (Figure 117). The summary tab is selected by default each time the tool control page is loaded. The Config History tab is only visible on tools that are configurable.

Figure 117 Tool page header bar

7.4 Summary Tab

The summary tab provides users and staff with operational information such as tool serial number, tool status, rates, tool status details, comments, configuration details, log in options for

idle tools, log out options for in use tools, tool description, and tool image (Figure 118, Figure 119).

Sputter

Stop using the Sputter

Bobs XYZ sputter system

This system has RF and DC capability up to 300 watts. The lab has several targets or you can bring your own with prior approval.

Figure 119 Tool control summary page of tool in use

7.4.1 Tool serial number

The tool serial number is optional and will only be displayed if a value exists in the tool table. It is displayed in the top right corner of the summary tab (Figure 120). Tool serial number configuration is discussed in the [Detailed administration → Tools](#) section on page 504.

s/n : XYZ123

Figure 120 Tool serial number

7.4.2 Tool status

The tool status is displayed at the top of the summary tab and informs users and staff of the current condition of the tool. There are several possible statuses, and they are displayed with precedence in the order listed below.

7.4.2.1 Tool in use

The highest priority status is that a tool is in use. The tool in use message will identify the user, project, and the time they started using the tool (Figure 121). The user name is a link that can be clicked to contact the user by email through NEMO.

 Captain Nemo (captain) is using this tool for the project named Cleanroom Maintenance since Monday @ 11:05 AM.

Figure 121 Tool status in use by user message

If the current user is also the user logged into the tool, the message will be more personalized (Figure 122).

 You are using this tool for the project named Cleanroom Maintenance since Monday @ 11:05 AM.

Figure 122 Tool status in use by current user message

If a staff member is using a tool on behalf of another user, both the staff member and user will be listed (Figure 123).

 Captain Nemo (captain) is using this tool on behalf of Ned Land (ned) for the project named Project 1 since Monday @ 12:39 PM.

Figure 123 Tool status in use by staff on behalf of a user

In addition, if the current user is using the tool with a reservation, the reservation end time will also be displayed (Figure 124).

 You are using this tool for the project named Cleanroom Staff since Monday @ 11:33 AM.

Your reservation for this tool will end at 2:00 PM. The remainder of your reservation will be relinquished when you stop using this tool.

Figure 124 Tool status in use by current user with reservation message

7.4.2.2 Delayed logoff

The delayed logoff status indicates that the previous user initiated a delayed logoff to prevent usage for some amount of time. Users are not able to log in during this time however staff may override and log in. The feature is useful for tools that require post-process runs such as plasma cleans. It allows a user to run the post-process and leave without waiting for the completion. Tool usage time is accumulated during delayed logoff. Delayed logoff configuration is discussed in the [Detailed administration → Tools](#) section on page 504.

 Captain Nemo (captain) has finished using the Chlorine Etch but delayed logoff is in effect. The tool will be available at 11:51 AM.

7.4.2.3 Scheduled outage

There are two types of scheduled outage: a scheduled tool outage and a scheduled resource outage. If there are multiple scheduled outages, all outages will be displayed sequentially. Both outage types display the reason for the shutdown, details, who initiated the shutdown, the start day and time, and the end day and time. Scheduled outages are planned shutdowns that take a predictable amount of time.

A scheduled tool outage allows staff to automatically shut down a tool on a set date and time which can be useful for scheduling tool configurations or preventative maintenance (Figure 125). Users are not able to log in during a scheduled tool outage however staff are. Details about scheduled tool outages can be found in the [Calendar page → Reservations → Schedule an outage](#) section on page 62.

 Foil clean

The chamber is flaking so we will change the foil and vacuum.

Captain Nemo (captain) scheduled this outage from Monday, April 27th, 2020 @ 11:30 AM until Monday, April 27th, 2020 @ 1:00 PM.

Figure 125 Tool status scheduled tool outage

A scheduled resource outage allows staff to automatically shut down a resource on a set date and time which can be useful for scheduling gas bottle changes or other facility related maintenance (Figure 126). Resource outages will automatically update tool status for each tool that relies on the resource. Users are not able to log in during a scheduled resource outage when the resource is required by the tool however staff are.

 2% SiH4 scheduled outage

Gas bottle change

Captain Nemo (captain) scheduled this outage from Monday, April 27th, 2020 @ 11:30 AM until Monday, April 27th, 2020 @ 12:30 PM.

Figure 126 Tool status scheduled required resource outage

If a scheduled resource is optional on a tool, the scheduled outage will be indicated in yellow, and the tool will still be available to users (Figure 127).

An optional resource has an outage: O2 (Gases)

O2 scheduled outage: Gas bottle change

Captain Nemo (captain) scheduled this outage from Tuesday, May 5th, 2020 @ 4:36 PM until Tuesday, May 5th, 2020 @ 4:50 PM.

Figure 127 Tool status scheduled optional resource outage

Details about scheduled resource outages can be found in the [Resources](#) section on page 265.

7.4.2.4 Shutdown

The tool shutdown status is displayed if the tool has a problem that requires shut down or a required resource is not available (Figure 128). Users are not able to log in during this time however staff are. Details about tool shut downs can be found in the [Tool control page → Report a problem tab](#) section on page 115. Details about resources can be found in the [Resources](#) section on page 265.

 **This tool is shut down.**

Figure 128 Tool status shut down

7.4.2.5 Optional resource not available

The optional resource outage status is displayed if there are resources unavailable that a tool partially depends on (Figure 129). Users and staff are able to log in. For example, a fluorine reactive ion etch system with multiple types of fluorine gases, and one is not available. Details about resources can be found in the [Resources](#) section on page 265. Dependent and optional resource configuration is discussed in the [Detailed administration → Tools](#) section on page 504.

 **This tool is operational but not all resources are available.**

Figure 129 Tool status optional resource outage

7.4.2.6 Operational and idle

The operational and idle status is displayed if there are no issues preventing usage of the tool (Figure 130). However, there may be a problem listed in the tool status details below. Users and staff are able to log in.

 **This tool is operational and idle.**

Figure 130 Tool status operational and idle

7.4.3 Tool rates

The tool rates are optional and will only be displayed if they have been defined (Figure 131). Tool rates are discussed in the [Customizations → Tool rates](#) section on page 354.

Tool rates: Full Cost **\$100.00** Shared Cost **\$50.00**
Training rates: Individual **\$150.00** Group **\$75.00**

Figure 131 Tool rates

If a tool has child tools defined to allow multiple modes of operation with different charges, the parent and all child rates will be displayed (Figure 132). Parent and child tools are discussed in the [Detailed administration → Tools](#) section on page 504.

Tool rates:
SEM: Full Cost \$100.00 Shared Cost \$50.00
SEM Lithography mode: Full Cost \$200.00 Shared Cost \$150.00
Training rates: Individual \$150.00 Group \$75.00

Figure 132 Tool rates with parent and child tools

7.4.4 Tool usage counters

Tool usage counters, if configured, are displayed below the rates (Figure 133). Tool usage counters are linked to numeric or float post usage questions and accumulate value with each tool logout based on the answer to the post usage question. This feature is useful for displaying how much a tool has been used, to track material usage, or to trigger preventative maintenance. Detailed information on how to setup tool usage counters is provided in the [Detailed administration → Tool usage counters](#) section starting on page 504.

Total etch time: 147 *This is the running total for etch time in minutes.
Don't reset this counter.*

Etch Time: 0 *This is for the etch time in minutes.
PMs are performed every 100 minutes of use.*

Figure 133 Tool usage counter, user view

Staff are able to reset the counter and will see a reset button next to the current value (Figure 134).

Total etch time: 147 **Reset** *This is the running total for etch time in minutes.
Don't reset this counter.*

Etch Time: 100 **Reset** *This is for the etch time in minutes.
PMs are performed every 100 minutes of use.*

Figure 134 Tool usage counter, staff view

Clicking reset will open a confirmation dialog box, click ok to reset the counter or cancel to abort (Figure 135).

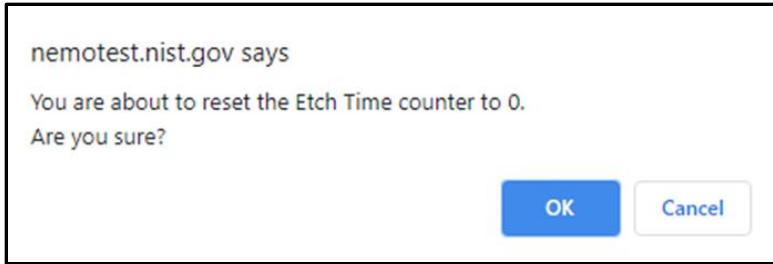

Figure 135 Tool usage counter reset confirmation dialog

Each time a counter is reset, a comment is posted for the tool that expires after seven days (Figure 136). In addition, if the Lab Manager role has been defined in settings.py, an email is sent. The comment and email will list the counter, its last value, who reset it, and when.

Figure 136 Tool usage counter reset comment

7.4.5 Tool status details

Tool status details provide additional information about a tool that may impact availability or results. If the information available for a particular dialog is lengthy, only the first two lines are displayed with an expansion icon (►). Click the icon to see more information.

7.4.5.1 Unavailable required resources

When a required resource is not available, the status details will show a red leaf and identify which required resource is not available along with the description that was entered when the resource was shut down (Figure 137).

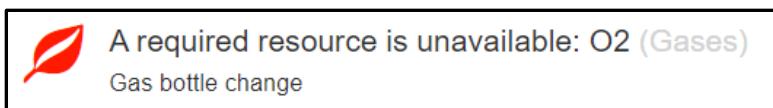

Figure 137 Unavailable required resource

7.4.5.2 Unavailable optional resources

When an optional resource is not available, the status details will show a yellow leaf and identify which required resource is not available along with the description that was entered when the resource was shut down (Figure 138).

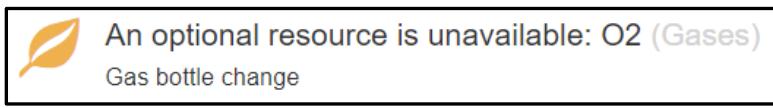

Figure 138 Unavailable optional resource

7.4.5.3 Shutdown and problem tasks

Shutdowns and problems are reported in the [Tool control → Report a problem tab](#) described on page 115. The status details functionality are identical for both except for the displayed icon. Shutdowns are displayed with a red fire icon (Figure 139) and problems are displayed with a yellow wrench icon (Figure 140). When a shutdown or problem is reported, the user can select a category that will be displayed as the heading (Figure 139). If no category is selected, the description is displayed as the heading (Figure 140).

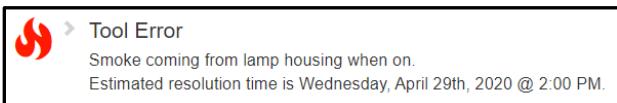

Figure 139 Tool shutdown

Figure 140 Tool problem

Clicking the (>) will expand the shutdown and problem dialog (Figure 141, Figure 142).

i Progress updates
On Monday, April 20th, 2020 @ 8:53 PM Captain Nemo (captain) updated this task:
Tested pump down curve. Need new soft pump valve, on order will arrive 5/6/2020.

[Hide this comment.](#)

Figure 147 Tool status comment dialog expanded

Staff or the user that created the comment may hide comments by clicking the hide this comment link (Figure 148).

Figure 148 Tool status hide comment link

Clicking the (▼) will collapse the comment dialog.

7.4.5.5 Update task (staff only)

Staff may update a task by clicking the update link on a problem or shutdown listed in the tool status details. Clicking the link will open the task update dialog (Figure 149). Many of the fields associated with the original task report are available to be edited. In addition, a summary of activity to date is listed on the right side of the page. However, if the page is too narrow or in mobile view, all information is listed in a single column. All fields are optional for updates. Only fields with changes are updated.

PECVD task

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:30 PM (1 week, 3 days ago).
Last updated by Captain Nemo (captain) on Monday, April 27th, 2020 @ 2:13 PM (an hour ago).

Update the task	Problem description
Would you like to change the urgency of this task? This will help staff prioritize tasks in the NanoFab.	Wafers floating on platen.
<input type="button" value="Normal"/>	Progress
Would you like to change this task's initial classification to more accurately reflect the nature of the problem? Proper classification helps the NanoFab staff analyze long-term maintenance trends.	On Monday, April 20th, 2020 @ 8:53 PM Captain Nemo (captain) updated this task: Tested pump down curve. Need new soft pump valve, on order will arrive 5/6/2020.
<input type="button" value="Wafer handling problem"/>	On Monday, April 27th, 2020 @ 2:13 PM, Captain Nemo (captain) set the status of this task to "Triage".
What is the status of the task?	
<input type="button" value="Triage"/>	
When do you think the problem will be resolved? Leave this field blank if it's difficult to predict.	
<input type="text" value="04/29/2020 12:00 PM"/>	
<input type="checkbox"/> This task requires the PECVD to be shutdown	
<input type="checkbox"/> This task is considered a potential safety hazard to the NanoFab	
Please describe any actions being taken to resolve this task. This information will be visible to all users in order to keep everyone apprised of the tool's status.

Figure 149 Tool control task update dialog

- The urgency of the task can be changed by selecting a new urgency from the drop down (Figure 150). The urgency is displayed on the maintenance screen detailed in the [Maintenance](#) section on page 239.

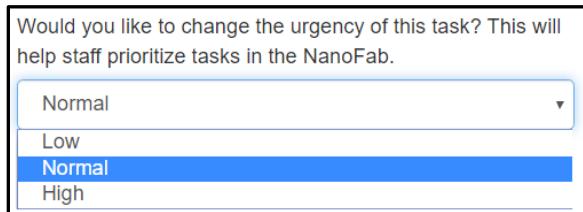

Figure 150 Tool control task update urgency

- If task categories have been defined, a dropdown and instruction will appear. Click the dropdown and select the problem category that best describes the problem (Figure 151). If no category describes the problem, leave this blank. Task categories can be used to bin problems making future problem analysis easier. Categories are configured on the [Detailed administration → Task categories](#) page described on page 483.

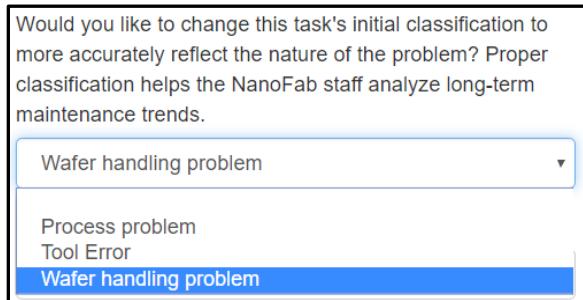

Figure 151 Tool control task update category

- If task statuses have been defined, a dropdown and instruction will appear (Figure 152). If the status is not known, the field can be left blank. Click the dropdown and select the new status for the problem. Task statuses are used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Statuses are configured on the [Detailed administration → Task statuses page](#) described on page 498.

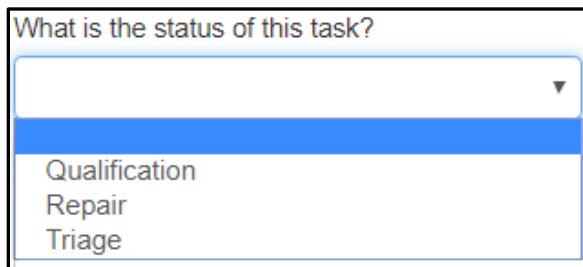

Figure 152 Tool control task update status

- Provide an estimate of when the problem will be resolved if known or leave blank. Clicking in the dialog will open a date and time dialog (Figure 153).

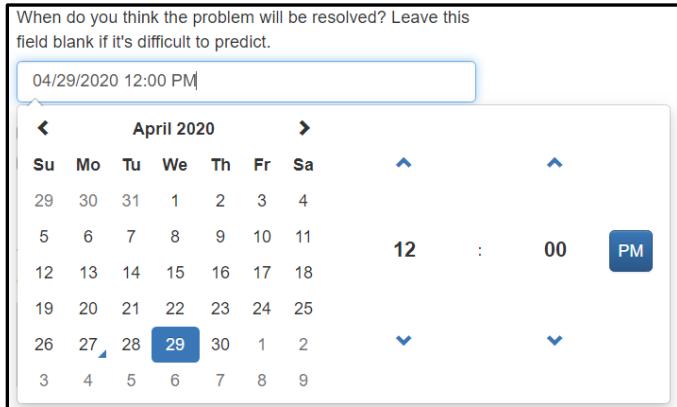

Figure 153 Tool control task update completion date

- Check if the shutdown check box if the tool is not able to be used by others and could potentially ruin samples (Figure 154).

Figure 154 Tool control task update safety hazard

- Check the safety hazard check box if the problem is a safety hazard to people or equipment (Figure 155).

Figure 155 Tool control task update shut down

- Provide a detailed update in the dialog box (Figure 156).

Figure 156 Tool control task update detailed description

- The choose files dialog may be used to upload any relevant pictures to show details that support the description (Figure 157). Clicking the button activates a standard file selection dialog. Multiple files can be uploaded. Note: it is good practice to make note of the files in the description to link the file to the text.

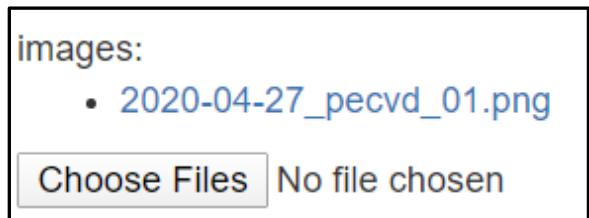

Figure 157 Tool control task update upload files

- Click the update button to finish (Figure 158). To cancel an update, navigate to another page prior to clicking the update button.

Figure 158 Tool control task update button

7.4.5.6 Resolve task (staff only)

Staff may resolve a task by clicking the resolve link on a problem or shutdown listed in the tool status details. Clicking the link will open the task resolution dialog (Figure 159). A resolution description and resolution category can be entered. In addition, a summary of activity to date is listed on the right side of the page. However, if the page is too narrow or in mobile view, all information is listed in a single column. All fields are optional.

- Provide a detailed resolution description in the dialog box (Figure 160).

Please describe any actions taken to resolve this task. This information will be kept in order to analyze long-term trends in NanoFab maintenance.

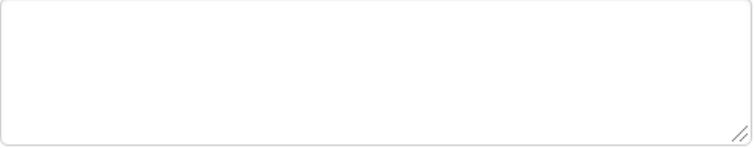

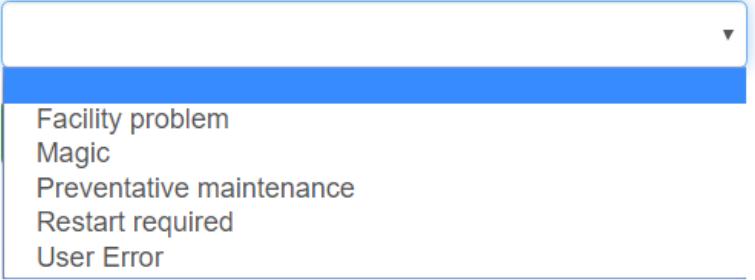

Figure 160 Tool control task resolution description

- If task categories have been defined, a dropdown and instruction will appear. Click the dropdown and select the problem category that best describes the problem (Figure 161). If no category describes the problem, leave this blank. Task categories can be used to bin problems making future problem analysis easier. Categories are configured on the [Detailed administration → Task categories](#) page described on page 483.

Please select a classification that best describes how this problem was fixed. If no classification is appropriate then leave this field blank.

- Facility problem
- Magic
- Preventative maintenance
- Restart required
- User Error

Figure 161 Tool control task resolution category

- Click the resolve button to finish (Figure 162). To cancel an update, navigate to another page prior to clicking the update button.

Resolve

Figure 162 Tool control task resolution button

7.4.5.7 Cancel task

The user who created a problem or shutdown may cancel the task by clicking the cancel link in the tool status details (Figure 163).

You may [cancel this task if it was mistakenly created.](#)

Figure 163 Tool control task cancel task link

There are no additional prompts, clicking the link immediately cancels the task and returns the user to the tool control summary page.

7.4.5.8 Hide comments

Staff or the user who created a comment may hide the comment by clicking the ‘hide this comment’ link in the comment details (Figure 164).

Figure 164 Tool control task hide comment link

There are no additional prompts, clicking the link immediately hides the comment and returns the user to the tool control summary page.

7.4.6 Tool configuration

Tool configurations are created in the Configurations table of the database detailed in the [Detailed administration → Configurations](#) section on page 409. If a tool is configurable, its current configuration will be shown (Figure 165).

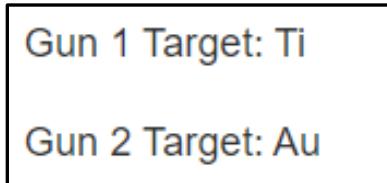

Figure 165 Tool control tool configuration

If the tool is not in use and the current user is a staff member or has permission to change a tool configuration, a drop down with all possible configurations will be shown (Figure 166). Select the desired configuration from the drop down.

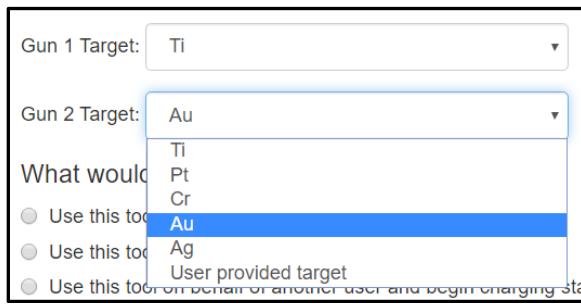

Figure 166 Tool control tool configuration dialog

Configuration history is saved in the database and is discussed in [Detailed administration → Configuration histories](#) on page 407. Configurations are discussed in the [Configuration Agenda](#) section on page 228.

7.4.7 Tool log in

The tool log in dialogs will vary depending on the user type (staff or not) and number of projects the user has.

7.4.7.1 User tool login

Users must be explicitly qualified to use tools. In addition, the tool must be in a usable tool status. Users with multiple projects will be prompted to select a project from their list of active projects (Figure 167). User qualifications are detailed in the [Qualifications](#) section on page 251.

Figure 167 Tool control login project selection

Clicking the project will enable the start button (Figure 168).

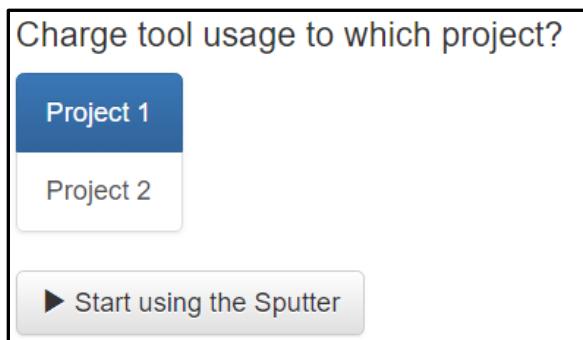

Figure 168 Tool control login multiple project start button

If a user only has one project, a message with the name of their project will appear and the start button will be displayed (Figure 169).

Figure 169 Tool control login single project start button

Click the 'Start using the tool' button to begin usage. NEMO will check user permissions before enabling the tool. If interlocks have been configured, NEMO will enable the interlock. Tool interlocks are discussed in the [Detailed administration → Tools](#) section on page 504.

A start record will be recorded in the usage events table listing the users, project, tool, and start time. Usage events are found on the [Detailed administration → Usage events](#) page detailed on page 535.

If a tool requires a user to be logged into an area and they are not, an error message will appear (Figure 170). Lab areas are configured through the [Detailed administration → Areas page](#) detailed on page 371. Tools can be configured to require a user to be logged into an area and are discussed in the [Detailed administration → Tools](#) section on page 504. If a tool requires a user to be logged into an area to use a tool and they attempt to enable the tool without being logged into

the area, an unauthorized tool access email will be sent to the abuse email if configured. Both are configured in the [Customization](#) page detailed starting on page 307.

Figure 170 Tool control log in area error message

If the user isn't qualified to use the tool, an error message will appear (Figure 171).

Figure 171 Tool control log in qualification error message

If interlocks are enabled and the interlock command fails, an error message will appear (Figure 172). You can choose to Enable the tool anyway (if that option is checked), try again or cancel. More information on the [interlock settings customization](#) detailed on page 312.

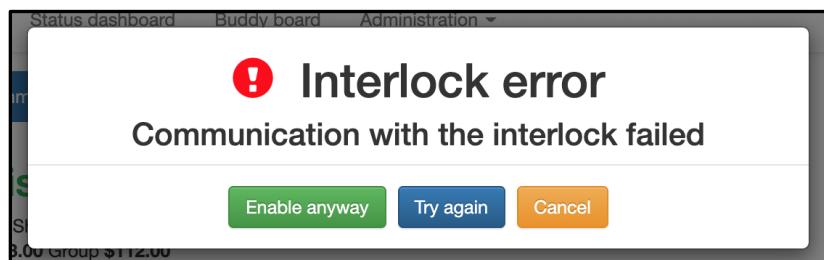

Figure 172 Tool control interlock error

7.4.7.2 Multiple use tool login

If a tool has been configured for multiple uses as a parent tool with child tools then multiple start buttons will be displayed (Figure 173). The parent/child tool configuration is useful in cases where a single tool can be used multiple ways and either the usage of each way needs to be tracked or needs to be charged different rates.

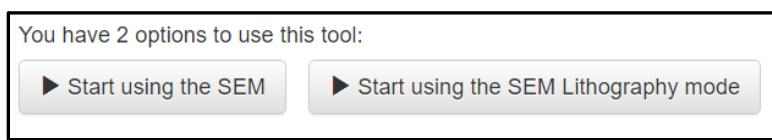

Figure 173 Tool control multiple use tool log in buttons

Parent and child tools are discussed in the [Detailed administration → Tools](#) section on page 504.

7.4.7.3 Staff tool login

Staff have the option to use tools for their own projects or to perform work for other users (Figure 174). Select the appropriate usage type to continue.

What would you like to do?

- Use this tool for my own project
- Use this tool on behalf of another user
- Use this tool for a remote project

Figure 174 Tool control login staff

Selecting ‘Use this tool for my own project’ will proceed the same as a user tool login detailed above. Staff can enable any tool regardless of qualifications and therefore do not need to be explicitly qualified on a tool. If a staff member is already charging staff time to a user, that option will be greyed out.

7.4.7.4 Staff tool login on behalf of another user

If Staff select to use a tool on behalf of another user, a search dialog will appear (Figure 175). Enter the users name. As the name is typed, a list of possible users will appear under the dialog. Select the user from the list at any time.

What would you like to do?

- Use this tool for my own project
- Use this tool on behalf of another user
- Use this tool for a remote project

Which user?

Figure 175 Tool control login on behalf of user

Once a user is selected, a list of the user’s projects will appear if they have more than one (Figure 176).

Charge tool usage to which project?

Project 1

Project 2

Figure 176 Tool control staff login select project

Clicking the project will enable the start button (Figure 177).

Figure 177 Tool control staff login multiple project start button

If a user only has one project, a message with the name of their project will appear and the start button will be displayed (Figure 178).

Figure 178 Tool control staff login single project start button

Click the 'Start using the tool' button to begin usage.

NEMO will enable the tool and record usage for the selected user regardless of user qualifications on the tool.

If interlocks have been configured, NEMO will enable the interlock. Tool interlocks are discussed in the [Detailed administration → Tools](#) section on page 504.

If using the tool for a remote project, the charging staff time indicator will appear on the navigation bar (Figure 179). If the tool in use is in an area, area access time will also be recorded. Staff charges are discussed in the [Staff charges](#) section on page 276.

Figure 179 Tool control staff charging time

7.4.8 Tool log out

The tool log out dialogs will vary depending on the options configured.

7.4.8.1 Post usage questions

If post usage questions are configured and set as required, they must be answered before tool log out will be allowed (Figure 180). Questions can be multiple choice, text, or numeric input. They

can be used to collect information about a run, create charges for consumables used, and record important tool parameters. Post usage questions can be configured so responses are either required or optional. In addition, questions can be grouped and repeated a configurable number of times to capture multiple processes in a single tool usage. Post usage questions are discussed in the [Detailed administration → Tools](#) section on page 504.

The screenshot shows a dialog box titled "How much gold was deposited?". It contains a text input field with "0" and a unit selector "nm". Below this, a question "Please rate your experience." is followed by four radio button options: "Great", "As expected", "Not terrible", and "Disaster".

Figure 180 Tool control log out post usage questions

All post usage question responses are saved in the database usage events table described in the [Detailed administration → Usage events](#) section on page 535. Post usage question responses can also be reviewed on the [usage data history tab](#) of the tool control page detailed on page 115. The ability to review the post usage question responses provides an electronic logbook that can be viewed by users and staff.

7.4.8.2 Delayed log out

If delayed log out has been enable for the tool, the user has the option to log out while preventing usage until the delayed log out time has elapsed (Figure 181). Enter the number of minutes to delay or leave blank to skip the delay. This feature is useful for tools that require timed conditioning runs such as etch systems. It allows the user to start the post conditioning run, log out, and leave the area while the run completes.

The screenshot shows a dialog box with the instruction "Prevent others from using the tool for" followed by a text input field containing "0" and the unit "minutes after disabling the tool". A link "What's this?" is located next to the input field.

Figure 181 Tool control log out delayed log out

Delayed log out configuration is discussed in the [Detailed administration → Tools](#) section on page 504.

7.4.8.3 Stop using a tool

If a required post usage question has not been answered, the 'Stop using the tool' button will be disabled (Figure 182).

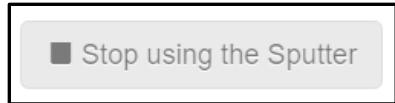

Figure 182 Tool control log out button disabled

Once all required post usage questions have been answered, the ‘Stop using the tool’ button will be enabled (Figure 183).

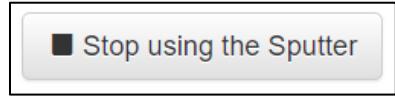

Figure 183 Tool control log out button enabled

Click the button to stop using the tool.

NEMO will disable the tool and stop recording usage. The usage record in the database will be updated with the end time. Usage events are found on the [Detailed administration → Usage events](#) page detailed on page 535.

If interlocks have been configured, NEMO will disable the interlock immediately even if delayed log out have been selected. Tool interlocks are discussed in the [Detailed administration → Tools](#) section on page 504.

Staff only – If using the tool on behalf of another user and charging staff time, a dialog will pop up asking if staff time charges should continue (Figure 184). Click the appropriate button to continue or stop charging staff time. Staff charges are discussed in the [Staff charges](#) section on page 276.

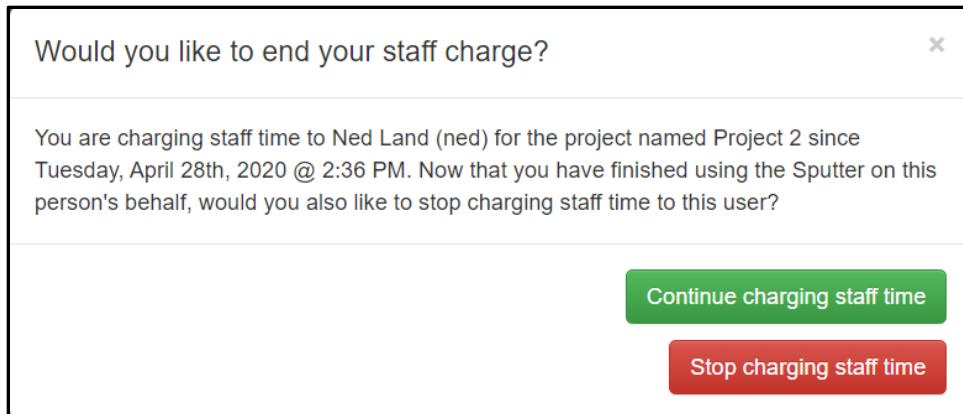

Figure 184 Tool control log out staff charges

7.4.9 Tool description

The bottom of the tool summary page can be configured to display a description (Figure 185).

Bobs XYZ sputter system

This system has RF and DC capability up to 300 watts. The lab has several targets or you can bring your own with prior approval.

Figure 185 Tool control example tool description

The description is optional and html coding can be used to control appearance. Tool descriptions are discussed in the [Detailed administration → Tools](#) section on page 504.

7.4.10 Tool image

A tool image can be configured to display at the bottom of the tool summary page (Figure 186). If a tool description is configured, the image will be displayed next to the tool description.

Figure 186 Tool control example tool image

The image is optional. Tool images are discussed in the [Detailed administration → Tools](#) section on page 504.

7.4.11 Tool Documents

Tool documents can be added and displayed at the bottom of the summary page (Figure 187).

Documents:

- [Sputter_Manual.pdf](#)
- [Sputter_SOP.pdf](#)

Figure 187 Tool control example tool documents

The documents are optional. Tool documents are discussed in the [Detailed administration → Tools](#) section on page 504.

7.5 Details Tab

The details tab provides users and staff with information about the selected tool including the responsible staff, tool location, qualified users, required and optional resources, and task and comment history (Figure 188).

Profilometer [Summary](#) **Details** [Report a problem](#) [Post a comment](#)

You may force Ned Land (ned) off this tool.

 Captain Nemo (captain) is primarily responsible for this tool and can be contacted with any questions or concerns about the tool.
If you are unable to reach Captain Nemo (captain) then please contact [Staff Cleanroom \(staff\)](#), or [Tech Cleanroom \(tech\)](#).
Problem reports for the Profilometer are automatically emailed to labstaff@nemo.com.
The Profilometer is located in room  Cleanroom Bay 5.
You may dial the phone that is closest to the Profilometer at extension  555-1234.

 ➤ Qualified users
 ➤ Resources that are required for this tool to operate
 ➤ Resources that are optional for this tool to operate
 ➤ Task & comment history for this tool

Figure 188 Tool control details page

7.5.1 Force user off of tool (staff only)

At the top of the page, staff are provided a quick link to for the currently logged in user off of the currently selected tool (Figure 189). Clicking the link will log the current user out of the tool and return the view to the summary tab.

If there are required post usage questions, an email will be sent to the user, the staff member who forced him off, the tool owner and backup owners, as well as the lab managers. The email will contain the required questions and the tool usage data entry will be blank for usage.

You may force Ned Land (ned) off this tool.

Figure 189 Tool details force user off of tool

7.5.2 Tool information

The tool information section of the details tab provides primary and back up staff contacts, problem report email, tool location, and tool location phone number (Figure 190).

Captain Nemo is primarily responsible for this tool and can be contacted with any questions or concerns about the tool.
If you are unable to reach Captain Nemo then please contact **Captain Nemo**, or **Ned Land**.
For equipment training, you can contact the primary, backup or the superuser, **Pierre Aronnax**.
Problem reports for the PECVD are automatically emailed to **service@nautilus.com**.
The PECVD is located in room **NanoFab**.
You may dial the phone that is closest to the PECVD at extension **x1234**.

Figure 190 Tool details tool information

- Primary tool owners are required. If the primary tool owner is associated with a contact, clicking on the arrow next to the primary tool owners name will display additional contact information (Figure 191).

Captain Nemo
Email: captain.nemo@nautilus.com
Office phone: 202-555-1212
Mobile phone:

- Call 098-765-4321
- Send a text message

Office location: Building 7 Room 2

Figure 191 Tool details additional information

- Backup tool owners are optional and will only display if configured. If the backup tool owners are associated with a contact, clicking on the arrow next to the backup tool owners name will display additional contact information in the same manner for primary tool owners.
- Tool superusers are optional and will only display if configured. If the superusers are associated with a contact, clicking on the arrow next to the superuser name will display additional contact information in the same manner for primary tool owners.
- Associating primary, backup tool owners and superusers with contacts is discussed in the [Detailed administration → Contact information](#) section starting on page 420.
- Problem reporting emails are optional and will only display if configured.
- Tool location is required.

- Tool phone number is required.

All tool information fields are set at the tool level and are discussed in the [Detailed administration → Tools](#) section on page 504.

7.5.2.1 Emailing tool contacts through NEMO

Clicking on a tool contact link will open the email dialog (Figure 192).

The screenshot shows a 'Compose an email' dialog box. At the top, it says 'Compose an email'. Below that, the 'From' field contains 'ned.land@nautilus.com'. The 'To' field contains 'captain.nemo@nautilus.com'. There is a checked checkbox labeled 'Send a copy of this message to myself'. Below these fields is a subject line input field containing 'What is the subject of this email?'. Below that is a large text area for the message body. At the bottom is a green 'Send email' button.

Figure 192 Tool control detail email dialog

To send an email

- The from and to fields are automatically set and cannot be changed (Figure 193).

The screenshot shows the 'From' field set to 'ned.land@nautilus.com' and the 'To' field set to 'captain.nemo@nautilus.com' in the email dialog.

Figure 193 Tool control detail email address

- Set the send a copy checkbox (Figure 194). By default, the user will be copied however, the checkbox can be unchecked if desired.

The screenshot shows a checked checkbox labeled 'Send a copy of this message to myself' in the email dialog.

Figure 194 Tool control detail email copy

- Enter a subject line in the subject dialog box (Figure 195).

What is the subject of this email?

Figure 195 Tool control email subject

- Enter the message in the message dialog box (Figure 196).

Figure 196 Tool control email message

- Click ‘Send email’ button to send the message (Figure 197).

Send email

Figure 197 Tool control email send button

7.5.3 Qualified users (staff only)

Staff are able to see all qualified users on a tool (Figure 198).

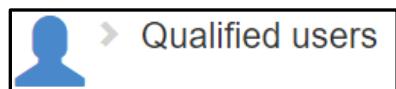

Figure 198 Tool control details qualified users

Clicking the (>) will expand the qualified users’ dialog (Figure 199). All qualified users are listed and there are dialogs to add qualified users and email all qualified users. If qualifying a user will automatically grant them access to the lab, it will be indicated in red. Active users are displayed boldly, and inactive users are greyed out. NEMO user creation and user status is discussed in the [Users](#) section on page 293.

Qualified users

Only qualified users are able to operate the Sputter.

Qualifying a user for this tool automatically grants them the physical access level "Cleanroom anytime".

Add a qualified user

Search for a user

You can email [all qualified users](#).

Current qualified users are listed below. Inactive qualified users are marked in light grey.

- Captain Nemo (captain)
- Conseil Aronnax (conseil)
- Ned Land (ned)

Figure 199 Tool control details qualified users expanded

Clicking the (▼) will collapse the qualified user dialog.

7.5.3.1 Qualify a user

Users can be qualified directly using the Add a qualified user search dialog (Figure 200). User tool qualifications are detailed in [Qualifications](#) on page 251.

Figure 200 Tool control details qualify a user

Start typing the user's name in the search dialog then select the name of the list returned. The return list updates automatically as typed, and a user can be clicked from the list at any time (Figure 201). Once clicked, the user is added to the current qualified users list.

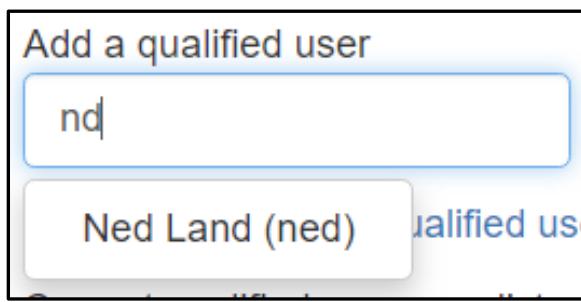

Figure 201 Tool control details qualify a user search list

7.5.3.2 Email all tool users

If there are any qualified users, an email link will appear below the add a qualified user dialog (Figure 202).

 You can email **all qualified users.**

Figure 202 Tool control details email all users

Clicking the link will open the user email page which is described in the [Email](#) section on page 232.

7.5.4 Required resources

The required resources are optional and only display if configured (Figure 203). Resources are discussed in the [Resources](#) section on page 265. Associating resources with tools is discussed in the [Detailed administration → Tools](#) section on page 504.

Figure 203 Tool control details required resources

Clicking the (>) will expand the required resource list (Figure 204).

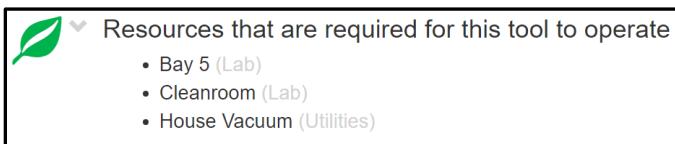

Figure 204 Tool control details require resources expanded

Clicking the (▼) will collapse the required resource list.

7.5.5 Optional resources

The optional resources are optional and only display if configured (Figure 205). Resources are discussed in the [Resources](#) section on page 265. Associating resources with tools is discussed in the [Detailed administration → Tools](#) section on page 504.

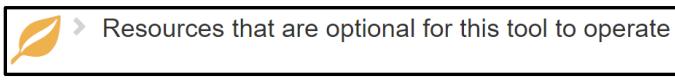

Figure 205 Tool control details optional resources

Clicking the (>) will expand the optional resource list (Figure 206).

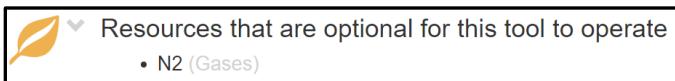

Figure 206 Tool control details optional resources expanded

Clicking the (▼) will collapse the optional resource list.

7.5.6 Task and comment history

The task and comment history provides a way to look at problems, shutdowns, and comments that are currently open or have been previously closed (Figure 207).

Figure 207 Tool control details task and comment history

Clicking the (>) will expand the optional resource list (Figure 208).

Task & comment history for this tool

Created in the last 3 months

10 most recent

Contains search title and content

Between start

and end

Go Export

Figure 208 Tool control details task and comment history expanded

Clicking the (▼) will collapse the required resource list.

The expanded task and comment history provides quick buttons to display all items created in the last three months (Figure 209) or the ten most recent events (Figure 210). Clicking either will show a list of tasks and comments below the search dialog (Figure 211).

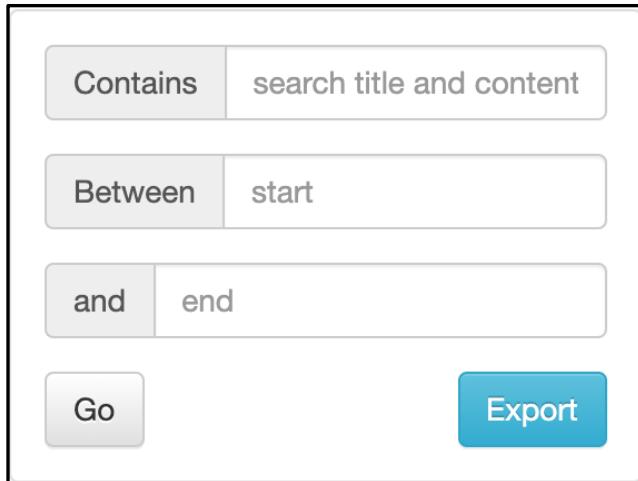

Created in the last 3 months

Figure 209 Tool control details task 3-month button

10 most recent

Figure 210 Tool control details task 10 most recent button

A search dialog is also provided to allow a keyword search or any date range to be displayed (Figure 211).

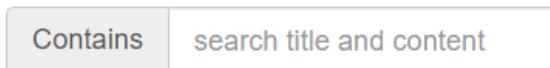

The image shows a search dialog box with the following layout:

Contains	search title and content
Between	start
and	end
Go	Export

Figure 211 Tool control details task search dialog

For a key word search, enter the search text in the contains field (Figure 212).

Contains	search title and content
----------	--------------------------

Figure 212 Tool control details task search text

For a date range search, click the start and end dialogs to enter dates. A calendar dialog will appear that can be used to navigate to the date of interest (Figure 213). However, a date can be typed directly into each box.

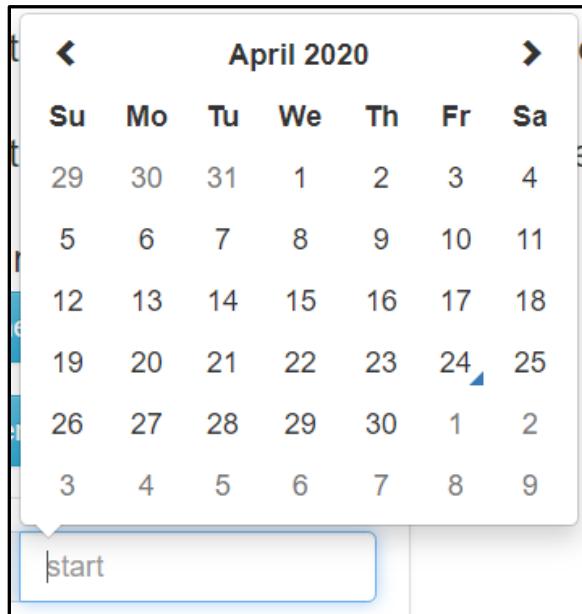

Figure 213 Tool control details task calendar dialog

The search can also combine text search and date ranges. To make open ended, leave fields blank. For example, to show all tasks, leave the contains field and start date blank and enter today's date into the end date, all task records will be returned.

Click the  button to display results below the dialog (Figure 214).

Figure 214 Tool control details task display results

Clicking the  will expand task or comment details (Figure 215).

Figure 215 Tool control details task results expanded

Clicking the  will collapse the details.

Clicking the  button will export current shown tasks and comments into a text file.

7.5.6.1 Reopen closed task (staff only)

If a staff member is viewing task history, a line will be displayed giving the option to reopen the task (Figure 216).

You can [reopen this task if it was mistakenly resolved](#).

Figure 216 Tool control details task results reopen task link

Clicking on the reopen link will open the [task update page](#) which is detailed on page 94. Click update to reopen the task.

7.6 Usage Data History

The usage data history tab provides users and staff with the ability to see how a tool was used based on answers to post usage questions. This feature is useful to replace handwritten logbooks and gives easy access to post usage question data. The tab will only be visible on tools that have

post usage questions configured. The usage data history is searchable by date, last records, and can be filtered by user. The selected data can be exported in a comma separated text file.

The screenshot shows a web-based application interface for managing tool usage data. At the top, there is a header with the tool name "790 RIE Right" and several navigation tabs: "Summary", "Details", "Usage Data History" (which is highlighted in blue), "Report a problem", and "Post a comment". Below the header, there is a search/filter section with fields for "From" and "Start date", "to" and "End date", and "or last" with a dropdown menu showing "25" and a selection arrow. There is also a field for "records" and two buttons: "Update" (green) and "Export" (blue). Below this, there is a "Filter by user:" dropdown with a placeholder "Search for a user" and a checkbox "Show project information". The main content area is a table with the following columns: "User", "Date", "What material did you etch?", "How long did you etch?", and "Any comments?". The table contains six rows of data, all belonging to a user named "Ned Land".

User	Date	What material did you etch?	How long did you etch?	Any comments?
Ned Land	06/08/2021 1:48 p.m.	Silicon Oxide	5	
Ned Land	06/08/2021 1:48 p.m.	Silicon Nitride	40	
Ned Land	06/05/2021 6:45 p.m.	Silicon Oxide	12	
Ned Land	06/05/2021 4:38 p.m.	Silicon Nitride	20	
Ned Land	06/05/2021 11:14 a.m.	Silicon Nitride	10	
Ned Land	06/05/2021 11:14 a.m.	Silicon Oxide	25	

Figure 217 Tool control usage data history

7.6.1 Feature setup

- The usage data history page is automatically displayed once post usage questions have been setup for a tool.
- Post usage question setup is discussed in detail in the [Detailed administration → Tools](#) section on page 504.
- Post usage questions can be configured so responses are either required or optional. In addition, questions can be grouped and repeated a configurable number of times to capture multiple processes in a single tool usage. If a combination of grouped and ungrouped questions are configured, the ungrouped question responses only appear with the first group response.

7.6.2 Review usage data history for a tool

- Navigate to the tool control page.
- Select the tool of interest from the tool list on the sidebar.
- Click the usage data history tab.
- The default view lists the last 25 records

Usage Data History

Figure 218 Tool control usage data history tab

- Select the date range or the last number of records:
 - Enter a start and end date if desired.
 - Or select the last number of records.
 - Click update to refresh the view.

From	<input type="text" value="07/31/2020"/>	to	<input type="text" value="11/30/2020"/>	or last	<input type="button" value="▼"/>	records
------	---	----	---	---------	----------------------------------	---------

Figure 219 Tool control usage data history date range or last records

- Filter by user:

- Enter a user name in the search box if desired.
- Click on the user you want to filter by.
- Click update to refresh the view.

Filter by user:	<input type="text" value="Search for a user"/>
-----------------	--

Figure 220 Tool control usage data history filter by user

- Show project information:

- Check the box if you want to see project information in the table
- Click update to refresh the view

<input checked="" type="checkbox"/> Show project information
--

Figure 221 Tool control usage data history show project info

- The resulting data will include project information:

User	Project	Date	What material did you etch?	How long did you etch?	Any comments?
Ned Land	Project 3	06/08/2021 1:48 p.m.	Silicon Oxide	5	
Ned Land	Project 3	06/08/2021 1:48 p.m.	Silicon Nitride	40	
Ned Land	Project 3	06/05/2021 6:45 p.m.	Silicon Oxide	12	
Ned Land	Project 3	06/05/2021 4:38 p.m.	Silicon Nitride	20	
Ned Land	Project 3	06/05/2021 11:14 a.m.	Silicon Nitride	10	
Ned Land	Project 3	06/05/2021 11:14 a.m.	Silicon Oxide	25	

Figure 222 Tool control usage data history with project information

- Scroll through the returned data to review.
- To export the selected data, click the export button.

Export

Figure 223 Tool control usage data history export button

7.7 Config History

The config history tab provides users and staff with the ability to see how a tool was configured previously (Figure 224). The tab will only be visible on tools that are configurable.

Configuration history is saved in the database and is discussed in [Detailed administration → Configuration histories](#) on page 407. Configurations are discussed in the [Configuration Agenda](#) section on page 228.

The screenshot shows a web page titled "Sputter" with a navigation bar including "Summary", "Details", "Config History" (which is highlighted in blue), "Report a problem", and "Post a comment". Below the navigation bar is a list of configuration changes:

- On *Tuesday, April 28th, 2020 @ 3:43 PM* Captain Nemo (captain) changed the configuration
- On *Tuesday, April 28th, 2020 @ 12:35 PM* Captain Nemo (captain) changed the configuration
- On *Monday, April 27th, 2020 @ 10:47 AM* Captain Nemo (captain) changed the configuration
- On *Friday, April 24th, 2020 @ 4:55 PM* Captain Nemo (captain) changed the configuration
- On *Friday, April 24th, 2020 @ 4:55 PM* Captain Nemo (captain) changed the configuration
- On *Friday, April 24th, 2020 @ 4:55 PM* Captain Nemo (captain) changed the configuration
- On *Thursday, April 23rd, 2020 @ 3:50 PM* Captain Nemo (captain) changed the configuration
- On *Thursday, April 23rd, 2020 @ 3:50 PM* Captain Nemo (captain) changed the configuration

Figure 224 Tool control config history page

Click the (+) icon to expand the details of a particular configuration (Figure 225).

The screenshot shows the expanded details for the configuration change on April 28th, 2020 at 12:35 PM. The expanded section contains the following information:

- On *Tuesday, April 28th, 2020 @ 12:35 PM* Captain Nemo (captain) changed the configuration
 - Gun 1 Target: Cr
 - Gun 2 Target: Au

Figure 225 Tool control configuration details

Click the (⊖) icon to collapse the details.

7.8 Report a problem Tab

The report a problem tab provides users and staff with the ability to alert others to problems with a tool (Figure 226). If a tool is unusable, it can be shut down and the tool owner notified. If it poses a safety hazard, more staff can be alerted.

Chlorine Etch

[Summary](#)[Details](#)[Config History](#)[Report a problem](#)[Post a comment](#)

Use this form to report a problem relating to the currently selected tool. The NanoFab staff will be notified of the problem by email and the details of the problem will be visible to everyone on the website.

Please choose a category that best describes this problem. If there is no appropriate category then leave this field blank.

What is the status of this task?

Please provide a **detailed** description of the problem so that the NanoFab staff have enough information to resolve the problem efficiently.

What is your best estimate of when the problem will be resolved? Leave this field blank if you are unsure.

- This problem represents a safety hazard to the NanoFab and should be regarded as urgent. Notify the NanoFab safety officer of this issue.
- Shut down the tool so that it may not be used until this problem is resolved.

[Choose Files](#) No file chosen

[Report problem](#)

Figure 226 Tool control report a problem page

7.8.1 To report a problem:

- Navigate to the tool control page.
- Select the tool of interest from the tool list on the sidebar.
- Click the report a problem tab.
- If task categories have been defined, a dropdown and instruction will appear. Click the dropdown and select the problem category that best describes the problem (Figure 227). If no category describes the problem, leave this blank. Task categories can be used to bin problems making future problem analysis easier. Categories are configured on the [Detailed administration → Task categories](#) page described on page 483.

Please choose a category that best describes this problem. If there is no appropriate category then leave this field blank.

Process problem
Tool Error
Wafer handling problem

Figure 227 Tool problem category selection

- (Staff Only) If task statuses have been defined, a dropdown and instruction will appear (Figure 228). If the status is not known, the field can be left blank. Click the dropdown and select the initial status for the problem. Task statuses are used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Statuses are configured on the [Detailed administration → Task statuses page](#) described on page 498.

What is the status of this task?

Qualification
Repair
Triage

Figure 228 Tool problem task status selection

- Provide a detailed description of the problem in the dialog box (Figure 229).

Please provide a **detailed** description of the problem so that the NanoFab staff have enough information to resolve the problem efficiently.

Figure 229 Tool problem detailed description

- (Staff only) Provide an estimate of when the problem will be resolved if known or leave blank (Figure 230). Clicking in the dialog will open a date and time dialog (Figure 231).

What is your best estimate of when the problem will be resolved? Leave this field blank if you are unsure.

Figure 230 Tool problem estimated repair time

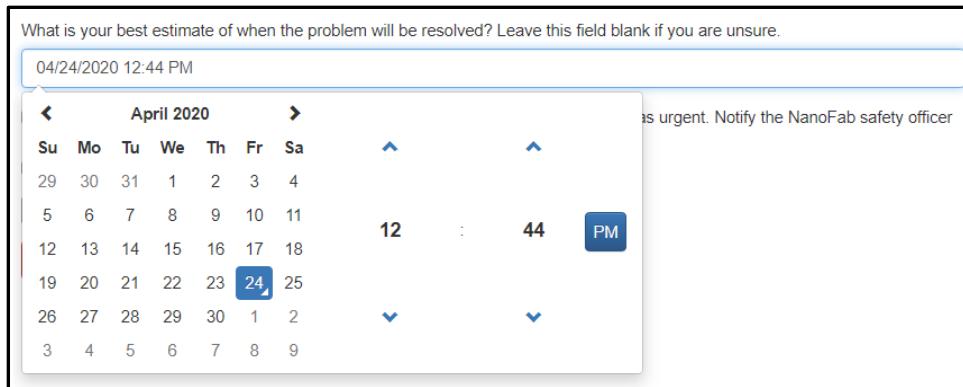

Figure 231 Tool problem estimated repair date and time dialog

- Check the safety hazard check box if the problem is a safety hazard to people or equipment (Figure 232).

This problem represents a safety hazard to the NanoFab and should be regarded as urgent. Notify the NanoFab safety officer of this issue.

Figure 232 Tool problem safety hazard

- Check if the shutdown check box if the tool is not able to be used by others and could potentially ruin samples (Figure 233).

Shut down the tool so that it may not be used until this problem is resolved.

Figure 233 Tool problem shut down

- The choose files dialog may be used to upload any relevant pictures or data to show details that support the description (Figure 234). Clicking the button activate a standard file selection dialog. Multiple files can be uploaded. Note: it is good practice to make note of the files in the description to link the file to the text.

No file chosen

Figure 234 Tool problem upload files

- Click the report button to finish (Figure 235).

Figure 235 Tool problem report button

7.8.2 Problem posting

Once the Report problem button is clicked, a task is created and saved in the Tasks table of the database which is discussed in the [Detailed administration → Tasks](#) section on page 498.

Tasks are displayed as problems and shutdowns in the summary tab of the tool control page.

Email notifications are triggered.

- Email notifications are only sent if the New task email has been configured in [Customization](#) which is discussed on page 328.
- Recipients set at the tool level as discussed in the [Detailed administration → Tools](#) section on page 504.
 - Primary tool owner
 - Backup tool owners if any are defined
 - Notification email if defined
- Recipients set in settings.py LAB_MANAGERS as discussed in the [Configuring NEMO settings → Lab Managers](#) section on page **Error! Bookmark not defined..**
- Recipients any non-staff user with a future reservation.

If the task is marked as a safety hazard

- In addition to the standard email notifications, a safety issue is automatically created, and a safety email is sent. Safety issues are discussed in the [Safety page](#) section on page 143.

7.9 Post a comment Tab

The post a comment tab provides users and staff with the ability to record information about a tool without changing the tool status (Figure 236). It is useful for highlighting tool usage information, process results, and general comments. Unlike reporting a problem, staff are not notified when a comment is posted therefore, comments should not be used to report problems or shutdowns.

The screenshot shows a web page titled 'Sputter'. At the top, there are tabs: 'Summary', 'Details', 'Config History', 'Report a problem', and a blue button labeled 'Post a comment'. Below the tabs, a text area explains the purpose of the form: 'Use this form to comment on the operating status of the selected tool. The comment will be visible to everyone on the website for **informational purposes**. (Note: if there is something wrong with the tool then please report a problem instead of creating a comment). You may remove the comment at any time because you are its author.' A dropdown menu shows '30 days' as the visibility duration. A text input field is labeled 'What would you like to say?'. At the bottom left is a checkbox for 'Make this comment only visible to staff users', and at the bottom right is a blue 'Post comment' button.

Figure 236 Tool control post a comment page

7.9.1 To post a comment:

- Navigate to the tool control page.

- Select the tool of interest from the tool list on the sidebar.
- Click the Post a comment tab.
- Click the drop down and select the amount of time to keep the comment visible (Figure 237).

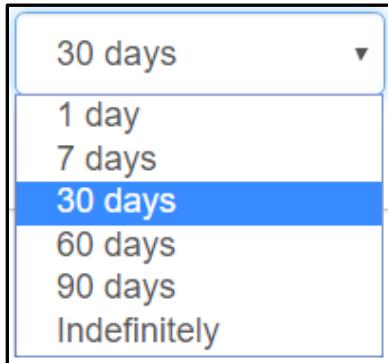

Figure 237 Comment visible time dropdown

- Enter any relevant information in the dialog box (Figure 238).

Figure 238 Comment dialog box

- Check to make comment visible only to staff (staff only) (Figure 239). This feature is useful to post special tool information.

Figure 239 Comment dialog staff visible checkbox

- Click the post comment button (Figure 240).

Post comment

Figure 240 Comment post button

7.9.2 Comment posting

Once the Post comment button is clicked, the comment is saved in the Comments table of the database which is discussed in the [Detailed administration → Comments](#) section on page 389. Comments are displayed in the summary tab of the tool control page. No email notifications are triggered.

7.10 Mobile device tool control

The tool control page will automatically change to a mobile display by stacking information into a single scrollable column (Figure 241). All of the features are available while in mobile view. To start, directly enter the name of the tool in the search dialog or select a tool by category. All categories and sub-categories are listed.

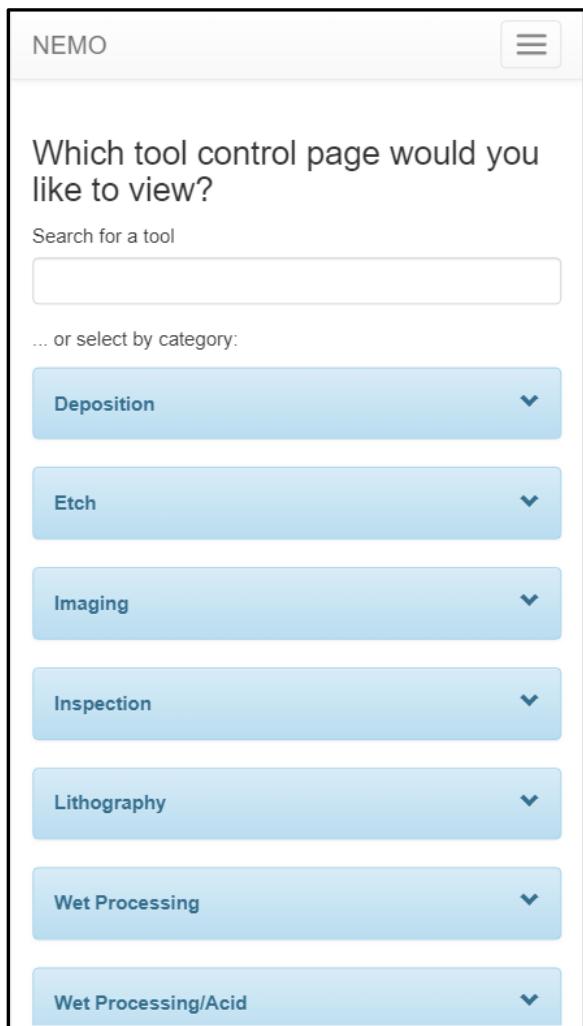

Figure 241 Mobile tool control page

7.10.1 Search for a tool

To search for a tool, start typing in the search dialog box. A tool button list will appear below the search dialog as characters are entered but at least two characters must be entered (Figure 242). Once the tool of interest appears, click the button of the tool of interest to go to the tool control page detailed below on page 126.

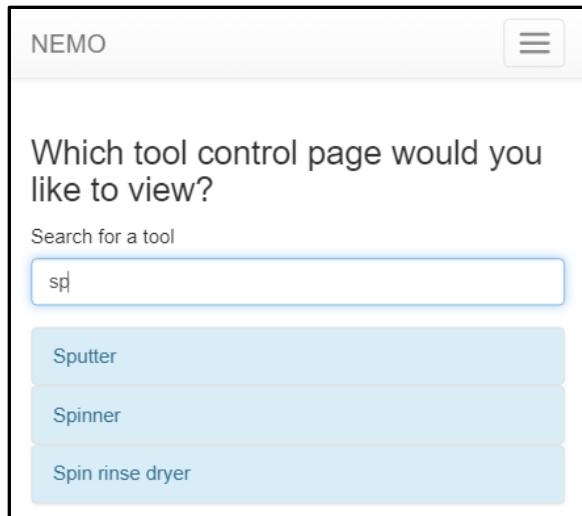

Figure 242 Mobile tool control search box and results

7.10.2 Select a tool by category

To select a tool by category, click the category button then click the tool link in the drop down. If the tool of interest is not on the list, click another category button (Figure 243). Note: it is possible to have more than one category at a time expanded. However, the page resets each time it is opened. Once the tool of interest appears, click the button of the tool of interest to go to the mobile tool reservation page detailed below on page 126.

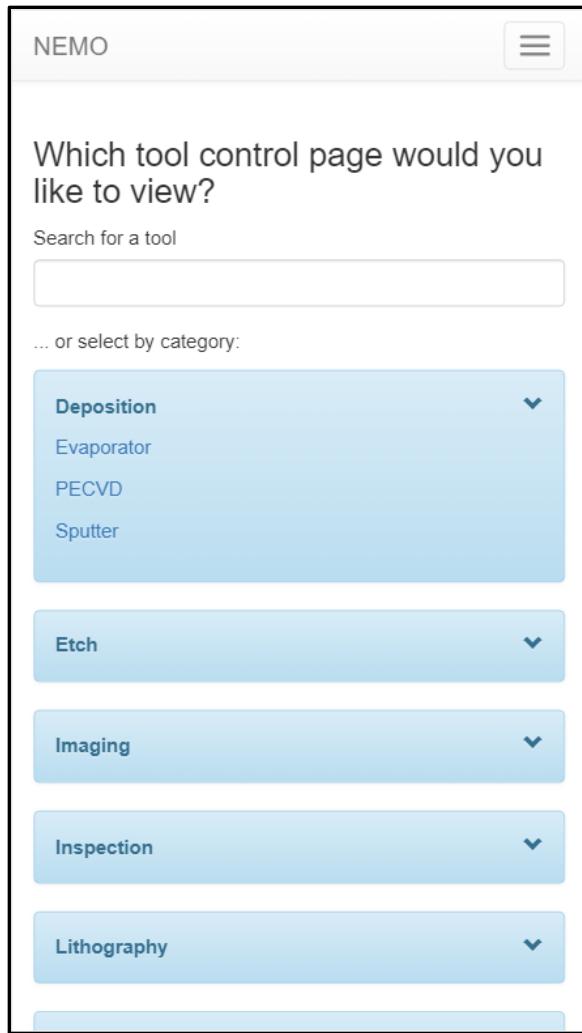

Figure 243 Mobile tool control category drop down

7.10.3 Mobile tool control page

The mobile tool control page lands on the summary tab (Figure 244). The summary tab, details tab, report a problem tab, and post a comment tab do not have any specializations to render on a mobile device. To select each tab, click or press near the tab title. Functionality is identical to the previously described tab features. If a tab renders larger than a screen, drag the screen to scroll.

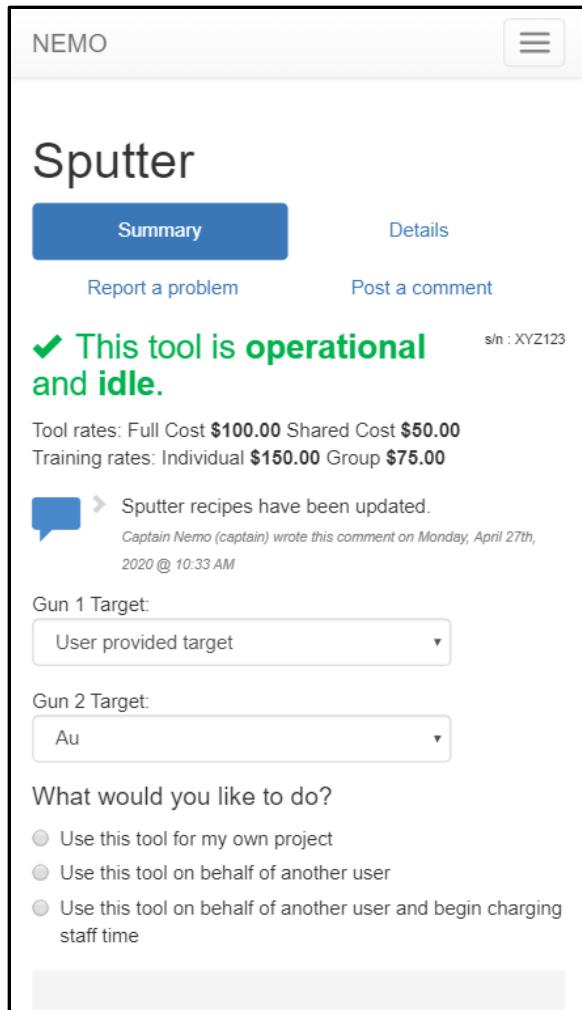

Figure 244 Mobile tool control landing page

7.11 Tool control customizations

7.11.1 Notification emails

Email notifications are possible when a task is created, updated, or resolved or a user tries to use a tool they are not qualified for and must be configured to be functional. Email templates are configured in the [Customization](#) page detailed starting on page 307.

7.11.2 Tool usage reminders

Tool usage reminder emails can be sent periodically. A timed service app must be properly configured and running which is described in [NEMO timed services](#) on page 603. The usage reminder email template must be configured and is described in the [Customization](#) pages detailed starting on page 307.

7.11.3 Tool rates

Tool rates can be customized and are discussed in the [Customizations → Tool rates](#) section on page 354.

7.11.4 Tool control page refresh rate

The tool control page automatically refreshes every 30 seconds which updates the current tool information and sidebar. To change the update interval, edit the tool_control.html and change the setInterval constant (in milliseconds) in the on_load function.

7.11.5 Optional tool features

The tool control pages were implemented such that if a feature was not used, its corresponding content would not be displayed. This helps eliminate the need for special setups to view features and easily enables many features to be optional. All of the optional features are detailed in the tool control pages.

8 Status dashboard

The status dashboard page provides a convenient overview of all users and staff currently logged into any areas or tools. In addition, there are views for problematic tools, idle tools, and an all-tool view. The status dashboard lands on the area occupancy tab by default.

8.1 Web address

The status dashboard page is accessible at site-address/status_dashboard/. For example, www.nemo.com/status_dashboard/. The page can also be accessed from the navigation bar menu item “Status dashboard”.

8.2 Area occupancy tab

The status dashboard lands on the area occupancy tab by default and the area occupancy tab will be highlighted with a blue background (Figure 245). This view shows all users that are currently logged into all areas. Staff members are highlighted in green and service personnel are highlighted in orange, so they stand out. Each area will list the number of people in the area if it is greater than 1. Staff and service personnel are listed separately if the area is configured not to include them in the occupancy count. Lab areas are configured through the [Detailed administration → Areas](#) page detailed on page 384.

The screenshot shows the 'Status dashboard' interface. At the top, there are two tabs: 'Area occupancy' (which is highlighted in blue) and 'Tool status & usage'. Below the tabs, there is a note: 'Staff members are highlighted in green. Service personnel are highlighted in orange. Users with expired reservations are highlighted in red.' The main content is divided into two sections: 'Cleanroom' and 'CMP lab'.
Cleanroom: A summary box indicates '2 / 5 people (+ 2 staff and 1 service personnel)' with a warning icon. A table lists users and their activities:

User	Since	Working on project...
✉ Tech Cleanroom	Monday @ 1:35 PM	Cleanroom Maint
✉ Ned Land	Monday @ 3:53 PM	Project 1
✉ Pierre Aronnax	Monday @ 3:53 PM	Project 2
✉ Staff Cleanroom	Monday @ 3:53 PM	Cleanroom Maint
✉ Captain Nemo	Monday @ 3:54 PM	Cleanroom Training

CMP lab: A summary box indicates '1 people' with a warning icon. A table lists users and their activities:

User	Since	Working on project...
✉ Conseil Aronnax	Monday @ 3:55 PM	Project 1

Figure 245 Status dashboard area occupancy

8.2.1 Maximum occupancy

If an area has a maximum occupancy set, the number of people will be listed as total of the maximum (Figure 246).

3 / 5 people

Figure 246 Status dashboard below maximum occupancy

If the occupancy is within one person, a yellow warning will be displayed with the occupancy (Figure 247).

⚠ 4 / 5 people

Figure 247 Status dashboard near maximum occupancy

If the occupancy is at or above the limit, a red warning will be displayed with the occupancy (Figure 248).

⚠ 5 / 5 people

Figure 248 Status dashboard at or above maximum occupancy

8.2.2 Force user out of area (staff only)

Staff will see a (☒) icon next to each user's name. Clicking the icon will log the user out of the area. There is no prompt for confirmation, the logout is immediate.

8.3 Tool status & usage tab

Clicking the 'Tool status & usage' tab will switch the view and highlight the tab with a blue background. The default view is the 'tools in use' filter. To change the filter, click the dropdown and click the filter of interest (Figure 249). All filter views show the tool name, user name, and when they started using the tool. The tool names are followed by status icons which are identical to those described in [Tool control → Side bar Tool list icons](#) on page 83.

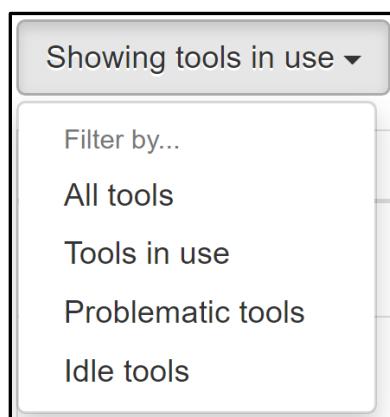

Figure 249 Status dashboard tool filter

8.3.1 Force user off of tool (staff only)

Staff will see a (ⓧ) icon next to each user's name on all tool status views except for idle tools. Clicking the icon will log the user out of the tool. There is no prompt for confirmation, the logout is immediate. All normal logout procedures are skipped and if interlocks are defined, the interlock is turned off immediately.

If there are required post usage questions, an email will be sent to the user, the staff member who forced him off, the tool owner and backup owners, as well as the lab managers. The email will contain the required questions and the tool usage data entry will be blank for usage.

Tool logout procedures are discussed in the [Tool control → Summary tab → Tool log out](#) section on page 103.

8.3.2 Tools in use

The 'tools in use' filter will only show tools that currently have someone logged in (Figure 250).

8.4 Staff status tab

Clicking the “Staff status” tab will switch the view to the staff status page, showing staff availability (Figure 254). The Staff availability is configurable and explained in detail in [Detailed administration -> Staff availability](#).

The current day is highlighted in blue.

Customizations are available for this feature. See [Status dashboard settings](#).

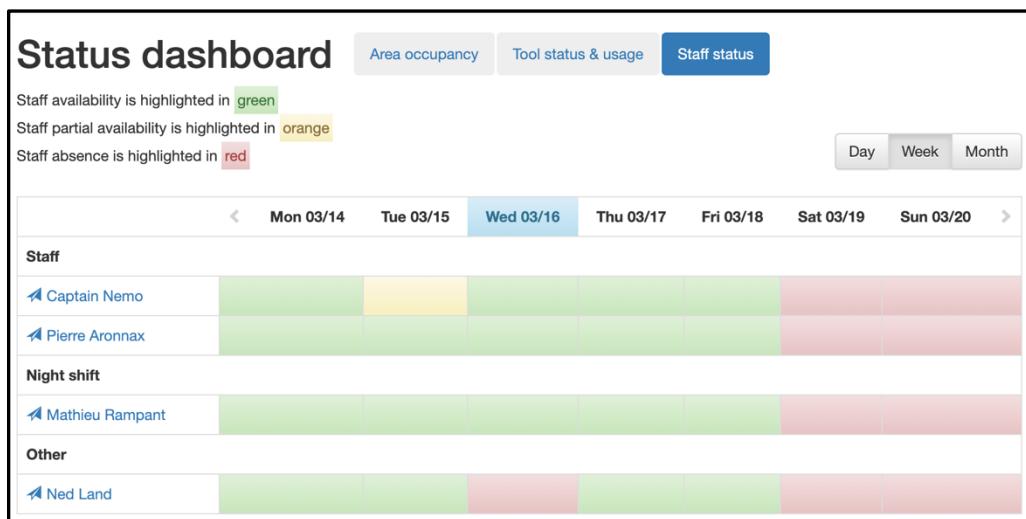

Figure 254 Status dashboard staff status

Clicking on a staff member's name will display a popup showing contact information. This contact information is pulled directly from [Detailed administration -> Contact information](#) (Figure 255).

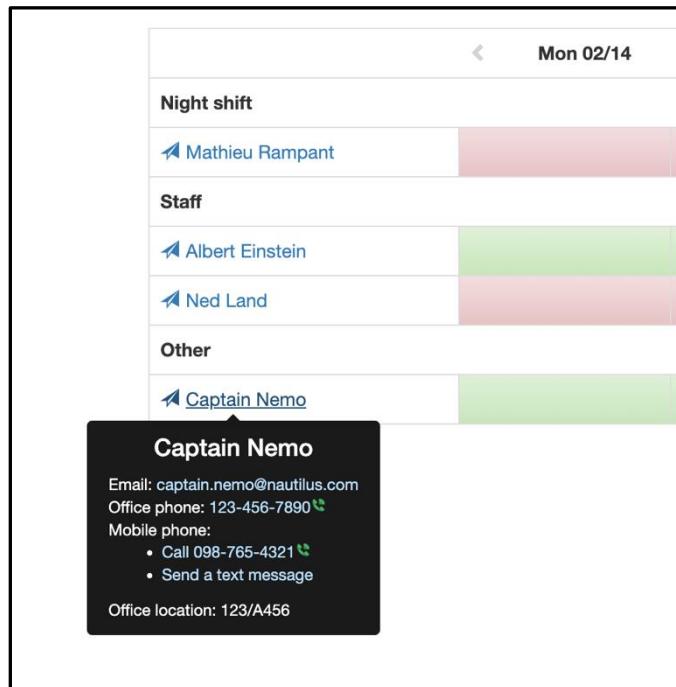

Figure 255 Status dashboard staff contact information

8.4.1 Changing the view mode

- Clicking on the “day/week/month” button will switch to the desired view (Figure 256).

Figure 256 Status dashboard staff switch view mode

- The default view is the day view (Figure 257).

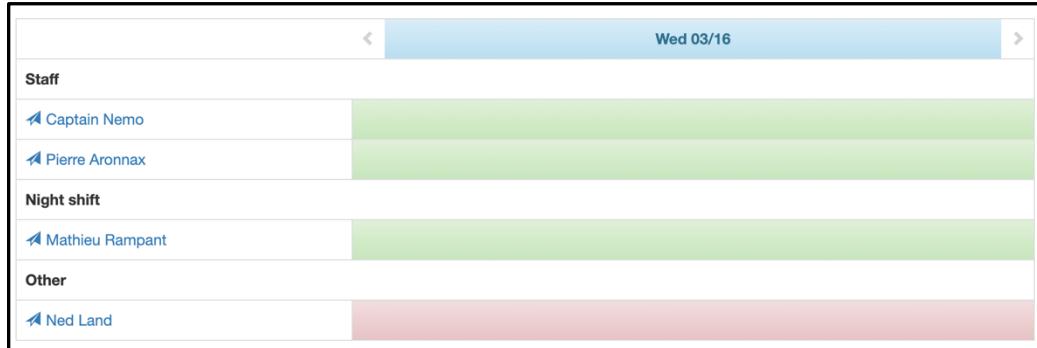

Figure 257 Status dashboard staff day view

- The week view shows the availability one week at a time (Figure 258).

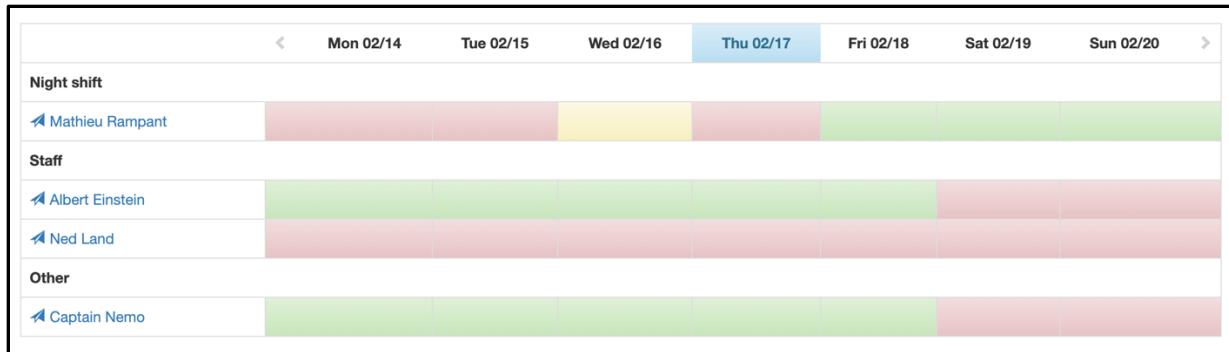

Figure 258 Status dashboard staff week view

- The month view is scrollable horizontally and will show a much larger timeframe (Figure 259).

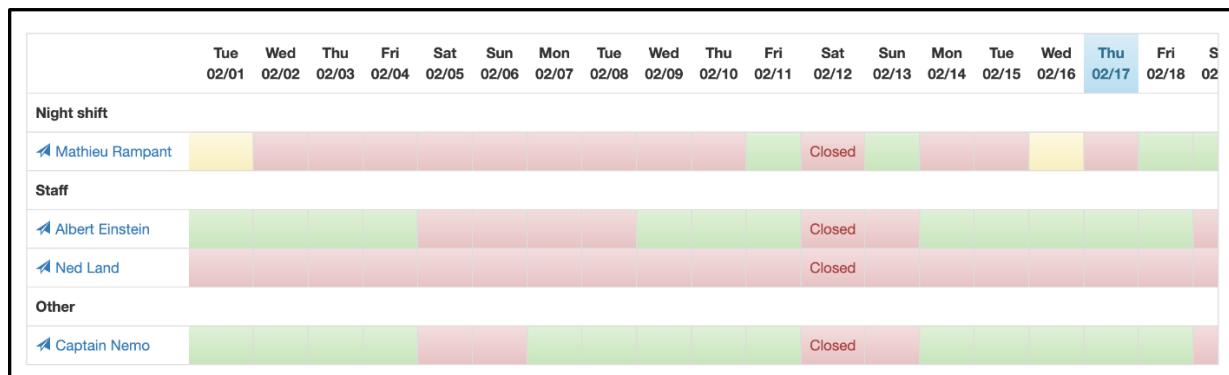

Figure 259 Status dashboard staff month view

- By default, the current day/week/month is displayed. Clicking on the left or right arrows will take you to the previous/next day, week, or month, respectively (Figure 260, Figure 261).

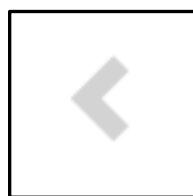

Figure 260 Status dashboard staff previous day/week/month

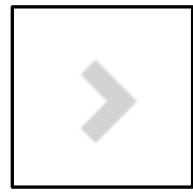

Figure 261 Status dashboard staff next day/week/month

8.4.2 User and staff view

Regular and staff users can only see staff names, their availability, and any potential facility closure that was set to make all staff absent.

There are 3 colors: green if the staff member is available that day, orange is the staff member is available for part of the day only, and red if the staff member is unavailable.

- When a staff member is only available part of the day, a tooltip will show more information if available (Figure 262).

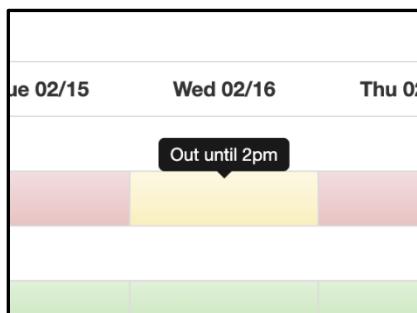

Figure 262 Status dashboard staff partial availability details

- If the staff member's working hours have been set, a tooltip will show them when hovering over a day when the staff is available (Figure 263).

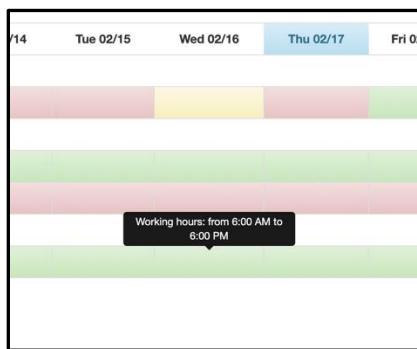

Figure 263 Status dashboard staff availability details

- If there is a facility closure and the closure was set to make all staff absent, it will say "Closed" and the tooltip will show the closure details (Figure 264).

Figure 264 Status dashboard staff closure details

8.4.3 Facility manager view

- Facility managers' view of the staff status page is more detailed and provide more functionality (Figure 265).

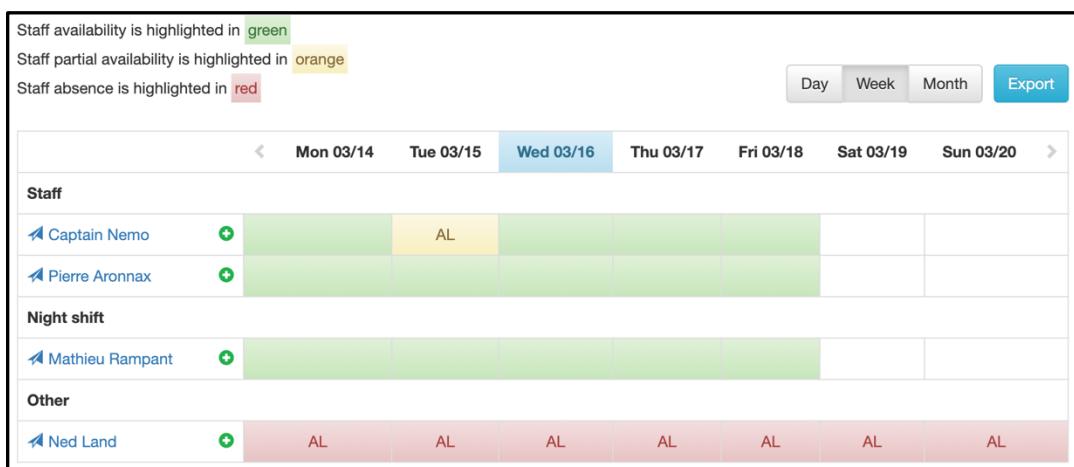

Figure 265 Status dashboard staff status facility managers' view

- In addition to the red, orange, and green colors for staff availability, facility managers see a white block when the staff member doesn't work on a specific day. In the following example, Captain Nemo doesn't work on Saturdays and Sundays (Figure 266).

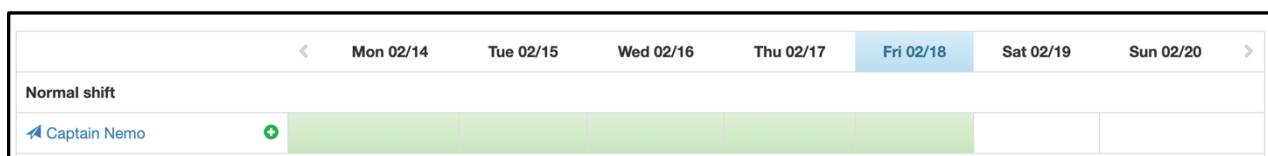

Figure 266 Status dashboard staff non workdays

- Facility managers can see the absence type and the details by hovering over the absence (Figure 267).

Figure 267 Status dashboard staff absence details

8.4.4 Create a new absence (facility managers only)

- Facility manager can add new staff absences by clicking on the green plus button next to a staff member's name. The staff absence popup will show up (Figure 268).

The screenshot shows a modal window titled "New staff absence". It contains the following fields:

- Staff:** A dropdown menu currently set to "Albert Einstein (einstein)".
- Absence type:** A dropdown menu.
- Start:** A date input field.
- End:** A date input field.
- All day:** A checked checkbox with the label "Uncheck this box when the absence is only for part of the day."
- Description:** A text area with placeholder text: "The absence description. This will be visible to anyone."
- Manager note:** A text area with placeholder text: "A note only visible to managers."
- Create staff absence:** A green button at the bottom right.

Figure 268 Status dashboard staff create absence popup

- The staff field is **not** a direct reference to a user, but to a Staff availability defined in [Staff availability](#).
- The description field will be shown to all users.
- The Manager note field will only be shown to facility managers.
- Absence type, start and end dates are **required**.

- After filling out the information, clicking on the “Create staff absence” button will create the absence and refresh the staff status page (Figure 269).

Figure 269 Status dashboard create staff absence button

8.4.5 Edit/Delete an absence (facility mangers only)

- Facility manager can click on the name of an absence in the view (Figure 270).

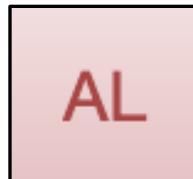

Figure 270 Status dashboard staff absence name

- This will bring up the edit popup (Figure 271).

Modify staff absence	
Staff	Albert Einstein (einstein)
Absence type	AL (Annual Leave)
Start	30-08-2022
End	06-09-2022
All day	<input checked="" type="checkbox"/> Uncheck this box when the absence is only for part of the day.
Description	The absence description. This will be visible to anyone.
Manager note	A note only visible to managers.
Delete Save changes	

Figure 271 Status dashboard edit absence popup

- After changing the details, clicking on the “Save changes” button will update the absence and refresh the staff status page (Figure 272).

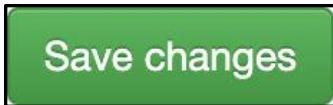

Figure 272 Status dashboard staff save changes button

- Clicking on the “Delete” button will delete the absence and refresh the staff status page (Figure 273).

Figure 273 Status dashboard staff delete changes button

8.4.6 Export staff status (facility managers only)

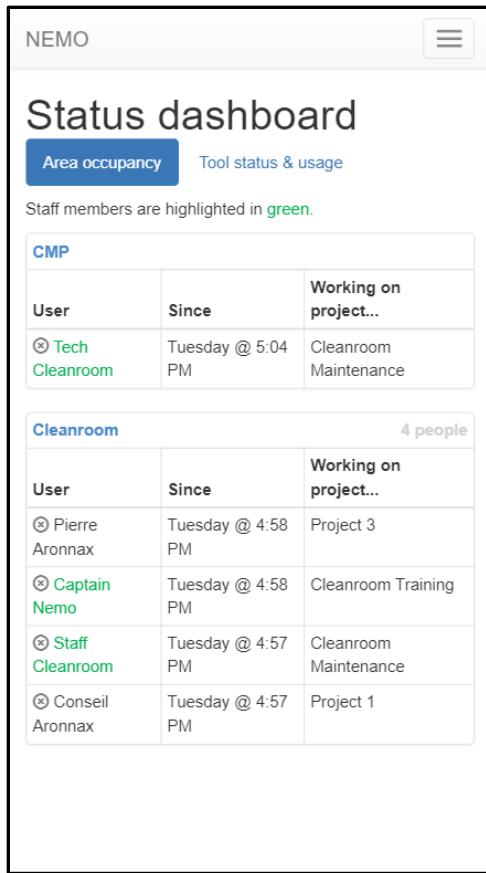

- Facility managers can export the current view of the staff status by clicking on the “Export” button (Figure 274). This will produce a CSV file of the staff status.

Figure 274 Status dashboard staff export button

8.5 *Mobile device status dashboard*

The mobile device view organizes the data to fit the width of the screen without reduction of functionality (Figure 275, Figure 276).

The screenshot shows a mobile application interface titled "Status dashboard". At the top, there are two tabs: "Area occupancy" (which is selected) and "Tool status & usage". A note below the tabs states: "Staff members are highlighted in green." The main content is divided into two sections: "CMP" and "Cleanroom".

8.6 Status dashboard customizations

8.6.1 Status dashboard refresh rate

The status dashboard page automatically refreshes every 10 seconds which updates the current area occupancy and tool usage information. To change the update interval, edit the `status_dashboard.html` and change the `setInterval` constant (in milliseconds) in the `on_load` function.

8.6.2 Other customizations

Other customizations and settings for the status dashboard are discussed in the [Status dashboard settings](#) page.

9 Requests

The Requests page is meant to be a common place for user requests. It includes the buddy board and the access requests. At least one of the 2 features needs to be enabled for the Requests menu item to show up (Figure 277).

The screenshot shows the NEMO application interface with the 'Requests' menu item selected. The top navigation bar includes links for 'NEMO', 'Calendar', 'Tool control', 'Status dashboard', 'Requests', 'Administration', 'Welcome, Captain', and a gear icon. Below the navigation, there are two tabs: 'Access requests' (selected) and 'Buddy requests board'. A message box contains the text: 'Request need to be submitted before 5PM. Contact staff for assistance.' A green 'New request' button is located in the top right corner. At the bottom, a message states: 'You do not have any current active access requests'.

Figure 277 Requests page

9.1 Buddy Board

The buddy board is a simple message system that enables facility users to pair up or form working groups required in many facilities for out of hours access.

To enable the buddy board, you must first enable it on an area. See [Detailed administration - Areas](#) on page 384.

9.1.1 Web address

The buddy board page is accessible at site-address/user_requests/buddy/. For example, www.nemo.com/user_requests/buddy/. The page can also be accessed from the navigation bar menu item “Requests”.

9.1.2 Usage

9.1.2.1 Open the buddy board

Click the Requests then on the Buddy board to access the buddy board. The page shows a new request button in the right upper corner, instructions, and the current list of buddy requests and replies (Figure 278).

The screenshot shows a 'Buddy requests board' interface. At the top, there are two tabs: 'Access requests' and 'Buddy requests board'. The 'Buddy requests board' tab has a red notification badge with the number '2'. Below the tabs, a message states: 'Requests will be automatically removed at the end of the day on their end date. Please submit a access request when everyone agrees on the dates.' A green 'New request' button is located in the top right corner. The main content area displays two posts:

- Saturday, February 5th, 2022**
 - **New** Ned Land needs a buddy in the Cleanroom
I need a buddy this Saturday Reply
- Sunday, February 6th, 2022**
 - **New** Ned Land needs a buddy in the Cleanroom
I am looking for a buddy this Sunday Reply

9.1.2.2 Create a new request

To create a new buddy request:

- Click the New request button (Figure 279).

New request

Figure 279 Buddy board new request button

- The new request page will open (Figure 280).

New buddy request

The screenshot shows a 'New buddy request' dialog box. It includes fields for 'Start date' and 'End date' (both empty), a 'Area' dropdown menu containing 'Cleanroom', a 'Description' text area with placeholder text 'Describe your request', and a green 'Create buddy request' button.

Figure 280 Buddy board new request dialog

- Click in the Start date dialog and click the start date on the calendar pop-up (Figure 281).

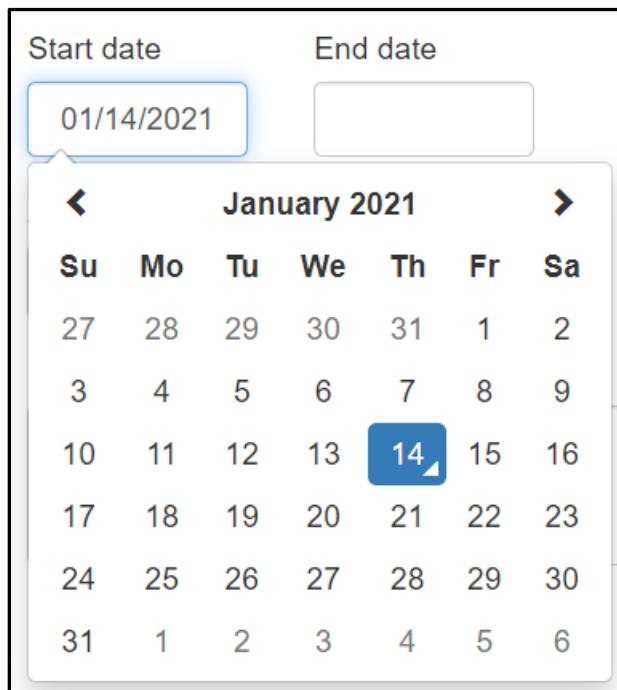

Figure 281 Buddy board start date

- Click in the End date dialog and click the end date on the calendar pop-up (Figure 282).

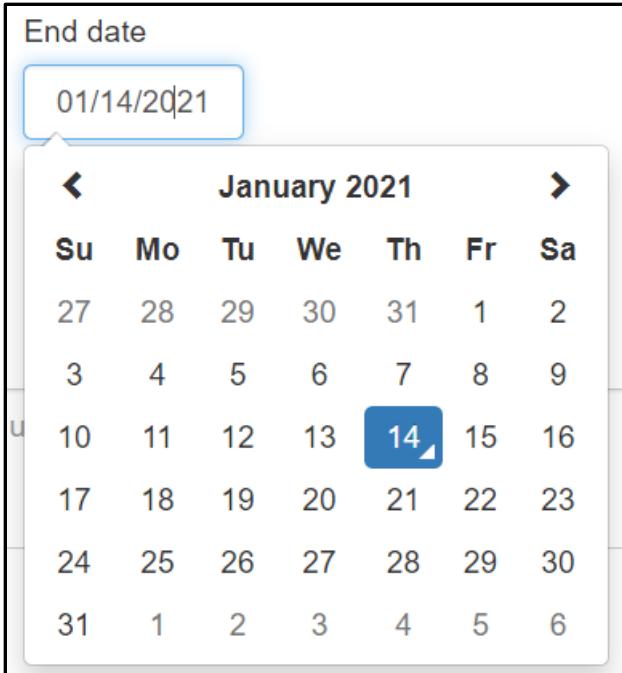

Figure 282 Buddy board end date

- If you have access to multiple areas that use the buddy system, click the area you are looking for a buddy. Otherwise, your area is automatically selected (Figure 283).

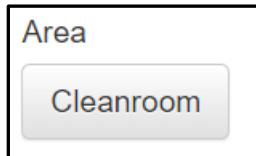

Figure 283 Buddy board area button

- Enter a description that includes details another user would need to determine if they want to join your buddy group (Figure 284).

Description
Describe your request

Figure 284 Buddy board description

- Click create buddy request button (Figure 285).

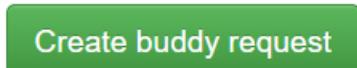

Figure 285 Buddy board create request button

- Your request will be created, and the page will return to the buddy board.
- All users with preferences set to see new buddy requests will see a notification icon next to requests menu on the navigation bar (Figure 286).

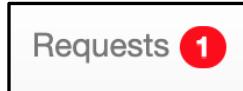

Figure 286 Requests navigation bar notification

9.1.2.3 Edit or delete your request

- Only the owner of a request can edit or delete the request.
- Once there is a reply, the request can't be edited or deleted.
- Click the edit button to edit the request (Figure 287).

Figure 287 buddy board edit request button

- All of the fields entered to create the request can be edited.
- Click save changes when finished (Figure 288).

Figure 288 Buddy board save changes button

- Click the delete button to delete the request (Figure 289).

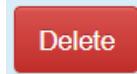

Figure 289 Buddy board delete request button

- The request will be deleted without further input.

9.1.2.4 Reply to a request

- Find a request in the time frame of interest (Figure 290).

Sunday, January 17th, 2021

- Cheng Zhang needs a buddy in the Cleanroom

I am looking for a buddy on Sunday

Reply

Figure 290 Buddy board request

- Click the reply button (Figure 291).

Reply

Figure 291 Buddy board reply button

- Enter a message in the dialog to respond to the initiator (Figure 292).

I can join you from 1 pm to 3 pm. Let me know if that works.

Figure 292 Buddy board reply dialog

- Click send to post your reply (Figure 293).

Send

Figure 293 Buddy board send reply button

- All users with preferences set to see buddy request replies that they replied to will see a notification icon next to the buddy board menu on the navigation bar (Figure 294).

Requests 2

Figure 294 Requests navigation bar notification

- All users with preferences set to receive emails for buddy request replies that they replied to will receive an email notification

9.1.3 Mobile device buddy board page

There are no mobile device views for the buddy board page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

9.1.4 Buddy board page customizations

9.1.4.1 Tab title

A title can be set for the buddy board tab in [Customization - User requests settings](#). See more details on page 310.

9.1.4.2 Description

A disclaimer/information text can be set for the buddy board in [Customization - User requests settings](#). See more details on page 310.

9.2 Access requests

The access requests feature is a system that enables facility users to temporarily request access to an area they don't typically have access to at certain times. Most often this would be used to request after-hours access to a lab/cleanroom.

To enable the access requests, you must first enable it on a physical access level. See [Detailed administration - Physical access level](#) on page 448 and by setting at least one facility manager in [Detailed administration - Users](#) on page 542.

9.2.1 Web address

The access requests page is accessible at site-address/user_requests/access/. For example, www.nemo.com/user_requests/access/. The page can also be accessed from the navigation bar menu item “Requests”.

9.2.2 Usage

9.2.2.1 Open the access requests

Click the Requests then on the Access requests tab to access the access requests (by default when clicking on Requests it will display the access requests tab). The page shows a new request button in the right upper corner, instructions, and the current list of access requests grouped by status. Possible statuses are: Pending, Approved, Denied and Expired (Figure 295).

The screenshot shows a web-based application for managing access requests. At the top, there are two tabs: "Access requests" (selected) and "Buddy requests board". A message box displays a warning: "Request need to be submitted before 5PM. Contact staff for assistance." A green "New request" button is located in the top right corner.

Buddies: Search for other users to add as your buddies

Selected users: Captain Nemo, Pierre Aronnax

Description: [UPDATE] Request is approved for the first day only (2/19). The following day the whole facility is closed.

Approve Deny

Figure 311 Access request approve/deny dialog

- Click approve or deny (Figure 312).

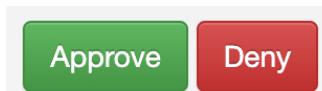

Figure 312 Access request approve/deny buttons

- A confirmation dialog will ask to confirm the choice. Upon confirmation, the user will be redirected to the access requests page.
- All users included in the request and facility managers will receive an email confirmation of the changes and new status of the request.
- Upon approval, a temporary physical access record giving access to the area to all the users included in the request, starting at the start time of the request, and ending at the end time of the request. Temporary physical accesses are discussed in [Detailed administration - Temporary physical access](#).

9.2.2.5 Weekend access

The access requests feature comes with a weekend access optional feature. An email can be sent to a customizable list of emails when users are expected to be (or not be) in the facility during weekends. To enable the feature, the weekend access emails setting needs to be set in [Customization - User requests settings](#) as well as the user office email address and the weekend email access template in [Customization - Weekend access notification email](#). This feature also needs to be set through a timed service job as described in the [NEMO Timed Services](#) section.

There are 2 cases when the email will be sent:

- When an approved request's time is overlapping the current weekend time, an email will be sent to inform the emails set in [Customization - User requests settings](#) as well as

facility managers that there will be users in the facility this coming weekend. For example, if the cutoff date and time is set to Friday 5pm and a request is approved before that (or anytime if the cutoff date and time are not set), then the email will be sent with a `weekend_access` variable set to “true”.

2. When no requests overlapping the current weekend time are approved before the cutoff day and time set in [Customization - User requests settings](#), an email will be sent at the cutoff date and time to inform the emails set in [Customization - User requests settings](#) as well as the facility managers that no users will be in the facility this coming weekend. For example, if the cutoff date and time is set to Friday 5pm and by that day and time there are no approved requests with time overlapping the current weekend, then the email will be sent with a `weekend_access` variable set to “false”.
If the cutoff day and time are not sent, the email will not be sent.

9.2.3 Mobile device access requests page

There are no mobile device views for the access requests page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

9.2.4 Access requests page customizations

9.2.4.1 Tab title

A title can be set for the access requests tab in [Customization - User requests settings](#). See more details on page 360.

9.2.4.2 Description

A disclaimer/information text can be set for the access requests in [Customization - User requests settings](#). See more details on page 360.

9.2.4.3 Access requests minimum number of users in a request

A minimum number of users in a request can be set in [Customization - User requests settings](#). See more details on page 360.

9.2.4.4 Access requests maximum number of requests to display

To limit the number of requests displayed in the access requests page, the maximum number of requests can be set in [Customization - User requests settings](#). See more details on page 360.

9.2.4.5 Weekend access emails

A list of emails can be set to send the weekend access email to, in [Customization - User requests settings](#). See more details on page 360. If this is not set, no weekend access emails will be sent.

9.2.4.6 Weekend access cutoff day and time

A day and time can be set in [Customization - User requests settings](#) after which the weekend access email will be sent if there are no approved requests by that time. If the date and time is not set, the email informing that no users will be in the facility will not be sent.

10 Jumbotron

The jumbotron is similar to the status dashboard but provides an integrated page to display user occupancy, tools in use, and any alerts or outages (Figure 313).

Area occupancy

Staff members are highlighted in green.
Service personnel are highlighted in orange.
Users with expired reservations are highlighted in red.

Cleanroom
⚠ 2 / 5 people (+ 2 staff and 1 service personnel)

User	Since	Working on project...
Tech Cleanroom	Monday @ 1:35 PM	Cleanroom Maint

Sputter tool annual PM next week
The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users.

Resource outage: O2
Gas bottle change

Figure 313 Jumbotron display

10.1 Web address

The jumbotron page is accessible at site-address/jumbotron/. For example, www.nemo.com/jumbotron/. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

10.2 Usage

The intent of this page is to run continuously on a monitor.

- Area occupancy information will only be displayed if areas have been defined.
 - This section shows all users that are currently logged into all areas. Staff members are highlighted in green and service personnel are highlighted in orange, so they stand out. Each area will list the number of people in the area if it is greater than 1. Staff and service personnel are listed separately if the area is configured not to include them in the occupancy count.
 - When area reservations are in use, users with expired reservations are highlighted in red.
- Tool usage information will only be displayed if tools have been defined.
- Alerts and outages are only displayed if any are present (Figure 314).
- An optional watermark can be used on the page to highlight the lab.

If there is no area occupancy or tool usage, then not-in-use messages are displayed (Figure 315).

Nobody is in an access controlled
NanoFab area

No NanoFab tools are in use

v 3.4.0 - Developed by CNST, NIST

Figure 315 Jumbotron not in use messages

The page automatically refreshes periodically to keep the information current. If NEMO has gone offline and does not respond to a refresh request, the page will display “NEMO is offline” (Figure 316).

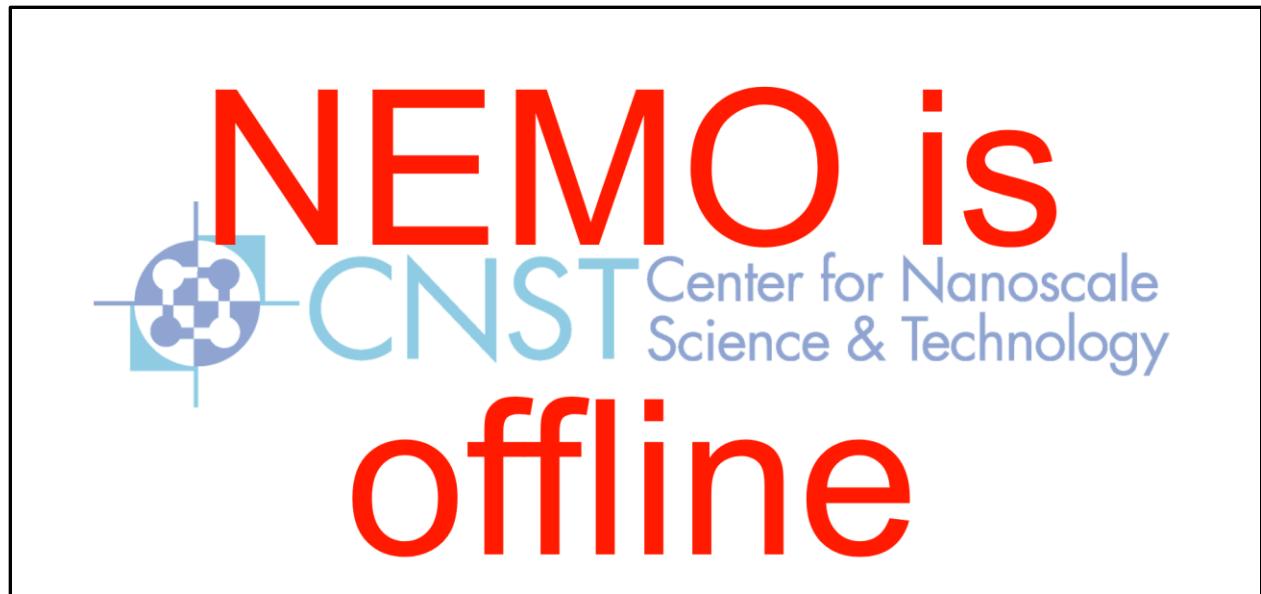

Figure 316 Jumbotron NEMO offline

10.3 Mobile device jumbotron

There are no mobile device views for the jumbotron page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

10.4 Jumbotron customizations

10.4.1 Background watermark

The jumbotron can display a background watermark image. The jumbotron watermark is configured through the [Customizations → Jumbotron watermark](#) page detailed on page 322.

10.4.2 Jumbotron refresh rate

The jumbotron page automatically refreshes every 10 seconds which updates the current area occupancy, tool usage information, alerts, and outages. To change the update interval, edit the jumbotrol.html and change the setInterval constant (in milliseconds) in the on_load function.

11 Safety items

The Safety items page provides safety information for users (Figure 317). Safety items and safety categories can be added in [Detailed administration → Safety items](#) and [Detailed administration → Safety categories](#), respectively.

The screenshot shows a web-based application titled 'Safety'. At the top right are three buttons: 'Safety' (highlighted in blue), 'Safety issues', and 'Safety data sheets'. A search bar is at the top left. On the left, there's a sidebar with 'Chemical handling' (selected and highlighted in blue) and 'Cleanroom safety'. The main content area has a box containing two sections: 'How to handle chemicals:' (with links to PDF and MP4 examples) and 'Dispose of chemicals:' (with a link to an OGV video example).

Figure 317 Safety items page

11.1 Usage

Click on categories on the left-hand side to see Safety items related to that category (Figure 318).

Figure 318 Safety items categories menu

When looking at safety items, click on the document links to open a popup (Figure 319).

Figure 319 Safety items open link

PDF and Video formats (.mp4, .ogv, .webm, .3gp) will be played directly in the popup (Figure 320, Figure 321).

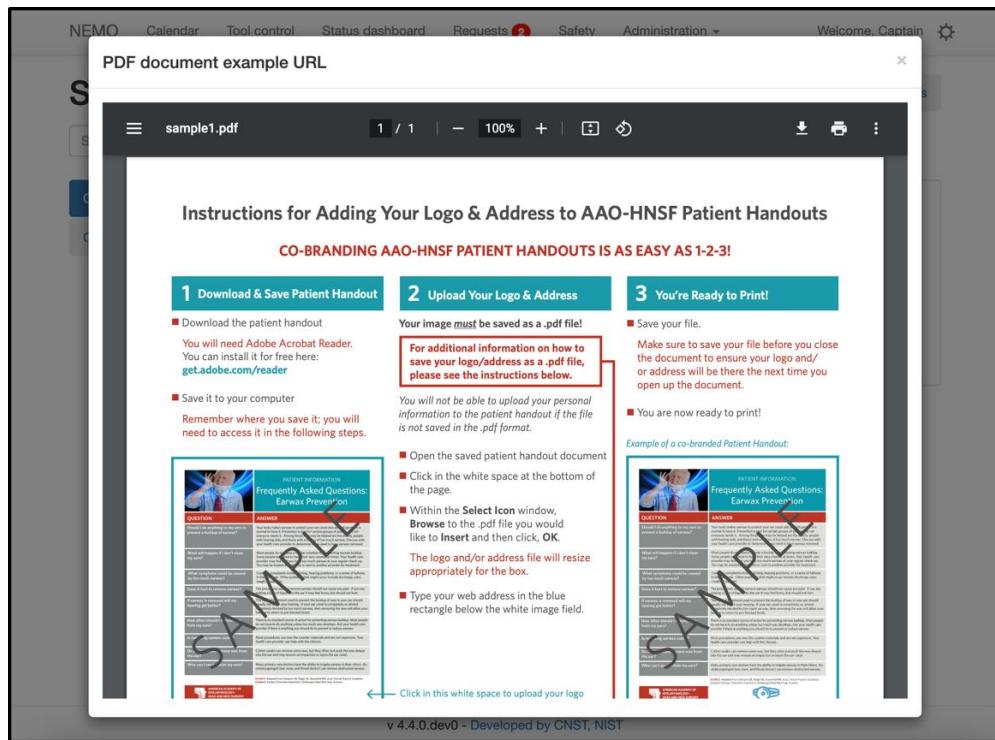

Figure 320 Safety items PDF popup

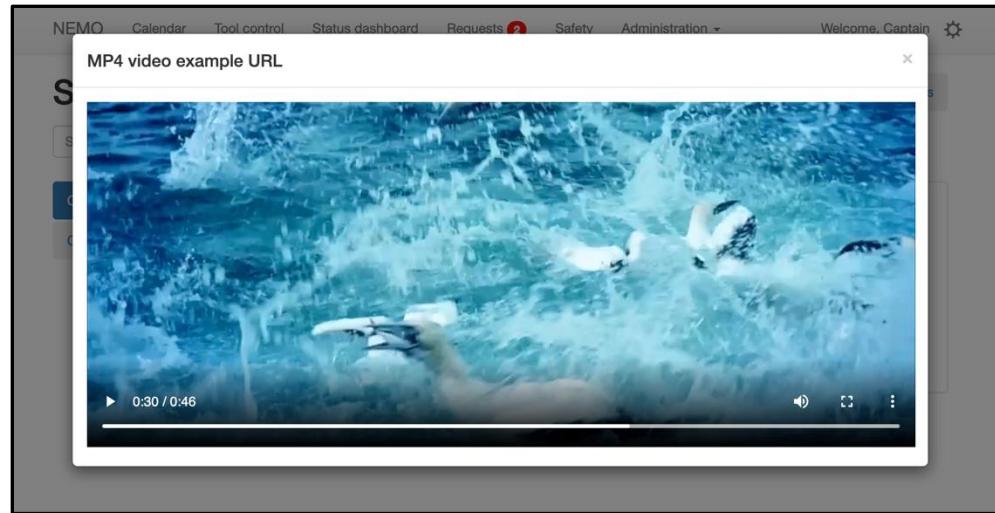

Figure 321 Safety items Video popup

Other links will initiate a download if the target is a file or redirect the user if the link is a URL (Figure 322).

○ Entering a cleanroom

Figure 322 Safety items redirect link

11.2 Web address

The safety items page is accessible at site-address/safety/. For example, www.nemo.com/safety/. The page is accessible from the navigation bar by clicking the Safety menu item.

11.3 Mobile device safety items page

There are no mobile device views for the safety issues page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

11.4 Safety items customizations

By going to [Customization → Safety](#), you can customize:

- Whether the Safety menu is displayed
- Whether the Safety items is displayed as a tab
- Which Safety category view is used (all in one page, or separate on a side menu)

12 Safety issues

The safety issues page provides users a method to report and view non-emergency issues in the lab and gives staff a method to document progress and resolutions (Figure 323). If a user reports a problem with a tool and checks that the problem is also a safety hazard, as described in the [Tool control → Report a problem](#) section on page 115, a new safety issue will automatically be created here. Users and staff can see current issues and look at closed issues.

This screenshot shows the 'Existing safety issues' page. At the top, there are three buttons: 'Safety' (grey), 'Safety issues' (blue, selected), and 'Safety data sheets' (light blue). Below the buttons, a message says 'This page lists ongoing safety issues.' and 'Use the buttons on the right side to report a safety concern or view past safety issues.' Two buttons are shown: 'Report safety concern' (red) and 'Past safety issues' (blue). A detailed concern is listed: 'Concern' (blue header), 'There is a pinch point on the glove box.' (text), 'Location: Gowning room' (text), and 'Reported anonymously on Tuesday, January 24th, 2023 @ 2:40 PM' (text).

Figure 323 Safety issues page

12.1 Safety message

NEMO has a default safety message displayed at the top of the safety issues page. It can be customized to specific lab requirements (Figure 324). A customized html safety message can be loaded into NEMO through the [Customizations → Safety introduction message](#) detailed on page 318.

Call 911 if there is an immediate emergency.

We invite your suggestions and observations in order to provide a safer and more effective environment for all users and staff. Use this form to report non-emergency related safety issues, unsafe working conditions, housekeeping suggestions, or observations. You can send your comments or concerns completely anonymously or provide your name so that we can follow up with you.

Figure 324 Safety issues page default safety message

12.2 View resolved safety issues

Safety issues that have been closed can be accessed by clicking the view past safety issues button (Figure 325).

Past safety issues

Figure 325 Safety issues past issues link

Clicking the link will open the resolved safety issues page (Figure 326).

Resolved safety issues

Safety

Safety issues

Safety data sheets

This page lists previously reported and resolved safety issues.

Concern

Several users are not wearing safety glasses.

Location: Cleanroom lithography

Reported anonymously on Tuesday, January 24th, 2023 @ 2:52 PM

Resolved on Tuesday, January 24th, 2023 @ 2:53 PM by Captain Nemo (captain)

Resolution

Posted sign in lab

Figure 326 Safety issues resolved issues page

All resolved issues will be listed with the most recent resolution listed first. If there are not any resolved safety issues to list, the user will be notified with “There are no past issues.”

Clicking the current safety issues button will return to the main safety page (Figure 327).

 Current safety issues

Figure 327 Safety issues return to main page

12.3 Report a new safety issue

New safety issues can be created by any user or staff member. To report a new safety issue, provide a location and a description of your concern (Figure 328).

Report a new safety issue

Where is the problem?

Why are you concerned?

Report this issue anonymously. Your name will not be visible to NanoFab staff. There will be no way for us to follow up with you about how the safety issue was resolved.

Report a new safety concern

Figure 328 Safety issues report new issue

Users can select to report issues anonymously if desired and their name will not be recorded with the report (Figure 329). However, the staff will not be able to follow up directly with the user about the problem or how it was resolved.

Report this issue anonymously. Your name will not be visible to NanoFab staff. There will be no way for us to follow up with you about how the safety issue was resolved.

Figure 329 Safety issues report new issue anonymously

Once all information is correct, click the report button (Figure 330).

Report a new safety concern

Figure 330 Safety issues issue report button

Upon clicking the report button NEMO will:

- Create a new safety issue in the safety issues table of the database as discussed in [Detailed administration → Safety Issues](#) on page 470.
- Send an email to the safety email address using the safety email template. If either are missing, no email will be sent. Safety email address and email template are detailed in the [Customization](#) section starting on page 307.
- Upon success, a confirmation message will appear to verify that the safety issue was received and recorded (Figure 331).

Your safety concern was sent to the staff and will be addressed promptly

If this is the final update and the issue will be closed, check the issue resolved checkbox (Figure 339).

Figure 339 Safety issues update issue resolved checkbox

All issues are visible to users by default, if an issue needs to be hidden from users, uncheck the visible to users' checkbox (Figure 340).

Figure 340 Safety issues update issue visible checkbox

Enter a detailed narrative or the progress to date or the final resolution (Figure 341).

Provide an update on how this safety issue is being handled or resolved.

Figure 341 Safety issues update narrative dialog box

To save, click the save update button (Figure 342). After clicking save, the main safety issues page is opened.

 Save update

Figure 342 Safety issues update save button

12.6 Notifications (staff only)

When safety alerts are created, the notification status is set for staff members. It automatically expires after one month. If a user accesses a page with a notification within that time, there will be a notification indicating new content since their last visit. The safety notifications are reset upon visiting the safety page. Notifications are detailed in [Detailed administration → Notifications](#) on page 446.

If the safety issues page has a link on the landing page, a red number that represents the number of new safety issues reported since the user last visited the safety page will appear to the right of the link name (Figure 343). Setup details can be found under [Detailed administration → Landing page choices](#) on page 423.

Figure 343 Landing page safety issues notification

The next time the safety issues page is visited, any new issues that have been created since the user last visited the safety issues page will have a special “new” icon to highlight the concern (Figure 344).

Figure 344 Safety issues page new issues

12.7 Web address

The safety issues page is accessible at site-address/safety/issues. For example, www.nemo.com/safety/issues. The page is accessible from the navigation bar under Safety.

12.8 Mobile device safety page

There are no mobile device views for the safety issues page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

12.9 Safety page customizations

Whether the Safety issues is displayed as a tab in the Safety page can be customized in [Customization → Safety](#).

Safety email address and email template are detailed in the [Customization](#) section starting on page 307.

A customized html safety message can be loaded into NEMO through the [Customizations → Safety introduction message](#) detailed on page 318.

13 Safety data sheets

The safety data sheet page allows users to check the required safety documentation for chemical and to quickly check which hazard apply to chemicals (Figure 345).

Chemical hazards are managed in the [Detailed administration → Chemical hazards](#) section described on page 396.

Chemicals are managed in the [Detailed administration → Chemicals](#) section described on page 398.

Safety data sheets								
Name	Flammable	Oxidizing	Compressed gas	Corrosive	Toxic	Harmful	Health hazard	Environment hazard
Acetylene			✓		✓			
Boron trifluoride			✓	✓				
Carbon tetrafluoride			✓					
Formaldehyde						✓		
Glycolic acid				✓			✓	

Figure 345 Safety data sheets

13.1 Search for a chemical

Use the search input field to type the name of a chemical. Only matching chemicals will appear in the table (Figure 346).

Safety data sheets								
Name	Flammable	Oxidizing	Compressed gas	Corrosive	Toxic	Harmful	Health hazard	Environment hazard
Boron trifluoride			✓	✓				
Carbon tetrafluoride			✓					

Figure 346 Safety data sheets search

Keywords can be shown and included in the search by checking the checkbox (Figure 347, Figure 348).

check this box to show and search through keywords

Figure 347 Safety data sheets keywords checkbox

Safety data sheets								
Name	Flammable	Oxidizing	Compressed gas	Corrosive	Toxic	Harmful	Health hazard	Environment hazard
Carbon tetrafluoride			✓					Tetrafluoromethane, Perfluoromethane, Freon 14, Halon 14, Arcton 0, CFC 14, PFC 14, R 14
Glycolic acid				✓			✓	Hydroxyacetic acid, 2-Hydroxyethanoic acid

Figure 348 Safety data sheets keywords search

13.2 Document/URL

The specific chemical document/link can be view when available by click on the chemical name. A new tab will open in your web browser with the link or download the document (Figure 349).

[Acetylene](#)

Figure 349 Safety data sheets chemical document link

13.3 Export Safety data sheets

Safety data sheets can be exported into a CSV file for further processing, filtering, and sorting. Click the export button to download the file (Figure 350).

 Export

Figure 350 Safety data sheets export

13.4 Web address

The safety data sheets page is accessible at site-address/safety_data_sheets/. For example, www.nemo.com/safety_data_sheets/. The page is accessible from the navigation bar under Safety.

13.5 Mobile device news and events page

There are no mobile device views for the safety data sheets page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

13.6 Safety data sheets customizations

Whether the Safety data sheet is displayed as a tab in the Safety page and whether the search through keywords is enabled by default can be customized in [Customization → Safety](#).

14 Send feedback

The send feedback provides users a dialog to send general comments and suggestions to staff that are not safety related (Figure 351).

The screenshot shows a web page titled "Submit feedback about the NanoFab". The page has a large text area for input, followed by a green "Send feedback" button.

Figure 351 Send feedback page

If either the email address or email template have not been configured, a warning message the feature has not been customized will be displayed instead of the feedback page (Figure 352). Configuration is detailed in the [Customization](#) section starting on page 307.

The Feedback page has not been customized yet

Feedback is emailed to an address specified by the NEMO site administrator. Use the [customizations page](#) to enter an email address, then all users will be able to send feedback.

Figure 352 Send feedback not configured

14.1 Web address

The send feedback page is accessible at site-address/feedback/. For example, www.nemo.com/feedback/. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

14.2 Usage

To send user feedback:

- Provide a detailed narrative in the dialog box (Figure 353).

We're continually working to improve the NanoFab experience for everyone.
Do you have an idea to make the NanoFab better? Send us your feedback!

Figure 353 Feedback dialog box

- Click the send feedback button (Figure 354).

Send feedback

Figure 354 Feedback send button

- The dialog is checked for size. If the dialog is empty, the user is prompted to add information (Figure 355).

Figure 355 Feedback empty dialog prompt

- If the dialog is too long, it is truncated without warning.
- Feedback is sent to the configured feedback email address using the configured email template.

14.3 Mobile device send feedback page

There are no mobile device views for the send feedback page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

14.4 Send feedback page customizations

14.4.1 Feedback email address and email template

Safety email address and email template are detailed in the [Customization](#) section starting on page 307.

14.4.2 Feedback message length

The maximum length of the feedback message is 5000 characters and can be changed in the constants.py file.

15 Contact staff

The contact staff page can be used to provide information to help users get in touch with staff members (Figure 356). Contact information can be grouped into categories and displayed in any order. Contacts are managed in the [Detailed administration → Contact information](#) section described on page 420.

15.1 Fields

Each contact can have the following information. Any optional fields that are left blank will not be displayed.

- Picture (optional) – pictures are automatically resized to 266 pixels high by 200 pixels wide and can be any common picture format such as png, tiff, jpg, etc.
- Name (required) – contact first and last name
- Email (optional) – any valid email address. The email address is displayed as a link to send email.
- Office phone (optional) – any valid phone number. The phone number is displayed as a link to make a call on a mobile device.
- Mobile phone (optional) – any valid phone number. The phone number is displayed as a link to make a call on a mobile device. In addition, a link to send a text message from a mobile device can be enabled.
- Office location (required) – description to find the contact, limited to 200 characters.

16 View usage

The view usage page allows a user to review all records for a selectable period (Figure 357). When the page is first opened, it displays any records for the current month.

Usage and billing information between August 1st, 2020 and August 31st, 2020

This page presents a monthly report of your NanoFab usage and billing information. Approved adjustments are reflected in the billing information data but not in the usage data.

Select month

or from to

Adjustment activities **are not included** in the usage information.

There was no usage between August 1st, 2020 and August 31st, 2020.

Figure 357 View usage and billing

16.1 Select date range

The date range may be selected from either the select month dropdown (Figure 358) or entered in the from and to dialogs. Clicking the from or to dialog will open a calendar view to select the dates (Figure 359).

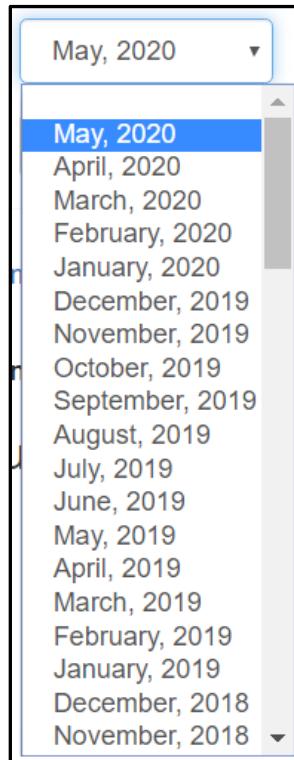

Figure 358 Usage month dropdown

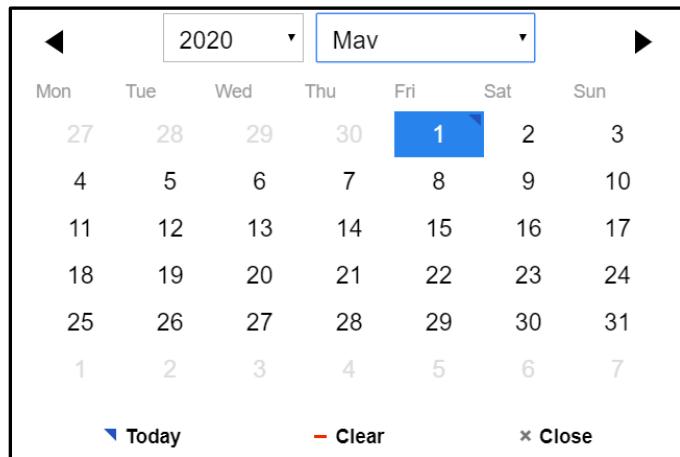

Figure 359 Usage date selection

Click update to search for records in the selected date range (Figure 360).

Figure 360 Usage date update

16.2 Usage select project (for Principal Investigators only)

Principal Investigators can select a project they managed in the dropdown (Figure 361). Upon clicking update, all the activities for that project will be displayed, regardless of the user being billed. This allows PIs to check their project's users activities for example.

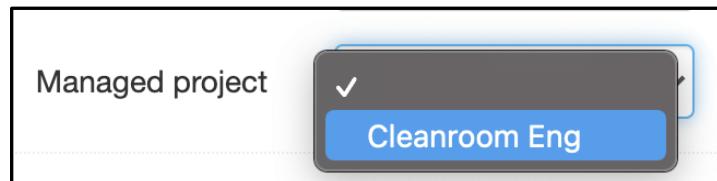

Figure 361 View usage select project

16.3 Usage

The usage tab will display usage data for the selected period (Figure 362). Clicking 'Usage' will highlight and activate the tab.

Figure 362 View usage, usage tab

If no usage records exist for a given period, it is indicated. If usage records exist, they are categorized in the following order:

- Missed reservations – the tool, date, time, and project information are provided (Figure 363).

The screenshot shows a section titled "Missed reservations". It contains one item: "Evaporator" listed under "Wednesday, April 22nd, 2020 @ 11:30 AM" and "Charged to project Project 2".

Figure 363 View usage missed reservations

- Supplies and consumables – the supply, quantity, seller, date, time, and project are provided (Figure 364). If the supply is related to a tool usage charge, the user will also be the seller.

The screenshot shows a section titled "Supplies and consumables". It contains two items:

- "Sputter gold": Quantity 8, Purchased from Ned Land (ned) on Monday, May 4th, 2020 @ 12:33 PM, Charged to project Project 1
- "Tweezers": Quantity 1, Purchased from Captain Nemo (captain) on Monday, May 4th, 2020 @ 12:29 PM, Charged to project Project 1

Figure 364 View usage supplies and consumables

- Staff charges – any work performed by a staff member for a user will be listed. The staff member, start date and time, end date and time, and project are listed (Figure 365).

The screenshot shows a section titled "Staff charges". It contains one item: "Work performed by Captain Nemo (captain)" listed under "Tuesday, April 28th, 2020 @ 3:00 PM" and "Tuesday, April 28th, 2020 @ 3:26 PM", "Charged to project Project 2".

Figure 365 View usage staff charges

- Training sessions – the type of training, duration, staff member trainer, tool, project, date, and time are listed (Figure 366).

Training sessions

Individual training for 60 minutes taught by **Captain Nemo (captain)** for the **Ellipsometer**. Charged to project Project 2 on Wednesday, April 22nd, 2020 @ 2:40 PM.

Figure 366 View usage training sessions

- Area access – the area accessed, start date and time, end date and time, and project are listed. If the area was accessed by a staff member on behalf of the user, it is highlighted in yellow, and the staff members name is also listed (Figure 367).

- Export: usage data can be exported in CSV format by clicking on the “Export” button (Figure 369).

Figure 369 Usage data export

16.4 Billing Information

The billing information tab will display charge data for the selected period (Figure 370). Clicking ‘Billing information’ will highlight and activate the tab.

Figure 370 View usage, billing information tab

The billing information tab can be used to display actual charges for a user through a customized interface to your institutions billing and project data. An example is shown in the views/usage.py file under the `billing_dict` function. It is beyond the scope of this manual to describe how to customize this feature for your institution. If the feature has not been configured a message will appear (Figure 371).

Figure 371 View usage billing information error

16.5 Web address

The view usage page is accessible at `site-address/usage/` and the view billing at `site-address/billing/`. For example, `www.nemo.com/usage/` or `www.nemo.com/billing/`. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

16.6 Mobile device view usage page

There are no mobile device views for the view usage page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

16.7 View usage page customizations

16.7.1 Billing information

Billing information data access must be customized for each institution. An example is shown in the views/usage.py file under the billing_dict function. It is beyond the scope of this manual to describe how to customize this feature for your institution.

17 News and events

The news and events page provides a convenient way for the lab staff to communicate with users about non-emergency topics. For example, new equipment on order, tool installation progress, future plans, etc. Each time NEMO is updated, news articles are automatically generated and describe the new features, improvements, and bug fixes implemented in the new release.

17.1 Recent news

The news and events page shows recent news articles by default (Figure 372).

The screenshot shows a 'Recent news' section with a green 'Publish new news' button in the top right. Below it is a message: 'Click a news story title to publish an update or archive it.' A note says 'Stories that were updated recently appear first.' and a link 'You can also view archived news.' An article titled 'New update New ICP etch system coming soon' is displayed, with a timestamp 'Originally published on Monday, May 4th, 2020 @ 2:02 PM by Captain Nemo (captain)'. The article content is 'A new ICP fluorine etch system has been ordered and will be sited next to the existing system. We expect delivery in six months and plan another two months for installation and startup.' A link '... show full story ...' follows. Another timestamp 'Updated on Monday, May 4th, 2020 @ 2:05 PM by Captain Nemo (captain)' is shown, with the note 'The new tool has arrived and will be brought into the cleanroom next week.'

Figure 372 News and events recent news

Staff can create new news articles by clicking the Publish new news button (Figure 373). The button will not be visible to non-staff users.

Publish new news

[Archive this news story](#)

Figure 390 News and events update page archive button

To publish an update:

- Enter the update in the dialog box (Figure 391)

Figure 391 News and events update dialog box

- Check/uncheck the box if you'd like to change the pinned status of the story (Figure 392).

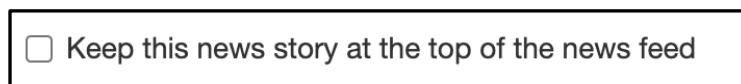

Figure 392 News and events update pinned checkbox

- Click the publish button (Figure 393)

Figure 393 News and events update publish button

- The news story is automatically updated in the database with author and time and date stamp added as discussed in [Detailed administration → News](#) on page 441.
- Notifications for all active users are set which are detailed in [Detailed administration → Notifications](#) on page 446.

17.5 Notifications

When news and events are created or updated, the notification status is set for all users. It automatically expires after one month. If a user accesses a page with a notification within that time, there will be a notification indicating new content since their last visit. The notifications are reset upon visiting the news and events page. Notifications are detailed in [Detailed administration → Notifications](#) on page 446.

If the news and events page has a link on the landing page, a red number that represents the number of articles created or updated since the user last visited the news and events page will appear to the right of the link name (Figure 394). Setup details can be found under [Detailed administration → Landing page choices](#) on page 423.

Figure 394 Landing page news notification

The next time the news and events page is visited, any new or updated articles will have a special “new update” icon to highlight the update (Figure 395).

Figure 395 News update icon

17.6 Web address

The news and events page is accessible at site-address/news/. For example, www.nemo.com/news/. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

17.7 Mobile device news and events page

There are no mobile device views for the news and events page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

17.8 News and events customizations

A news story is published when a new NEMO release is installed with links to the release notes and the feature manual. This feature can be disabled by setting `NEW_VERSION_NEWS = False` in `settings.py`.

18 Sensor data

The sensor data page provides a dashboard to navigate through sensors and sensor categories, display or export sensor data and alert logs.

18.1 Setup

To enable this feature, you need to have ‘NEMO.apps.sensors’ in INSTALLED_APPS in your settings.py.

In addition, a timed service app must be properly configured and running which is described in [NEMO timed services](#) on page 603.

Setting up sensor categories is discussed in [Detailed administration -> Sensor categories](#).

Setting up sensors is discussed in [Detailed administration -> Sensors](#).

Setting up email alerts is discussed in [Detailed administration -> Sensor alert emails](#).

18.2 Usage

- Select a category or sensor from the dashboard (Figure 396) until reaching the desired sensor data.

Figure 396 Sensor data dashboard

- The sensors square will display the latest value and time read (Figure 397).

Figure 397 Sensor data dashboard sensors

- The date range can be changed by clicking on the calendar icon next to either the start or the end date (Figure 398). You can select a preset range or a custom date range.

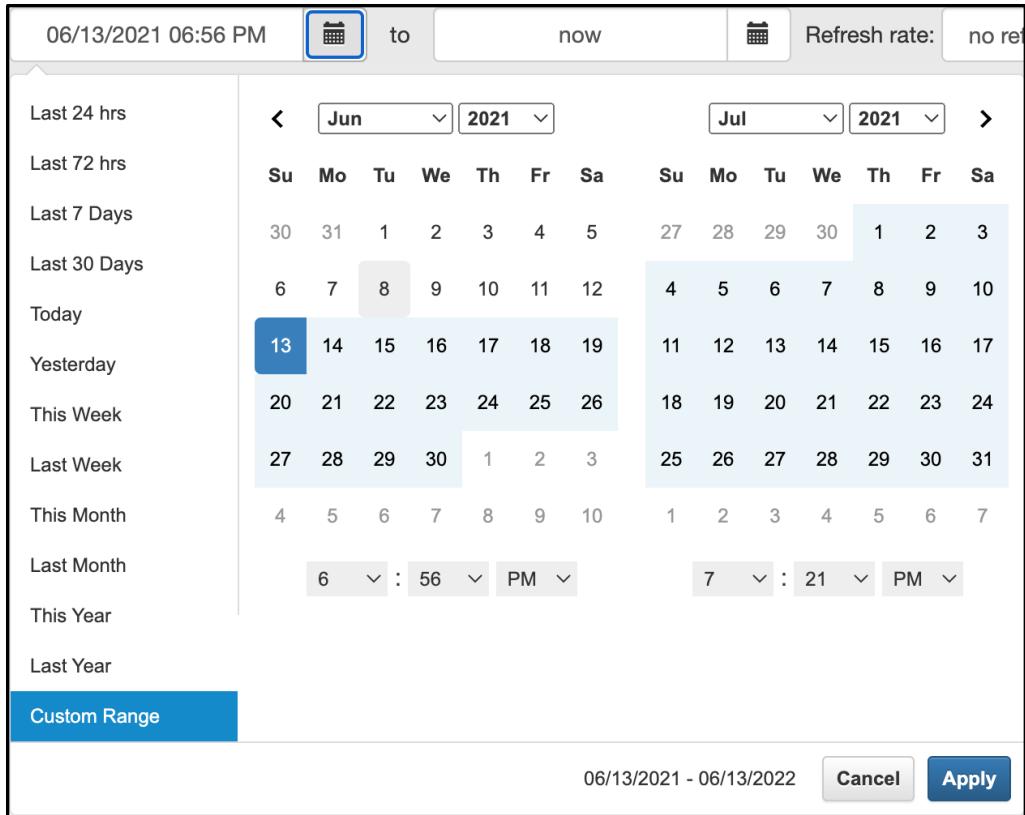

Figure 398 Sensor data date range

- To change the refresh rate, click on the drop down (Figure 399).

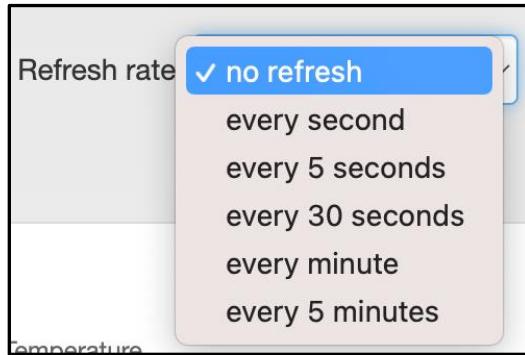

Figure 399 Sensor data refresh rate dropdown

18.2.1 Graph data

- A graph will show the data based on the default date range (Figure 400). See [Sensor page customizations](#) to change the default range.

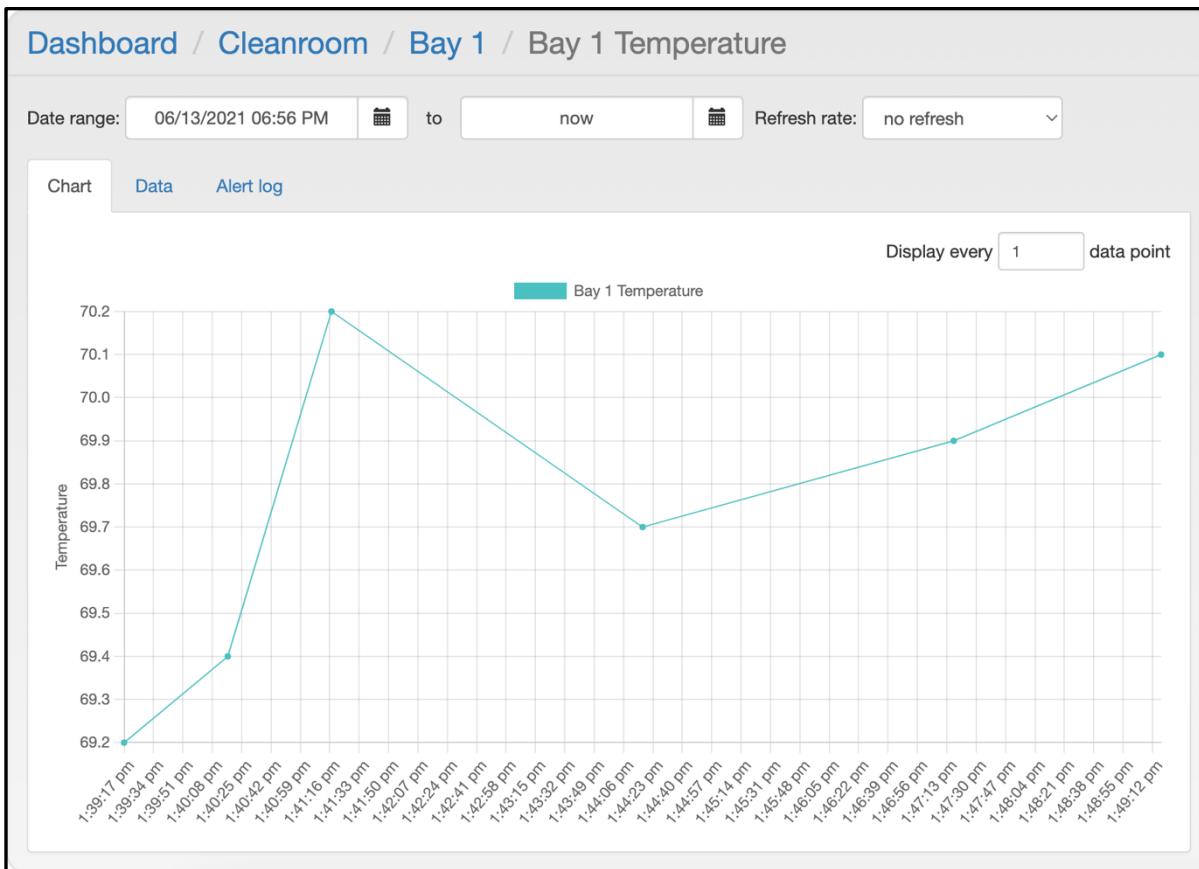

Figure 400 Sensor data graph

- Hovering over a single data point will display its detailed information (Figure 401).

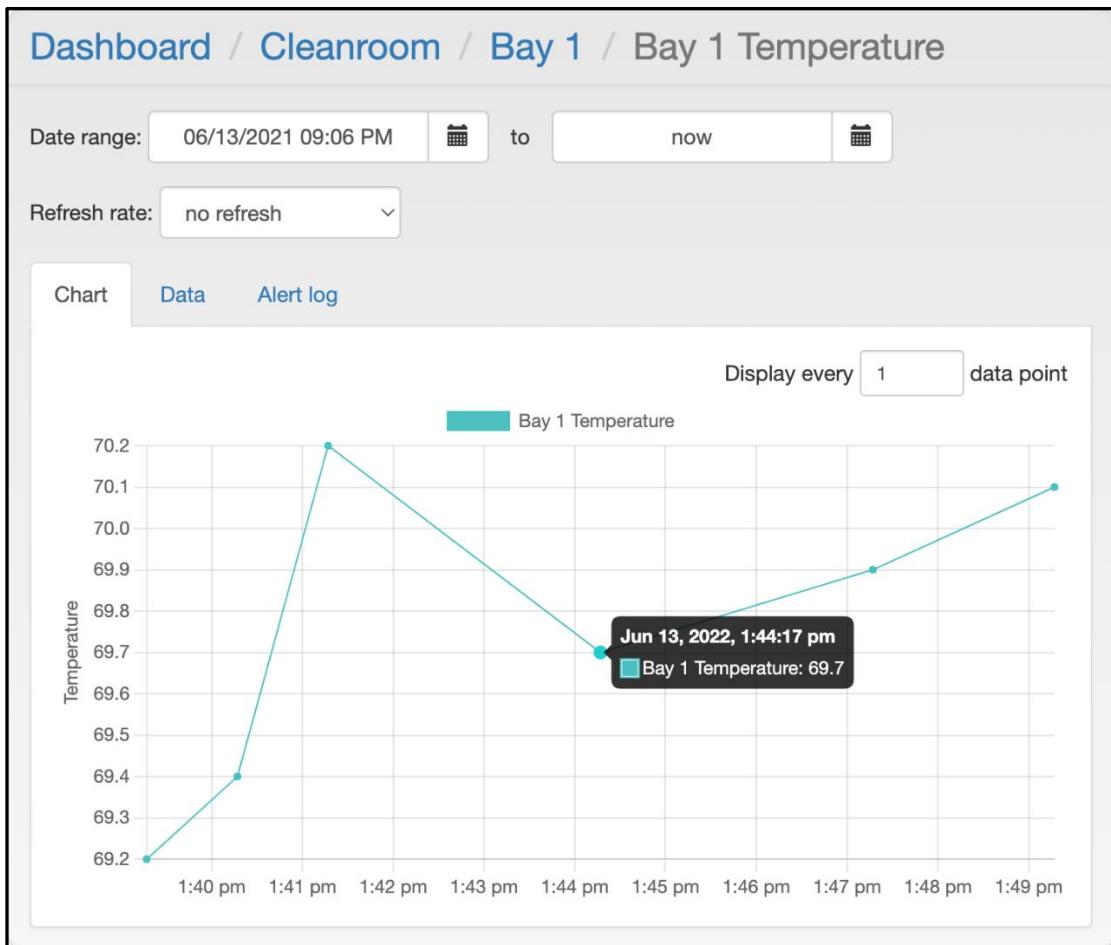

Figure 401 Sensor data graph data point details

- Less data points can be displayed by changing the input for every x data point (Figure 402).

Figure 402 Sensor data graph change data points

18.2.2 Data

- The data tab will show the time and raw values (Figure 403).

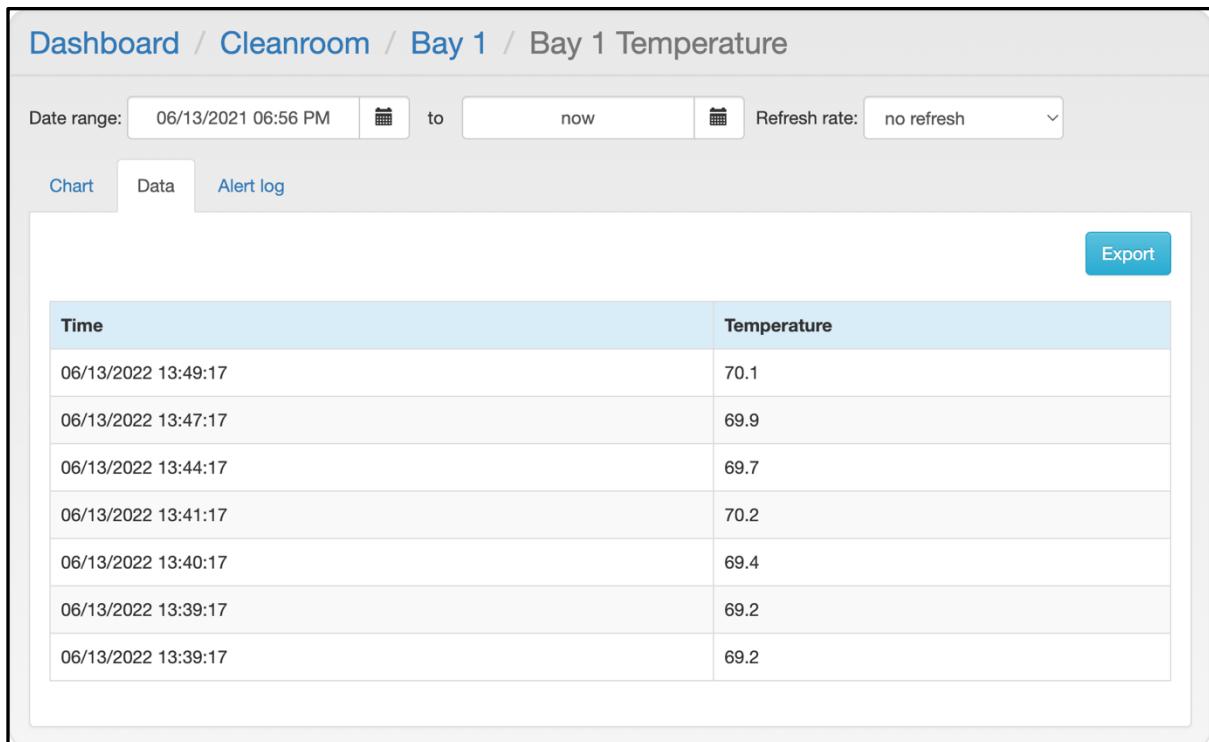

Figure 403 Sensor data tab

- You can click on the export button to get a CSV file (Figure 404).

Figure 404 Sensor data export

18.2.3 Alerts

- When an alert is triggered, the sensor and all its parent categories will be displayed in red color (Figure 405, Figure 406, Figure 407).

Figure 405 Sensor data alert dashboard

Figure 406 Sensor data alert dashboard category

Figure 407 Sensor data alert dashboard sensor

- On a sensor page, the alert log tab will show when alerts were triggered and/or reset (Figure 408).

Figure 408 Sensor data alert log

18.3 Web address

The sensor data page is accessible at site-address/sensors/. For example, www.nemo.com/sensors/. The page is accessible from the navigation bar by clicking Administration then clicking Sensor data.

18.4 Mobile device sensor data page

There are no mobile device views for the sensor data page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling. To visualize and interact with the graph data, it is recommended to use a tablet or desktop computer.

18.5 Sensor page customizations

Some sensor parameters can be customized in [Sensor settings](#).

19 User Preferences

The user preferences page provides a dialog to enable user specific reservation notifications with meeting invites, buddy system preferences and staff status view preferences (Figure 409).

The figure shows a 'User Preferences' dialog box. It has three main sections: 'Reservations', 'Buddy System', and 'Staff status'. The 'Reservations' section contains two checkboxes: 'Check this box to receive ICS calendar invitation when creating reservation' and 'Check this box to receive ICS calendar invitation when cancelling a reservation'. The 'Buddy System' section contains three checked checkboxes: 'Check this box to see notification badges for new buddy requests', 'Check this box to see notification badges when users reply to buddy requests you replied to', and 'Check this box to receive an email notification when users reply to buddy requests you replied to'. The 'Staff status' section includes a 'Default view' dropdown with options 'Day' (selected), 'Week', and 'Month'. At the bottom is a blue 'Update' button.

Figure 409 User preferences page

19.1 Usage

To update reservation user preferences:

- Check the top box to receive a calendar invite when creating a reservation (Figure 410)

Check this box to receive ICS calendar invitation when creating reservation

Figure 410 User preferences creation email checkbox

- Check the bottom box to receive a calendar cancelation when cancelling a reservation (Figure 411)

Check this box to receive ICS calendar invitation when cancelling a reservation

Figure 411 User preferences cancellation email checkbox

To update buddy board user preferences:

- Check the top box to see notifications for new buddy requests (Figure 412). They will appear as a number next to the buddy board heading on the navigation bar (Figure 413).

Check this box to see notification badges for new buddy requests

Figure 412 User preferences new buddy request notification checkbox

- Check the middle box to see notifications when users reply to buddy requests you replied to (Figure 414).

Check this box to see notification badges when users reply to buddy requests you replied to

Figure 414 User preferences buddy response notification checkbox

- Check the bottom box to receive email notifications when users reply to buddy requests you replied to (Figure 415).

Check this box to receive an email notification when users reply to buddy requests you replied to

Figure 415 User preferences buddy response email checkbox

To update Staff status default view preferences:

- Check the radio button corresponding to the default view you would like to use when looking at the staff status (Figure 416). Note that the option won't be displayed if the user isn't authorized to see the staff status or if he can only use the day view.

Default view Day Week Month

Figure 416 User preferences staff status default view

To update Email notification preferences (Figure 417):

- Enter an optional alternate email address to receive notifications to.
- Check the radio button corresponding to one of the options. Some notifications can be turned off completely, while others must be sent to at least the main email address.

Email notifications

The following is a list of notifications you will receive from NEMO. You have the option to set an alternate email address and define your preferences for which notifications you want to be sent to either of your emails, or both.

Some notifications can also be turned off completely.

Alternate email address	<input type="text"/>			
Reservation emails	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only		
Buddy request replies	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only		
Access request updates	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only		
Broadcast emails	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only		
Task updates	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only		
Access expiration reminders	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only		
Tool qualification expiration reminders	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only		
Usage reminders	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only	<input type="radio"/> Alternate email only	<input type="radio"/> Off
Reservation reminders	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only	<input type="radio"/> Alternate email only	<input type="radio"/> Off
Reservation ending reminders	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only	<input type="radio"/> Alternate email only	<input type="radio"/> Off
Recurring charges reminder days	<input type="text" value="60,7"/>	Set the number of days to receive a reminder prior to recurring charges being charged. A comma-separated list can be used.		
Recurring charges reminders:	<input checked="" type="radio"/> Both emails	<input type="radio"/> Main email only	<input type="radio"/> Alternate email only	<input type="radio"/> Off

Figure 417 User preferences email notifications

To save user preferences:

- Click the update preferences button (Figure 418)

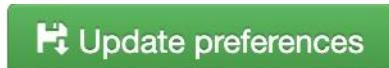

Figure 418 User preferences update button

- Selections will be updated in the database as discussed in [Detailed administration → User preferences](#) on page 538.

19.2 Web address

The user preferences page is accessible at site-address/user_preferences/. For example, www.nemo.com/user_preferences/. The page is accessible from the navigation bar by clicking the link or in mobile view by selecting preferences.

19.3 Mobile device user preferences page

There are no mobile device views for the safety page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

19.4 User preferences page customizations

There are no user preferences customizations.

20 Administration menu (staff only)

The administration menu provides the interfaces to manage accounts, projects, users, tools, areas, training, and maintenance as well as customize NEMO setups and access the NEMO database (Figure 419). Only staff have access to the administration menu and pages. Some administration pages also require super-user privilege (API, Customization, Impersonate).

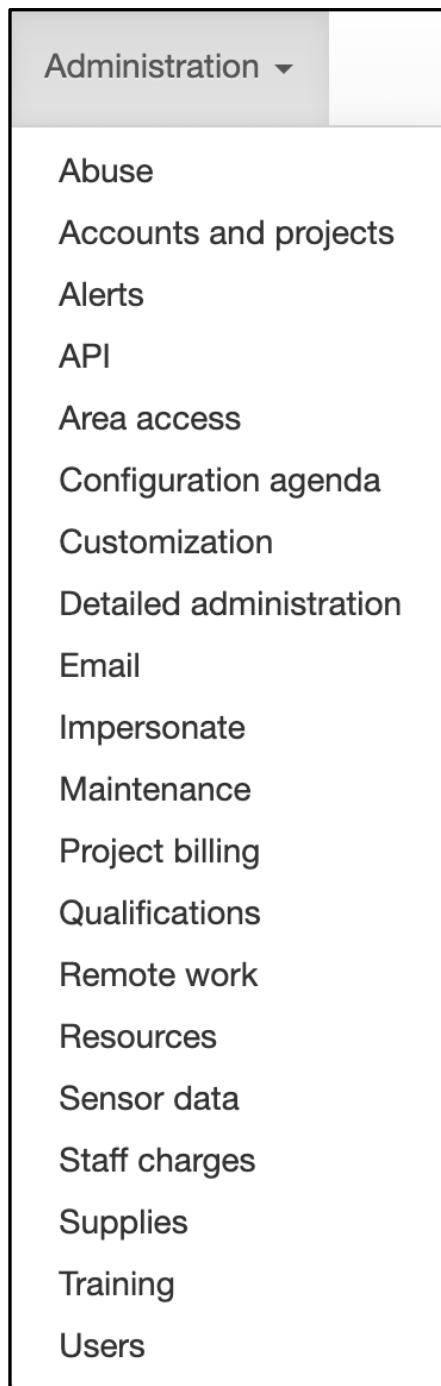

Figure 419 Administration menu

21 Abuse (managers only)

The abuse page can take various inputs to score users on their missed reservations and last-minute cancellations (Figure 420).

Reservation abuse

This page ranks users that abuse reservation privileges. Abuse is defined as cancelling, moving, or extending a reservation shortly before the reservation would have started. A point penalty is calculated per abuse. Point penalties increase the shorter the notice of a reservation change. (That is, cancelling a reservation right before it would have started will incur a high amount of points, while cancelling it 6 hours before would incur fewer points).

The weight & details of what constitutes abuse can be configured (though reasonable defaults have been chosen).

Cancellation horizon	6	hours	
Cancellation penalty	Up to	points	
Evaluate for the	Entire NanoFab		
Starting	04/01/2020	Ending	04/29/2020
Generate report			

Figure 420 Reservation abuse page

21.1 Web address

The abuse page is accessible at site-address/abuse/. For example, www.nemo.com/abuse/. The page is also accessible from the navigation bar by clicking Administration then clicking Abuse.

21.2 Mobile device abuse page

There are no mobile device views for the abuse page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

21.3 Abuse page customizations

There are no customizations for the abuse page.

22 Accounts and projects (user office, accounting and managers only)

The accounts and projects page provides the interface to administer accounts, projects, and user permissions on projects.

An account is at the top of the hierarchy. This is where you send the bill. An account can have many projects.

Projects are used to identify different efforts by the same account. This is what department or group is charging the account. Each project can have many users.

A user can be active on any number of projects under any number of accounts.

Many accounts will have one project with one or more users, but NEMO has the flexibility to accommodate any mode of operation.

Upon entering the page, there are buttons to add accounts, add projects, search for accounts or projects, and a list of all accounts and projects (Figure 421). The accounts and projects

Accounts and projects				
				<input type="button" value="New project"/> <input type="button" value="New account"/>

Identifier: PROJ.2019.02

Start Date: 06/03/2020

Figure 428 Accounts and projects project view

22.2 Account and project status

Accounts and projects can be either active or inactive and their status is indicated by an icon. Changing an account to inactive will cause all of its associated projects to inherit the inactive state regardless of individual project statuses. Although a project will inherit its account inactive status, the individual project statuses are not changed. Projects that are inactive, either directly or inherited from account, cannot be selected on any lab use activity.

Clicking the icon will toggle the status.

Active

Account or project is active

Inactive

Account or project is inactive

On the list view, account or project status can be toggled by clicking on the green icon  to deactivate, or the red icon  to reactive an account/project.

Any change in account or project status is recorded in the activity histories table of the database detailed in the [Detailed administration → Activity histories](#) section on page 375.

22.3 Manage users on a project

Users can be added and removed to any project regardless of associated accounts through the Accounts and project page or the [Users](#) page which is detailed on page 293.

To manage users on a project:

- Search for a project or select one from the list view using the details icon ()

- Click the (>) on a project listing to expand the project dialog and include qualified users (Figure 429).

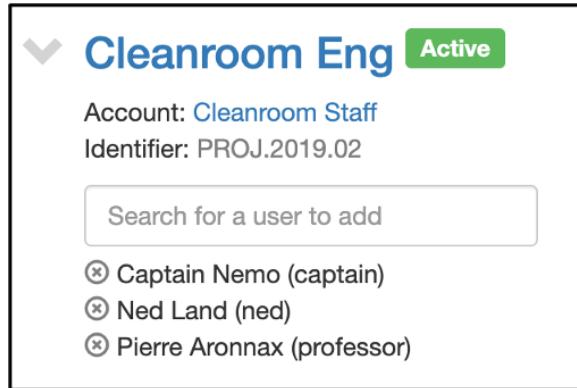

Figure 429 Accounts and projects expanded dialog

- To add a user, click in the search dialog box (Figure 430).

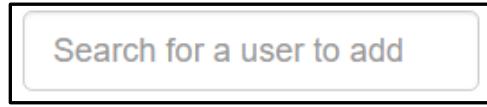

Figure 430 Accounts and projects search for user

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking the name on the list (Figure 431).

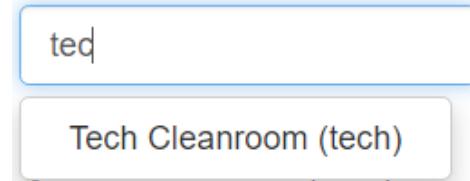

Figure 431 Accounts and projects add user

- The selected user is added immediately without confirmation and the list of users displayed is updated.
- Click the (X) to remove a user from a project. The removal is immediate without confirmation and the list of users displayed is updated.
- Adding or removing a user on a project is recorded in the membership history table of the database detailed in the [Detailed administration → Membership histories](#) section on page 441.
- Clicking the (v) will collapse the project dialog.

22.4 Create an account

To create an account:

- Click the new account button on the accounts and projects page (Figure 432).

Figure 432 Accounts and projects new account button

- The new account dialog will open (Figure 433).

A modal dialog box titled "New account". It contains fields for "Name" (with placeholder "Name"), "Type" (with dropdown menu), "Start date" (with placeholder "Choose a date"), and a checked "Active" checkbox. At the bottom is a green "Create new account" button with a small icon.

Figure 433 Accounts and projects new account dialog

- Enter the account name in the dialog box (Figure 434).

A modal dialog box titled "Name" containing a single input field with placeholder "Name".

Figure 447 Accounts and projects new project start date

- Select any number of documents to upload (optional) (Figure 448). This feature needs to be enabled in the [Customization → Projects and accounts](#) section.

A screenshot of a user interface showing a 'Documents' input field with a 'Choose Files' button and a placeholder 'No file chosen'.

Figure 448 Accounts and projects new project documents

- The active checkbox is checked by default. It can be unchecked for inactive status (Figure 449).

A screenshot of a user interface showing an 'Active' checkbox which is checked.

Figure 449 Accounts and projects new project active checkbox

- Click the create new project button (Figure 450) to confirm.

Figure 450 Accounts and projects new project create button

- The new project is recorded in the projects table of the database detailed in the [Detailed administration → Projects](#) section on page 446.
- The page will redirect to the project details page (Figure 451).

A screenshot of a user interface showing the details of a newly created project named 'New test project'. The project is marked as 'Active'. It shows the account 'New test account' and identifier 'Proj.2021.03'. Under 'Users', there is a search bar and a note stating 'This project does not have any members.' Under 'Principal Investigators', there is a search bar and a note stating 'This project does not have any principal investigators.'

Figure 451 Accounts and projects new project finished

- If the project name already exists, an error will be created (Figure 452).

Name
<input type="text" value="New test project"/>
Project with this Name already exists.

Figure 452 Accounts and projects new project error

22.6 Web address

The accounts and projects page is accessible at site-address/accounts_and_projects/. For example, www.nemo.com/accounts_and_projects/. The page is also accessible from the navigation bar by clicking Administration then clicking Accounts and projects.

22.7 Mobile device accounts and projects page

There are no mobile device views for the accounts and projects page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

22.8 Accounts and projects page customizations

There are several customizations available for accounts and projects. They are discussed in the [Customizations → Project and accounts](#) section.

23 Alerts (staff and user office only)

The alerts page creates notifications to all users and can have a scheduled start date and time as well as a scheduled end date and time. Any existing alerts are displayed at the bottom of the page and can be edited or deleted. (Figure 453). Existing alerts display the title, details, start date/time and end date/time.

The screenshot shows the 'Alerts' page. At the top, there's a heading 'Create a new alert' and a note: 'You can create and edit alerts that will be visible to everyone. The alert will only be visible after the debut time and will be deleted after the expiration time.' Below this is a form for creating a new alert:

- Title:** A text input field containing a single character 'I'.
- Type:** A dropdown menu labeled 'Select an alert type'.
- Contents:** A large text area for alert content, currently empty.
- Debut time:** A text input field showing '05/04/2020 9:28 PM'.
- Expiration time:** A text input field that is empty.
- Create alert:** A green button.

At the bottom, there is a summary card for an existing alert:

Sputter tool annual PM next week edit x

The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users.

Debuts on Monday, April 13th, 2020 @ 1:52 PM
This alert will never expire

Figure 453 Alerts page

23.1 Create an alert

To create an alert:

- Enter an alert title (Figure 454). The title is displayed in bold at the top of the alert message.

Figure 454 Alerts title dialog box

- Select an alert type (Figure 455). The alert type will only display if alert types have been defined in the alert categories table of the database detailed in the [Detailed administration → Alert categories](#) section on page 377. Categorizing alerts can be useful for binning alerts aiding in future analysis and trending.

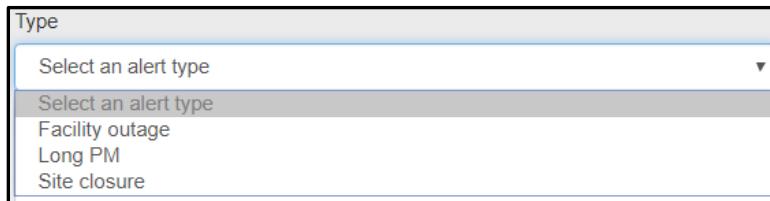

Figure 455 Alerts type dropdown

- Provide details to share with users (Figure 456).

Figure 456 Alerts details dialog box

- Select a start date and time (Figure 457). The default is now.

Figure 457 Alerts start date and time

- Select an end date and time (Figure 458). To prevent alert expiration, leave this blank.

Figure 458 Alerts end date and time

- Clicking in the start or end date/time area will bring up the calendar/clock selection dialog (Figure 459). Click to the appropriate date and time. The date/time dialog will update as you click.

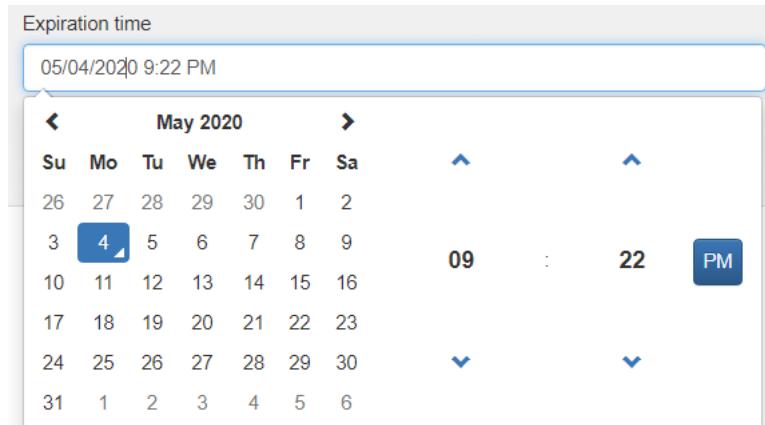

Figure 459 Alerts calendar/clock dialog

- Click the create alert button (Figure 460).

Figure 460 Alerts create button

- Upon creation, the alert will be saved in the database and is detailed in the [Detailed administration → Alerts](#) section on page 379.
- The new alert will be displayed at the bottom of the alerts page and on the [landing page](#) described on page 31.

23.2 Delete an alert

An alert can be deleted by clicking the (X) icon in the alert of interest at the bottom of the alerts page (Figure 461). The deletion is immediate without confirmation. The alert is still saved in the database but marked as deleted and will no longer be displayed.

Figure 461 Alerts existing alert dialog

23.3 Edit an alert

To edit an alert:

- Click the (Pencil) icon in the alert dialog of interest.
- The alert edit page will open (Figure 462).

Alerts

You can create and edit alerts that will be visible to everyone. The alert will only be visible after the debut time and will be deleted after the expiration time.

Figure 463 Alerts edit abandon changes button

- To save the update click the save changes button (Figure 464).

Save changes

Figure 464 Alerts edit save changes button

23.4 Web address

The alerts page is accessible at site-address/alerts/. For example, www.nemo.com/alerts/. The page is also accessible from the navigation bar by clicking Administration then clicking Alerts.

23.5 Mobile device alerts page

There are no mobile device views for the alerts page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

23.6 Alerts page customizations

23.6.1 Alert categories

The alert type will only display if alert types have been defined in the alert categories table of the database detailed in the [Detailed administration → Alert categories](#) section on page 377.

24 API (admin only)

This topic is discussed in more details in the [API access](#) section on page 550.

25 Area Access (staff and user office only)

The area access page can be used to manually create an area access record and view area access (Figure 465).

The screenshot shows a page titled "Area access". Below the title, a message says "You can manually create an area access record under extraordinary circumstances." A section titled "View area access records for:" lists three options: "Today", "Yesterday", and "Or, enter a custom date range". Below this are two input fields labeled "start" and "end", followed by a button labeled "View access records".

Figure 465 Area access page

25.1 Create an access record

An area access record can be manually created due to a door access hardware or network failure. However, the preferred method to bypass area access requirements is to enable users to log themselves in and out of areas from the [landing page](#) which is setup in [Customizations → Application settings](#) section described on page 310.

To create an area access record:

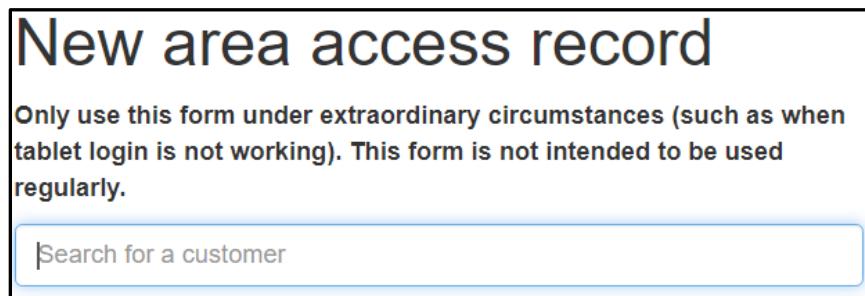

- Click the manually create an access record link (Figure 466).

You can manually create an area access record under extraordinary circumstances.

Figure 466 Area access new record link

- The new area access record page will open (Figure 467).

The screenshot shows a page titled "New area access record". A note states: "Only use this form under extraordinary circumstances (such as when tablet login is not working). This form is not intended to be used regularly." Below this is a search bar with the placeholder text "Search for a customer".

Figure 467 Area access new record page

- Enter the user name in the dialog box (Figure 468).

Search for a customer

Figure 468 Area access new record search dialog

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking the name on the list (Figure 469).

The screenshot shows a search dialog with a text input field containing 'c'. Below the input field is a list box containing two items: 'Staff Cleanroom (staff)' and 'Tech Cleanroom (tech)'. The 'Staff Cleanroom (staff)' item is highlighted with a blue border.

Figure 469 Area access new record search list

- If the user has multiple projects, select which project to bill time against (Figure 470).

The screenshot shows a dialog box with the question 'Which of the customer's projects would you like to bill?'. Below the question are three radio buttons labeled 'Cleanroom Eng', 'Cleanroom Maint', and 'Cleanroom Training', all of which are unselected.

Figure 470 Area access new record multiple projects

- If the user has only one project, it will be selected automatically (Figure 471).

Area access will be billed to the customer's only project, "Project 1"

Figure 471 Area access new record one project

- If the user has access to multiple areas, select which area to log the user into (Figure 472).

The screenshot shows a dialog box with the question 'Staff Cleanroom (staff) has access to the following areas. Which would you like to bill for access?'. Below the question are two radio buttons labeled 'Cleanroom anytime' and 'CMP Anytime', both of which are unselected.

Figure 472 Area access new record multiple areas

- If the user has access to only one area, it will be selected by default (Figure 473).

The customer only has access to the cleanroom anytime. Access will be billed for that area.

Figure 473 Area access new record single area

- Click the create area access record (Figure 474).

Create area access record

Figure 474 Area access new record create button

- The area access policy will be checked to determine if the user may access the selected area. If there is a failure, the user will be prompted with the problem (Figure 475).
 - The user must be active
 - The user must be associated with an active project
 - The user must have access to the area
 - The user must have current unexpired physical access to the lab
 - The user must not be currently logged into an area
 - The user must have a physical access level that permits access at the login time
 - The area must not be shut down as a resource
 - The area must not be over its occupancy limit
 - If the area requires a reservation, the user must have a reservation that encompasses the area access start time.

Oops! Something went wrong. The new area access record was not created because:

Ned Land (ned) is already billing area access to another area. The user must log out of that area before entering another.

Figure 475 Area access new record error dialog

- Upon success, a new area access record will be created in the area access table of the database and a success message will be displayed (Figure 476).

Ned Land (ned) is now logged in to the cleanroom.

Figure 476 Area access new record success message

25.2 View access records

Area access records can be viewed for any custom date range however, two shortcuts for today and yesterday are provided (Figure 477).

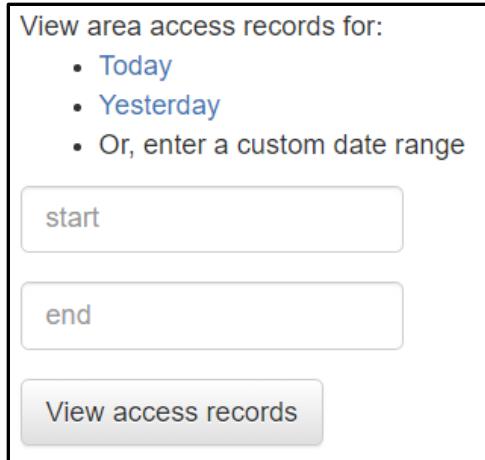

Figure 477 Area access view access records

To view area access records:

- Set a date range.
 - Click the ‘Today’ quick link to populate the start and end date with the current date (Figure 478). The view will automatically update with any records.

Figure 478 Area access view record today link

- Click the ‘Yesterday’ quick link to populate the start and end date with the previous days date (Figure 479). The view will automatically update with any records.

Figure 479 Area access view record yesterday link

- Manually enter a start and end date (Figure 480).

Figure 480 Area access view record manual date range

- Click in the start and end date dialog boxes directly to bring up the calendar dialog and navigate to the desired start and end date (Figure 481).

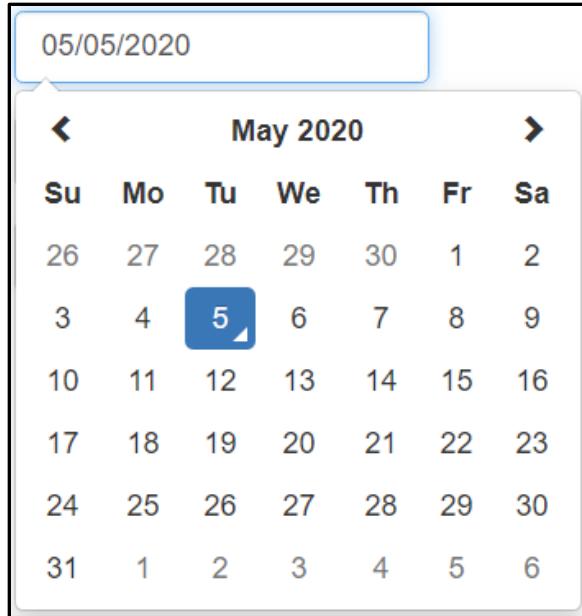

Figure 481 Area access view record calendar dialog

- Click view access records button (Figure 482).

Figure 482 Area access view record button

- The page will update with access records from the selected date range (Figure 483). Fields returned are the record identifier, user name, project, start date/time and end date/time. If a user is currently logged into an area, the end will be indicated as "In progress".

Identifier	User	Project	Start	End
54	Ned Land (ned)	Project 2	Tuesday, May 5th, 2020 @ 12:18 PM	In progress
53	Ned Land (ned)	Project 2	Tuesday, May 5th, 2020 @ 12:17 PM	Tuesday, May 5th, 2020 @ 12:17 PM
52	Captain Nemo (captain)	Cleanroom Eng	Tuesday, May 5th, 2020 @ 12:10 PM	Tuesday, May 5th, 2020 @ 12:10 PM

Figure 483 Area access view record data

25.3 Web address

The area access page is accessible at site-address/area_access/. For example, www.nemo.com/area_access/. The page is also accessible from the navigation bar by clicking Administration then clicking Area access.

25.4 Mobile device area access page

There are no mobile device views for the area access page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

25.5 Area access page customizations

There are no customizations for the area access page.

26 Configuration agenda (staff only)

The configuration agenda is an organizational tool for staff to view all required configurations for each configurable tool on the same page and allows the configuration steps to be accomplished without navigating to other pages (Figure 484). Two views are available, the default current day and a near future that shows the next business day. Each tool requiring configuration is displayed and if the current day is a Friday, the near future view will show Saturday, Sunday, and Monday.

Tools that require staff to configure a tool for a user or when the type of usage needs to be tracked can have configurations created. Configurations are created in the configurations table of the database discussed in the [Detailed administration → Configurations](#) section starting on page 409. A history of configurations can be found in the configuration history table of the database discussed in the [Detailed administration → Configuration histories](#) section starting on page 407.

Configuration agenda for today

Below is a list of reservations which require tool configurations. The reservations are grouped by tool and ordered by start time. Reservations that have a red background were created on short notice, thus there is no guarantee the tool will be configured properly when the user arrives. Reservations that have already started or have no configuration information are excluded. You can also [view reservations in the near future](#) that will require configuration changes.

Evaporator	
Staff Cleanroom (staff) Tuesday, May 5th, 2020 @ 7:00 PM Tuesday, May 5th, 2020 @ 8:00 PM Pocket 1 Source needs to be set to Ti. Pocket 2 Source needs to be set to Au.	Pocket 1 Source: <input type="text" value="Ti"/> Pocket 2 Source: <input type="text" value="Ti"/> <input type="button" value="Enable the tool for myself"/>
Sputter	
Conseil Aronnax (conseil) Project 2 Tuesday, May 5th, 2020 @ 7:00 PM Tuesday, May 5th, 2020 @ 8:00 PM Gun 1 Target needs to be set to Ti. Gun 2 Target needs to be set to Au. <input type="button" value="Enable the tool on behalf of Conseil"/>	Gun 1 Target: <input type="text" value="User provided target"/> Gun 2 Target: <input type="text" value="Au"/> <input type="button" value="Enable the tool for myself"/>
Ned Land (ned) Project 1 Tuesday, May 5th, 2020 @ 9:00 PM Tuesday, May 5th, 2020 @ 10:00 PM Gun 1 Target needs to be set to Cr. Gun 2 Target needs to be set to Au. <input type="button" value="Enable the tool on behalf of Ned"/>	

Figure 484 Configuration agenda page with today view

26.1 Usage

All configurations required in a day are displayed for each tool in order of nearest to latest. This allows planning without the need to closely monitor the reservation calendar of each tool that requires configuration. To switch to the near future view, click the link in the dialog at the top of the page (Figure 485).

You can also [view reservations in the near future](#) that will require configuration changes.

Figure 485 Configuration agenda future view link

From the near future view, you can switch to the today view by clicking the link in the dialog at the top of the page (Figure 486 Configuration agenda today view link).

You can also view reservations for today that will require configuration changes.

Figure 486 Configuration agenda today view link

Each tool displays the reservations on the left and the current tool configuration on the right. The tool name heading is a link to that tools calendar page.

Configurations can only be changed while the tool is idle. The configurations will be listed with a drop down and a tool enable button will be provided to facilitate quick access (Figure 487). Select the new configuration as needed from the drop downs. Updates are automatic and immediate.

Figure 487 Configuration agenda idle tool

If a tool is enabled, the configuration will be locked, and a disable tool button will be displayed (Figure 488). The tool must be disabled to change the configuration however caution should be used to not impair a tool that may be currently running a process.

Figure 488 Configuration agenda tool in use

In some cases, it might be desirable to charge users for tool configuration changes. The user reservation dialog provides a short cut button to enable the tool on behalf of a user while the configuration is in progress (Figure 489).

Figure 489 Configuration agenda user reservation info

26.2 Web address

The configuration agenda page is accessible at site-address/configuration_agenda/. For example, www.nemo.com/configuration_agenda/. The page is accessible from the navigation bar by clicking Administration then clicking Configuration agenda.

26.3 Mobile device configuration agenda page

There are no mobile device views for the configuration agenda page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

26.4 Configuration agenda page customizations

There are no customizations for the configuration agenda page.

27 Email (any staff role)

The email page provides staff with an interface to send emails to users. The user groups available are all users qualified on a tool, all users working on a project, or all users working under an account (Figure 490).

Figure 490 Email page

27.1 Usage

The email broadcast process starts with selecting the group of users to email, making some recipient selections, adding email content, then sending as detailed in the sections below.

27.1.1 Group selection

Click one of the user group links (Figure 491).

Figure 491 Email groups

A search dialog will open below the group list. Enter the tool, area, project, or account depending on the link selected (Figure 492).

Figure 492 Email selection

Results are returned as characters are typed and the item of interest can be selected at any time by clicking on the list (Figure 493).

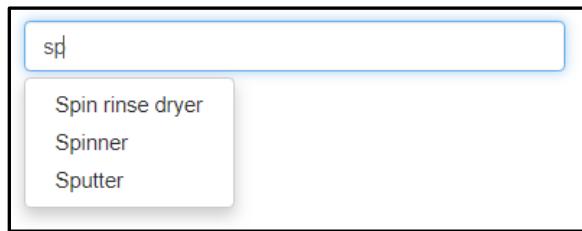

Figure 493 Email selection list

Upon selecting the item of interest, the compose email page will be opened (Figure 494).

Compose an email

Recipients

Active users are listed below in black. Inactive users are gray.

- Only send this email to active users
- Send a copy of this email to myself

Captain Nemo (captain) - captain.nemo@nautilus.com
Conseil Aronnax (conseil) - conseil@nautilus.com
Ned Land (ned) - ned.land@nautilus.com
Pierre Aronnax (professor) - pierre.aronnax@nautilus.com
Staff Cleanroom (staff) - staff@nautilus.com

Preview Send

Figure 494 Email compose email page

If an email template has not been loaded yet, an error message will be displayed preventing the process from continuing (Figure 495).

Compose an email

A generic email format has not been customized for your organization yet. You'll need to create one before you can send email broadcasts from within NEMO. Please visit the [customizations page](#) to upload a template.

Figure 495 Email compose error page

27.1.2 Recipients

The recipients section shows all users in the group chosen and provides options to only include active users and to copy the sender (Figure 496).

The dialog box is titled "Recipients". It contains a list of users: Captain Nemo (captain) - captain.nemo@nautilus.com, Conseil Aronnax (conseil) - conseil@nautilus.com, Ned Land (ned) - ned.land@nautilus.com, and Pierre Aronnax (professor) - pierre.aronnax@nautilus.com. There is a note stating "Active users are listed below in black. Inactive users are gray." Below the list are two checkboxes: "Only send this email to active users" (checked) and "Send a copy of this email to myself" (checked). A blue "Export user list" button is located in the top right corner.

Figure 496 Email recipients dialog

By default, only active users will receive the email. Uncheck the checkbox to include all users (Figure 497).

Figure 497 Email recipients active user checkbox

By default, the staff member sending the message will be copied. Uncheck the checkbox to not be copied (Figure 498).

Figure 498 Email recipients copy sender checkbox

The list of recipients can be exported to use outside of NEMO, for example to load into your preferred email client. Click on the “export user list” button to get a CSV file with first name, last name, username, and email for each recipient (Figure 499).

Export user list

Figure 499 Email recipients export user list

27.1.3 Email content

The mail content section provides options for subject, title, title color, greeting, and body (Figure 500).

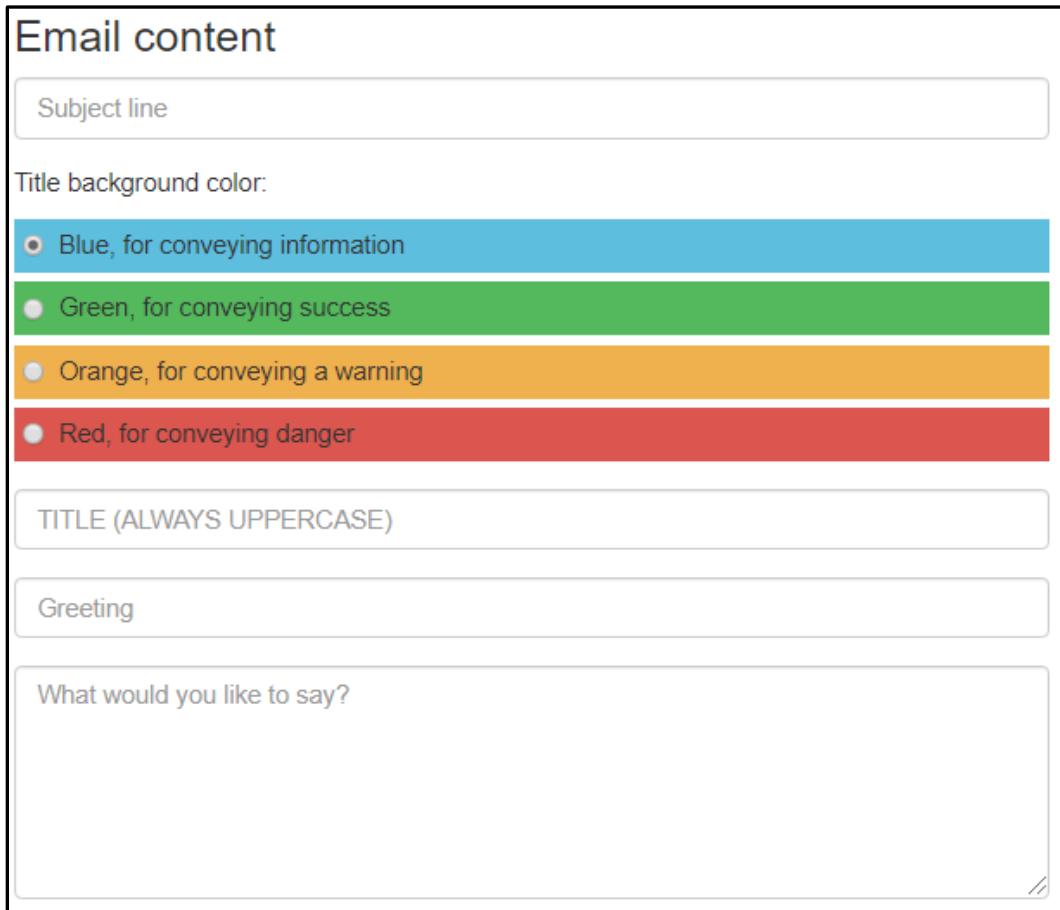

Figure 500 Email content dialog

The subject line will appear as the subject in the email (Figure 501).

Figure 501 Email content subject dialog box

The title background color can be selected to emphasize the importance of the email (Figure 502).

Figure 502 Email content title background checklist

The title text is entered in the title dialog box (Figure 503).

Figure 503 Email content title dialog box

The greeting is entered in the greeting dialog box (Figure 504).

Figure 504 Email content greeting dialog box

The email body is entered in the "what would you like to say?" dialog box (Figure 505).

Figure 505 Email content body dialog box

27.1.4 Preview Email

Clicking the preview button will render the email (Figure 506). Changes can be made in the email form above and the preview will be updated each time the preview button is clicked.

Figure 506 Email preview button

The email preview will render below the preview button (Figure 507).

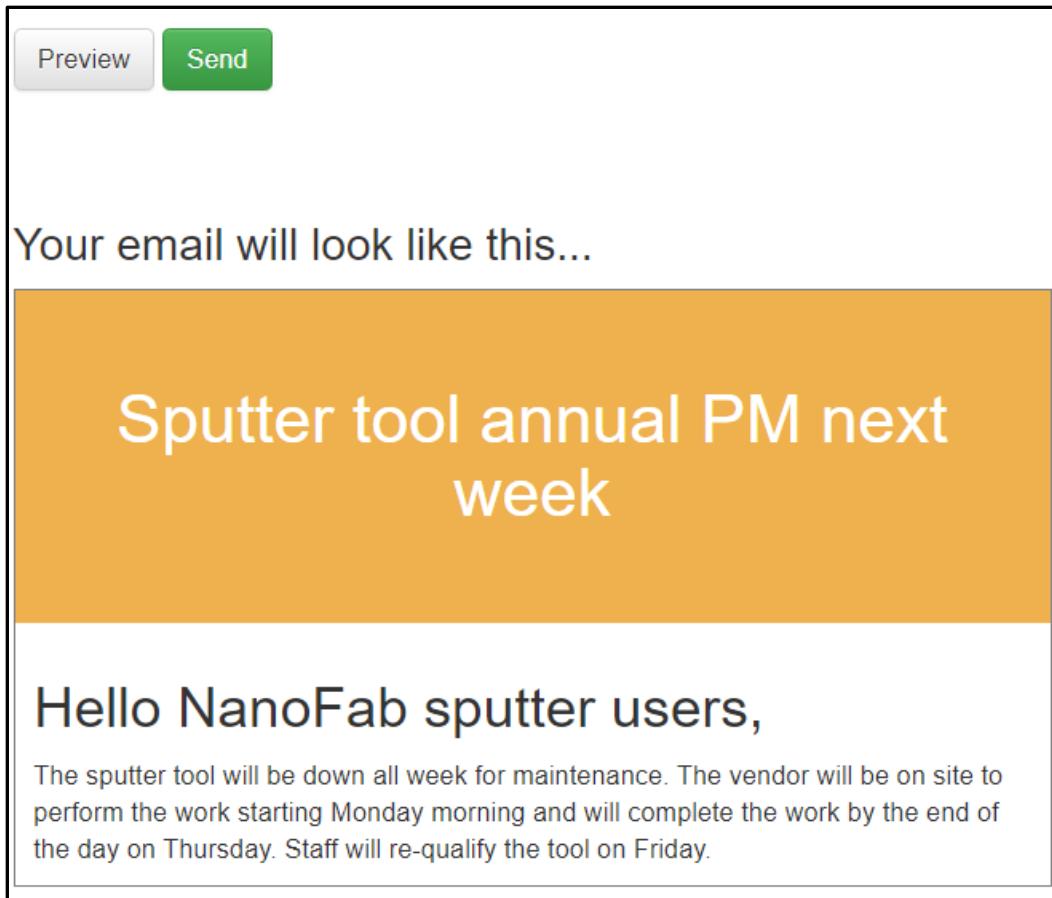

Figure 507 Email rendered preview

27.1.5 Send Email

Clicking the send button will send the message to all recipients selected (Figure 508).

Figure 508 Email send button

Upon successful completion, a message will be displayed (Figure 509). Click the continue button to return to the landing page.

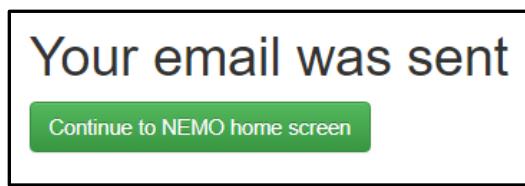

Figure 509 Email send success

27.1.6 Send using default email client

Clicking the use default email client button will open the default email application set up on your computer and load up the recipients as bcc and the subject, title, greeting and message (Figure 510).

Figure 510 Email use default email client button

This feature only works if the total characters for all email addresses is less than 2000 characters. This is a limitation of the MAILTO browser functionality. The button will be disabled if that limit is reached (Figure 511).

There are too many email addresses to use the default email client. Use the export function instead.

Figure 511 Email use default email client button disabled

27.2 Web address

The configuration agenda page is accessible at site-address/email_broadcast/. For example, www.nemo.com/email_broadcast/. The page is accessible from the navigation bar by clicking Administration then clicking Email.

27.3 Mobile device email page

There are no mobile device views for the email page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

27.4 Email page customizations

Emails require a generic email template that is used to format messages. The email template is configured in the [Customization → Generic email](#) page detailed starting on page 327.

28 Impersonate (admin only)

The impersonate feature allows an admin user to impersonate any active user (Figure 512). This feature is useful to replicate problems a user may be having accessing different features of NEMO.

This form allows you to impersonate any active user.

Search for a user to impersonate

Impersonate

Figure 512 Impersonate page

28.1 Usage

To impersonate a user:

- Enter the users name in the search dialog box (Figure 513).

Search for a user to impersonate

Figure 513 Impersonate search dialog

- A list of users is returned as characters are typed (Figure 514). The user can be selected from the return list at any time by clicking the users name.

ned

Ned Land (ned)

Figure 514 Impersonate search dialog return list

- If the incorrect user is selected, use the backspace to delete characters and names will be returned with each character deleted.
- Click the impersonate button to begin impersonating the selected user (Figure 515).

Figure 515 Training record button

- NEMO will return to the landing page and a header will appear at the top of each page indicating that you are currently impersonating another user (Figure 516). NEMO will act as if the selected user is currently logged in.

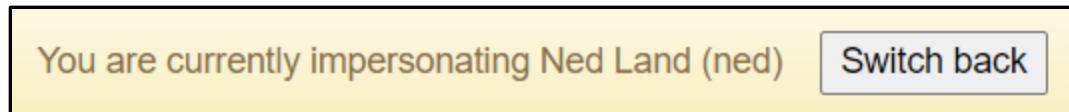

Figure 516 Impersonate page header

- Click the switch back button on the impersonate page header to return to normal operation (Figure 517).

Figure 517 Impersonate header switch back button

28.2 Web address

The impersonate page is accessible at site-address/impersonate/. For example, www.nemo.com/impersonate/. The page is accessible from the navigation bar by clicking Administration then clicking Impersonate.

28.3 Mobile device impersonate page

There are no mobile device views for the impersonate page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

28.4 Impersonate page customizations

There are no customizations for the impersonate page.

29 Maintenance (staff only)

The maintenance page provides staff with a list of all pending and recently closed tasks on a single page which is useful for determining priorities across the lab. When first opening the page, it defaults to the pending tasks tab.

29.1 Pending tasks

The pending tasks tab displays urgency, severity, tool name, problem category, the last update, date created, and description for each pending task (Figure 518). The listing is ordered by urgency then by date created, oldest first. The list can be sorted by any heading except description by clicking the heading name.

Maintenance						
Urgency	Severity	Tool	Category	Last updated	Created	Description
High	🔥	Elllipsometer		2 weeks, 5 days ago		Measurements incorrect.
High	🔥	Microscope		1 week, 2 days ago by Captain	2 weeks, 5 days ago	Smoke coming from lamp housing when on.
High	🔥	Contact Aligner	Tool Error		1 week, 2 days ago	it doesnt work
High	🔥	Spinner	Process problem		53 seconds ago	Wafers are flying off the spinner.
Normal	🔧	PECVD	Wafer handling problem	1 week, 2 days ago by Captain	2 weeks, 5 days ago	Wafers floating on platen.
Normal	🔧	Evaporator			2 weeks, 2 days ago	test problem
Normal	🔧	Fluorine Etch	Tool Error		a minute ago	The tool errors with temperature alarms when idle

Figure 518 Maintenance pending tasks

Clicking on the row of any pending task will display the task details on the right side of the screen (Figure 519). The task details view provides important links and information about the current task to streamline access for updates.

Microscope task

Primary tool owner: Captain Nemo (captain)

[Enable tool](#) [Calendar](#) [Tool control](#)

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:31 PM (2 weeks, 5 days ago).
Last updated by Captain Nemo (captain) on Monday, April 27th, 2020 @ 2:11 PM (1 week, 2 days ago).

Urgency	High

Problem description
Smoke coming from lamp housing when on.

Progress
On Monday, April 27th, 2020 @ 2:09 PM Captain Nemo (captain) updated this task:
Possible frayed wires to lamp socket. Will test socket and wiring.

On Monday, April 27th, 2020 @ 2:09 PM, Captain Nemo (captain) set the status of this task to "Repair".

Figure 519 Maintenance pending task details

The pending task details contains the following information:

- Tool name (Figure 520)

Microscope task

Figure 520 Maintenance pending task tool name

- Primary tool owner (Figure 521)

Primary tool owner: Captain Nemo (captain)

Figure 521 Maintenance pending task primary tool owner

- Quick link buttons – quick link buttons are provided to streamline common operations while performing maintenance to resolve tasks.
 - Enable/disable the tool
 - Enable tool, single project – click enable tool to start logging time (Figure 522).

Enable tool

Figure 522 Maintenance pending task enable tool button

- Enable tool, multiple projects – click enable button to reveal dropdown list of projects (Figure 523). Select a project from the list to start logging time (Figure 524).

Enable tool ▾

Figure 523 Maintenance pending task enable tool button multiple projects

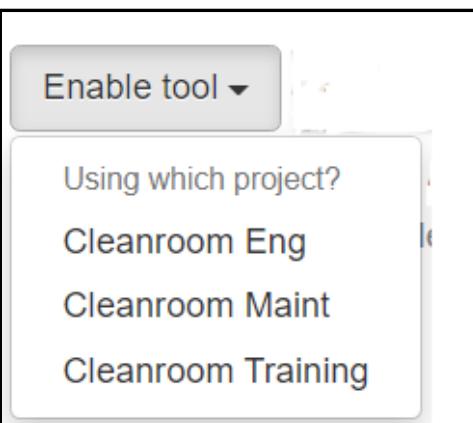

Figure 524 Maintenance pending task multiple projects list

- Disable tool – click to stop logging time on a tool (Figure 525). In the maintenance mode of operation, the disable tool is immediate, and the user is not prompted for logout questions.

Disable tool

Figure 525 Maintenance pending task disable tool button

- Navigate to the calendar page for the tool – this link will open the calendar page in a new tab and select the task subject tool (Figure 526).

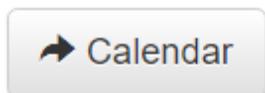

Figure 526 Maintenance pending task calendar page link

- Navigate to the tool control page for the tool – this link will open the tool control page in a new tab and select the task subject tool (Figure 527).

- Who created the task and when (Figure 528)

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:31 PM (2 weeks, 5 days ago).

Figure 528 Maintenance pending task creation info

- Who last updated the task and when (Figure 529)

Last updated by Captain Nemo (captain) on Monday, April 27th, 2020 @ 2:11 PM (1 week, 2 days ago).

Figure 529 Maintenance pending task update info

- Update the task
 - The current urgency is displayed (Figure 530). Shutdowns and safety problems default to high urgency while problems default to normal urgency. To update, use the dropdown to change the task urgency to high, normal, or low (Figure 531).

Figure 530 Maintenance pending task urgency

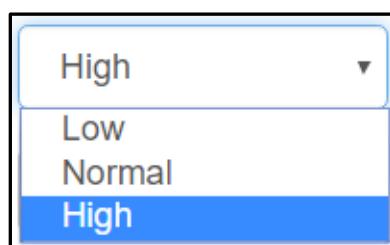

Figure 531 Maintenance pending task urgency dropdown

- The current problem category is displayed only if task categories have been defined in the task categories table of the database (Figure 532). Task categories are discussed in the [Detailed administration → Task categories](#) section on page 483. To update, use the dropdown to change the problem category (Figure 533).

Figure 532 Maintenance pending task problem category

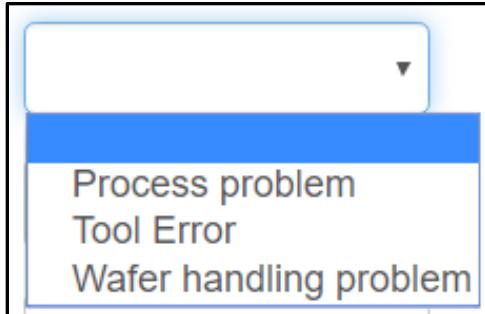

Figure 533 Maintenance pending task problem category dropdown

- The current status is displayed only if task statuses have been defined in the task statuses table of the database (Figure 534). Task statuses are discussed in the [Detailed administration → Task statuses](#) section on page 498. To update, use the dropdown to change the task status (Figure 535).

Figure 534 Maintenance pending task status

Figure 535 Maintenance pending task status dropdown

- The current estimated resolution time is displayed (Figure 536). To update, click the dialog box to open the clock-calendar dialog (Figure 537). Select the new date and time estimate. The dialog box is updated as the calendar and clock are clicked.

Figure 536 Maintenance pending task estimated resolution

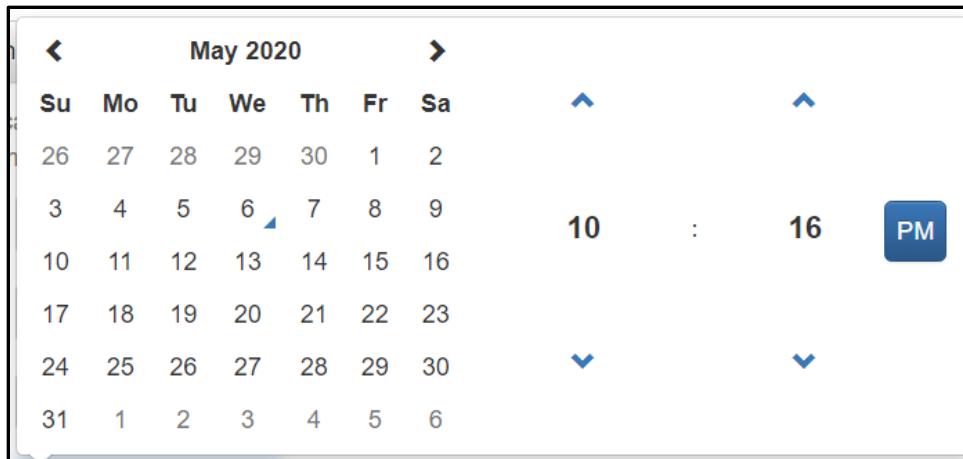

Figure 537 Maintenance pending task estimated resolution clock/calendar

- The current shutdown status is displayed (Figure 538). To update click the checkbox to select or deselect as needed.

This task requires the Microscope to be shutdown

Figure 538 Maintenance pending task shutdown status

- The current safety hazard status is displayed (Figure 539). To update click the checkbox to select or deselect as needed.

This task is considered a potential safety hazard to the NanoFab

Figure 539 Maintenance pending task safety hazard status

- Use the radio button to select update or resolve for the task (Figure 540). Selecting resolve will show the resolution category below the details dialog if resolution categories have been defined.

Update Resolve

Figure 540 Maintenance pending task update or resolve radio

- Provide update or resolution details that describe any actions taken (Figure 541).

Please describe any actions being taken to resolve this task.

29.2 Closed tasks

The closed tasks tab displays urgency, severity, tool name, problem category, date created, date resolved, and description for up to 20 closed tasks (Figure 551). The listing is ordered by date closed, more recent closure first. The list can be sorted by any heading except description by clicking the heading name.

Maintenance						
Pending	Closed					
Urgency	Severity	Tool	Category	Created	Resolved	Description
High	🔥	Ellipsometer		Friday, April 17th, 2020 @ 12:29 PM	Wednesday, May 6th, 2020 @ 9:25 PM	Measurements incorrect.
High	🔥	Profilometer		Wednesday, April 1st, 2020 @ 3:25 PM	Wednesday, May 6th, 2020 @ 8:56 PM	Monthly PM complete, nothing unusual observed.
Normal	🔧	Fluorine Etch		Monday, April 20th, 2020 @ 8:18 PM	Monday, April 27th, 2020 @ 4:22 PM	trouble
Normal	🔧	Sputter	Tool Error	Thursday, April 23rd, 2020 @ 3:52 PM	Monday, April 27th, 2020 @ 10:30 AM	Chamber door is hard to close
High	🔥	Sputter	Process problem	Thursday, April 23rd, 2020 @ 3:51 PM	Monday, April 27th, 2020 @ 10:30 AM	Cant get the RF to strike, looks like bad vacuum
Normal	🔧	Sputter	Wafer handling problem	Friday, April 24th, 2020 @ 4:59 PM	Monday, April 27th, 2020 @ 10:30 AM	Stuck in vacuum transfer

Figure 551 Maintenance closed tasks

Clicking on the row of any closed task will display the task details on the right side of the screen (Figure 552).

PECVD task

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:30 PM (2 weeks, 5 days ago).

Urgency: normal

Problem category: wafer handling problem

Problem description

Wafers floating on platen.

images:

- [2020-04-27_pecvd_01.png](#)

Progress

On Monday, April 20th, 2020 @ 8:53 PM Captain Nemo (captain) updated this task:

Tested pump down curve. Need new soft pump valve, on order will arrive 5/6/2020.

On Monday, April 27th, 2020 @ 2:13 PM, Captain Nemo (captain) set the status of this task to "Triage".

Resolved by Captain Nemo (captain) on Wednesday, May 6th, 2020 @ 9:39 PM

Resolution category: repairs complete

Parts arrived and were installed. System tested and operating normally.

Figure 552 Maintenance closed task details

All details and updates are listed including the initial task information, problem description, progress updates, and resolution information. Any images associated with the task are linked and can be open by clicking the links.

29.3 Web address

The maintenance page is accessible at site-address/maintenance/. For example, www.nemo.com/maintenance/. The page is accessible from the navigation bar by clicking Administration then clicking Maintenance.

29.4 Mobile device maintenance page

There are no mobile device views for the maintenance page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

29.5 Maintenance page customizations

29.5.1 Number of closed tasks to return

The number of closed tasks returned is set in the maintenance.py file, maintenance function, closed_tasks = statement. Change [:20] to the number of closed tasks to return.

30 Qualifications (staff only)

The qualifications page provides a convenient interface for performing batch qualification or disqualification for one or more users on one or more tools (Figure 553).

Batch qualifications

Use this form to qualify one or more users on one or more tools. You may select as many users or tools as you like. User and tool names are automatically searched for when you type in the text boxes below. All of the selected users will be qualified or disqualified for all of the selected tools. You can remove a selected user or tool by clicking on the representative button.

Qualify users

Disqualify users

Search for user

Search for tool

Figure 553 Qualifications page

30.1 Tool qualifications

Users can be qualified on tools through several interfaces within NEMO. Each has its particular value.

- [Tool control page](#) discussed on page 110 – users may be qualified or disqualified one at a time on the tool displayed. If the selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- [Qualifications page](#) discussed on page 251 – many users may be qualified or disqualified on many tools at the same time. If a selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- [Training page](#) discussed on page 289 – many users may be qualified on many tools at the same time. In addition, training type and time will be recorded. If a selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- [Users page](#) discussed on page 293 – the selected user may be qualified or disqualified on one tool at a time. The users physical access level is not updated.
- [Tool table in the database](#) discussed on page 504 – many users may be qualified or disqualified on a single tool. The users physical access level is not updated.

30.2 Usage

30.2.1 Select users

- Select one or more users by typing the first users name in the search for user dialog (Figure 554).

Search for user

Figure 554 Qualifications user search dialog

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking on the list (Figure 555).

Figure 555 Qualifications user search dialog return list

- After clicking the user will be listed below the search dialog (Figure 556).

Figure 556 Qualifications user search name added

- If a user is selected by mistake, click the users name below the search dialog to remove them from the list (Figure 557).

Figure 557 Qualifications user search name button

- Repeat for each user to be qualified or disqualified.

30.2.2 Select tools

- Select one or more tools by typing the tool name in the search for tool dialog (Figure 558).

Figure 558 Qualifications tool search dialog

- Results are returned as characters are typed and the tool of interest can be selected at any time by clicking on the list (Figure 559).

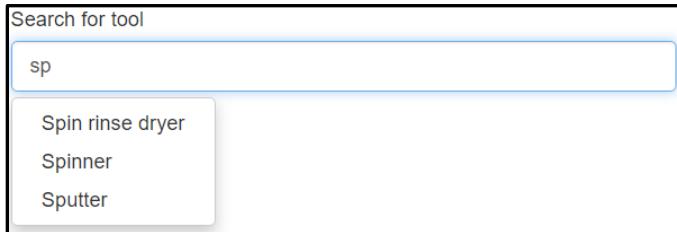

Figure 559 Qualifications tool search return list

- After clicking the tool will be listed below the search dialog (Figure 560).

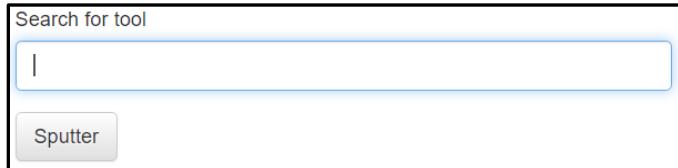

Figure 560 Qualifications tool search tool added

- If a tool is selected by mistake, click the tool name below the search dialog to remove it from the list (Figure 561).

Figure 561 Qualifications tool search name button

- Repeat for each tool to be qualified or disqualified.

30.2.3 Qualify or disqualify users

- Qualify users – click the qualify users button to qualify the selected users on the selected tools (Figure 562). If a tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated. Granting access levels for tools is discussed in the [Detailed administration → Tools](#) section on page 504.

Qualify users

Figure 562 Qualifications qualify button

- Disqualify users – click the disqualify users button to disqualify the selected users on the selected tools (Figure 563).

Disqualify users

Figure 563 Qualifications disqualify button

- Change status – upon selection of either qualify or disqualify, the selected updates will be made. A success message will be shown (Figure 564). Click the continue button to return to the NEMO home page. Note: to be successful, at least one user and one tool must be selected. If not, the user will be prompted to correct the problem.

Figure 564 Qualifications success message

30.3 Web address

The qualifications page is accessible at site-address/qualifications/. For example, www.nemo.com/qualifications/. The page is accessible from the navigation bar by clicking Administration then clicking Qualifications.

30.4 Mobile device qualifications page

There are no mobile device views for the qualifications page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

30.5 Qualifications page customizations

There are a few customizations available for automatically expiring tool qualifications for users. They are discussed in the [Customizations → User](#) section.

31 Recurring charges (user office & managers only)

The recurring charges page allows to charge for supplies/consumables at regular intervals (Figure 565). For example, it can be used to record storage bin rentals or cleanroom gown rentals. Supplies are setup in the consumables table of the database detailed in the [Detailed administration → Consumables](#) section on page 417.

The screenshot shows a web-based application interface for managing recurring charges. At the top, there is a navigation bar with links for NEMO, Calendar, Tool control, Status dashboard, Requests, Administration, Welcome, Captain, and a gear icon. Below the navigation is a search bar labeled "Search for recurring charges". To the right of the search bar are two buttons: "Export" and "Add item". A dropdown menu indicates "25 ✓ results per page". The main content area is a table with the following columns: Name, Item, Customer, Project, Frequency, Last charge, and Actions. The table contains three rows of data:

Name	Item	Customer	Project	Frequency	Last charge	Actions
Cleanroom gown #1	Cleanroom gown	Pierre Aronnax (professor)	Cleanroom Eng	Every 5 days ⓘ	12/07/2022	Edit Clear Delete
Storage bin #1	Storage bin	Pierre Aronnax (professor)	Cleanroom Eng	Every 4 week days ⓘ	12/08/2022	Edit Clear Delete
Storage bin #2	Storage bin	Captain Nemo (captain)	Cleanroom Eng	Every 4 week days ⓘ	12/08/2022	Edit Clear Delete

At the bottom right of the table area, it says "Page 1 of 1".

Figure 565 Recurring charges page

31.1 Usage

31.1.1 Create recurring charge

To create a new recurring charge:

- Click the new item button on the recurring charges page (Figure 566).

Figure 566 Recurring charges new item button

- The new item dialog will open (Figure 567).

New item

Figure 567 Recurring charges new item dialog

- Enter the item name in the name dialog box (Figure 568).

Figure 568 Recurring charges new item name

- Select the consumable and its quantity in dialog box and selector (Figure 569).

Figure 569 Recurring charges new item consumable

- All other fields are optional unless you are also trying to charge for the recurring charge right away, in which case all fields except the end date will be required.
- Enter the customer's name in dialog box (Figure 570).

Figure 570 Recurring charges new item customer

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking the name on the list (Figure 571).

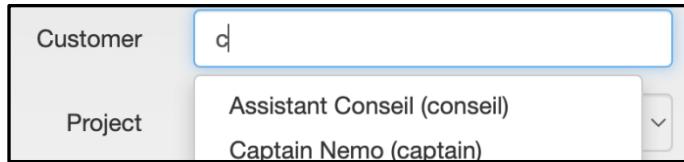

Figure 571 Recurring charges new item customer list

- After selecting the customer, select the project to bill in the selector (Figure 572).

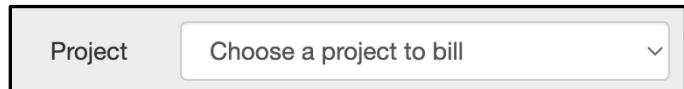

Figure 572 Recurring charges new item project

- Enter the date to start charging on (Figure 573).

Figure 573 Recurring charges new item charge date

- Select the charge frequency (Figure 574).

Figure 574 Recurring charges new item charge frequency

- Select an optional end for the recurring charge. This is optional. If not filled, the charges will continue indefinitely (Figure 575).

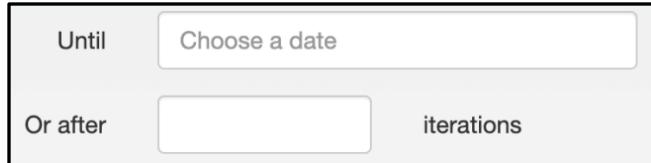

Figure 575 Recurring charges new item end options

- Click the save button (Figure 576) to confirm.

Figure 576 Recurring charges new item save button

- Alternatively, you can click the save and charge now button (Figure 577) to confirm and charge the first occurrence right away.

Figure 577 Recurring charges new item save and charge now button

- The new recurring charge is recorded in the recurring charges table of the database detailed in the [Detailed administration → Recurring charges](#) section.
- The page will redirect back to the recurring charges page.

31.1.2 Editing recurring charge item

From the recurring charge list page, click on the Edit button (Figure 578). The same fields as shown in the previous section will be shown and editable (unless the recurring charges are locked, see below).

Figure 578 Recurring charges edit button

31.1.3 Clearing recurring charge item

From the recurring charge list page, click on the Clear button (Figure 579). This will remove the customer from this recurring charge and reset the last charge date, allowing a new customer to be assigned to it.

Figure 579 Recurring charges clear button

31.1.4 Deleting recurring charge item

From the recurring charge list page, click on the Delete button (Figure 580). A confirmation dialog will appear. Upon confirmation, the recurring charge item will be removed.

Figure 580 Recurring charges delete button

31.1.5 Locking recurring charges

In the [Detailed administration → Recurring charges](#) section, select the option to lock recurring charges.

Locking recurring charges is useful to keep the current name, consumable and charge frequency locked except for facility managers. User office staff can only assign the items and charge them but cannot edit anything else (Figure 581).

Modify Storage bin #1

This form allows you to modify a recurring charge for a storage bin. The fields include:

- Name:** Storage bin #1
- Consumable:** 1 Storage bin
- Customer:** Pierre Aronnax
- Project:** Cleanroom Eng
- Start charging on:** 11/02/2022
- And then every:** 4 Week Day(s)
- Until:** Choose a date
- Or after:** iterations

At the bottom are two buttons: **Save** (green) and **Save and charge now** (orange).

Figure 581 Recurring charges locked form

31.1.6 Recurring charges validation

If there are any potential issues with charging for an item, the entire row will be highlighted in red (Figure 582). Hovering over the row will provide more information about the issue. Potential errors are item expired (end date or occurrences reached), customer error (inactive or access expired) or project error (project or account inactive, consumable withdraw not allowed).

Name	Item	Customer	Project	This item expired	acy	Last charge	Next charge
Cleanroom gown #1	Cleanroom gown	Pierre Aronnax (professor)	Cleanroom Eng	Every 5 days	<small>i</small>		

Figure 582 Recurring charges item expired

31.1.7 Customer upcoming charges reminder

For customers to receive reminders of their upcoming charges, the Recurring charges reminder email template must be set in [Customization → File & email templates → Reorder supplies reminder email](#).

By default, users will receive reminders 2 months prior to a recurring charge and another reminder one week prior. These parameters can be changed for each user individually in their user preferences (Figure 583). User preferences are discussed in depth in the [User Preferences](#) section.

Recurring charges reminder days	60,7	Set the number of days to receive a reminder prior to recurring charges being charged. A comma-separated list can be used.
---------------------------------	------	--

Figure 583 Recurring charges reminder days

31.2 Web address

The recurring charges page is accessible at site-address/recurring_charges/. For example, www.nemo.com/recurring_charges/. The page is accessible from the navigation bar by clicking Administration then clicking Recurring charges.

31.3 Mobile device recurring charges page

There are no mobile device views for the recurring charges page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

31.4 Recurring charges page customizations

There are several customizations available for recurring charges. They are discussed in the [Customizations → Recurring charges](#) section.

32 Remote work (staff only)

The remote work page allows staff to review and validate any work performed by staff on behalf of a user (Figure 584). Work can be reviewed for any staff member or all staff members and the month/year is selectable. Staff can validate work performed to confirm charges before billing.

Remote work

This page displays remote work done by NanoFab staff on behalf of users. You can filter by which staff member performed the work, and when, by using the dropdown boxes below. Each charge can be validated, which means that you have confirmed that the charge is legitimate and correct, and no adjustment needs to be made to it. Press the green 'Validate' button on an individual row to validate a charge. Charges that have already been validated are highlighted in green.

Do not validate a charge if part or all of it is incorrect. Instead, visit the user office so an adjustment can be entered into the billing system. Furthermore, please visit the user office if there is a charge that you forgot to enter.

There are no mobile device views for the remote work page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

32.4 Remote work page customizations

There are no customizations for the remote work page.

33 Resources (staff only)

The resources page lists all resources, grouped by category. Resources in green are currently available while resources in red are unavailable (Figure 595).

The screenshot shows a page titled "Resources". Below the title, a message states: "Below is a list of resources, grouped by category. Resources in green are currently available while resources in red are unavailable. Click on a resource to modify its availability, status message or to schedule an outage. When a resource is unavailable, users are blocked from using tools or login to areas that fully depend on that resource." A section titled "Gases" contains a list of resources: 2% SiH4, Ar, CF4, CHF3, Cl2, N2, N2O, NH4, and O2 - Gas bottle change. The first seven items are in green, and the last one is in red.

O2 - Gas bottle change

Figure 595 Resources page

33.1 Resource discussion

Resources provide a method to define tool dependencies such as gases, facility spaces, and utilities that can be associated with tools are either required or non-required resources. When a resource is unavailable, users are blocked from using tools or areas that require the resource and notified on tools that with a non-required association.

Example 1, if ‘oxygen’ is defined as a resource and shutdown, all tools that have ‘oxygen’ as a required dependency will also be shutdown. All tools that have ‘oxygen’ as a non-required dependency will be noted. This can be useful for gas bottle changes.

Example 2, if ‘cleanroom’ is defined as a resource and all tools require ‘cleanroom’ then shutting down the ‘cleanroom’ resource will shut down every tool. This can be useful for weather closures or lab wide closures.

Example 3, if ‘cleanroom’ is defined as a resource and the area ‘lab’ requires the ‘cleanroom’ resource, then shutting down the ‘cleanroom’ resource will prevent users logging in to the area ‘lab’. If the area also has physical access defined, the doors for the area will not open for non-staff.

Resources can optionally be grouped by category to visually organize common resources. Resource categories are defined in the [Detailed administration → Resource categories](#) section discussed on page (468).

Resources are defined in the [Detailed administration → Resources](#) section discussed on page (470). Areas are associated with resources here.

Tools may optionally have required resources and/or non-required resources assigned. Tools are defined in the [Detailed administration → Tools](#) section discussed on page (504).

33.2 Resource Detail

To access the details of a resource, click the resource name (Figure 596).

Figure 596 Resources example of resource name

The resource details page will open and list tools and areas that fully or partially depend on the resource (Figure 597). In addition, there are buttons to modify resource availability and to schedule resource outages.

N2 (Gases)

This resource is available.

Tools that fully depend on N2

- Acid Hood
- CMP tool
- Chlorine Etch
- Contact Aligner
- Develop Hood
- Evaporator
- Fluorine Etch
- PECVD
- Solvent Hood
- Spin rinse dryer
- Sputter

Tools that partially depend on N2

- Profilometer

No areas depend on N2

33.2.1 Modify a resource

Resource status and status messages can be managed through the modify resource dialogs. A resource can be shut down and details provided to users, and a resource can be brought back to available. Information about impacted tools and areas is also provided.

33.2.1.1 Shut down an available resource

- From the resource page, click the resource name (Figure 601).

Figure 601 Resources item name

- Click the modify availability button (Figure 602).

Modify availability

Figure 602 Resources modify availability button

- The modify a resource dialog will open (Figure 603).

Modify N2 resource

N2 is currently **available**. Enter a status message to mark the resource as unavailable.

When a resource is unavailable:

- The status message will be displayed on the landing page and tool control page of each affected tool
- Tools that fully depend on this resource will be **unavailable to users**
- Areas that depend on this resource will be **unavailable to users**
- Tools that partially depend on this resource will be available to users, however it is the user's responsibility to determine if their fabrication process will succeed without the resource available

Why is the resource unavailable?

Warning: the following tools fully depend on this resource and are in use. You must disable the tools individually to block **current** use. It is recommended that you disable these tools before making the resource unavailable.

- Chlorine Etch

Modify resource

Nevermind

Figure 603 Resources modify resource dialog shutdown

- Provide a reason the resource will be unavailable (Figure 604).

Why is the resource unavailable?

Figure 604 Resources shutdown reason

- If any tools that require the resource are currently in use, a warning will be displayed (Figure 605).

Warning: the following tools fully depend on this resource and are in use. You must disable the tools individually to block current use. It is recommended that you disable these tools before making the resource unavailable.

- Evaporator

Figure 605 Resources shutdown tool in use warning

- Click the modify button to shut down the resource or, click the never mind button to return to the resource page (Figure 606).

Figure 606 Resource shutdown buttons

- Return to the resources page, if the resource was shutdown, it will now be red with the outage reason listed (Figure 607).

N2 - Nitrogen gas bottle change underway, should be completed today.

Figure 607 Resource shutdown listing

- The outage will be listed in the alerts and outages section of the landing page (Figure 608).

Resource outage: N2
Nitrogen gas bottle change underway, should be completed today.

Figure 608 Resource shutdown landing page message

- The outage will be listed in the tool control summary tab of each impacted tool
 - Required resource outage will cause the tool to be shut down (Figure 609).

This tool is **shut down**.
 A required resource is unavailable: N2 (Gases) Nitrogen gas bottle change underway, should be completed today.

Figure 609 Resource shutdown tool shutdown message

- Non-required resource outage will list a warning (Figure 610).

This tool is **operational** but not all resources are available.
 An optional resource is unavailable: N2 (Gases) Nitrogen gas bottle change underway, should be completed today.

Figure 610 Resource outage tool problem message

33.2.1.2 Enable a previously shutdown resource

- Click the red resource name (Figure 611). Note: only the red text is a link.

N2 - Nitrogen gas bottle change underway, should be completed today.

Figure 611 Resource example of red shutdown resource listing

- Click the modify availability button (Figure 612).

Modify availability

Figure 612 Resources modify availability button

- The modify a resource dialog will open (Figure 613).

Modify O2 resource

O2 is currently **unavailable**. What would you like to do?

- Make the resource available
- Change the status message for the resource outage

Modify resource

Nevermind

Figure 613 Resources modify resource dialog enable

- Select make available or change message radio button (Figure 614). The make resource available button is checked by default.

N2 is currently **unavailable**. What would you like to do?

- Make the resource available
- Change the status message for the resource outage

Figure 614 Resources enable selection

- If change message selected, update dialog box (Figure 615).

What would you like the new status message to say?

Nitrogen gas bottle change underway, should be completed today.

Figure 615 Resources update status message dialog box

- Click modify button to finish or click never mind to return to the resource page (Figure 616).

Figure 616 Resource enable buttons

- Return to the resources page, if the resource was enabled, it will now be green (Figure 617).

Figure 617 Resource enabled listing

- All alerts and tool restrictions are removed.

33.2.2 Scheduled resource outages

Resource outages can be scheduled when the start and end time is known. Examples include gas bottle changes or facility maintenance that will happen in a predictable manner. Outages automatically start and end. Once the end time is past, the outage will be hidden. A history of scheduled outages is maintained in the [scheduled outages table](#) of the database as discussed on page 483.

33.2.2.1 Create a scheduled resource outage

- From the resource page, select the resource of interest (Figure 618).

Figure 618 Resource item name link

- Click the Schedule outage button on the resource detail page (Figure 619).

Figure 619 Resource scheduled outage button

- The scheduled resource outage dialog page will open (Figure 620).

Schedule N2 outage

You can schedule a resource outage to occur for a specific time window. This prevents users from using affected tools and areas, **but will not kick users off if they're already logged in to an area or using a tool**. It is the staff's responsibility to ensure that all tools and areas that use the resource are properly shutdown.

When a resource is unavailable:

- The status message will be displayed on the landing page and tool control page of each affected tool
- Tools that fully depend on the resource will be **unavailable to users**
- Areas that depend on the resource will be **unavailable to users**
- Tools that partially depend on the resource will be available to users, however it is the user's responsibility to determine if their fabrication process will succeed without the resource available

Create a new N2 outage

Outage category - is there a category for this outage? This is useful for data and trend analysis

Details

What is the reason for the outage? What other details will be relevant for users to know?

Start time End time

Create outage

Figure 620 Resource scheduled outage page

- Select the optional outage category if scheduled outage categories have been defined (Figure 621). If scheduled outage categories have not been defined, this dialog will not appear. Scheduled outage categories are defined in the [Detailed administration → Scheduled outage categories](#) section discussed on page (470).

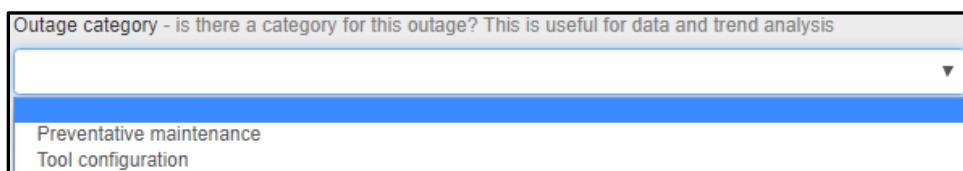

Figure 621 Resource scheduled outage category dropdown

- Provide details about the outage (Figure 622).

Details

What is the reason for the outage? What other details will be relevant for users to know?

Figure 622 Resource scheduled outage details

- Select a start time and end time (Figure 623). Clicking in the start time or end time dialog will open the clock/calendar dialog (Figure 624). The date and time will update automatically as the clock/calendar is clicked.

Start time	End time

Figure 624 Resource clock/calendar dialog

- Click the create outage button (Figure 625).

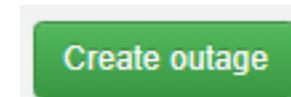

Figure 625 Resource scheduled outage button

- Scheduled outages are saved in the scheduled outage table of the database which is described in the [Detailed administration → Scheduled outages](#) section on page (483).
- The details of the scheduled outage will be displayed at the top of the resource detail page (Figure 626).

The screenshot shows the 'N2 (Gases)' resource detail page. At the top right are two buttons: 'Modify availability' (blue) and 'Schedule outage' (green). Below these buttons is a message: 'This resource is available.' To the left, under 'Scheduled outages:', is a red box containing the following information:
N2 scheduled outage
Outage category: Preventative maintenance
Starts on Monday, September 21st, 2020 @ 5:28 PM
Ends on Monday, September 21st, 2020 @ 6:28 PM
Shutdown for purity testing
To the right of the red box are two icons: a pencil and a red X.

Scheduled outages:

N2 scheduled outage

Outage category: Preventative maintenance

Starts on Monday, September 21st, 2020 @ 5:28 PM

Ends on Monday, September 21st, 2020 @ 6:28 PM

Shutdown for purity testing

Figure 626 Resource detail page scheduled outage details

33.2.2.2 Delete a scheduled resource outage

A scheduled resource outage can be deleted by clicking the (X) icon in the outage of interest at the top of the resource detail page (Figure 627). The deletion is immediate without confirmation. The outage is still saved in the database but marked as deleted and will no longer be displayed.

The screenshot shows the 'O2' resource detail page. A red box highlights an existing scheduled outage. To the right of the red box are two icons: a pencil and a red X. The outage details are as follows:
O2 scheduled outage
Outage category: Preventative maintenance
Starts on Monday, May 18th, 2020 @ 8:00 AM
Ends on Monday, May 18th, 2020 @ 12:00 PM
Gas bottle change

Figure 627 Resource existing scheduled outage dialog

33.2.2.3 Edit a scheduled resource outage

To edit a scheduled outage:

- Click the (Pencil) icon in the alert dialog of interest at the top of the resource detail page.
- The scheduled outage page will populate the details of the selected outage (Figure 628).

The screenshot shows a web-based form titled 'Edit this outage'. The 'Resource' field contains 'O2'. The 'Outage category' dropdown is set to 'Preventative maintenance'. The 'Details' input field contains 'Gas bottle change'. The 'Start time' is '05/18/2020 8:00 AM' and the 'End time' is '05/18/2020 12:00 PM'. At the bottom are two buttons: an orange 'Abandon changes' button and a green 'Save changes' button.

Figure 628 Resource edit existing scheduled outage

- Edit any fields that need updating. The process is identical to creating a scheduled outage above.
- To cancel click the abandon changes button (Figure 629).

Abandon changes

Figure 629 Resource scheduled outage edit abandon changes button

- To save the update click the save changes button (Figure 630).

Save changes

Figure 630 Resource scheduled outage edit save changes button

33.3 Web address

The resources page is accessible at site-address/resources/. For example, www.nemo.com/resources/. The page is accessible from the navigation bar by clicking Administration then clicking Resources.

33.4 Mobile device resources page

There are no mobile device views for the resources page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

33.5 Resources page customizations

There are no customizations for the resources page.

34 Staff charges (staff only)

The staff charges page provides an interface to manage work performed by staff on behalf of users. The page can take several forms depending on what a staff member is currently doing on behalf of a user.

34.1 Usage

- If a staff member is not performing any work on behalf of a user, a dialog will be displayed to select a user (Figure 631).

The screenshot shows a web page titled "Staff charges". A large text area says: "Use this form to charge a user for staff time and area access time when you are working on a project on their behalf. You may only work on one user project at a time for a customer." Below this is a section labeled "Customer" with a search input field containing the placeholder "Search for a customer".

Figure 631 Staff charge page, staff not currently working on behalf of user

- Enter a user name in the search dialog (Figure 632).

The screenshot shows a search dialog box with a blue header bar containing the text "Customer". Below it is a search input field with the placeholder "Search for a customer".

Figure 632 Staff charge user search dialog

- A list of users is returned as characters are typed (Figure 633). The user can be selected from the return list at any time by clicking the name.

The screenshot shows the same search dialog as Figure 632, but now it has suggestions listed below the input field. The first suggestion is "C" (with a small blue selection bar underneath), followed by three user names: "Conseil Aronnax (conseil)", "Staff Cleanroom (staff)", and "Tech Cleanroom (tech)".

Figure 633 Staff charge user search return list

- If the user has only one project, it will be listed and automatically selected (Figure 634).

Staff charges

Customer: Conseil Aronnax (conseil)

Staff time will be billed to the customer's only project, "Project 1"

Begin billing staff time

Figure 634 Staff charge user with one project

- If the user has multiple projects, a list of projects will be returned to select from (Figure 635). Click one of the available projects to select it (Figure 636).

Staff charges

Customer: Ned Land (ned)

Which of the customer's projects would you like to bill?

- Project 1
- Project 2

Begin billing staff time

Figure 635 Staff charge user with multiple projects

Which of the customer's projects would you like to bill?

- Project 1
- Project 2

Figure 636 Staff charge user project selection

- Click the begin billing button to start charging staff time (Figure 637). The user, project, and start time will be recorded in the staff charges table of the database which is discussed in the [Detailed administration → Staff charges](#) section on page 486.

Begin billing staff time

Figure 637 Staff charge begin billing button

- The navigation bar will display the charging staff time indicator in red (Figure 638).

Charging staff time

Figure 638 Staff charge navigation bar indicator

- Hovering over the charging staff time indicator will provide user and project details (Figure 639).

Figure 639 Staff charge navigation bar indicator details

- The staff member is now working on a project on behalf of a user. The staff charges page will provide dialog to stop working on the project and, if areas have been defined, provide a dialog to also begin charges for area access. In addition, if the staff member is logged into a tool on behalf of a user, it will be listed as well (Figure 640).

Staff charges

You are charging staff time to Ned Land (ned) for the project named Cleanroom Eng since Sunday, January 30th, 2022 @ 12:22 AM.

Charge note: Save

Here is a summary of the current charges:

Type	Start	End
Dicing saw usage	Sunday, January 30th, 2022 @ 12:22 AM	
Start time charge	Sunday, January 30th, 2022 @ 12:22 AM	

I have finished working on this project

I have entered a billable area on behalf of this user:

- Campus
- Cleanroom

Begin billing for area access

Figure 640 Staff charge page, staff working on project, not billing area access

- To add a charge note, simply click on the text area and enter the note (Figure 641), then click on the save button (Figure 642).

Charge note:

Figure 641 Staff charge note text area

Save

Figure 642 Staff charge text area save button

- To stop working on a project, click the finished working button (Figure 643). This will write the end time to the staff charges table of the database, turn off the charging staff time indicator, and return to the initial customer search dialog.

I have finished working on this project

Figure 643 Staff charge finished working button

- To begin billing for area access, click the area to work in (Figure 644) then click the area access button (Figure 645). The area, user, project, and start time will be recorded in the area access records table of the database which is discussed in the [Detailed administration → Area access records](#) section on page 382.

I have entered a billable area on behalf of this user:

CMP lab

Cleanroom

I have finished working on this project

I have entered a billable area on behalf of this user:

Campus
 Cleanroom

Begin billing for area access

Figure 648 Staff charge with area usage summary

34.2 Web address

The staff charge page is accessible at site-address/staff_charges/. For example, www.nemo.com/staff_charges/. The page is accessible from the navigation bar by clicking Administration then clicking Staff charges.

34.3 Mobile device staff charges page

There are no mobile device views for the staff charges page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

34.4 Staff charges page customizations

Email reminders that staff charges are underway can be sent periodically and require an email template that is used to format messages. The email template is configured in the [Customization → Staff charge reminder email](#) page detailed starting on page 333.

In addition, a timed service app must be properly configured and running which is described in [NEMO timed services](#) on page 603.

35 Project billing (user office and accounting only)

The project billing page provides staff with an interface to search for usage by account, application, or project (Figure 649).

If the billing service is not set or unavailable, this page will redirect to the [project usage page](#).

This screenshot shows the 'Usage and billing information' page for May 2020. It includes a dropdown for 'Select month' set to 'May, 2020', a date range from '05/01/2020' to '05/31/2020', a search field 'For' containing 'Search for an account, application or project', and a green 'Update' button.

Figure 649 Project billing page

35.1 Usage

The project billing page offers an additional search dialog to display all records for an account, application, or project (Figure 650).

This screenshot shows a search dialog with a label 'For' and a text input field containing 'Search for an account, application or project'.

Figure 650 Project billing search dialog

A list of items is returned as characters are typed (Figure 651). The item of interest can be selected from the return list at any time by clicking the name.

This screenshot shows a search results list within a dialog. The search term 'acc' has been entered in the input field. The results list contains:
Account 1
account
Account 2
account
Account 3
account
New test account
account

Figure 651 Project billing search dialog return list

The rest of the project billing page usage and return information is identical to the [view usage page](#) detailed on page 180.

35.2 Web address

The project billing page is accessible at site-address/project_billing/. For example, www.nemo.com/project_billing/. The page is accessible from the navigation bar by clicking Administration then clicking Project billing.

35.3 Mobile device project billing page

There are no mobile device views for the project billing page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

35.4 Project billing page customizations

There are no customizations for the project billing page.

36 Supplies (staff and user office only)

The supplies page provides staff with an interface to record distribution of consumable items and supplies to users (Figure 652). Supplies are setup in the consumables table of the database detailed in the [Detailed administration → Consumables](#) section on page 417. The consumables table facilitates tracking of quantities in stock and can trigger a notification if the stock is low.

Withdraw consumables

Use this form to charge users for consumable items & supplies.

Customer

Project

Consumables

2 inch wafer tray

Tweezers (Cost \$5.00)

Figure 652 Supply page

36.1 Usage

To withdraw a consumable item or supply:

- Enter a user name in the customer dialog (Figure 653).

Figure 653 Supply customer dialog

- A list of users is returned as characters are typed (Figure 654). The user can be selected from the return list at any time by clicking the name.

Figure 654 Supply customer dialog return list

- If the wrong name is selected, clicking the selected users name will reset the form.

- If the selected user does not have an active project, an error is displayed and the withdraw will not be allowed (Figure 655).

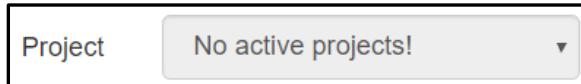

Figure 655 Supply no active project

- If the selected user has one project, it is automatically selected (Figure 656).

Figure 656 Supply single project

- If the selected user has multiple projects, click the dropdown and choose a project to bill (Figure 657).

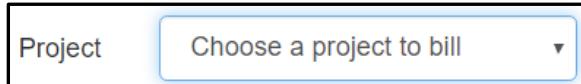

Figure 657 Supply multiple projects

- Click on the consumable item or the + icon (+) in the list to bring up the quantity popup (Figure 658).

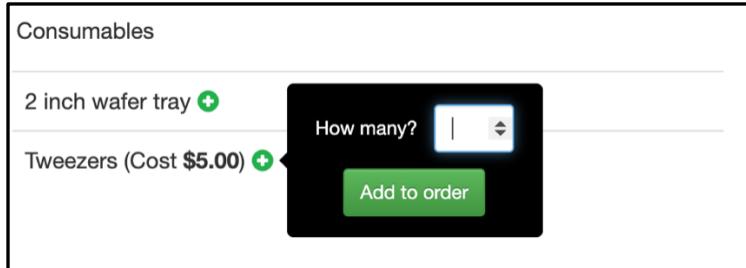

Figure 658 Supply select consumable

- The consumable item list can be organized by categories which are described in the [Detailed administration → Consumable categories](#) section on page 413.
- The cost of each consumable can be optionally listed by uploading rate information as discussed in the [Customizations → Tool rates](#) section on page 354.
- Enter an integer quantity in the quantity dialog (Figure 659).

Figure 659 Supply quantity

- Click the “Add to order” button or simply press <Enter> (Figure 660)

Add to order

Figure 660 Supply add to order

- The item is added to the “current order” on the right side of the screen (Figure 661)

Withdraw consumables

Use this form to charge users for consumable items & supplies.

Customer	Project	Consumable	Quantity	X
Captain Nemo (captain)	Cleanroom Eng	Tweezers	3	X

Current order:

Customer Project Consumable Quantity

Captain Nemo (captain) Cleanroom Eng Tweezers 3 X

Consumables

2 inch wafer tray (Cost \$15.00) +

Tweezers (Cost \$5.00) +

Clear **Confirm**

Figure 661 Supply current order

- You can keep adding more items to the current order, for the same or for a different customer (Figure 662)

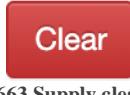

Current order:

Customer	Project	Consumable	Quantity	X
Captain Nemo (captain)	Cleanroom Eng	Tweezers	3	X
Captain Nemo (captain)	Cleanroom Eng	2 inch wafer tray	10	X
Ned Land (ned)	Cleanroom Eng	Tweezers	2	X

Clear **Confirm**

Figure 662 Supply multiple items order

- You can click the clear button (Figure 663) to clear the current order.

Clear

Figure 663 Supply clear button

- Click the confirm button (Figure 664).

Confirm

Figure 664 Supply confirm button

- If the withdraw was successful
 - The transaction is recorded in the consumable withdraws table of the database described in the [Detailed administration → Consumable withdraws](#) section on page 415.
 - The total quantity in stock is updated in the consumables table of the database unless the item's reusable property is set to True.
 - A success message is displayed at the top of the page (Figure 665).

The withdrawal of 2 of Tweezers for Ned Land (ned) was successfully logged and will be billed to project Cleanroom Eng. X

Figure 665 Supply success message

- If the withdraw was not successful
 - A failure reason is provided at the top of the page (Figure 666).

Oops! Something went wrong. Please correct the errors highlighted below.

Figure 666 Supply fail message

- Any missing information is highlighted next to the dialog box (Figure 667).

This field is required.

Figure 667 Supply missing information

- If a non-integer is entered for the quantity, it is noted at the quantity dialog (Figure 668).

Figure 668 Supply integer error

- Correct any errors and try again.

36.2 Web address

The supplies page is accessible at site-address/consumables/. For example, www.nemo.com/consumables/. The page is accessible from the navigation bar by clicking Administration then clicking Supplies.

36.3 Mobile device supplies page

There are no mobile device views for the supplies page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

36.4 Supplies page customizations

Supply rates can be displayed next to each supply in the consumable list and are discussed in the [Customizations → Tool rates](#) section on page 354.

37 Training (staff and tool superusers only)

The training page provides staff and tool superusers with an interface to record user training and qualify users (Figure 669).

The screenshot shows a web-based application titled "Training". The header includes instructions: "Use this form to charge users for training sessions.", "You can add participants to a training session by clicking the 'Add another participant' link. Remove a participant or blank row by clicking the circled X on that row.", and "When a user has successfully completed a training session you have the option to check the "Qualify" box, which qualifies the user for that tool." Below these are six columns: Trainee, Tool, Project, Duration (in minutes), Training type, and Qualify. The first two columns contain input fields with placeholder text. The fourth column has a dropdown menu. The fifth column has a checkbox labeled "Qualify" which is checked. A link "Add another participant" is located below the table. At the bottom left is a button labeled "Record training sessions".

Figure 669 Training page

37.1 Usage

To record user training:

- Enter the user name in the trainee dialog box (Figure 670).

The screenshot shows a "Trainee" dialog box with a single input field. The placeholder text "Trainee" is visible above the input field.

Figure 670 Training trainee dialog

- A list of users is returned as characters are typed (Figure 671). The user can be selected from the return list at any time by clicking the user name.

The screenshot shows a "Trainee" dialog box with a search input field containing the text "ned". Below the input field is a list box containing the user "Ned Land (ned)".

Figure 671 Training trainee dialog return list

- If the incorrect user is selected, click the users name in the trainee dialog box to clear the entry and retry.
- Enter the tool in the tool dialog box (Figure 672).

Figure 672 Training tool dialog

- A list of tools is returned as characters are typed (Figure 673). The tool can be selected from the return list at any time by clicking the tool name. Staff can select any tool, superusers can only select the tools they are superusers for.

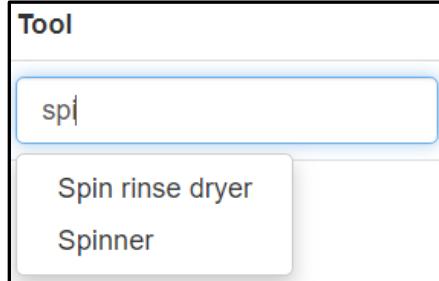

Figure 673 Training tool dialog return list

- If the incorrect tool is selected, click the tool name in the tool dialog box to clear the entry and retry.
- If the user has only one project, it will be selected automatically (Figure 674).

Figure 674 Training single project

- If the user has multiple projects, click the dropdown and choose a project to bill (Figure 675).

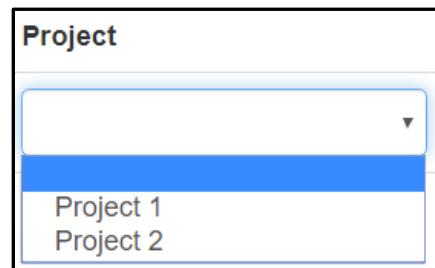

Figure 675 Training multiple projects

- Enter the training time in the duration dialog box in minutes (Figure 676).

A rectangular input field with a black border. The text "Duration (in minutes)" is centered at the top in bold black font. Below it is a large, empty rectangular area for input.

Figure 676 Training duration

- Select the training type from the dropdown (Figure 677).

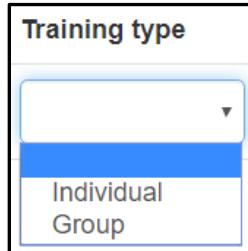

Figure 677 Training type

- If the user should not be qualified on the tool at this time, uncheck the qualify checkbox (Figure 678).

Figure 678 Training qualify

- More training sessions can be added by clicking the add participant link (Figure 679). Each training row is independent so multiple training sessions do not need to be related in any way.

[Add another participant](#)

Figure 679 Training add participant

- If a training session row needs to be removed, click the next to the trainee name.
- Click the record button to complete the training (Figure 680).

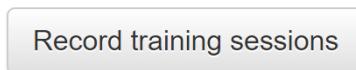

Figure 680 Training record button

- If the training was recorded successfully
 - A training record will be written in the training sessions table of the database described on the [Detailed administration → Training sessions](#) page detailed on page 531.
 - If the qualify box was checked, the membership histories table in the database is updated. The membership history table is described on the [Detailed](#)

- [administration → Membership histories](#) page detailed on page 441. If the selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- A success dialog will be displayed (Figure 681). Click continue to return to the NEMO landing page.

Figure 681 Training success message

- If the training was not recorded successfully, an error message is displayed (Figure 682). Correct any missing information and retry.

Figure 682 Training error message

37.2 Web address

The training page is accessible at site-address/training/. For example, www.nemo.com/training/. The page is accessible from the navigation bar by clicking Administration then clicking Training.

37.3 Mobile device training page

There are no mobile device views for the training page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

37.4 Training page customizations

There are no customizations for the training page.

38 Users (any staff role – read-only for staff and accounting)

The users page provides an interface to add new users and update existing users (Figure 683). Users can be associated with projects, tools, and physical access areas from this dialog.

However, this feature exposes a limited number of parameters of the user table that are necessary to create users. A role beyond user must be defined in the users table of the database discussed in the [Detailed administration → Users](#) section on page 540.

User office and managers have full access to this feature however, other staff member only have read-only access.

38.1 Create new user

To create a new user:

- Click the new user button (Figure 684).

Figure 684 Users new user button

- The new user form will open (Figure 685, Figure 686). The items displayed on the form depend on the functionality that has been defined in NEMO.

Figure 685 Users new user form

The screenshot shows a user interface for managing user profiles. It includes sections for:

- Projects:** A button to "Add a project". Below it, a message states: "This user has no assigned projects."
- Tool qualifications:** A button to "Add a qualification". Below it, a message states: "This user is not qualified to use any tools."
- Physical access levels:** A section titled "Tablet controlled" which is highlighted with a blue background. It contains a note: "Selecting a parent area access will give access to all sub-areas" and a list of sub-accesses:
 - Campus
 - Cleanroom access
 - Cleanroom access weekdays
- Safety training:** A section titled "Safety training" containing a list of training types:
 - Cleanroom training
 - Chemical handling
 - Fume hood training
 - Compressed gases training
 - Equipment training
- Onboarding phases:** A section titled "Onboarding phases" containing a list of orientation types:
 - General orientation
 - Cleanroom orientation
- Documents:** A message stating "This user doesn't have any documents." followed by a "Choose Files" button which shows "No file chosen".

Figure 686 Users new user form continued

- Required: enter first name in dialog box (Figure 687).

Figure 687 New user first name dialog box

- Required: enter last name in dialog box (Figure 688).

Figure 688 New user last name dialog box

- Required: enter username in dialog box (Figure 689). Some extra validation on the username format can be added by setting USERNAME_REGEX in settings.py

Figure 689 New user username dialog box

- Required: enter email address in dialog box (Figure 690).

Figure 690 New user email address dialog box

- Select user type from dropdown (Figure 691). User types are defined in the user types table of the database on the [Detailed administration → User types](#) page detailed on page 538.

Figure 691 New user type dialog box

- Enter a badge number that is associated with the user for accessing doors and kiosks (Figure 692). This is easily accomplished by having a badge reader on a computer where user profiles are created. Click inside of the dialog box then scan the badge.

Figure 692 New user badge number dialog box

- Enter notes for the user (Figure 693).

Figure 693 New user notes dialog box

- Enter an access expiration date (Figure 694). This can be useful to track safety training end dates or project expiration dates and will automatically turn off the users access on the designated date. Leave blank for no expiration.

Figure 694 New user access expiration dialog box

- Clicking the one year from now will automatically set the date (Figure 695).

Figure 695 New user access expiration one-year quick link

- Clicking in the date dialog box will display the calendar dialog (Figure 696).

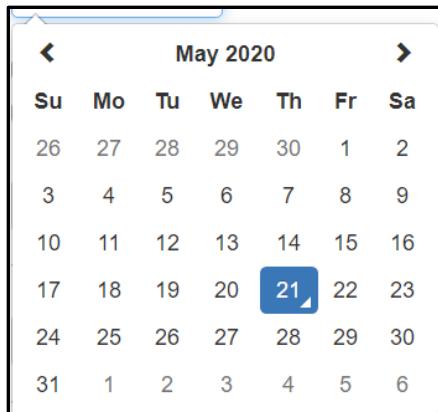

Figure 696 New user access expiration calendar dialog

- Navigate the calendar and click the date to update the dialog box.
- Make user active or not active by checking the checkbox (Figure 697). By default, a new user is active. A user that is not active cannot access NEMO or have reservations or tool usage performed on their behalf. Any change in a user status is recorded in the activity histories table of the database detailed in the [Detailed administration → Activity histories](#) section on page 375.

Figure 697 New user active checkbox

- Select facility rules tutorial required or not required by checking the checkbox (Figure 698). By default, it is required for new users. The default can be changed in the [Customization → User settings](#) section. This will display the [Facility tutorial](#) described on page 35 and block user tool reservations and tool login.

Figure 698 New user training required checkbox

- If the identity service is in use, select the domain the user belongs to (Figure 699). If only one domain has been defined, it will be selected automatically (Figure 700). The identity service is discussed in the [Configuring NEMO settings → Identity service](#) section on page 603.

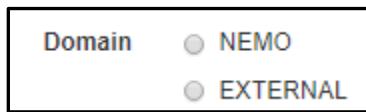

Figure 699 New user domain selection

Figure 700 New user single domain

- Enter projects to associate the user with (Figure 701).

Figure 701 New user project dialog box

- A list of projects is returned as characters are typed (Figure 702). The project can be selected from the return list at any time by clicking the project name. Repeat for all projects.

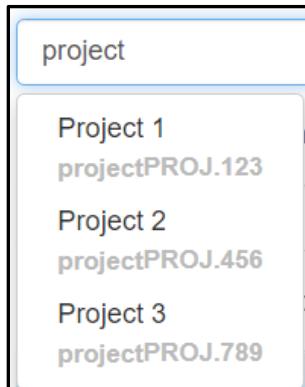

Figure 702 New user projects return list

- The selected project will appear under the dialog (Figure 703). Click the (X) to remove the user from the project.

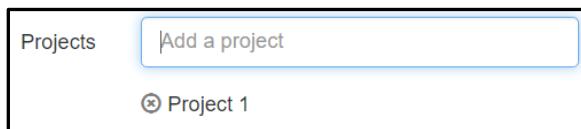

Figure 703 New user project added

- Enter tools the user is qualified on (Figure 704).

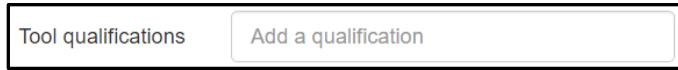

Figure 704 New user tool qualification dialog box

- A list of tools is returned as characters are typed (Figure 705). The tool can be selected from the return list at any time by clicking the tool name. Repeat for all tools.

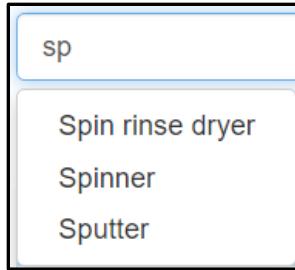

Figure 705 New user tool qualification return list

- The selected tool will appear under the dialog (Figure 706). Click the (X) to remove a tool qualification.

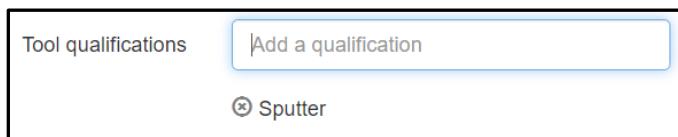

Figure 706 New user tool qualification added

- If NEMO will control area access permissions, a dialog for physical access levels will be displayed (Figure 707).

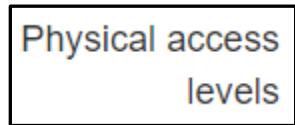

Figure 707 New user physical access levels

- Check the box for the access levels for the user (Figure 708). The physical access levels are a combination of physical areas and access schedules which are defined in the [Detailed administration → Physical access levels](#) table detailed on page 446. Areas may also have doors associated with them that are accessed through [entrance tablets](#) which are detailed on page 588.

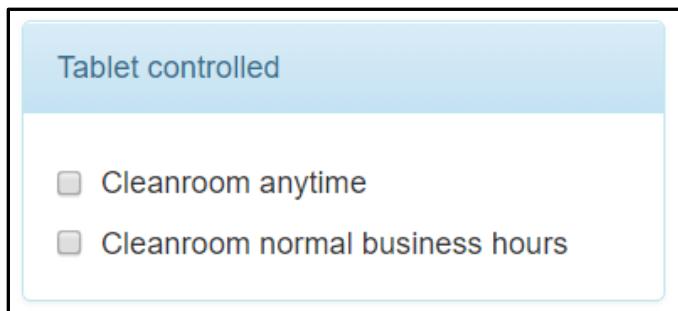

Figure 708 New user NEMO controlled doors

- Doors and access periods that are controlled by an external access control system can be setup to communicate permissions through the identity service. Any physical access levels available for NEMO to set user permissions on will be listed as badge-reader controlled (Figure 709).

Badge-reader controlled
<input checked="" type="checkbox"/> FEI FIBs - 216/G113 <input checked="" type="checkbox"/> JEOL E-Beam - 216/G107 <input checked="" type="checkbox"/> NanoFab TEM - 216/G115

Figure 709 New user external access control

- Select physical access levels to assign to the user by checking the checkboxes.
- If onboarding phases exist, select the ones that apply to this user by checking the checkboxes (Figure 710). Onboarding phases are defined in [Detailed administration → Onboarding phases](#).

Onboarding phases
<input type="checkbox"/> General orientation <input type="checkbox"/> Cleanroom orientation

Figure 710 New user onboarding phases

- If safety trainings exist, select the ones that apply to this user by checking the checkboxes (Figure 711). Safety trainings are defined in [Detailed administration → Safety trainings](#).

Safety training
<input type="checkbox"/> Cleanroom training <input type="checkbox"/> Chemical handling <input type="checkbox"/> Fume hood training <input type="checkbox"/> Compressed gases training <input type="checkbox"/> Equipment training

Figure 711 New user safety trainings

- If user documents are enabled in [Customization → User](#), you can select and upload multiple files by clicking the choose files button (Figure 712).

Choose Files

Figure 712 New user choose files button

- Click the create user button to save the user information (Figure 713).

Figure 713 New user create user button

- If the user was recorded successfully
 - Any externally controlled door accesses are updated through the identity service.
 - A record is written in the users table of the database creating the user.
 - Any tool qualifications selected are written to the membership table.
 - Any physical access levels granted are written to the membership table.
 - Any projects selected are written to the membership table.
- If the user was not recorded successfully
 - If required fields are left blank, a notice message will be displayed at the field (Figure 714).

Figure 714 New user blank field error

- If an invalid email address is entered, a warning message will appear at the top of the page (Figure 715) and an error message will be displayed at the email address dialog box (Figure 716).

Oops! Something went wrong. Please correct the errors highlighted below.

Figure 715 New user error message

Enter a valid email address.

Figure 716 New user bad email address message

38.2 Modify existing user

To modify an existing user:

- From the users page, enter a user name in the search dialog (Figure 717).

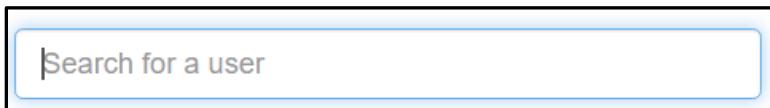

Figure 717 User page search dialog

- A list of users is returned as characters are typed (Figure 718). The user can be selected from the return list at any time by clicking the user's name.

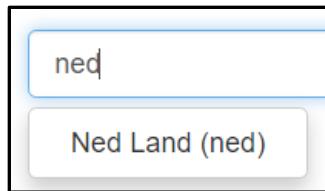

Figure 718 User page search return list

- You can also click on the edit button of the users list (Figure 719).

First Name	Last Name ▾	Username	Type	Active	Staff	User Office	Accounting	Admin	
Pierre	Aronnax	professor	Faculty	✓	✓				Edit Deactivate

Figure 719 User list edit

- Upon selecting the user, the modify user page will be displayed (Figure 720).

The screenshot shows the 'Modify user' dialog box. At the top left are three links: 'Search for another user', 'View user history', and 'Safely deactivate this user'. The main title is 'Modify user'. Below it are six input fields:

- First name:** Ned
- Last name:** Land
- User name:** ned
- E-mail address:** ned.land@nautilus.com
- Type:** Staff (with a dropdown arrow)
- Badge number:** (empty field)

Figure 720 Modify user page

- The modify user dialog reads the information currently saved user profile including project associations, tool qualifications, and physical access levels. They can be changed under the same process detailed in the create user section above. Once changes are complete, click the save changes button at the bottom of the page (Figure 721).

Figure 721 Modify user save button

38.3 View user history

From the modify user page, click on the view user history button (Figure 722).

Figure 722 Modify user view history link

- Clicking the link opens the membership history page for this user (Figure 723).
- The membership history tracks several user actions, who took them, and when. Records are stored in the membership histories table of the database detailed in the [Detailed administration → Membership histories](#) section on page 441.
 - Activated or deactivated user
 - Joined or removed from a project
 - Joined or removed from a tool qualification
 - Joined or removed from a physical access level.
 - Any tracked changes from the auditlog library

History for Ned Land (ned)

Date & time	User	Action
Thursday, April 9th, 2020 @ 2:38 PM	Captain Nemo (captain)	This user now belongs to physical access level "Cleanroom anytime".
Monday, April 13th, 2020 @ 2:43 PM	Captain Nemo (captain)	This user no longer belongs to project "Project 2".
Monday, April 13th, 2020 @ 2:43 PM	Captain Nemo (captain)	This user no longer belongs to project "Project 3".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	User deactivated.
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	This user no longer belongs to tool "PECVD".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	This user no longer belongs to physical access level "Cleanroom anytime".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	This user no longer belongs to project "Project 1".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	User activated.
Tuesday, April 14th, 2020 @ 11:01 PM	Captain Nemo (captain)	This user now belongs to physical access level "Cleanroom anytime".
Tuesday, April 14th, 2020 @ 11:03 PM	Captain Nemo (captain)	This user now belongs to project "Project 1".
Thursday, April 16th, 2020 @ 5:34 PM	Captain Nemo (captain)	This user now belongs to tool "PECVD".
Thursday, April 16th, 2020 @ 5:34 PM	Captain Nemo (captain)	This user now belongs to tool "Sputter".

Figure 723 Modify user history detail

38.4 Safely deactivate this user

From the user list, click the deactivate button (Figure 724). This is only displayed if an active user was selected. Safely deactivating a user will ensure no additional billable activity can be accumulated once the user is deactivated.

Figure 724 User safe deactivation link

- Clicking the link checks to be sure it is safe to deactivate a user by checking for current billable tasks such as:
 - Future reservations
 - Tools currently in use
 - Currently in an access-controlled area
 - Staff charges currently in progress
- Any current activity is displayed by category (Figure 725).
- Checkboxes are selected by default to remove any current billable tasks. Uncheck them to skip removing a category of tasks.
- Clicking the deactivate user button will cancel any reservations and end any current charges for checked usage categories.

Safe deactivation for Ned Land (ned)

Upcoming reservations

There are two reservations for Ned that are upcoming or in progress.

- Cancel all future reservations for Ned

Tool	Project	Start	End
Fluorine Etch	Project 1	Friday, May 22nd, 2020 @ 11:00 AM	Friday, May 22nd, 2020 @ 1:00 PM
Sputter	Project 1	Friday, May 22nd, 2020 @ 10:00 AM	Friday, May 22nd, 2020 @ 12:00 PM

Tool usage

Ned is using two tools.

- Disable all tools for Ned

Tool	Project	Start
PECVD	Project 1	Thursday, May 21st, 2020 @ 5:47 PM
Ellipsometer	Project 1	Thursday, May 21st, 2020 @ 5:44 PM

Area access

Ned is currently in the CMP lab.

- Force Ned to log out of the CMP lab

Staff charges

Captain Nemo (captain) is working on the project named "Project 1" for Ned Land (ned) since Thursday, May 21st, 2020 @ 5:44 PM.

- End all staff charges

Deactivate user

Figure 725 User safe deactivate page

38.5 Web address

The users page is accessible at site-address/users/. For example, www.nemo.com/users/. The page is accessible from the navigation bar by clicking Administration then clicking Users.

38.6 Mobile device configuration agenda page

There are no mobile device views for the users page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

38.7 Users page customizations

38.7.1 User settings

There are several customizations available for user pages. They are discussed in the [Customizations → User](#) section.

38.7.2 Identity service

The identity service requires custom programming to provide a bridge between NEMO and outside systems such as multiple LDAP servers for different types of users, and external access control systems to authorize users to access doors. It is beyond the scope of this manual to provide programming examples for bridge software, but details of the NEMO settings can be found in the [Configuring NEMO settings → Identity service](#) section on page 603.

39 Projects (PIs only)

39.1 Usage

This page simply displays the projects the user is a Principal Investigator on. Project Investigators can be set in the [Projects Administration](#) page.

It will display basic information about the project as well as users on the project (Figure 726).

NEMO Calendar Tool control Status dashboard Buddy board Administration ▾

39.2 Web address

The projects page is accessible at site-address/projects/. For example, www.nemo.com/projects/. The page is accessible from the navigation bar by clicking Administration then clicking Projects (Figure 727).

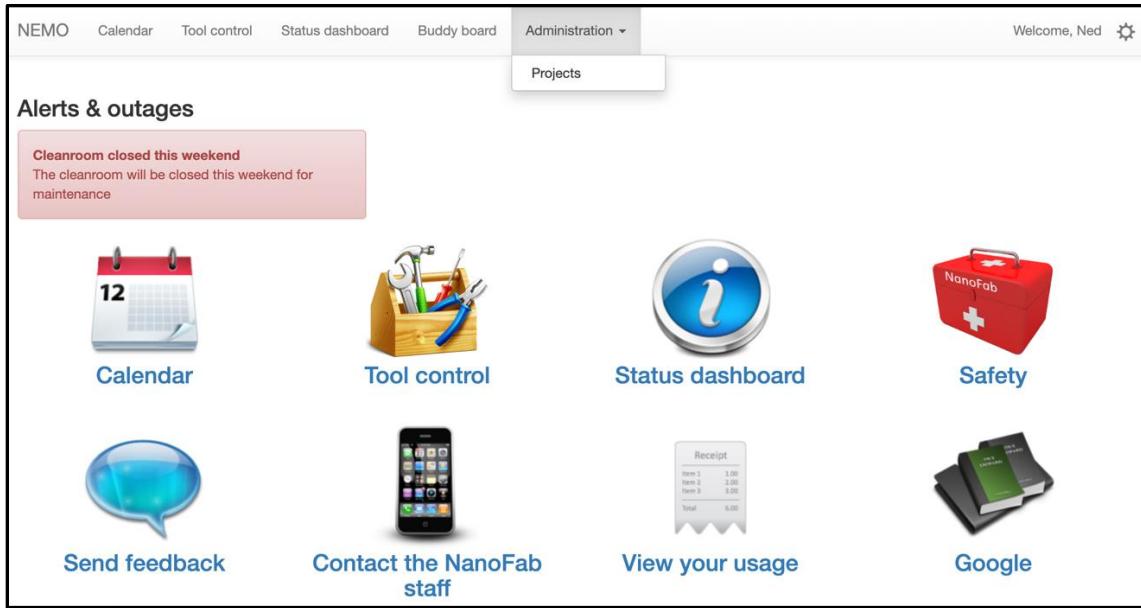

Figure 727 Projects view address

39.3 Mobile device

There are no mobile device views for the users page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

39.4 Projects page customizations

There are no customizations for the impersonate page.

40 Customization (admin only)

The customization section can be used to tailor NEMO to the needs of a particular lab. Customizations include where NEMO will send emails, what the emails should look like, page customizations, and functional settings.

HTML content creation and formatting are beyond the scope of this manual. Many resources can be found online.

However, sample email templates can be found on the NEMO repository on GitHub at

<https://github.com/usnistgov/NEMO/tree/master/resources/emails>

40.1 Application

The application settings can be used to allow users to manually log into and out of areas and to set the facility name, site title, and the project selection template (Figure 728). The log in and log out features are useful for labs that use NEMO for door control in the event of an outage and also for labs that do not use door control but want to track lab access. Tools can be configured to require a user to be logged into an area before they will be allowed to activate the tool. Customizing the facility name and site title can be used to tailor the application to your institution. Customizing the project selection template allows for custom project information to be displayed when users are selecting a project to associate a reservation/usage with.

Application settings

Area login/logout

Allow users to log themselves into access controlled areas from the landing page
 Allow users to log themselves out of access controlled areas from the landing page
 Show access controlled area login/logout button on calendar view (requires login and/or logout feature enabled above)

Facility name The name of the facility to use in all templates.

Site title The name of the site to use in all templates/headers.

Save settings

Figure 728 Customization application settings

- If the “allow users to log themselves into access controlled areas” checkbox is checked, the log in dialog is displayed (Figure 729) on the [NEMO landing page](#) as described on page 33.

Figure 729 Landing page log in dialog box

- If the “allow users to log themselves out of access controlled areas” checkbox is checked, the log out dialog is displayed (Figure 730) on the [NEMO landing page](#) as described on page 34.

Figure 730 Landing page log out dialog box

- If the “allow login/logout in the calendar view checkbox” is checked, the area login/logout button is displayed (Figure 731) on the [NEMO calendar page header](#) when an area is selected as described on page **Error! Bookmark not defined.**. This feature requires that the allow area login and/or allow area logout features above are enabled.

Login to the Cleanroom

Figure 731 Calendar page login button

- The default facility name is “NanoFab” and will be displayed in all templates (Figure 732). To edit, click in the dialog box and enter the desired facility name.

40.2 Calendar

The calendar settings can be used to set the default calendar view, first day of the week, default calendar start time, and to customize how dates are displayed for international support (Figure 734).

Calendar settings

Default view Week view Month view Day view

First day of the week Monday Sunday

Start of the day The time the day starts in the calendar view (24h format).

Outage recurrence limit days The maximum number of days a recurring scheduled outage can be set in advance.

The following settings allow to customize the date format in the different calendar views. See [FullCalendar documentation](#) for more information on the syntax.

Time format The time format for the calendar.

Day column format The column date format for the day view.

Week column format The column date format for the week view.

Month column format The column date format for the month view.

Current time indicator Show current time indicator on the calendar

Areas Also show areas (for reservations) that the user doesn't have access too (they will be grayed out)

Overview options: Enable all tools option Enable all areas option Enable all tools & areas option
 Show qualified tools button

Figure 734 Customization calendar settings

The default view can be changed between week view, month view, or day view by checking the desired radio button (Figure 735).

Default view: Week view Month view Day view

Figure 735 Customization calendar default view

The first day of the week displayed on the week view and month view can be changed between Monday and Sunday by checking the desired radio button (Figure 736).

Figure 736 Customization calendar first day of week

The start time in the week view and day view can be set by entering a time in 24-hour format (Figure 737).

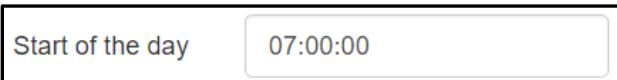

Figure 737 Customization calendar start time

The number of days in advance to create recurring outages can be set by entering an integer number (Figure 738).

Figure 738 Customization calendar recurring outage days in advance

The time format for the calendar can be customized by entering the format string in the dialog box (Figure 739). See the [Full Calendar documentation](#) for more information on the syntax.

Figure 739 Customization calendar time format

The date format for the day column can be customized by entering the format string in the dialog box (Figure 740). See the [Full Calendar documentation](#) for more information on the syntax.

Figure 740 Customization calendar day column format

The date format for the week column can be customized by entering the format string in the dialog box (Figure 741). See the [Full Calendar documentation](#) for more information on the syntax.

Figure 741 Customization calendar week column format

The date format for the month column can be customized by entering the format string in the dialog box (Figure 742). See the [Full Calendar documentation](#) for more information on the syntax.

Figure 742 Customization calendar month column format

The calendar will highlight the current day and can optionally display a red pointer to indicate the current time on day and week calendar views. Display the red pointer to indicate the time by checking the show current time indicator checkbox (Figure 743).

Figure 743 Customization calendar time indicator

The calendar will show a user the areas they specifically have permission to enter. However, a user can be given access to see the reservations for all areas by checking the Also show areas checkbox (Figure 744).

Figure 744 Customization calendar show all areas checkbox

The calendar can show options to display reservation/usage for all tools, all areas or all tools and areas as well as showing a button to show only qualified tools for non-staff users (Figure 745).

Figure 745 Customization calendar show overview options

40.3 Email Addresses

NEMO can send email messages in support of a variety of features (Figure 746). The email address customization provides the capability to send different types of email messages to different people or departments in the organization.

The screenshot shows a configuration interface for email addresses. At the top, it says 'Email addresses'. Below that is a table with four rows, each containing a category name, an email address placeholder, and a descriptive text block. A green 'Save email addresses' button is at the bottom.

Feedback	feedback@example.org	User feedback from the Feedback page is sent to this email address.
Safety	safety@example.org	Safety suggestions and observations are sent to this email address.
Abuse	abuse@example.org	Alerts about user activities that could constitute 'abuse' are sent to this email address. Examples include missed reservations and unauthorized tool access.
User office	information@example.org	The main point of contact for users to obtain NanoFab information. Automated emails sent from NEMO are typically 'from' this address.

Save email addresses

Figure 746 Customization email addresses

Feedback – emails generated by the send feedback page are sent to this email address. The send feedback feature is described in the [send feedback](#) section on page 171. The send feedback feature requires both the email address and email template to be configured in the customizations. The feedback email customization is described in the [feedback email](#) section below on page 325.

Safety – emails generated by the safety page are sent to this email address. The safety page is described in the safety section on page 160. Safety email notifications require both the email address and email template to be configured in the customizations. The safety email customization is described in the [safety issue email](#) section below on page 333.

Abuse – emails generated by either a missed reservation, unauthorized tool login attempt, or tutorial completion are sent to this email address. The missed reservation feature is described in the [reservation](#) section on page 61. The [tool login](#) feature is described on page 99. The [rules tutorial](#) feature is described on page 35. Both the email address and email template must be configured in the customizations. The [missed reservation email](#) customization is described in the missed reservation email section below on page 327. The [unauthorized tool login email](#) customization is described below on page 335. The [tutorial completion email](#) customization is described below on page 325.

User office – all emails initiated by NEMO will be from this email address. For example, reservation reminders, missed reservations, and tool in use reminders. Emails initiated by a user will be from the user that initiated the email. For example, feedback emails, staff canceling a user's reservation, and safety.

40.4 File & email templates

40.4.1 General instructions

Examples of email templates for most features can be found on GitHub in the [resources/emails folder](#).

To upload a file or email template:

- Click the choose file button to open the file selection dialog (Figure 747).

Figure 747 Customization instructions choose file button

- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view or download the file will be shown (Figure 748).

Access request notification email

This email is sent to the person who created the request when an access request is created or updated. The other users present on the request as well as the facility managers are cc'ed.

The following context variables are provided when the email is rendered:

- `template_color` - the color: green if approved, red if denied, blue otherwise
- `access_request` - the user's access request that was created or updated
- `status` - the status of the request: received, updated, approved or denied
- `access_requests_url` - the URL to the access requests page

[access_request_notification_email.html](#)

Figure 748 Customization instructions file loaded

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear (Figure 749).

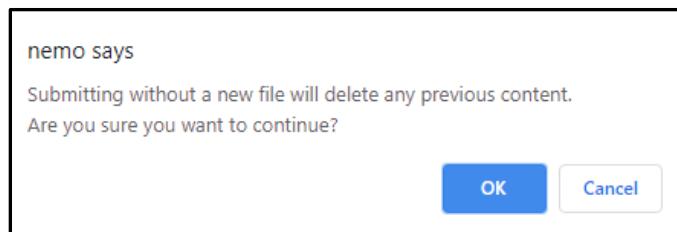

Figure 749 Customization instructions file deletion confirmation

- Click OK to delete the file or Cancel to leave the file.

- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button (Figure 750).

Figure 750 Customization instructions show content button

- The current file content will be displayed in a separate window.

To download the contents of the currently loaded file:

- Click the blue anchor link with the full filename (Figure 751).

[access_request_notification_email.html](#)

Figure 751 Customization instructions download link

- The current file will be downloaded by your web browser

40.4.2 Login banner

The customization for the login banner can be configured using html to display information to users on the login page and is uploaded and viewed through this dialog (Figure 752). The login banner is optional, and no default value is displayed if not configured. More information about the [login](#) page can be found on page 18.

Login banner

The login banner is an informational message displayed underneath the username and password text boxes on the login page. You can customize this to convey rules for NEMO users at your organization.

Figure 752 Customization login banner

To create a custom login banner

- Use any html editor to create the desired content
- Example
 - The html code in Figure 753

```

<H2><center>
Welcome to our lab!
</center></H2>
<H3><center>
If you are having trouble with your user name or password, please see a user office staff member.
</center></H3>

```

Figure 753 Customization login banner html

- Will produce the banner in Figure 754 on the login page

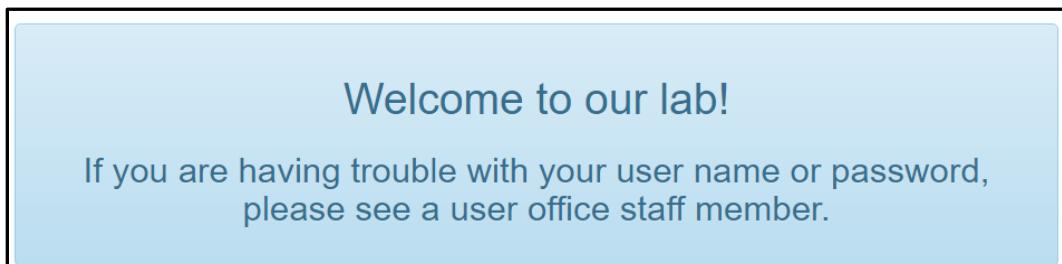

Figure 754 Customization login banner html rendered

To upload a login banner:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload login banner button to load the file.
- The selected file will be renamed ‘login_banner.html’ and saved in the media folder of the NEMO website.

40.4.3 Facility failed login page

The customization for the failed login page can be configured using html to display login trouble information to users and is uploaded and viewed through this dialog (Figure 755). The failed login configuration is optional, and a default value is displayed if not configured. More information about the [login](#) page can be found on page 18.

"Facility failed login" message

This message is displayed after authentication when either no matching username could be found in the database or if that user has been deactivated.

The HTML you upload is rendered with the Django template engine. You can use JavaScript (including jQuery) within the message.

Figure 755 Customization failed login

To create a custom failed login page:

- Use any html editor to create the desired content
- Example
 - The html code in Figure 756

```

<H2><center>
There was a problem logging you in!
</center></H2>
<H3><center>
We cant find you on our list of active users. If you have used the lab before, your username may
be deactivated for some reason. Please see a user office staff member.
</center></H3>

```

Figure 756 Customization failed login html

- Will produce the failed login page in Figure 757

Figure 757 Customization failed login html rendered

To upload a login banner:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload failed login page button to load the file.
- The selected file will be renamed 'authorization_failed.html' and saved in the media folder of the NEMO website.

40.4.4 Introduction for Safety suggestions and observations page

The customization for the introduction for safety suggestions and observations page can be configured using html to display lab specific safety information to users on the safety page and is uploaded and viewed through this dialog (Figure 758). The safety introduction is optional, and a default value will be displayed if not configured. More information about the [safety](#) page can be found on page 160.

Introduction for "Safety suggestions and observations" page

What would you like everyone to know about safety policy and procedures? This introduction will be presented at the top of the safety page. You can use HTML to modify the look of the text.

Figure 758 Customization safety introduction

To create a custom safety introduction

- Use any html editor to create the desired content
- Example
 - The html in Figure 759

```
<p style="font-weight:bold; color:red">For emergency related safety issues involving chemicals spills and exposures, fires, toxic gas release, or any personal injuries call 911 and tell them where you are.</p>

<p>This lab values safety and strives to create a safe working environment for everyone. We invite your suggestions and observations in order to provide a safer and more effective environment for all users and staff. Use this form to report non-emergency related safety issues, unsafe working conditions, housekeeping suggestions, or observations directly to the NanoFab management. This will generate an email that will be automatically sent to the NanoFab management. You can send your comments or concerns completely anonymously or provide your name so that we can follow up with you within 3 business days. If you feel this should be handled sooner than 3 business days, you should contact the lab manager.</p>
```

Figure 759 Customization safety introduction html

- Will produce the introduction in Figure 760 on the safety page:

For emergency related safety issues involving chemicals spills and exposures, fires, toxic gas release, or any personal injuries call 911 and tell them where you are.

This lab values safety and strives to create a safe working environment for everyone. We invite your suggestions and observations in order to provide a safer and more effective environment for all users and staff. Use this form to report non-emergency related safety issues, unsafe working conditions, housekeeping suggestions, or observations directly to the NanoFab management. This will generate an email that will be automatically sent to the NanoFab management. You can send your comments or concerns completely anonymously or provide your name so that we can follow up with you within 3 business days. If you feel this should be handled sooner than 3 business days, you should contact the lab manager.

To upload a login banner:

- Click the choose file button to open the file selection dialog
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload login banner button to load the file.
- The selected file will be renamed ‘safety_introduction.html’ and saved in the media folder of the NEMO website.
- To view the uploaded content, navigate to the safety page by clicking the link provided (Figure 761).

Introduction for "[Safety suggestions and observations](#)" page

Figure 761 Customization safety introduction page link

40.4.5 Facility rules tutorial page

The customization for the facility rules tutorial page can be configured using html to display lab specific tutorial information to users and is uploaded and viewed through this dialog (Figure 762). The rules tutorial is optional however there is no default content therefore users with training required while no rules tutorial has been configured will require staff to uncheck the users training required status. More information about the rules tutorial can be found in the [landing page](#) section on page 35.

"Facility rules tutorial" page

The facility rules tutorial is an opportunity to provide new users with a tutorial to your facility operating procedures and rules. The HTML you upload is rendered with the Django template engine. You can use JavaScript (including jQuery) within the page.

- The form should include `{% csrf_token %}` inside the form tags.
- Completion of the HTML form should be POSTed to "`{% url 'facility_rules' %}`" (exactly as is).

Upon completion, the user's "facility rules tutorial required" attribute is set to false, and they are able to make reservations and control tools.

Figure 762 Customization rules tutorial

The tutorial is triggered by a flag in a user's profile and by default is set to require training upon user creation. NEMO user profiles are discussed in the [Users](#) section described on page 293. A notification is displayed on the landing page and is the user access point for completing the tutorial which is described in the [landing page](#) section on page 35.

To create a custom rules tutorial

- Use any html editor to create the desired content
- The HTML uploaded is rendered with the Django template engine.
- JavaScript (including jQuery) can be used within the page.
- To mark the training as complete, the form must be POSTed to the 'facility_rules' URL to enable the user to make reservations and control tools.
- Example
 - The html in Figure 763

```
<h1>NanoFab Rules</h1>

<form action="{% url 'facility_rules' %}" method="post">
    {% csrf_token %}

    <div id="introduction">
        <h4>Introduction</h4>
        <p>The NanoFab operates as a shared resource for both internal and external users. Please work with other users to ensure everyone is as productive as possible.</p>
        <p>Don't over reserve tools and if you no longer need a reservation, cancel it as soon as possible. Please be sure that you log in as soon as you begin using each tool and log out only after the tool is available for the next user.</p>
        <p><strong>Most important, clean up after yourself</strong></p>
        <button type="button" class="btn btn-success" onclick="$('div#introduction').hide(); $('#conclusion').show(); window.scrollTo(0,0);">I understand and agree</button>
    </div>

    <div id="conclusion" style="display:none">
        <p>Ultimately, the staff want to make your NanoFab experience as productive and fun as possible. We hope these rules will make everyone's life better.<br></p>
        <button type="submit" style="white-space: normal" class="btn btn-success">Click here to officially complete your training</button>
    </div>
</form>
```

Figure 763 Customization rules tutorial html

- Will produce the tutorial pages shown in Figure 764 and Figure 765

NanoFab Rules

Introduction

The NanoFab operates as a shared resource for both internal and external users. Please work with other users to ensure everyone is as productive as possible.

Don't over reserve tools and if you no longer need a reservation, cancel it as soon as possible. Please be sure that you log in as soon as you begin using each tool and log out only after the tool is available for the next user.

Most important, clean up after yourself

[I understand and agree](#)

Figure 764 Customization rules tutorial html rendered page 1

NanoFab Rules

Ultimately, the staff want to make your NanoFab experience as productive and fun as possible. We hope these rules will make everyone's life better.

[Click here to officially complete your training](#)

Figure 765 Customization rules tutorial html rendered page 2

To upload a rules tutorial:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload rules tutorial button to load the file.
- The selected file will be renamed 'facility_rules_tutorial.html' and saved in the media folder of the NEMO website.
- To view the uploaded content, navigate to the safety page by clicking the link provided (Figure 766).

["NanoFab rules tutorial" page](#)

Figure 766 Customization rules tutorial page link

40.4.6 Jumbotron watermark

The customization for the jumbotron watermark can be configured to display a background on the jumbotron page view (Figure 767). The jumbotron watermark configuration is optional and a white background is displayed if not configured. More information about the [jumbotron](#) page can be found on page 143.

"Jumbotron" watermark

This image is displayed as background for the Jumbotron. It is set as a full background screen, so your image needs to take that into account.

The image you upload should be a valid image file (recommended size is 1500x1000).

Figure 767 Configuration jumbotron watermark

To upload a jumbotron watermark:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘jumbotron_watermark.png’ and saved in the media folder of the NEMO website.
- An example of the jumbotron with watermark background is displayed in Figure 768.

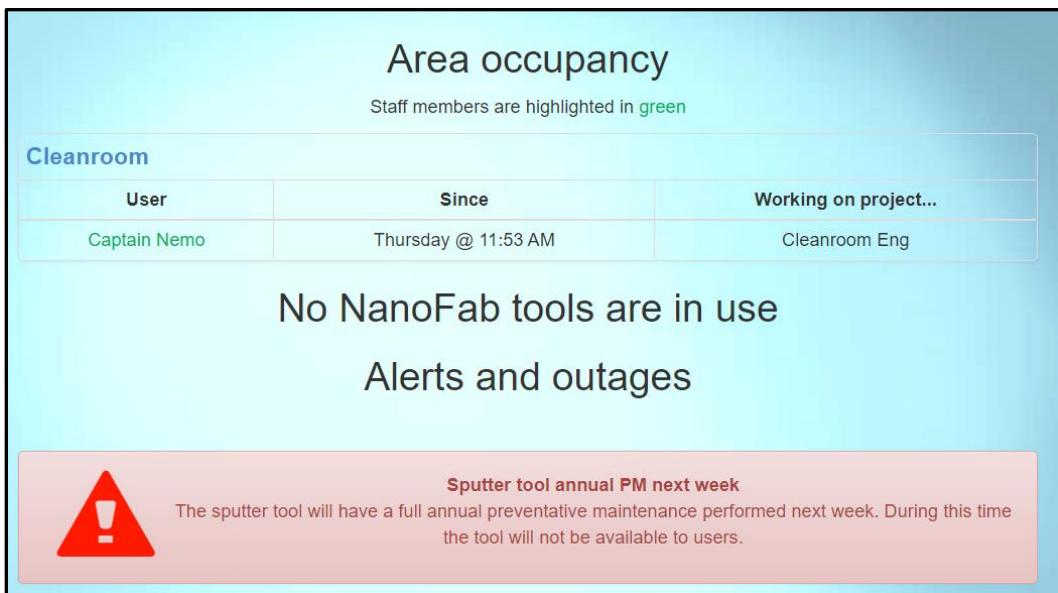

Figure 768 Customization watermark behind jumbotron

40.4.7 Access request notification email

The customization for the access request notification email template can be configured using html to render a specific message when a user creates or updates an access request, and when a facility manager approves or denies a request (Figure 769). Basically, any creation or updates of an access request will trigger this email to be sent. The access requests feature is described in the [access requests](#) section on page 149. The access request notification template is optional and if not defined email notifications will not be sent.

Access request notification email

This email is sent to the person who created the request when an access request is created or updated. The other users present on the request as well as the facility managers are cc'ed.

The following context variables are provided when the email is rendered:

- **template_color** - the color: green if approved, red if denied, blue otherwise
- **access_request** - the user's access request that was created or updated
- **status** - the status of the request: received, updated, approved or denied
- **access_requests_url** - the URL to the access requests page

Figure 769 Customization access request notification email

To create a custom access request email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **template_color** – the color to be used in the template, green for an approved request, red for a denied request, and blue otherwise
 - **access_request** – the access request that was created or updated
 - **status** – the request status: received, updated, approved, or denied
 - **access_requests_url** – the access requests URL
- The email subject is “Your access request for the <area> has been <received,updated,approved,denied>”. For example, “Your access request for the Cleanroom has been received”
- The email will be from the user office email.

40.4.8 Cancellation email

The customization for the cancellation email template can be configured using html to render a specific message when a staff member cancels a user's reservation (Figure 770). The cancel user reservation feature is described in the [reservations](#) section on page 49. The cancellation email template is optional and if not defined cancellation emails will not be sent.

Cancellation email

This email is sent to a user when a staff member cancels the user's reservation. The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation that was cancelled
- **staff_member** - the user object of the staff member who cancelled the reservation
- **reason** - the reason the staff member provided for cancelling the reservation

Figure 770 Customization cancellation email

To create a custom cancellation email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the reservation object of the canceled reservation
 - staff_member – the user object of the staff member who canceled the reservation
 - reason – the reason the staff member provided for canceling the reservation
- The email subject is always, “Your reservation was canceled”.
- The email will be from the staff member that canceled the reservation

40.4.9 Counter threshold reached email

The customization for the counter threshold reached template can be configured using html to render a specific message when the warning threshold value for a tool usage counter is reached (Figure 771). The counter threshold reached email template is optional and if not defined the emails will not be sent.

Figure 771 Customization counter threshold reached email

To create a custom counter threshold reached email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - counter – the tool usage counter which value reached the warning threshold
- The email subject is always, “Warning threshold reached for {tool.name} {counter.name} counter”.
- The email will be from the user office

40.4.10 Facility rules tutorial email

The customization for the Facility rules tutorial email template can be configured using html to render a specific message to staff when a user completes the tutorial (Figure 772). The rules tutorial feature is described in the [landing page](#) section on page 35. The rules tutorial email is optional and will only be sent if the email template is configured. The rules tutorial email requires the email template and the abuse email address described on page 315 or the email will not be sent.

Facility rules tutorial email

This email is sent when a user completes the facility rules tutorial. It can contain a free-response answer (quiz question). If you do not upload a template then no notification email is sent to staff when a user completes the training tutorial. The following context variables are provided when the email is rendered:

- **user** - the user's model instance
- **making_reservations_rule_summary** - a free-response answer provided by the user. Normally, this is provided by the user to summarize their understanding of the Facility rules and procedures.

Figure 772 Customization rules tutorial email

To create a custom rules tutorial email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **user** – the user object of the user who completed the tutorial
 - **making_reservations_rule_summary** – a free response answer that can be passed from the rules tutorial to the email.
- The email subject is always “<Facility Name> rules tutorial”.
- The email will be from the abuse email defined in the email addresses section above on page 315.
- The email will be addressed to the abuse email address.

40.4.11 Feedback email

The customization for the feedback email template can be configured using html to render a specific message when a user fills out the feedback form (Figure 773). The send feedback feature is described in the [send feedback](#) section on page 171. The feedback feature requires both the feedback email template and feedback email address customizations or emails will not be sent. The feedback email address customization is described in the [email addresses](#) section above on page 315.

Feedback email

This email is sent when a user [submits feedback](#). The feedback email address (at the top of this page) must also be configured for users to be able to do this. The following context variables are provided when the email is rendered:

- **contents** - the user's feedback
- **user** - the user object of the user who submitted the feedback

Figure 773 Customization feedback email

To create a custom feedback email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - contents – the user’s feedback
 - user – the user object of the user who submitted feedback
- The email subject is always, “feedback from {username}”.
- The email will be from the user leaving feedback.

40.4.12 Generic email

The customization for the generic email template can be configured using html to render a specific message when a staff member fills out the email form (Figure 774). The email feature is described in the [email](#) section on page 232. The email feature requires the generic email template or emails will not be sent.

Generic email

A generic email that can be sent to qualified tool users, members of an account, or members of a project. Send these using the [email broadcast page](#). The following context variables are provided when the email is rendered:

- **title** - the user specified title of the email
- **greeting** - a greeting to the recipients of the email
- **contents** - the body of the email
- **template_color** - the color to emphasize

Figure 774 Customization generic email

To create a custom generic email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - title - the user specified title of the email
 - greeting - a greeting to the recipients of the email
 - contents - the body of the email
 - template_color - the title color to emphasize
- The email subject is the subject entered on the email feature page.
- The email will be from the user creating the email.

40.4.13 Missed reservation email

The customization for the missed reservation email template can be configured using html to render a specific message when a user misses a reservation (Figure 775). The missed reservation feature is described in the [reservation](#) section on page 61. The missed reservation feature requires

the missed reservation email template and the abuse email address described on page 315 or the email will not be sent.

Missed reservation email

This email is sent when a user misses a reservation. If a tool is not used for an amount of time after the user's reservation has begun, it is marked as missed and removed from the calendar. The following context variables are provided when the email is rendered:

- **reservation** - the reservation that the user missed

Figure 775 Customization missed reservation email

To create a custom missed reservation email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **reservation** – the reservation object of the missed reservation
- The email subject is always “Missed reservation for the {reservation.tool}”.
- The email will be from the user office email defined in the email addresses section above on page 315.
- The email will be addressed to the user that missed the reservation, the abuse email address, and the user office email address.

40.4.14 New task email

The customization for the new task email template can be configured using html to render a specific message to users and staff when a task is created (Figure 776). The task feature is described in the tool control section on page 35. The new task email is optional and will only be sent if the email template is configured.

New task email

This email is sent when a new maintenance task is created for a tool. The following context variables are provided when the email is rendered:

- **user** - the user who created the task
- **task** - the task information
- **tool** - the tool that the task is associated with
- **tool_control_absolute_url** - the URL of the tool control page for the tool
- **template_color** - an HTML color code indicating the severity of the problem. Orange for warning, red for shutdown.

Figure 776 Customization new task email

To create a custom rules tutorial email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user object of the user who created the task
 - task – the task object information
 - tool – the tool object that the task is associated with
 - tool_control_absolute_url – the URL of the tool control page for the tool
 - template_color – an HTML color code indicating the severity of the problem. Orange for warning, red for shutdown.
- The email subject will identify the tool name, if the task is a safety hazard, and if the task is defined as a problem or shutdown.
- The email will be from the user reporting or updating the task
- The email will be addressed to the tool primary owner, backup owners, notification email defined in the tool table, and lab managers if defined in the settings.py file.

40.4.15 Out of time reservation email

The customization for the out of time reservation email template can be configured using html to render a specific message to users when a user is still logged in an area that requires reservations to access, but their reservation has expired (Figure 777). A grace period can be set when configuring the area that will delay the email.

Out of time reservation email

This email is sent when a user is still logged in an area but his reservation expired. A grace period can be set when configuring the area. The following context variables are provided when the email is rendered:

- **reservation** - the reservation that the user is out of time on

Figure 777 Customization out of time reservation email

To create a custom out of time reservation email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the user's upcoming reservation object
- The email subject will always be “Out of time in the {area}”.
- The email will be from the user office email defined in the email addresses section above on page 315.
- The email will be addressed to the user with the reservation and any users defined in the abuse email of the area table.

40.4.16 Recurring charges reminder email

The customization for the recurring charges reminder email template can be configured using html to render a specific message to users a certain number of days before they are to be charged for recurring consumable charges (Figure 778).

The screenshot shows a web-based configuration interface for an email template. At the top, a title bar reads "Recurring charges reminder email". Below it, a descriptive text states: "This email is sent to users at configurable days (defaults to one week) before they are charged for recurring charges. The following context variables are provided when the email is rendered:". A bulleted list follows: • **user** - the user who is assigned to the items • **charges** - the list of recurring charges • **reminder_days** - the number of days until the items are charged. There are two buttons at the bottom: a "Choose File" button and a green "Upload recurring charges reminder email" button.

Figure 778 Customization recurring charges reminder email

To create a recurring charges reminder email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **user** – the user who is about to be charged
 - **charges** – a list of recurring charges due on the same date
 - **reminder_days** – the number of days until the charges will be billed
- The email subject will always be “Recurring charges will be charged in { reminder_days } day(s)”.
- The email will be from the user office email defined in the email addresses section.
- The email will be addressed to user.

40.4.17 Reorder supplies reminder email

The customization for the reorder supplies reminder email template can be configured using html to render a specific message to the supply owner when the supply stock drops below the minimum (Figure 779).

The screenshot shows a web-based configuration interface for an email template. At the top, a title bar reads "Reorder supplies reminder email". Below it, a descriptive text states: "This email is sent to the item's reminder email when the quantity of an item falls below the reminder threshold and should be reordered. The following context variables are provided when the email is rendered:". A bulleted list follows: • **item** - the item which quantity fell below the reminder threshold. There are two buttons at the bottom: a "Choose File" button and a green "Upload reorder supplies reminder email" button.

Figure 779 Customization reorder supplies reminder email

To create a custom reorder supplies reminder email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - item – the item (consumable) object which quantity fell below the reminder threshold
- The email subject will always be “Time to order more {consumable.name}”.
- The email will be from the user office email defined in the email addresses section above on page 315.
- The email will be addressed to the email set on the [Consumable table](#).

40.4.18 Reservation ending reminder email

The customization for the reservation ending reminder email template can be configured using html to render a specific message to users when a user is logged in an area and their reservation in that area is about to end (Figure 780). The reservation ending reminder email is optional and will only be sent if the reservation ending reminder email template is configured.

Reservation ending reminder email

This email is sent to a user that is logged in an area 30 and 15 minutes before their area reservation ends. The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation ending

Figure 780 Customization reservation ending reminder email

To create a custom reservation ending reminder email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the user's ending reservation object
- The email subject will always be “{area name} reservation ending soon”.
- The email will be from the user office email defined in the email addresses section above on page 315.
- The email will be addressed to the user with the reservation.

40.4.19 Reservation reminder email

The customization for the reservation reminder email template can be configured using html to render a specific message to users when a reservation is approaching (Figure 781). The reservation reminder feature is described in the [reservation](#) section on page 49. The reservation reminder email is optional and will only be sent if both the reservation reminder email template

and the reservation warning email template are configured. [The reservation warning email](#) template is described below on page 332.

Reservation reminder email

This email is sent to a user two hours before their tool/area reservation begins. The reservation warning email must also exist for this email to be sent. The following context variables are provided when the email is rendered:

- **reservation** - the user's upcoming reservation

Figure 781 Customization reservation reminder email

To create a custom reservation reminder email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **reservation** – the user's upcoming reservation object
- The email subject will always be “{tool name} reservation reminder”.
- The email will be from the user office email defined in the email addresses section above on page 315.
- The email will be addressed to the user with the reservation.

40.4.20 Reservation warning email

The customization for the reservation warning email template can be configured using html to render a specific message to users when a reservation is approaching and there is a problem with the tool they reserved (Figure 782). The reservation warning feature is described in the [reservation](#) section on page 49. The reservation warning email is optional and will only be sent if both the reservation reminder email template and the reservation warning email template are configured. The [reservation reminder email](#) template is described above on page 329.

Reservation warning email

This email is sent to a user two hours before their tool/area reservation begins and maintenance may interfere with the upcoming reservation. The reservation reminder email must also exist for this email to be sent. The following context variables are provided when the email is rendered:

- **reservation** - the user's upcoming reservation
- **fatal_error** - boolean value that, when true, indicates that it will be impossible for the user to use the tool/access the area during their reservation (due to maintenance, outages or a missing required dependency)
- **template_color** - an HTML color code indicating the severity of the problem. Orange for warning, red for shutdown.

Figure 782 Customization reservation warning email

To create a custom reservation warning email template:

- Use any html editor to create the desired content

- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the user’s upcoming reservation object
 - fatal_error – when true, indicates that the tool is shutdown
- The email subject will always be “{tool name} reservation problem”.
- The email will be from the user office email defined in the email addresses section above on page 315.
- The email will be addressed to the user with the reservation.

40.4.21 Safety issue email

The customization for the safety email template can be configured using html to render a specific message to users when a safety issue has been created (Figure 783). The safety issue feature is described in the [safety](#) section on page 160. The safety email is optional and will only be sent if both the safety email template and the safety email address are configured. The safety email address is defined in the email addresses section above on page 315.

Safety issue email

This email is sent when a new maintenance task is created for a tool. The following context variables are provided when the email is rendered:

- **issue** - the issue information
- **issue_absolute_url** - the URL for the detailed view of the issue

Figure 783 Customization safety email

To create a custom safety email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - issue – the issue object
 - issue_absolute_url – the URL to the detailed view of the issue
- The email subject will always be “Safety issue”.
- The email will be from the user reporting the safety issue unless the report is anonymous then the email will be from the safety email address defined in the email addresses section above on page 315.
- The email will be addressed to the safety email address defined in the email addresses section above on page 315.

40.4.22 Staff charge reminder email

The customization for the staff charge email template can be configured using html to render a specific message to staff as a reminder they are currently charging a user (Figure 784). The staff

charge feature is described in the [staff charge](#) section on page 276. The staff charge email is optional and will only be sent if the email template is configured.

Staff charge reminder email

This email is periodically sent to remind staff that they are charging a user for staff time. The following context variables are provided when the email is rendered:

- **staff_charge** - the staff charge that is in progress

Figure 784 Customization staff charge email

To create a custom staff charge email template

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - `staff_charge` – the staff charge object
- The email subject will always be “Active staff charge since {`staff_charge.start`}”.
- The email will be from the user office email address defined in the email addresses section above on page 315.
- The email will be addressed to the staff member currently charging.

40.4.23 Task status notification email

The customization for the task status notification email template can be configured using html to render a specific message to staff when the status of a task is changed (Figure 785). The task status feature is described in the [tool control](#) section on page 94. The task status email is optional and will only be sent if the email template is configured.

Task status notification email

This email is sent when a tool task has been updated and set to a particular state. The following context variables are provided when the email is rendered:

- **template_color** - the color to emphasize
- **title** - a title indicating that the message is a task status notification
- **task** - the task that was updated
- **status_message** - the current status message for the task
- **notification_message** - the notification message that is configured (via the admin site) for the status
- **tool_control_absolute_url** - the URL of the tool control page for the task

Figure 785 Customization new task email

To create a custom task status email template

- Use any html editor to create the desired content

- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - template_color – an HTML color code indicating the title background color
 - title – a title indicating the message is a task status notification
 - task – the task object that was updated
 - status_message – the current status message for the task
 - notification_message – the notification message that is configured (via the admin site) for the status
 - tool_control_absolute_url – the URL of the tool control page for the task
- The email subject will always be “{tool.name} task notification”.
- The email will be from the user updating the task status
- The email will be addressed to the tool primary owner, backup owners, and/or notification emails defined in the tool table, if selected in the task status table.

40.4.24 Tool qualification expiration email

The customization for the tool qualification expiration email template can be configured using html to render a specific message to users when they are about to lose access to a tool (Figure 786).

Tool qualification expiration email

This email is sent to the user, tool owner & backup owners and facility managers when a tool qualification is about to expire (reminder) or expired. The following context variables are provided when the email is rendered:

- **remaining_days** - the number of days left before the qualification expires. This variable is only provided when a reminder is sent
- **expiration_date** - the date the tool qualification expires
- **user** - the user whose qualification is expiring
- **tool** - the tool whose qualification is expiring
- **last_tool_use** - the last time the tool was used. Blank if the user never used the tool
- **qualification_date** - the time the user was last qualified on that tool

Figure 786 Customization tool qualification expiration email

To create a tool qualification expiration email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - remaining_days – the number of days until the tool access expires. Only present if the email is a reminder.
 - expiration_date – the date the tool qualification expires
 - user – the user whose tool access is expiring
 - tool – the tool the user is about to lose access to
 - last_tool_use – the last time the tool was used, or blank if the user never used it
 - qualification_date – the date the user was last qualified on the tool

- The email subject will either be “Your {tool.name} qualification expires in {remaining_days} days” or “You {tool.name} qualification has expired”.
- The email will be from the user office email address.
- The email will be addressed to the user and cc’d to any email address set in [Customization → Tool qualification](#).

40.4.25 Unauthorized tool access email

The customization for the unauthorized tool access email template can be configured using html to render a specific message to staff when a user tries to log into a tool that is in an area the user is not currently logged into (Figure 787). The unauthorized tool access feature is described in the [tool control](#) section on page 99. The unauthorized tool access email is optional and will only be sent if the email template and the abuse email address described on page 315 is configured.

Unauthorized tool access email

This email is sent when a user tries to access a tool:

- without being logged in to the area in which the tool resides (type 'area').
- without having a current area reservation (type 'reservation')

The following context variables are provided when the email is rendered:

- **operator** - the person who attempted to use the tool
- **tool** - the tool that the user was denied access to
- **type** - the type of abuse ('area' or 'reservation')

Choose File

📁 Upload unauthorized tool access email

Figure 787 Customization unauthorized tool access email

To create a custom unauthorized tool access email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - operator – the person who attempted to enable the tool
 - tool – the tool object of the tool the user was denied access to
 - type – the type of abuse (“area” or “reservation”)
- The email subject will always be “Area access requirement”.
- The email will be from the abuse email address
- The email will be addressed to the abuse email address

40.4.26 Usage reminder email

The customization for the usage reminder email template can be configured using html to render a specific message to users periodically when they are logged into areas or tools (Figure 788). The usage reminder feature is described in the [tool control](#) section on page 127. The usage

reminder email is optional and will only be sent if the email template and the abuse email address described on page 315 is configured.

Usage reminder email

This email is periodically sent to remind a user that they have a tool enabled. The following context variables are provided when the email is rendered:

- **user** - the user who is using a tool or logged in to an area

Figure 788 Customization usage reminder email

To create a custom usage reminder email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **user** – the user object who is using a tool or logged in to an area
 - **user.resources_in_use** – a list of resources the user is currently using
- The email subject will always be “{facility name} usage”.
- The email will be from the user office email address
- The email will be addressed to the user

40.4.27 User access expiration reminder email

The customization for the user access expiration reminder email template can be configured using html to render a specific message to users a certain number of days before their access expires (Figure 789). The user access expiration feature is described in the [Customization → User → Access expiration reminder](#) section. The user access expiration reminder email is optional and will only be sent if the email template, the number of days and the user office email address are all configured.

User access expiration reminder email

This email is periodically sent to remind a user that their access is expiring. The following context variables are provided when the email is rendered:

- **user** - the user whose access is expiring
- **remaining_days** - the remaining days before the access expires

Figure 789 Customization user access expiration reminder email

To create a custom user access expiration reminder email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user object whose access is expiring
 - remaining_days – the remaining days before the user's access expires
- The email subject will always be “Your {facility_name} access expires in {remaining_days} days ({format_datetime(user.access_expiration)})”.
- The email will be from the user office email address
- The email will be addressed to the user

40.4.28 User reservation created email

The customization for the user reservation created email template can be configured using html to render a specific message to users when they create a reservation that provides a calendar invite for common mail interfaces such as Outlook or Gmail as an attachment (Figure 790). The feature is described in the [user preference](#) section on page 193. The user reservation created email is optional and will only be sent if the email template and the user office email address described on page 315 are configured and the user has enabled the feature in their user preferences.

User reservation created email

This email is sent to a user when the user creates a reservation and has opted to receive ics calendar notification in his preferences.

This is optional, the email will still be sent with only the calendar attachment if this is left blank.

The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation that was created

Figure 790 Customization user reservation created email

To create a custom user reservation created email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the reservation object of the users reservation
- The email subject will always be “{facility_name} Reservation for the {tool_name}”.
- The email will be from the user office email address
- The email will be addressed to the user

40.4.29 User reservation cancelled email

The customization for the user reservation canceled email template can be configured using html to render a specific message to users when they cancel a reservation that provides a calendar

invite for common mail interfaces such as Outlook or Gmail as an attachment (Figure 791). The feature is described in the [user preference](#) section on page 193. The user reservation canceled email is optional and will only be sent if the email template and the user office email address described on page 315 are configured and the user has enabled the feature in their user preferences.

User reservation cancelled email

This email is sent to a user when the user cancels his own reservation and has opted to receive ics calendar notification in his preferences.

This is optional, the email will still be sent with only the calendar attachment if this is left blank.

The following context variables are provided when the email is rendered:

- **reservation** - the user's reservation that was cancelled

Figure 791 Customization user reservation canceled email

To create a custom user reservation cancelled email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the reservation object of the user's reservation
- The email subject will always be “{facility_name} Reservation for the {tool_name}”.
- The email will be from the user office email address
- The email will be addressed to the user

40.4.30 Weekend access notification email

The customization for the weekend access notification email template can be configured using html to render a specific message to be sent to the weekend access emails provided in User request settings. The weekend access notification email is optional and will only be sent if the email template and the user office email address described on page 315 are configured.

Weekend access notification email

This email is sent to the [weekend access notification email\(s\)](#) as well as the facility manager(s) when:

- there is at least one approved access request that includes weekend time during the current week. (The email is sent when the first weekend access request is approved).
- there are no approved access requests that include weekend time during the current week. (the email is sent on the [cutoff day](#) at the [cutoff hour](#) provided in the user requests settings above).

The following context variables are provided when the email is rendered:

- **weekend_access** - true/false, whether there are approved weekend access requests for the current week.

Figure 792 Customization user reservation canceled email

To create a custom weekend access email template:

- Use any html editor to create the desired content
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - `weekend_access` – a Boolean (true/false) value representing whether there will be weekend access.
- The email subject will always be either “Weekend access for the {facility_name} {saturday_date} – {sunday_date}”
- The email will be from the user office email address
- The email will be addressed to the email(s) set in [User request settings](#) as well and all facility managers.

40.5 Interlock

The Interlock settings can be used to display a custom message when an interlock command fails. Interlocks can be used for both doors and tools, and you can customize the message for each (Figure 793).

The screenshot shows a dialog box titled "Interlock settings". It contains two input fields: "Tool failure message" with the value "Communication with the interlock failed" and "Door failure message" with the same value. Below these is a checkbox labeled "Bypass on error" with the description "Check this box to offer users the option to bypass lock/unlock command when there is an interlock error." A green "Save settings" button is at the bottom.

Figure 793 Interlock settings

- The default message for tool interlock failure is “Communication with the interlock failed”. To edit, click in the dialog box and enter the desired message (Figure 794). Note that carriage returns will be displayed to ease visual organization of information.

The screenshot shows a single input field labeled "Tool interlock failure message" containing the text "Communication with the interlock failed".

Figure 794 Interlock settings tool failure message

- The default message for door interlock failure is “Communication with the interlock failed”. To edit, click in the dialog box and enter the desired message (Figure 795). Note that carriage returns will be displayed to ease visual organization of information.

The screenshot shows a single input field labeled "Door interlock failure message" containing the text "Communication with the interlock failed".

Figure 795 Interlock settings door failure message

- Additionally, you can enable an option for users to bypass the interlock error by clicking the checkbox (Figure 796), meaning they can still enable/disable a tool or enter a billable area in NEMO.

In reality this means that if interlock commands fail but tools or doors can be manually enabled by staff, the user can select that option to have NEMO keep track of time as it otherwise would.

Check this box to offer users the option to bypass lock/unlock command when there is an interlock error.

Figure 796 Interlock settings bypass

40.6 Projects and accounts

The Projects and accounts settings can be used to control the display of the account list and project selection, and to enable project document upload (Figure 797).

The screenshot shows the 'Projects & accounts' settings page. It includes the following sections:

- Account list:**
 - Hide inactive accounts: Check this box to only show active accounts in the user list.
 - Hide inactive projects: Check this box to only show active projects in the user list.
 - Collapse project list by default: Check this box to collapse account projects by default.
- Project selection template:** A text input field containing "{{ project.name }}". A tooltip explains: "The django template used for rendering project selection when enabling tools and making reservations. The context variable project is provided."
- Document upload:** An unchecked checkbox labeled "Enable project document upload".

A green "Save settings" button is at the bottom.

Figure 797 Customization projects and accounts settings

- By default, inactive accounts are shown in the accounts and projects list. To hide them, check the “Hide inactive accounts” box (Figure 798).

The screenshot shows the 'Hide inactive accounts' checkbox checked (indicated by a blue checkmark). A tooltip says: "Check this box to only show active accounts in the user list."

Figure 798 Projects and accounts settings hide inactive accounts

- By default, inactive projects are shown in the accounts and projects list. To hide them, check the “Hide inactive accounts” box (Figure 799).

The screenshot shows the 'Hide inactive projects' checkbox checked (indicated by a blue checkmark). A tooltip says: "Check this box to only show active projects in the user list."

Figure 799 Projects and accounts settings hide inactive projects

- The default project selection template is “{{ project.name }}”. To edit, click in the dialog box and enter the desired message (Figure 800). The syntax follows Django templating engine. Conditions and other tags can be used.
For example, entering “{{ project.account.name }} – {{ project.name }}” will result in the account name followed by the project name to be displayed when users need to select a project to associate with a reservation, usage etc.
Note that carriage returns will be displayed to ease visual organization of information.

The screenshot shows the 'Project selection template' input field containing the value "{{ project.name }}".

Figure 800 Projects and accounts application setting project selection template

- By default, uploading documents to projects is disabled. To enable it, check the “Enable project document upload” box (Figure 801).

Figure 801 Projects and accounts settings enable project document upload

40.7 Rates

The customization for the tool rates can be configured to display rates for tools and supplies (Figure 802). The tool rate configuration is optional, and no rate information will be displayed if not configured. More information about how the tool rates are displayed can be found in the [tool control](#) section on page 89. More information about how supply rates are displayed can be found in the [supply](#) section on page 284. NEMO comes with a default rate class defined which can be edited to suit your institution by modifying the rates.py file to create a custom rate class. NOTE: It is beyond the scope of this manual to provide details of programming changes.

Tool Rates

You can upload a json file to display tool rates. An example of a valid rates file can be found on [Github](#).

It should be a JSON array of elements, and the following key/values are supported for each element:

- **item_id** - the id of the tool or supply
- **table_id** - the type of rate, one of "inventory_rate" (for supplies), "primetime_eq_hourly_rate" (for tool), "training_individual_hourly_rate" (for individual training rate), "training_group_hourly_rate" (for group training rate)
- **rate_class** - the class, one of "full cost" or "cost shared"
- **rate** - the rate amount
- **item** - the name of the item (optional)

Figure 802 Configuration tool rates

To create a custom tool rate file for the default rate class

- Use any editor to create the desired json array of elements.
- The following key/values are supported for each element:
 - item_id - the id of the tool or supply that corresponds to the id value in the tool table or consumables table
 - item - the name of the item which is optional but useful to make the json file human readable.
 - table_id - the type of rate
 - "inventory_rate" (for consumables/supplies),
 - "primetime_eq_hourly_rate" (for tool),
 - "training_individual_hourly_rate" (for individual training rate),
 - "training_group_hourly_rate" (for group training rate)
 - rate_class - the class,
 - "full cost" (for tool, consumable/supply, individual and group training)
 - "cost shared" (for tool)
 - rate - the rate amount
- NOTE: only the rates defined will be displayed so every tool or supply does not need to be defined and every rate type and class do not need to be defined.
- Examples
 - Tool and training rates, full cost, cost shared tool rate and individual and group training.
 - The json code in Figure 803

```
[
  {
    "item_id": 4,
    "item": "Sputter",
    "table_id": "primetime_eq_hourly_rate",
    "rate_class": "cost shared",
    "rate": 50.0
  },
  {
    "item_id": 4,
    "item": "Sputter",
    "table_id": "primetime_eq_hourly_rate",
    "rate_class": "full cost",
    "rate": 100.0
  },
  {
    "item_id": 4,
    "item": "Sputter",
    "table_id": "training_individual_hourly_rate",
    "rate_class": "full cost",
    "rate": 150.0
  },
  {
    "item_id": 4,
    "item": "Sputter",
    "table_id": "training_group_hourly_rate",
    "rate_class": "full cost",
    "rate": 75.0
  }
]
```

Figure 803 Configuration tool rates example 1 json

- Will provide the rate view on the tool control page in Figure 804

Tool rates: Full Cost \$100.00 Shared Cost \$50.00
 Training rates: Individual \$150.00 Group \$75.00

Figure 804 Configuration tool rates example 1 view

- Tool and training rates; only full cost tool rate and individual training defined.
 - The json code in Figure 805

```
[  
 {  
   "item_id": 2,  
   "item": "PECVD",  
   "table_id": "primetime_eq_hourly_rate",  
   "rate_class": "full cost",  
   "rate": 100.0  
 },  
 {  
   "item_id": 2,  
   "item": "PECVD",  
   "table_id": "training_individual_hourly_rate",  
   "rate_class": "full cost",  
   "rate": 150.0  
 }  
]
```

Figure 805 Configuration tool rates example 2 json

- Will provide the rate view on the tool control page in Figure 806

Tool rates: Full Cost \$100.00
 Training rates: Individual \$150.00

Figure 806 Configuration tool rates example 2 view

- Supply rates
 - The json code in Figure 807

```
[  
 {  
   "item_id": 1,  
   "item": "Tweezers",  
   "table_id": "inventory_rate",  
   "rate_class": "full cost",  
   "rate": 10.0  
 },  
 {  
   "item_id": 2,  
   "item": "2 inch wafer tray",  
   "table_id": "inventory_rate",  
   "rate_class": "full cost",  
   "rate": 42.0  
 }  
]
```

Figure 807 Configuration tool rates example 3 json

- Will provide the rate view on the supply page in Figure 808

Sample handling
Tweezers (Cost \$10.00)
Sample storage
2 inch wafer tray (Cost \$42.00)

Figure 808 Configuration tool rates example 3 view

To upload a custom rate json file:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed ‘rates.json’ and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 809).

Tool Rates

You can upload a json file to display tool rates. An example of a valid rates file can be found on [Github](#).

It should be a JSON array of elements, and the following key/values are supported for each element:

- **item_id** - the id of the tool or supply
- **table_id** - the type of rate, one of "inventory_rate" (for supplies), "primetime_eq_hourly_rate" (for tool), "training_individual_hourly_rate" (for individual training rate), "training_group_hourly_rate" (for group training rate)
- **rate_class** - the class, one of "full cost" or "cost shared"
- **rate** - the rate amount
- item - the name of the item (optional)

rates.json

Figure 809 Customization tool rates file loaded

To delete the currently loaded file:

- Click the upload watermark button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

40.8 Recurring charges

The Recurring charges settings can be configured to control the name of the feature itself, and a few parameters for the functionality (Figure 810).

The dialog box is titled "Recurring charges settings". It contains the following fields:

- Feature name:** A text input field containing "Recurring charges". A tooltip next to it says: "The name to use for this feature throughout the application."
- Lock recurring charges:** A checkbox that is checked. A tooltip next to it says: "Check this box to lock recurring charges, so staff members can only change customer and project fields."
- Customer validation:** A checkbox that is unchecked. A tooltip next to it says: "Check this box to skip customer validation (inactive or access has expired)."
- Category:** A dropdown menu set to "Rental". A tooltip next to it says: "[Optional] Select a consumable category to restrict consumable choices to."
- Force quantity:** An input field.
- Save settings:** A green button with a save icon.

Figure 810 Customization recurring charges settings

- By default, the recurring charges feature is called “Recurring charges”. Click on the text dialog box to change it (Figure 811). The name is used in the Administration menu as well as the Detailed administration part of the application. This can be useful for example if only one type of items is reoccurring, i.e., the feature could be named “User bins” or “Gown rentals”.

The dialog box is titled "Recurring charges settings". It contains the following field:

- Feature name:** A text input field containing "Recurring charges". A tooltip next to it says: "The name to use for this feature throughout the application."

Figure 811 Recurring charges settings feature name

- Recurring charges can be locked to prevent other staff members from changing any parts of it except for the customer it is assigned to and the project. To lock recurring charges, check the corresponding box (Figure 812).

The dialog box is titled "Recurring charges settings". It contains the following field:

- Lock recurring charges:** A checkbox that is checked. A tooltip next to it says: "Check this box to lock recurring charges, so staff members can only change customer and project fields."

Figure 812 Recurring charges settings lock recurring charge items

- By default, before an item can be charged, the customer is validated to make sure the user is active, and his access hasn't expired. To skip that validation and charge anyway, check the corresponding box (Figure 813).

The dialog box is titled "Recurring charges settings". It contains the following field:

- Customer validation:** A checkbox that is checked. A tooltip next to it says: "Check this box to skip customer validation (inactive or access has expired)."

Figure 813 Recurring charges settings skip customer validation

- By default, all consumable items are available for recurring charges. Here you can select a specific category to limit the choices available for recurring charges (Figure 814).

Figure 814 Recurring charges settings consumable category

- By default, any quantity of consumable can be selected in recurring charges. This allows staff to charge for more than one item at a time, like 5 storage bins at one time for example. To force the quantity to always be set and not offer the choice, enter the number in the dialog box (Figure 815). This can be useful if the quantity is always 1 for example.

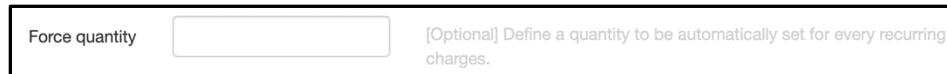

Figure 815 Recurring charges settings force item quantity

40.9 Safety

The Safety settings can be configured to display the main menu item and the sub-menu items (Figure 816).

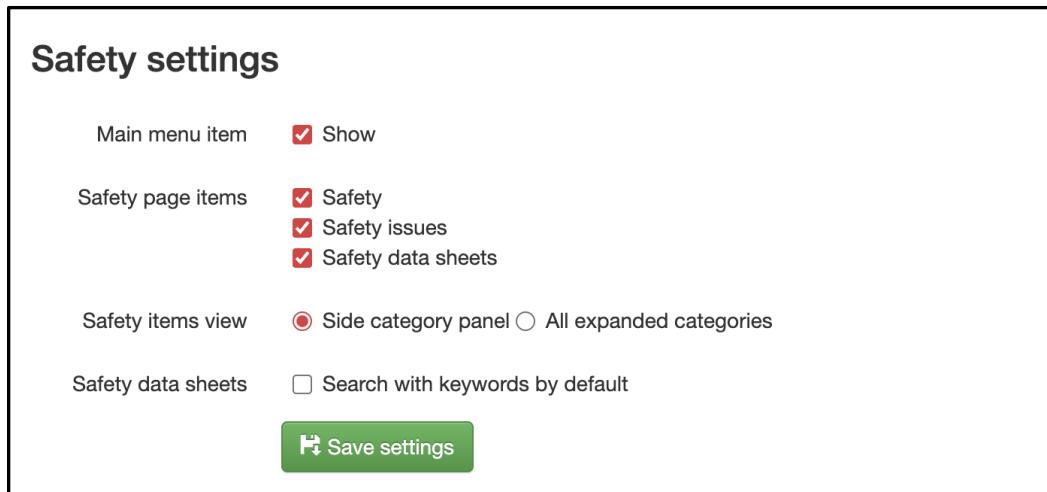

Figure 816 Customization safety settings

- The main menu item can be hidden by unchecking the corresponding checkbox (Figure 817).

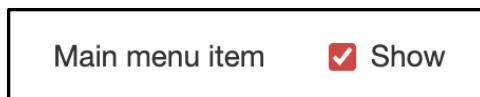

Figure 817 Safety settings show/hide main menu item

- The safety items tab can be hidden by unchecking the corresponding checkbox (Figure 818).

Figure 818 Safety settings show/hide safety item tab

- The safety issues tab can be hidden by unchecking the corresponding checkbox (Figure 819).

Figure 819 Safety settings show/hide safety issues

- The safety data sheets tab can be hidden by unchecking the corresponding checkbox (Figure 820).

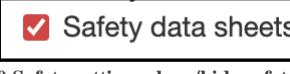

Figure 820 Safety settings show/hide safety data sheets

- The safety item view can be customized between the side category panel (default) and an all-expanded version (Figure 821).

Figure 821 Safety settings safety items view

- The safety data sheets search can be set to allow keywords search by default (Figure 822).

Figure 822 Safety settings safety data sheets keywords search

40.10 Sensor data

The [Sensor data](#) feature is detailed starting on page 194.

The screenshot shows a 'Sensor data settings' form. It includes a field for 'Sensor alert email(s)' containing 'sensor_alerts@example.org', a note explaining that a comma-separated list can be used, and a 'Default daterange' section with radio buttons for 'Last 24 hrs', 'Last 72 hrs', 'Last week', 'Last month', and 'Last year' (which is selected). Below that is a 'Default refresh rate:' dropdown set to 'no refresh'. A green 'Save settings' button is at the bottom.

Figure 823 Customization sensor data settings

- The sensor alert global email(s) will be notified every time any sensor alert is triggered or reset. A comma separated list can be used (Figure 824).

The screenshot shows a 'Sensor alert email(s)' field containing 'sensor_alerts@example.org'.

Figure 824 Sensor data settings sensor alert emails

- The default date range can be selected here and will apply to all sensor data (Figure 825).

The screenshot shows a 'Default daterange' section with radio buttons for 'Last 24 hrs', 'Last 72 hrs', 'Last week', 'Last month', and 'Last year' (which is selected).

Figure 825 Sensor data settings default date range

- The default refresh rate for all tabs in the sensor data pages can be set here (Figure 826).

The screenshot shows a 'Default refresh rate:' dropdown menu with 'no refresh' selected.

Figure 826 Sensor data settings default refresh rate

40.11 Status dashboard

The dashboard can be configured to with different parameters for the occupancy and the staff status page (Figure 827).

The screenshot shows the 'Status dashboard settings' page. It includes sections for 'Area occupancy' (checkbox for 'Qualified areas' and 'Show areas the user doesn't have access to'), 'Staff status' (checkboxes for 'Display' options like 'Only show staff status to staff members' and 'Only show weekdays (no weekend) - only applies to week view'), 'First day of the week' (radio buttons for 'Monday' or 'Sunday'), 'Date format' (input field 'D m/d' with a note about Django date formats), 'Check past availability' (radio buttons for 'Everyone', 'Staff only', or 'Managers only'), 'Check future availability' (radio buttons for 'Everyone', 'Staff only', or 'Managers only'), 'User view options' (radio buttons for 'Day/Week/Month', 'Day/Week', or 'Day'), and 'Staff view options' (radio buttons for 'Day/Week/Month', 'Day/Week', or 'Day'). A green 'Save settings' button is at the bottom.

Figure 827 Customization status dashboard settings

- If the “Show areas the user doesn’t have access to” box is checked, the status dashboard will display occupancy of all areas, even the ones the current user doesn’t have access to (Figure 828).

Figure 828 Customization status dashboard show areas user doesn't have access to checkbox

- If the “Only show staff status to staff members” box is checked, only staff member will see the staff status page (Figure 829).

Figure 829 Customization status dashboard show staff status only to staff checkbox

- If the “Only show weekdays (no weekend)” box is checked, only weekdays will be shown in the staff status page (Figure 830).

Figure 830 Customization status dashboard staff status only show weekdays checkbox

- The first day of the week displayed on the staff status view can be changed between Monday and Sunday by checking the desired radio button (Figure 831).

First day of the week:	<input checked="" type="radio"/> Monday	<input type="radio"/> Sunday

40.12 Tool qualification

The tool qualification expiration feature will notify and remove tool qualification from users if they haven't used that tool after a certain time. To enable the feature the [Tool qualification expiration email](#) must be uploaded. These settings can be used to control the number of days used to determine when users lose their tool qualification and when reminders are sent (Figure 837).

The screenshot shows a configuration interface for tool qualification expiration. At the top, it says "Tool qualification expiration". Below that, a note states: "If active, this feature will remove tool qualification from a user if the user has not used the tool after a while or never used it since qualified (configured separately)." It also notes that the "user tool qualification expiration email" needs to be set to enable this feature.

Reminder days	<input type="text"/>	The (optional) number of days to send a reminder prior to the user's tool qualification expiration (below). A comma-separated list can be used for multiple reminders. This applies to both expiration cases.
Expiration days (previous tool usage)	<input type="text"/>	The number of days before the user's tool qualification expires since the user last used the tool.
Expiration days (no tool usage)	<input type="text"/>	The number of days before the user's tool qualification expires since the user qualified for the first time.
Reminder/expiration CC	<input type="text"/> information@example.org	Extra email address to copy when a user's tool qualification reminder/expiration email is sent. A comma-separated list can be used.

Save settings

Figure 837 Customization tool qualification settings

- Enter the number of days to remind users prior to their tool qualification expiring. A comma-separated list can be used. For example, to remind users 2 months, one month and one week before they will lose tool access, enter “60,30,7” (Figure 838).

The screenshot shows the "Reminder days" input field containing the value "60,30,7". To the right of the input field is a descriptive note: "The (optional) number of days to send a reminder prior to the user's tool qualification expiration (below). A comma-separated list can be used for multiple reminders. This applies to both expiration cases."

Figure 838 Tool qualification expiration reminder days

- Enter the number of days after a user last used a tool which will trigger them to lose access in the dialog box. This will only get triggered if they have used the tool in the past. For example, if you wish users to lose access to a tool if they haven't used it for a year, enter “365” (Figure 839).

Expiration days (previous tool usage)	365	The number of days before the user's tool qualification expires since the user last used the tool.
---	-----	--

Figure 839 Tool qualification expiration days previous usage

- Enter the number of days a user must use a tool after being trained on it before they lose access in the dialog box. This will only get triggered if they have never used the tool in the past. For example, if you wish users to lose access to a tool if they haven't used it for 2 weeks after being trained on it, enter "14" (Figure 840).

Expiration days (no tool usage)	14	The number of days before the user's tool qualification expires since the user qualified for the first time.
------------------------------------	----	--

Figure 840 Tool qualification expiration days no usage

- To cc one or more email addresses on the reminder and expiration email, enter them in the dialog box. A comma-separated list can be used (Figure 841).

Reminder/expiration CC	information@example.org	Extra email address to copy when a user's tool qualification reminder/expiration email is sent. A comma-separated list can be used.
---------------------------	-------------------------	---

Figure 841 Tool qualification expiration cc

40.13 User

The User settings can be used to control the display of the user list and access expiration details (Figure 842).

The screenshot shows the 'Customization user settings' page. The 'General' section contains three settings: 'New user facility tutorial' (radio buttons for 'Required' and 'Not required'), 'User list' (checkbox for 'Hide inactive'), and 'User document upload' (checkbox for 'Enable'). The 'Access expiration reminder' section contains two settings: 'Reminder days' (text input field) and 'Reminder email CC' (text input field). A green 'Save settings' button is at the bottom.

General		
New user facility tutorial	<input checked="" type="radio"/> Required <input type="radio"/> Not required	Whether the facility rules tutorial is required for new users by default.
User list	<input type="checkbox"/> Hide inactive	Check this box to only show active users in the user list.
User document upload	<input type="checkbox"/> Enable	Check this box to allow uploading documents to users.

Access expiration reminder

Figure 857 User requests settings access requests weekend access emails

- The default cutoff day and time to send weekend access emails to is blank. To edit, click in the dropdown and select the day, then click in the dialog box and enter the desired number (Figure 858). Note that the time needs to be in 24hrs format.

A screenshot of a user interface showing a configuration dialog. On the left, the text "Weekend access notification cutoff" is displayed next to a dropdown arrow. To the right of the dropdown is the word "at". Further to the right is another input field containing the time ":00 hrs".

Figure 858 User requests settings access requests weekend access notification cutoff

41 Detailed administration

The detailed administration page provides database table access to NEMO data where features can be configured, and usage data can be viewed (Figure 859).

The screenshot shows the NEMO administration interface. At the top, there's a dark blue header with the word 'NEMO' in yellow. Below it is a lighter blue bar with the text 'WELCOME, CAPTAIN. VIEW SITE / LOG OUT'. The main content area has a light blue header 'Home > Nemo' and a sub-header 'Nemo administration'. A table lists various database tables with 'Add' and 'Change' buttons:

NEMO		
Accounts	Add	Change
Activity histories	Add	Change
Alert categories	Add	Change
Alerts	Add	Change
Area access records	Add	Change
Areas	Add	Change
Comments	Add	Change
Configuration histories	Add	Change
Configurations	Add	Change
Consumable categories	Add	Change
Consumable withdraws	Add	Change
Consumables	Add	Change

Figure 859 Detailed administration start of table list

Access to the detailed administration pages requires admin status or any staff role plus some special permissions. A super user can give access to any user with a staff role on a table-by-table basis from the users table of the database. The users table of the database discussed in the [Detailed administration → Users](#) section on page 540.

Users can return to the NEMO home page by clicking the “view site” link at the top of the page (Figure 860).

Figure 860 Detailed administration view site link

Users can log out of NEMO by clicking the “log out” link at the top of the page (Figure 861).

Figure 861 Detailed administration log out link

Each table can be accessed through the detailed administration page. There are several features that are common across all tables for adding and editing data. Features and details that are unique to a particular table will be discussed in the section specific to the table.

41.1 Adding data

Clicking the Add icon (Figure 862) on any table will open a dialog to input data that can be saved into the database.

Figure 862 Detailed administration add data icon

- The specific fields, their function, and usage will be detailed in each specific table section below. If the fields origin is data from another table in the database, the table name will be listed in italics. For example, *Accounts table*.
- Required fields are displayed in bold (Figure 863)

Name:
Parent tool:

Figure 863 Detailed administration bold and non-bold fields

- Saving records can be accomplished in three ways (Figure 864)
 - Click “save and add another” to save the current record and create another blank record.
 - Click “save and continue editing” to save the current record and stay on the current record for additional changes.
 - Click “save” to save the current record and return to the summary page for the table.

Figure 864 Detailed administration save buttons

41.2 Changing data

Clicking the Change icon (Figure 865) on any table will open a summary of the table rows that can be selected for editing (Figure 866). Clicking the table name will also open a summary.

Figure 865 Detailed administration change data icon

Figure 870 Detailed administration record history

- A view on site button may be displayed at the top right of the page (Figure 871). Clicking the view on page button will redirect to the feature page defined for that table.

VIEW ON SITE >

Figure 871 Detailed administration view on site button

- A delete button will be displayed at the bottom of the page (Figure 872).

Figure 872 Detailed administration delete button

- Add record button – the top right side of the summary page will have a button to add new records (Figure 873).

ADD CONSUMABLE WITHDRAW +

Figure 873 Detailed administration add record button

- Search – some summary pages have a search dialog at the top of the page that can be used to quickly narrow results to records of interest (Figure 874). Enter a search term in the dialog box and click the search button. Partial names and wildcards can be used. Any matching results will be returned.

Figure 874 Detailed administration search dialog

- Filters can be used to narrow down the record list.
 - Filters may include a date range above the record list that can be clicked to filter results. A date range filter will start at a coarse range and continue to a narrower range. Anytime the date has been filtered, the first filter selection will be to unfilter to the previous filter level.
 - If there is multi-year data, the years with data will be displayed in the filter selection (Figure 875).

Figure 875 Detailed administration year filter

- Clicking a year filter will show data from that year and change the filter selection to the months with data (Figure 876).

Figure 876 Detailed administration month filter

- Clicking a month filter will show data from that month and change the filter selection to the days of the month with data (Figure 877).

Figure 877 Detailed administration day filter

- Clicking a day filter will show data from the date selected (Figure 878).

Figure 878 Detailed administration date filter

- Other filters may be included on the right sidebar of the page and can change from page to page (Figure 879). However, their function is the same. Click on the filter level desired to narrow down the number of records displayed in the summary page until the records of interest are displayed.

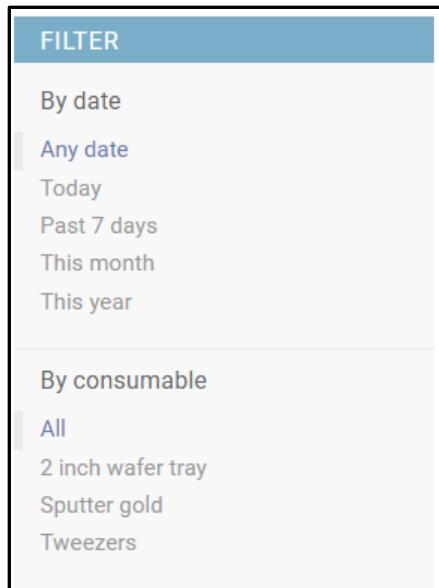

Figure 879 Detailed administration side bar filters

- Actions can be used to execute a function on one or more records (Figure 880).

Action:	-----	Go	0 of 15 selected
<input type="checkbox"/>	ID	CUSTOMER	MERCHANT
<input type="checkbox"/>	15	Captain Nemo (captain)	Captain Nemo (captain)
<input type="checkbox"/>	14	Ned Land (ned)	Captain Nemo (captain)
<input type="checkbox"/>	13	Ned Land (ned)	Captain Nemo (captain)

Figure 880 Detailed administration action menu

- Every table has a delete record action.
- To execute a function on one or more records
 - Select the records of interest by checking the checkbox on the left of the record. Checking the checkbox in the title bar will select all records (Figure 881).

Figure 881 Detailed administration select records

- Select the action to execute from the drop-down list (Figure 882).

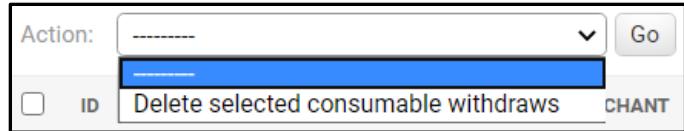

Figure 882 Detailed administration select action

- Click “go” (Figure 883).

Figure 883 Detailed administration action go button

- When deleting records, a list of impacts and related items will be displayed with a prompt to confirm or cancel the action (Figure 884).

Figure 884 Detailed administration delete confirmation dialog

- Click the yes button to continue or the no button to cancel (Figure 885).

Figure 885 Detailed administration delete confirmation buttons

- Sort – the summary list of records can be sorted by clicking on the column title (Figure 886).

MERCHANT	CONSUMABLE	QUANTITY	PROJECT
4 ▲	3 ▼	2 ▼	1 ▲

Figure 886 Detailed administration sort indicators

- An arrow next to the column title indicates sort direction. Down arrow indicates descending and up arrow indicates ascending.
- If multiple columns are clicked, then records are sorted in order of precedence with the last clicked column having the highest precedence. Lower numbers have higher precedence.
- Hovering over a sorted field heading will show an icon () to remove sorting from that column (Figure 887). Click the icon to remove sorting.

Figure 887 Detailed administration remove sorting

42 Detailed administration – NEMO (admin only)

42.1 Account types

42.1.1 Usage

Account types are optional but can be useful for binning accounts aiding in future analysis and trending. Account types, if used, must be created in this table view and can be any text name. Any number can be defined. If no account types are defined, they are not displayed on the account page. Account types are discussed in the [account page](#) detailed on page 207.

42.1.2 Summary page

The summary page provides a listing of account types (Figure 888). Click the name field in the row of interest to edit.

Home > Nemo > Account types

Select account type to change

Action: ----- Go 0 of 3 selected

ACCOUNT TYPE

Academia

3 account types

Figure 888 Account types summary page

42.1.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 889). See [Common features in detailed administration](#) for more information.

Home > Nemo > Account types > Add account type

Add account type

Name:

Figure 889 Account types add/edit page

- Name – the name can be up to 200 characters (required).

42.1.4 User access page

There is no user access page to create account types however, account types are discussed in the [account page](#) detailed on page 207.

42.2 Accounts

42.2.1 Usage

An account is at the top of the billing hierarchy. This is where you send the bill. An account can have many projects. Users make charges to projects which are carried to accounts. A detailed discussion of accounts can be found in the [Accounts and projects](#) section on page 207.

42.2.2 Summary page

The summary page provides a search dialog and filtering of the active field (Figure 890). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing accounts. At the top, there's a breadcrumb navigation: Home > Nemo > Accounts. Below the header, a search bar contains the placeholder "Select account to change". To the right of the search bar is a button labeled "ADD ACCOUNT +". On the far right, a vertical sidebar titled "FILTER" is open, showing various filtering options: "By active" (with "All", "Yes", and "No" options), "By type" (with "All", "Academia", "Industry", and "Internal" options), and "By start date" (with "Any date", "Today", "Past 7 days", "This month", and "This year" options). The main content area displays a table with three rows of account data:

<input type="checkbox"/>	NAME	ID	ACTIVE	TYPE	START DATE
<input type="checkbox"/>	Account 2	2	<input checked="" type="checkbox"/>	Academia	-
<input type="checkbox"/>	Account 3	3	<input checked="" type="checkbox"/>	-	06/03/2020
3 accounts					

Figure 890 Accounts summary page

42.2.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 891). See [Common features in detailed administration](#) for more information.

Home > Nemo > Accounts > Add account

Add account

Name:

Type: ---- ▼ Pencil + X

Start date: Today Calendar

Active
Users may only charge to an account if it is active. Deactivate the account to block future billable activity (such as tool usage and consumable check-outs) of all the projects that belong to it.

Save and add another Save and continue editing SAVE

Figure 891 Accounts add/edit page

- Name – this is the name referred to for the account. It can be a maximum of 100 characters and must be unique (required).
- Type – this is the type for the account. Account types are discussed in [Account types](#) in page 371.
- Start date – the account start date.
- Active – this indicates if the account is available to be used. Users may only charge to an account if it is active. Deactivate the account to block future billable activity (such as tool usage, etc.) of all the projects that belong to it.

42.2.4 User access page

Accounts are created and managed on the accounts and projects page detailed in the [Accounts and projects](#) section on page 207.

42.3 Activity histories

42.3.1 Usage

The activity histories table maintains a record of changes made to the active status of users, projects, and accounts. Records are written automatically, and manual entry or editing should not be necessary.

42.3.2 Summary page

The summary page provides date filtering (Figure 892). Click the activity history field in the row of interest to edit.

The screenshot shows a table titled "Activity histories" with the following data:

ACTIVITY HISTORY	CONTENT TYPE	OBJECT ID	ACTION	DATE	AUTHORIZER
Account 7 deactivated	account	7	Deactivated	Monday, June 22nd, 2020 @ 4:01 PM	Captain Nemo (captain)
User 15 activated	user	15	Activated	Thursday, May 21st, 2020 @ 5:55 PM	Captain Nemo (captain)
User 3 activated	user	3	Activated	Thursday, May 21st, 2020 @ 5:53 PM	Captain Nemo (captain)

Figure 892 Activity histories summary page

42.3.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 893). In addition, the history button will show any manual changes that were made to the record. See [Common features in detailed administration](#) for more information.

Home > Nemo > Activity histories > Account 7 deactivated

Change activity history HISTORY

Content type:	account		
Object id:	7		
Action:	Deactivated		
The target state (activated or deactivated).			
Date:	Date: 06/22/2020 Today 		
Time:	Time: 04:01 PM Now 		
The time at which the active state was changed.			
Authorizer:	Captain Nemo (captain) 		
The staff member who changed the active state of the account, project, or user in question.			
Delete	Save and add another	Save and continue editing	SAVE

Figure 893 Activity histories add/edit page

- Content type – a large selection is available under the dropdown however, NEMO only uses accounts, projects, and users (required).
- Object id – this field is the id number of the account, project, or user (required).
- Action – this field is either activated or deactivated (required).
- Date – date and time the action was taken (required).
- Authorizer – user that initiated the action (required). *User table*

42.3.4 User access page

Activity histories are automatically recorded through actions initiated on accounts, projects, and users. Accounts and projects are detailed in the [Accounts and projects](#) section on page 207. Users are detailed in the [users](#) section on page 293.

42.4 Alert categories

42.4.1 Usage

Alert categories are optional but can be useful for binning alerts aiding in future analysis and trending. Alert categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no alert categories are defined, they are not displayed on the alerts page. Alert categories are discussed in the [Alerts](#) section detailed on page 216.

42.4.2 Summary page

The summary page provides a listing of alert categories (Figure 894). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing alert categories. At the top, there's a breadcrumb navigation: Home > Nemo > Alert categories. Below the header, a message says "Select alert category to change". On the right, a button labeled "ADD ALERT CATEGORY +". Underneath, there's a search bar with "Action: -----" and a dropdown arrow, followed by a "Go" button and the text "0 of 3 selected". A scrollable list contains four items, each with a checkbox and a link: "NAME", "Facility outage", "Long PM", and "Site closure". At the bottom left, it says "3 Alert categories".

Figure 894 Alert category summary page

42.4.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 895). See [Common features in detailed administration](#) for more information.

The screenshot shows the "Add alert category" page. At the top, a breadcrumb navigation: Home > Nemo > Alert categories > Add alert category. The main title is "Add alert category". Below it, there's a "Name:" label next to an input field containing a single vertical bar character. At the bottom, there are three buttons: "Save and add another", "Save and continue editing", and a large blue "SAVE" button.

Figure 895 Alert category add/edit page

- Name – the name can be up to 200 characters (required).

42.4.4 User access page

Alert categories are discussed in the [Alerts](#) section detailed on page 216.

42.5 Alerts

42.5.1 Usage

Alerts are used to notify users of upcoming events that can impact lab or equipment availability. Alerts are discussed in the [Alerts](#) section detailed on page 216. Alerts are created and edited through a NEMO page and manual editing of this table should not be necessary.

42.5.2 Summary page

The summary page provides a listing of alerts (Figure 896). Click the title field in the row of interest to edit.

Action:	TITLE	CATEGORY	CREATION TIME	CREATOR	DEBUT TIME	EXPIRATION TIME	USER	DISMISSABLE	EXPIRED	DELETED
<input type="checkbox"/>	Sputter tool annual PM next week	Long PM	Monday, April 13th, 2020 @ 1:53 PM	Captain Nemo (captain)	Monday, April 13th, 2020 @ 1:52 PM	-	-			
<input type="checkbox"/>	Cleanroom closed this weekend		Thursday, June 21st, 2018 @ 4:40 PM	Captain Nemo (captain)	Thursday, June 21st, 2018 @ 4:39 PM	-	-			

Figure 896 Alerts summary page

42.5.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 897). See [Common features in detailed administration](#) for more information.

Home > Nemo > Alerts > Add alert

Add alert

Title:

Category:
A category/type for this alert.

Contents:

Creation time: Date: 06/23/2020 Today | Time: 04:09 PM Now |

Creator:

Debut time: Date: Today | Time: Now |
The alert will not be displayed to users until the debut time is reached.

Expiration time: Date: Today | Time: Now |
The alert can be deleted after the expiration time is reached.

User:
The alert will be visible for this user. The alert is visible to all users when this is empty.

Dismissible
Allows the user to delete the alert. This is only valid when the 'user' field is set.

Expired
Indicates the alert has expired and won't be shown anymore

Deleted
Indicates the alert has been deleted and won't be shown anymore

Save and add another **Save and continue editing** **SAVE**

Figure 897 Alerts add/edit page

- Title – title to be displayed for the alert, maximum of 100 characters.
- Category – category of the alert selected from alert categories. *Alert categories table*
- Contents – message to describe the alert, maximum of 500 characters (required).
- Creation Time – the date/time the alert was created (required).
- Creator – the user that created the alert. *Users table*
- Debut time – the time the alert will start displaying on the landing page (required).
- Expiration time – the time the alert will expire and stop being displayed on the landing page.
- User – the user targeted for the alert, this will be blank for all users. *Users table*
- Dismissible – only valid when a user is selected, allows user to delete the alert.
- Expired – indicates the alert has expired and will not be displayed any longer.
- Deleted – indicates the alert was deleted and will not be displayed any longer.

42.5.4 User access page

Alerts are discussed in the [Alerts](#) section detailed on page 216.

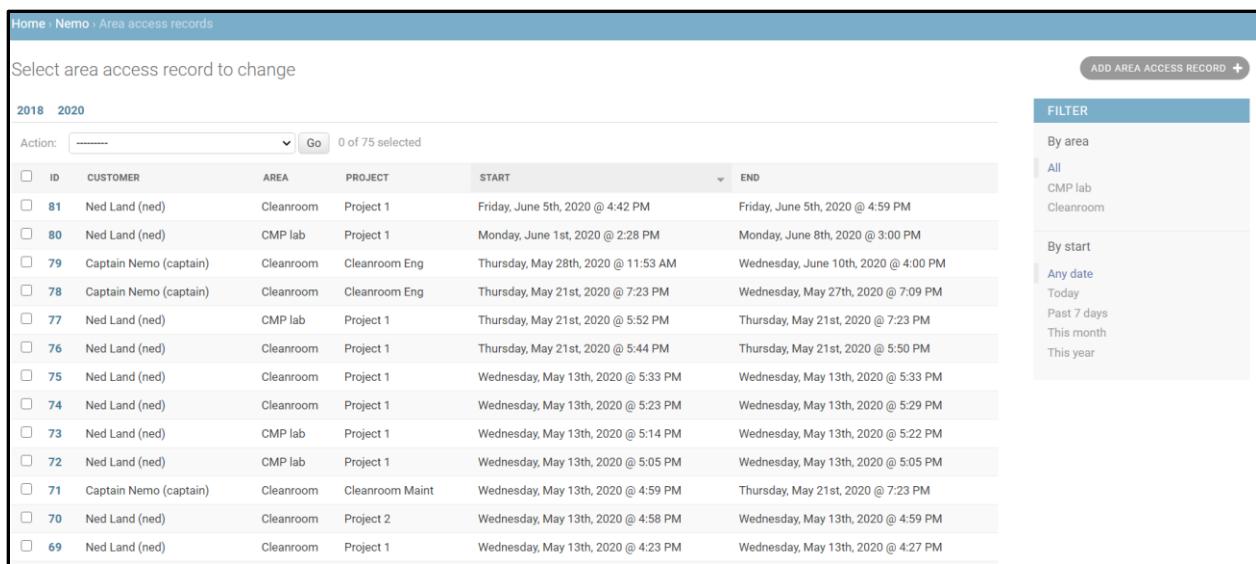

42.6 Area access records

42.6.1 Usage

The area access records table maintains the list of users that have accessed an area. Records are written automatically when a user enters/exits an area. Manual editing may be necessary to correct an access record if for example a user forgets to log out of an area.

42.6.2 Summary page

The summary page provides date filtering, filtering by area, and by start date (Figure 898). Click the id field in the row of interest to edit.

Action:	ID	CUSTOMER	AREA	PROJECT	START	END

Figure 899 Area access records add/edit page

- Area – drop down list of all areas (required). *Areas table*
- Customer – drop down list of all users (required). *Users table*
- Project – drop down list of all projects (required). *Projects table*
- Start – the start date and time (required).
- End – the end date and time.
- Staff charge – the staff charge record id the area access record is associated with.

42.6.4 User access page

Area access records are automatically recorded when a user accesses a controlled area. Access is provided via the landing page by a user, the area access page by staff, or through a controlled door tablet. Areas are discussed in the next section.

42.7 Areas

42.7.1 Usage

The areas table contains the list of areas defined for a facility. Areas are optional and can be used to define spaces and group tools in common places. In addition, areas can optionally have occupancy limits set as well as require a reservation for access.

The times a user has access to an area are defined as physical access levels. Physical access levels are used to associate areas with time schedules and are discussed in the [Detailed administration → Physical access level](#) section on page 446.

An area can optionally have doors associated with it that NEMO controls through interlocks. Doors are discussed in the [Detailed administration → Doors](#) section on page 423.

User area access permissions are permissions to physical access levels and are discussed in the [Users](#) section on page 293.

Areas must be created and edited through accessing this table directly.

42.7.2 Summary page

The summary page provides a list of areas (Figure 900). Click the area field in the row of interest to edit. If parent/child areas are used, clicking the expand tree button will list all children under a parent and clicking collapse tree will hide all children under a parent.

The screenshot shows a web-based application interface for managing areas. At the top, there's a navigation bar with 'Home', 'Nemo', and 'Areas'. Below the navigation is a search bar with a placeholder 'Select area to change' and a 'Search' button. To the right of the search bar are three buttons: 'EXPAND TREE', 'COLLAPSE TREE', and 'ADD AREA +'. On the far right, there's a 'FILTER' sidebar with two sections: 'By requires reservation' (with options 'All', 'Yes', and 'No') and 'By parent area' (with options 'All', 'Cleanroom', and 'CMP lab'). The main content area displays a table with the following data:

Action	Title	Name	Parent Area	Category	Requires Reservation	Maximum Capacity	Reservation Warning	ID
<input type="checkbox"/>	Cleanroom	Cleanroom	-	Cleanroom	<input checked="" type="checkbox"/>	5	2	1
<input type="checkbox"/>	CMP lab	CMP lab	-	-	<input checked="" type="checkbox"/>	0	-	3

At the bottom left of the table area, it says '2 areas'.

Figure 900 Areas summary page

42.7.3 Fields

The add/change page for this table lists the fields that can be edited. In addition, the history button will show any manual changes that were made to the record. The area table is listed in five sections that will be detailed below.

- General Information (Figure 901)
 - Name – the name of the area, maximum 200 characters (required)

- Parent area – if parent/child relationships are desired, select the parent area from the drop-down list.
- Category – to organize areas on the calendar sidebar, categories can be created to group by. Optional
- Reservation email – An email will be sent to this address when users create or cancel reservations in the area or in children areas. A comma-separated list can be used. Optional
- Abuse email – An email will be sent to this address when users overstay their reservation in the area or in children areas (logged in with expired reservation). A comma-separated list can be used. Optional

Change area HISTORY

Name:	<input type="text" value="Cleanroom"/>
What is the name of this area? The name will be displayed on the tablet login and logout pages.	
Parent area:	<input style="width: 100px; height: 20px; border: 1px solid #ccc;" type="text" value="-----"/> ▼ ✎ + Select a parent area, (building, floor etc.)
Category:	<input type="text" value="Cleanroom"/>
Create sub-categories using slashes. For example "Category 1/Sub-category 1".	
Reservation email:	<input type="text"/>
An email will be sent to this address when users create or cancel reservations in the area or in children areas. A comma-separated list can be used.	
Abuse email:	<input type="text"/>
An email will be sent to this address when users overstay in the area or in children areas (logged in with expired reservation). A comma-separated list can be used.	

Figure 901 Area general information

- Area access (Figure 902)
 - Requires reservation – check this box to require a reservation for this area before a user can login. Checking this box will cause this area to display on the calendar sidebar so it is accessible for reservations.
 - Logout grace period – number of minutes users have to logout of this area after their reservation expired before being flagged and abuse email is sent.
 - Welcome message – the welcome message will be displayed on the tablet login page. You can use HTML and JavaScript. Only required for tablet door access control.
 - Buddy system allowed – this checkbox enables the buddy board for this area. The buddy board appears on the navigation bar and is described in the [buddy board](#) section starting on page 143.

Area access

Requires reservation
Check this box to require a reservation for this area before a user can login.

Logout grace period: Number of minutes users have to logout of this area after their reservation expired before being flagged and abuse email is sent.

Welcome message:

The welcome message will be displayed on the tablet login page. You can use HTML and JavaScript.

Buddy system allowed
Check this box if the buddy system is allowed in this area.

Figure 902 Area area access

- Occupancy (Figure 903)
 - Maximum capacity – The maximum number of people allowed in this area at any given time. Set to 0 for unlimited. (required)
 - Count staff in occupancy – Indicates that staff users will count towards maximum capacity. If not checked, staff occupancy will be listed separately on the status dashboard and jumbotron pages.
 - Count service personnel in occupancy – Indicates that service personnel will count towards maximum capacity. If not checked, service personnel occupancy will be listed separately on the status dashboard and jumbotron pages.
 - Reservation warning – The number of simultaneous users (with at least one reservation in this area) allowed before a warning is displayed when creating a reservation.

Occupancy

Maximum capacity: The maximum number of people allowed in this area at any given time. Set to 0 for unlimited.

Count staff in occupancy
Indicates that staff users will count towards maximum capacity.

Count service personnel in occupancy
Indicates that service personnel will count towards maximum capacity.

Reservation warning: The number of simultaneous users (with at least one reservation in this area) allowed before a warning is displayed when creating a reservation.

Figure 903 Area occupancy

- Reservation (Figure 904) – these parameters are only applicable if the ‘requires reservation’ check box is checked
 - Reservation horizon – Users may create reservations this many days in advance. Leave this field blank to indicate that no reservation horizon exists for this area.
 - Missed reservation threshold – The amount of time (in minutes) that an area reservation may go unused before it is automatically marked as "missed" and hidden from the calendar. The cancellation process is triggered by a timed job on the web server.

The screenshot shows a configuration interface titled 'Reservation'. It has two main sections: 'Reservation horizon' and 'Missed reservation threshold'. The 'Reservation horizon' section contains a text input field with the value '14' and a descriptive note below it. The 'Missed reservation threshold' section contains a text input field and a descriptive note below it.

Reservation	
Reservation horizon:	<input type="text" value="14"/>
Users may create reservations this many days in advance. Leave this field blank to indicate that no reservation horizon exists for this area.	
Missed reservation threshold:	<input type="text"/>
The amount of time (in minutes) that an area reservation may go unused before it is automatically marked as "missed" and hidden from the calendar. Usage can be from any user, regardless of who the reservation was originally created for. The cancellation process is triggered by a timed job on the web server.	

Figure 904 Area reservation

- Policy (Figure 905) – these parameters are only applicable if the ‘requires reservation’ check box is checked.
 - Policy off between times – Check this box to disable policy rules every day between the given times
 - Policy off start time – The start time when policy rules should NOT be enforced
 - Policy off end time – The end time when policy rules should NOT be enforced
 - Policy off weekend – Whether or not policy rules should be enforced on weekends
 - Minimum usage block time – The minimum amount of time (in minutes) that a user must reserve this area for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this area.
 - Maximum usage block time – The maximum amount of time (in minutes) that a user may reserve this area for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this area.
 - Maximum reservations per day – The maximum number of reservations a user may make per day for this area.
 - Minimum time between reservations – The minimum amount of time (in minutes) that the same user must have between any two reservations for this area.
 - Maximum future reservation time – The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

Policy

Policy off between times
Check this box to disable policy rules every day between the given times

Policy off start time: Now |

The start time when policy rules should NOT be enforced

Policy off end time: Now |

The end time when policy rules should NOT be enforced

Policy off weekend
Whether or not policy rules should be enforced on weekends

Minimum usage block time:

The minimum amount of time (in minutes) that a user must reserve this area for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this area.

Maximum usage block time:

The maximum amount of time (in minutes) that a user may reserve this area for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this area.

Maximum reservations per day:

The maximum number of reservations a user may make per day for this area.

Minimum time between reservations:

The minimum amount of time (in minutes) that the same user must have between any two reservations for this area.

Maximum future reservation time:

The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

Figure 905 Area policy

42.7.4 User access page

There are no user pages for creating areas. Accessing areas can be performed from the landing page if enabled, the area access page by staff, and the entrance tablets if used.

42.8 Badge readers

42.8.1 Usage

The badge reader table can be used to create custom badge reader behavior. The default behavior of NEMO is to expect the F2 character as the send key and the record key. It does not need to be explicitly defined but has been here to provide an example of how to record a new badge reader. When using the Kiosk or Area Access, add ?reader_id=<reader_id> to the URL to select a badge reader configuration.

42.8.2 Summary page

The summary page provides a listing of badge readers (Figure 906). Click the id field in the row of interest to edit.

Select badge reader to change				
Action:	-----		Go	0 of 1 selected
<input type="checkbox"/>	ID	NAME	SEND KEY	RECORD KEY
<input type="checkbox"/>	1	Standard badge reader	F2	F2
1 badge reader				

Figure 906 Badge reader summary page

42.8.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 907). See [Common features in detailed administration](#) for more information.

Add badge reader

Name:

Send key:

The name of the key which submits the badge number ('F2', 'Shift', 'Meta', 'Enter', 'a' etc.)

Record key:

The name of the key which starts badge number recording. If left blank, badge number recording starts when any input is received.

[Save and add another](#)

[Save and continue editing](#)

SAVE

Figure 907 Badge reader add/edit page

- Name – the name can be up to 200 characters (required).
- Send key – The name of the key which submits the badge number ('F2', 'Shift', 'Meta', 'Enter', 'a' etc.) (required)
- Record key – The name of the key which starts badge number recording. If left blank, badge number recording starts when any input is received.

42.8.4 User access page

There are no user access pages associated with badge readers. When using the Kiosk or Area Access, add ?reader_id=<reader_id> to the URL to select a badge reader configuration.

42.9 Buddy request messages

42.9.1 Usage

The buddy request messages table stores the responses entered on the [buddy board](#) feature described starting on page 143.

42.9.2 Summary page

The summary page provides a listing of buddy request messages (Figure 908). Click the ID field in the row of interest to edit. You can reach the parent buddy request by clicking the buddy request of interest.

Select buddy request message to change				ADD BUDDY REQUEST MESSAGE +

42.10.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 911). See [Common features in detailed administration](#) for more information.

Change buddy request

Creation time: Date: 12/29/2020 Today | Time: 11:53 AM Now |

The date and time when the request was created.

Start: 12/29/2020 Today |

The start date the user is requesting a buddy.

End: 12/29/2020 Today |

The end date the user is requesting a buddy.

Description: I need a buddy today

The description of the request.

Area: Cleanroom

User: Mathieu Rampant (mrampant)

The user who is submitting the request.

Expired
Indicates the request has expired and won't be shown anymore.

Deleted
Indicates the request has been deleted and won't be shown anymore.

Figure 911 Buddy request add/edit page

- Creation time – use the dialog box or calendar/clock to select the creation date/time (required).
- Start – use the dialog box or calendar to select the start date (required).
- End – use the dialog box or calendar to select the end date (required).
- Description – dialog box to enter description of the buddy request (required).
- Area – select area from the drop down (required) (Areas Table).
- User – select user submitting request from the drop-down box (required) (Users Table).
- Expired – check box indicates if request has past end date and won't be displayed any longer.
- Deleted – check box indicates if request was deleted by user and won't be displayed any longer.

42.10.4 User access page

Records are typically not edited or created directly in this view. There is a [buddy board page](#) for managing buddy requests which is described starting on page 143.

42.11 Chemical hazards

42.11.1 Usage

The chemical hazards table stores the chemical hazards used for the [safety data sheets](#) feature described starting on page 171.

42.11.2 Summary page

The summary page provides a listing of chemical hazards (Figure 912). Click the name field in the row of interest to edit.

Figure 913 Chemical hazard add/edit page

- Name – use the input field to enter the name of the chemical hazard (required).
- Display order – use the dialog box or calendar to select the start date (required).
- Logo – use the “Choose File” button to upload a logo for this hazard. Standard hazards logos can be found on [the NEMO GitHub repository](#).
- Chemicals – use the multi selector to select chemicals that this hazard applies to. This can also be done from the [Chemicals](#) admin page.

42.11.4 User access page

Chemical hazards are displayed in the [Safety data sheets](#) section detailed on page 171.

42.12 Chemicals

42.12.1 Usage

The chemicals table stores the chemical used in the [safety data sheets](#) feature described starting on page 171.

42.12.2 Summary page

The summary page provides a listing of chemicals (Figure 914). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing chemicals. At the top, a header reads "Select chemical to change" and includes a "ADD CHEMICAL +" button. Below the header, there is a search bar labeled "Action: -----" with a dropdown arrow, a "Go" button, and a status message "0 of 5 selected". A list of chemicals is displayed in rows, each with a checkbox to its left. The chemicals listed are: CHEMICAL, Acetylene, Boron trifluoride, Carbon tetrafluoride, Formaldehyde, and Glycolic acid. At the bottom of the list, it says "5 chemicals".

Figure 914 Chemical summary page

42.12.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 915). See [Common features in detailed administration](#) for more information.

Change chemical

Carbon tetrafluoride

HISTORY

Name: Carbon tetrafluoride

Hazards:

Available hazards: Flammable, Oxidizing, Corrosive, Toxic, Harmful, Health hazard, Environmental hazard

Chosen hazards: Compressed gas

Choose all Remove all

Select the hazards for this chemical. Hold down "Control", or "Command" on a Mac, to select more than one.

Document: Choose File No file chosen

URL: https://www.oshatrain.org/courses/pdf/samf

Keywords: Tetrafluoromethane, Perfluoromethane, Freon 14, Halon 14, Arcton 0, CFC 14, PFC 14, R 14

This screenshot shows a user interface for managing chemical information. At the top, there's a header with the title 'Change chemical' and a 'HISTORY' button. Below that, the chemical name 'Carbon tetrafluoride' is entered in a text field. The 'Hazards' section contains two lists: 'Available hazards' (Flammable, Oxidizing, Corrosive, Toxic, Harmful, Health hazard, Environmental hazard) and 'Chosen hazards' (Compressed gas). There are 'Choose all' and 'Remove all' buttons below these lists. A note says 'Select the hazards for this chemical. Hold down "Control", or "Command" on a Mac, to select more than one.' Below the hazards, there are fields for 'Document' (with a 'Choose File' button and 'No file chosen' message), 'URL' (with a text input containing a sample URL), and 'Keywords' (with a text input containing a list of related terms like Tetrafluoromethane, Perfluoromethane, etc.).

Figure 915 Chemical add/edit page

- Name – use the input field to enter the name of the chemical (required).
- Hazards – use the multi selector to select hazards for this chemical.
- Document – use the “Choose file” button to upload a document for this chemical.
- URL – alternatively, a URL link can be entered for the document.
- Keywords – use the dialog box to enter a list of keywords that can be used in the search feature of the Safety data sheets page.

42.12.4 User access page

Chemicals are displayed in the [Safety data sheets](#) section detailed on page 171.

42.13 Closures

42.13.1 Usage

The closures table is used to records facility closures and override physical access level schedules to prevent access during the times defined. This feature is useful for creating holiday schedules and planned closures. During a physical access exception period, the selected physical access levels are not accessible to users.

42.13.2 Summary page

The summary page provides a listing of closures (Figure 916). Click the name field in the row of interest to edit.

The screenshot shows a table with columns: NAME, ALERT DAYS BEFORE, TIMES, STAFF ABSENT, and NOTIFY MANAGERS LAST OCCURRENCE. The first row has values: Christmas - Lab closed, 14, 12/25/2022 12:00 AM - 11:59 PM and 12/25/2021 12:00 AM - 11:59 PM, checked in both STAFF ABSENT and NOTIFY MANAGERS LAST OCCURRENCE. The second row has values: President's day - Lab closed, 5, 02/20/2022 12:00 AM - 11:59 PM and 02/21/2021 12:00 AM - 11:59 PM, checked in NOTIFY MANAGERS LAST OCCURRENCE. A sidebar on the right titled 'FILTER' includes sections for 'By area' (All, Campus, Cleanroom, Grey room), 'By staff absent' (All, Yes, No), and 'By notify managers last occurrence' (All, Yes, No).

Action:	NAME	ALERT DAYS BEFORE	TIMES	STAFF ABSENT	NOTIFY MANAGERS LAST OCCURRENCE
<input type="checkbox"/>	Christmas - Lab closed	14	12/25/2022 12:00 AM - 11:59 PM 12/25/2021 12:00 AM - 11:59 PM	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/>	President's day - Lab closed	5	02/20/2022 12:00 AM - 11:59 PM 02/21/2021 12:00 AM - 11:59 PM	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Figure 916 Closures summary page

42.13.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 917, Figure 919). See [Common features in detailed administration](#) for more information.

Change closure

HISTORY**President's day - Lab closed****Name:**

President's day - Lab closed

The name of this closure, that will be displayed as the policy problem and alert (if applicable).

Alert days before:

5

Enter the number of days before the closure when an alert should automatically be created. Leave blank for no alert.

Alert template:

The lab will be closed for President's day from {{ start_time }} to {{ end_time }}.
The buddy system will be in effect.

The template to create the alert with. The following variables are provided (when applicable): **name, start_time, end_time, areas**.**Alert preview:****President's day - Lab closed**

The lab will be closed for President's day from Friday,
February 18th, 2022 @ 12:00 AM to Sunday,
February 20th, 2022 @ 11:59 PM.
The buddy system will be in effect.

 Notify managers last occurrence

Check this box to notify facility managers on the last occurrence of this closure.

 Staff absent

Check this box and all staff members will be marked absent during this closure in staff status.

Figure 917 Closures add/edit page 1

- Name – descriptive name of the closure. This field is displayed in the message to users if someone tries to enter the area during the selected time (Figure 918) (required)

You do not have access to the Cleanroom at this time due to the following closure: President's day - Lab closed. The closure ends on Sunday, February 20th, 2022 @ 11:59 PM

Figure 918 Closures message

- Alert days before – number of days before the closure that the automatic alert should be shown. Setting this field to any value other than blank will trigger the automatic alert creation, if the “Create closure alerts” timed service is set. See [NEMO Timed Services](#) for more information.
- Alert template – template message used for the alert. 4 variables can be used in the template: name, start_time, end_time and areas (unique areas from physical access levels). This field is required if “Alert days before” is set.
- Alert preview – preview of the alert if an alert template is provided. To display the preview, after providing an alert template click on “Save and continue editing”.
- Notify managers last occurrence – check this box to make sure facility managers get a reminder email on the last occurrence of this closure. This feature is particularly useful when setting multiple dates in advance, for example Christmas dates for the next 5 years,

managers will be notified on the last one 5 years from now, so they can remember to go add more dates. The “Create closure alerts” timed service need to be set for this to work. See [NEMO Timed Services](#) for more information.

- Staff absent – check this box and all staff will be marked absent on the staff status page and the status will show “Closed”. See [Staff status](#).

Physical access levels:

Available physical access levels

Cleanroom access
Grey room access

Chosen physical access levels

Cleanroom access weekdays

Closure times:

START TIME	END TIME	DELETE?
Sunday, February 20th, 2022 from 12:00 AM to 11:59 PM		<input type="checkbox"/>
Date: 02/20/2022 Today	Date: 02/20/2022 Today	
Time: 12:00 AM Now	Time: 11:59 PM Now	
<hr/>		
Sunday, February 21st, 2021 from 12:00 AM to 11:59 PM		<input type="checkbox"/>
Date: 02/21/2021 Today	Date: 02/21/2021 Today

Time: <input type="text"/> Now	Time: <input type="text"/> Now	

Figure 919 Closures page 2

- Physical access levels – select available physical access levels that the exception will apply to and use the right arrow to add to the chosen users list. Multiple physical access levels can be selected using the control or shift keys.
- Closure times (at least 1 required):
 - Start time – enter a start time for the closure.
 - End time – enter an end time for the closure.

42.13.4 User access page

There is no user page available to create facility closures. Once created, users with the selected physical access level will not be able to access the associated area during the closure window.

42.14 Comments

42.14.1 Usage

The comments table is used to store comments entered on the tool pages and should not normally need to be directly edited. Comments are entered on the [post a comment](#) tab of the tool control page and are detailed on page 122. The [comment history](#) for a tool can be viewed on the details tab of the tool control page and are detailed on page 113.

42.14.2 Summary page

The summary page provides a listing of comments (Figure 920). Click the id field in the row of interest to edit.

Change configuration history HISTORY

Configuration:	Evaporator: Pocket 1 Source	
User:	Captain Nemo (captain)	
Modification time:	Date: 05/06/2020	Today
	Time: 11:09 PM	Now
Slot:	0	
Setting:	Ti	
<div style="text-align: left;"> Delete Save and add another Save and continue editing SAVE </div>		

Figure 923 Configuration histories add/edit page

- Configuration – select the configuration from the drop-down list. (required) *Configurations table*
- User – select the user name from the drop-down list (required). *Users table*
- Modification time – use the dialog box or calendar/clock to select the creation date/time (required).
- Slot – indicates where the configuration will go
- Setting – the specific item to be used for the configuration

42.15.4 User access page

Configurations are created in the [configurations table](#) detailed on page 409. The configuration of a tool can be changed, updated, and viewed on several pages of NEMO. The configuration can be selected when a [reservation is made](#) which is detailed on page 49, staff [update the configuration](#) when the tool is setup for the user which is detailed on page 228, and the history can be viewed from the [config history tab](#) of the tool control page which is detailed on page 115.

42.16 Configurations

42.16.1 Usage

The configurations histories table is used to store tool configurations for each configurable tool. The configuration can be selected when a [reservation is made](#) which is detailed on page 49, staff [update the configuration](#) when the tool is setup for the user which is detailed on page 228, and the history can be viewed from the [config history tab](#) of the tool control page which is detailed on page 115.

42.16.2 Summary page

The summary page provides a listing of configurations (Figure 924). Click the id field in the row of interest to edit.

The screenshot shows a web-based administrative interface for managing configurations. At the top, a blue header bar displays the navigation path: Home > Nemo > Configurations. Below the header, a search bar contains the placeholder text "Select configuration to change". To the right of the search bar is a grey button labeled "ADD CONFIGURATION" with a plus sign icon. Underneath the search bar, there is a form with the label "Action:" followed by a dropdown menu and a "Go" button. To the right of the "Go" button, it says "0 of 5 selected". The main content area is a table with the following data:

<input type="checkbox"/>	ID	TOOL	NAME	QUALIFIED USERS ARE MAINTAINERS	DISPLAY PRIORITY	EXCLUDE FROM CONFIGURATION AGENDA
<input type="checkbox"/>	3	Chlorine Etch	Material to be etched	✓	0	✓
<input type="checkbox"/>	4	Evaporator	Pocket 1 Source	✗	1	✗
<input type="checkbox"/>	5	Evaporator	Pocket 2 Source	✗	2	✗
<input type="checkbox"/>	1	Sputter	Gun 1 Target	✗	1	✗
<input type="checkbox"/>	2	Sputter	Gun 2 Target	✗	2	✗

Below the table, a message indicates "5 configurations".

42.16.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 925, Figure 926). See [Common features in detailed administration](#) for more information.

HISTORY

Change configuration

Name:

Pocket 2 source

The name of this overall configuration. This text is displayed as a label on the tool control page.

Tool:

Evaporator

The tool that this configuration option applies to.

Configurable item name:

Source

The name of the tool part being configured. This text is displayed as a label on the tool control page. Leave this field blank if there is only one configuration slot.

Advance notice limit:

24

Configuration changes must be made this many hours in advance.

Display order:

2

The order in which this configuration will be displayed beside others when making a reservation and controlling a tool. Can be any positive integer including 0. Lower values are displayed first.

Prompt:

Please select the source you will need. If you will provide the target, provide the details in the comments.

The textual description the user will see when making a configuration choice.

Current settings:

Ag

The current configuration settings for a tool. Multiple values are separated by commas.

Available settings:

Ti,
Pt,
Cr,
Au,
Ag,
User provided source

The available choices to select for this configuration option. Multiple values are separated by commas.

Figure 925 Configurations add/edit page part 1

Maintainers:

- Exclude from configuration agenda – Reservations containing this configuration will be excluded from the Configuration Agenda page.
- Absence string – The text that appears to indicate absence of a choice.
- Enabled – Enable/disable the configuration. If disabled, it will not show up in the tool control or in the Configuration Agenda page.

42.16.4 User access page

The configuration of a tool can be changed, updated, and viewed on several pages of NEMO. The configuration can be selected when a [reservation is made](#) which is detailed on page 49, staff [update the configuration](#) when the tool is setup for the user which is detailed on page 228, and the history can be viewed from the [config history tab](#) of the tool control page which is detailed on page 115.

42.17 Consumable categories

42.17.1 Usage

Consumable categories are optional but can be useful for binning consumables so they can be displayed in logical groups. Consumable categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no consumable categories are defined, all consumables will be listed in alphabetical order. Consumable categories are discussed in the [Supplies](#) section detailed on page 284.

42.17.2 Summary page

The summary page provides a listing of consumable supply categories (Figure 927). Click the name field in the row of interest to edit.

The add/change page for this table lists the fields that can be edited (Figure 928). See [Common features in detailed administration](#) for more information.

Add consumable category

Name:

Figure 928 Consumable category add/edit page

- Name – the name can be up to 200 characters (required).

42.17.4 User access page

Consumable categories are discussed in the [Supplies](#) section detailed on page 284.

42.18 Consumable withdraws

42.18.1 Usage

The consumable withdraws records table maintains the list of consumable or supply items that have been distributed to users either manually by staff or automatically by tool usage. Records are written automatically when a staff member [checks out a supply](#) to a user which is detailed on page 284, or a consumable withdraw is initiated by a [tool post usage](#) question which is detailed on page 504. Normally, this table will not require manual editing unless an incorrect quantity is entered.

42.18.2 Summary page

The summary page provides date filtering, filtering by consumable, and by start date (Figure 929). Click the id field in the row of interest to edit.

Figure 930 Consumable withdraws add/edit page

- Customer – The user who will use the consumable item. (required) *Users table*
- Merchant – The staff member that performed the withdraw. (required) *Users table*
- Consumable – Select the consumable from the drop-down list. (required) *Consumables table*
- Quantity – The integer number quantity provided (required)
- Project – The withdraw will be billed to this project. (required) *Projects table*
- Date – use the dialog box or calendar/clock to select the creation date/time (required).

42.18.4 User access page

Records are written automatically when a staff member checks out a supply to a user which is detailed on page 284, or a consumable withdraw is initiated by a tool post usage question which is detailed on page 504.

42.19 Consumables

42.19.1 Usage

The consumables can be defined as items manually distributable by staff to users or items automatically distributed to users triggered by tool usage. The total quantity in stock can be tracked and messages automatically sent to the responsible person at a set threshold.

42.19.2 Summary page

The summary page provides date filtering, filtering by visibility and consumable (Figure 931). Click the name field in the row of interest to edit.

<input type="checkbox"/>	NAME	QUANTITY	CATEGORY	VISIBLE	REUSABLE	REMINDER THRESHOLD	REMINDER EMAIL	ID

Change consumable

Tweezers

Name: Tweezers

Category: -----

Quantity: 10
The number of items currently in stock.

Reusable
Check this box if this item is reusable. The quantity of reusable items will not decrease when orders are made (storage bins for example).

Visible

Reminder threshold: 5
More of this item should be ordered when the quantity falls below this threshold.

Reminder email: service@nautilus.com
An email will be sent to this address when the quantity of this item falls below the reminder threshold.

Reminder threshold reached: *

Buttons: Delete | Save and add another | Save and continue editing | **SAVE**

Figure 932 Consumables add/edit page

- Name – Name of the consumable (required).
- Category – Select a category from the drop-down list.
- Quantity – The integer number of items currently in stock (required).
- Reusable – Checkbox to indicate if item is reusable. Reusable items quantity never decreases.
- Visible – Checkbox to indicate if item is on the supply list. This is usually unchecked for items automatically distributed based on tool usage.
- Reminder threshold – The quantity at which a restock reminder email should be sent
- Reminder email – The email address of the person responsible for ordering additional stock.
- Reminder threshold reached – Indicator if stock is below reminder threshold (not user settable)

42.19.4 User access page

There is no page for creating or maintaining consumables, it must be done on this page. However, quantity records are updated automatically when a staff member [checks out a supply](#) to a user which is detailed on page 284, or a consumable withdraw is initiated by a [tool post usage](#) question which is detailed on page 504.

42.20 Contact information

42.20.1 Usage

Contact information can provide users information about how to find a staff member when needed. Contact information, if used, must be created in this table view. Any number can be defined. In addition, contacts can be associated with NEMO users to provide additional contact information on the tool detail pages. Contact information is discussed in the [contact staff section](#) detailed on page 177. Tool details are discussed in the [tool details section](#) starting on page 107.

42.20.2 Summary page

The summary page provides a listing of contacts (Figure 933). Click the name field in the row of interest to edit.

Select contact information to change

- Name – the name can be up to 200 characters and is not linked to a user in the user table (required).
- Image – an image of the contact can be uploaded to display on the contact page.
- Category – The group the contact should be in. (required if categories are defined)
- Email – email address of the contact
- Office phone – land line phone number of contact
- Office location – text box for office location, can provide directions, etc.
- Mobile phone – mobile number of contact
- SMS capable – If the mobile phone capable of receiving text messages a link will be displayed for users to click to send a text message to the recipient when viewing the 'Contact information' page.

- User – Select the NEMO user to associate with this contact. When a user and contact are associated, more contact information will be provided for the contact on the tool details page. Tool details are discussed in the [tool details section](#) starting on page 107.

42.20.4 User access page

Contact information, if used, must be created in this table view and can be any text name. Contact information is discussed in the [contact staff section](#) detailed on page 177.

42.21 Contact information categories

42.21.1 Usage

Contact information categories are optional but can be useful for grouping types of staff on the contact information page. Contact information categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no contact information categories are defined, all contacts will be listed in alphabetical order. Contact information categories are discussed in the [contact staff section](#) detailed on page 177.

42.21.2 Summary page

The summary page provides a listing of contact information categories (Figure 935). Click the name field in the row of interest to edit.

- Name – the name can be up to 200 characters (required).
- Display order – Contact information categories are sorted according to display order. The lowest value category is displayed first in the 'Contact information' page. (required)

42.21.4 User access page

Contact information categories, if used, must be created in this table view and can be any text name. Contact information categories are discussed in the [contact staff section](#) detailed on page 177.

42.22 Disciplines

42.22.1 Usage

Disciplines are optional but are useful to group projects based on their main discipline, for example Chemistry, Physics etc.

Disciplines won't appear as an option for projects unless at least one discipline has been added.

42.22.2 Summary page

The summary page provides a listing of disciplines (Figure 937). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing disciplines. At the top, a header reads "Select discipline to change". Below this is a search bar with "Action: -----" and a dropdown arrow, followed by a "Go" button and the text "0 of 4 selected". A large list area contains four entries, each with a checkbox next to the word "DISCIPLINE": "Biology", "Chemistry", "Electronics", and "Physics". At the bottom of this list, the text "4 disciplines" is displayed. In the top right corner of the main content area, there is a button labeled "ADD DISCIPLINE +".

Figure 937 Disciplines summary page

42.22.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 938). See [Common features in detailed administration](#) for more information.

The screenshot shows a web-based application interface for editing a discipline. The title "Change discipline" is at the top left, and a "HISTORY" button is on the top right. The main content area shows the discipline "Chemistry" in bold. Below it is a form field labeled "Name:" containing "Chemistry", with the placeholder "The name of the discipline" underneath. At the bottom are four buttons: "Delete" (red), "Save and add another" (blue), "Save and continue editing" (blue), and "SAVE" (blue).

Figure 938 Disciplines add/edit page

- Name – the name can be up to 200 characters (required).

42.22.4 User access page

There is no user access page available for disciplines. However, they are displayed as an optional field when creating/editing [Projects](#).

42.23 Doors

42.23.1 Usage

NEMO has the capability to control access to lab doors using a display with card reader and interlock relay to actuate a door lock solenoid. Doors are optional but can be useful for ensuring lab occupancy is tracked. Doors are discussed in more detail in the [entrance tablet section](#) on page 588.

42.23.2 Summary page

The summary page provides a listing of doors (Figure 939). Click the name field in the row of interest to edit. Once doors are defined, a URL is automatically available to access the door based on the row id number. In the doors summary page figure below, accessing www.nemo.com/welcome_screen/1/ will display the door access screen for the lab entrance door.

- Interlock – select the interlock from the dropdown list. This interlock relay will be actuated to unlock the door. (required)

42.23.4 User access page

There is no user access page available for the doors. They are generated internally and cannot be modified or deleted.

42.24 Email logs

42.24.1 Usage

All emails sent by NEMO are logged for audit purposes and accessible in the detailed administration. Use the `send_email` function available in `utilities.py` to automatically log emails.

42.24.2 Summary page

The summary page provides a listing of emails sent by NEMO (Figure 941). Click the ID field in the row of interest to view. Email log records cannot be edited or deleted.

Figure 942 Email logs view page

- Category – the type of email NEMO sent.
- Sender – the name of the sender, typically the User office email defined in the customization page.
- To – the user the email was sent to.
- Subject – the subject of the email.
- Content – the body of the email.
- Ok – indicated if the message was sent without error.
- Attachments – list of files attached.
- Content preview – a preview of the email if available.

42.24.4 User access page

Interlock card categories, if used, must be created in this table view and can be any text name. Interlock card categories are used in the interlock cards table to define how NEMO should communicate with the interlock.

42.25 Interlock card categories

42.25.1 Usage

Interlock card categories are used to link an interlock class in `interlocks.py` to interlock cards so NEMO knows how to talk to the interlock. An interlock card category should be created for each interlock class in `interlocks.py` that will be used to control tool access or door access.

42.25.2 Summary page

The summary page provides a listing of interlock card categories (Figure 943). Click the name field in the row of interest to edit.

The screenshot shows a web-based administrative interface for managing interlock card categories. At the top, there's a breadcrumb navigation: Home > Nemo > Interlock card categories. Below the header, a search bar contains the placeholder text "Select interlock card category to change". To the right of the search bar is a button labeled "ADD INTERLOCK CARD CATEGORY +". Underneath the search bar, there's a form with "Action:" dropdown set to "-----", a "Go" button, and a status message "0 of 4 selected". A table lists four categories: NAME, ProXr, Raspberry Pi Interlock, Stanford, and WebRelayHttp. Each category has a checkbox next to it. At the bottom of the table, it says "4 Interlock card categories".

Figure 943 Interlock card categories summary page

42.25.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 944). See [Common features in detailed administration](#) for more information.

Home > Nemo > Interlock card categories > WebRelayHttp

Change interlock card category

HISTORY

Name:
The name for this interlock category

Key:
The key to identify this interlock category by in interlocks.py

Delete **Save and add another** **Save and continue editing** **SAVE**

Figure 944 Interlock card categories add/edit page

- Name – name can be up to 200 characters (required).
- Key – The key to identify this interlock category in interlocks.py (required)

The interlocks.py file has a dictionary that links this key name to each interlock class in interlocks.py. Users can create their own interlock class and access it in NEMO by updating the dictionary to include their custom class (Figure 945).

```
interlocks: Dict[str, Interlock] = {
    'stanford': StanfordInterlock(),
    'web_relay_http': WebRelayHttpInterlock(),
    'proxr': ProXrInterlock(),
    'rpi_interlock': RPiInterlock(),
}
```

Figure 945 Interlock card categories example dictionary in interlocks.py

42.25.4 User access page

Interlock card categories, if used, must be created in this table view and can be any text name. Interlock card categories are used in the interlock cards table to define how NEMO should communicate with the interlock.

42.26 Interlock cards

42.26.1 Usage

Interlock cards define the communication parameters with an interlock device. Regardless if single relay interlock devices are used or multi-relay interlock devices are used, each device will require definition as an interlock card. Information such as IP address, port number and interlock category define how NEMO will communicate with the device.

42.26.2 Summary page

The summary page provides a listing of interlock cards (Figure 946). Click the name field in the row of interest to edit.

- Number – Card number (required for Stanford interlocks)
- Even port – even port number (required for Stanford interlocks)
- Odd port – odd port number (required for Stanford interlocks)
- Category – interlock card category selectable from drop down list (required). See [Interlock card categories](#).

- Username – if a username and password is required to access the interlock device, enter the username
- Password – if a username and password is required to access the interlock device, enter the password
- Enabled – check box to set the status of the device, normally checked.

42.26.4 User access page

Interlock cards, if used, must be created in this table view and can be any text name. Interlock cards are used in the interlocks table to define which interlock device to talk to.

42.27 Interlocks

42.27.1 Usage

The interlocks table defines each relay on an interlock card. An entry is required for each relay on the card that will be used. NEMO areas and tools access the interlocks to control lab door and tool access.

42.27.2 Summary page

The summary page provides a listing of interlocks (Figure 948). Click the id field in the row of interest to edit.

- Unit id – extra field used for Modbus interlocks.
- State – Informational only, can be locked, unlocked, or unknown if not initialized.
- Most recent reply – Informational only, useful for testing.
- Most recent reply time – Time the latest reply was received.

42.27.4 User access page

Interlocks, if used, must be created in this table view. Interlocks are used in the tools and doors table to define which relay is used on an interlock card.

42.28 Landing page choices

42.28.1 Usage

The landing page choices table stores configurable quick links that are displayed at the bottom of the landing page. The links can be tailored for desktop or laptop rendering and provide shortcuts to NEMO pages that are or are not accessible from the navigation bar, organizational pages, or outside resources. The [landing page](#) is detailed starting on page 30.

42.28.2 Summary page

The summary page provides a listing of landing page choices (Figure 950). Click the name field in the row of interest to edit.

Change landing page choice

Tool control

Image: Currently: tools.png
Change: No file chosen
An image that symbolizes the choice. It is automatically resized to 128x128 pixels when displayed, so set the image to this size before uploading to optimize bandwidth usage and landing page load time

Name: Tool control
The textual name that will be displayed underneath the image

URL: /tool_control/
The URL that the choice leads to when clicked. Relative paths such as /calendar/ are used when linking within the site. Use fully qualified URL paths such as https://www.google.com/ to link to external sites.

Display order: 1
The order in which choices are displayed on the landing page, from left to right, top to bottom. Lower values are displayed first.

Open in new tab
Open the URL in a new browser tab when it's clicked

Secure referral
Improves security by blocking HTTP referrer [sic] information from the targeted page. Enabling this prevents the target page from manipulating the calling page's DOM with JavaScript. This should always be used for external links. It is safe to uncheck this when linking within the site. Leave this box checked if you don't know what this means

Hide from mobile devices
Hides this choice when the landing page is viewed from a mobile device

Hide from desktop computers
Hides this choice when the landing page is viewed from a desktop computer

Hide from users
Hides this choice from normal users. When checked, only staff, technicians, facility managers and super-users can see the choice

Hide from staff
Hides this choice from staff and technicians. When checked, only normal users, facility managers and super-users can see the choice

Notifications:
Displays a the number of new notifications for the user. For example, if the user has two unread news notifications then the number '2' would appear for the news icon on the landing page.

Figure 951 Landing page choices add/edit page

- **Image** – click the choose file button to select the icon image of interest. It is automatically resized to 128 x 128 pixels when displayed, so set the image to this size before uploading to optimize bandwidth usage and landing page load time. (required)

- **URL** – The URL that the choice leads to when clicked. Relative paths such as /calendar/ are used when linking within the site. Use fully qualified URL paths such as https://www.google.com/ to link to external sites. (required)
- **Display order** – The order in which choices are displayed on the landing page, from left to right, top to bottom. Lower values are displayed first. (required)
- **Open in new tab** – check the checkbox to open the URL in a new browser tab when it's clicked.
- **Secure referral** – Improves security by blocking HTTP referrer [sic] information from the targeted page. Enabling this prevents the target page from manipulating the calling page's DOM with JavaScript. This should always be used for external links. It is safe to uncheck this when linking within the site. Leave this box checked if you don't know what this means.
- **Hide from mobile devices** – Hides this choice when the landing page is viewed from a mobile device

- Hide from desktop computers – Hides this choice when the landing page is viewed from a desktop computer
- Hide from users – Hides this choice from normal users. When checked, only staff, technicians, and admins can see the choice
- Hide from staff – Hides this choice from staff and technicians. When checked, only normal users, facility managers and admins can see the choice
- Notifications – Displays the number of new notifications for the user. For example, if the user has two unread news notifications then the number '2' would appear for the news icon on the landing page. *Notifications table*

42.28.4 User access page

Landing page choices, if used, must be created in this table view. Once created, they appear on the landing page displaying the uploaded icon and description. The [landing page](#) is detailed on page 30.

42.29 Membership histories

42.29.1 Usage

The membership histories table automatically tracks several user actions, who took them, and when.

Actions tracked:

- Project joined or removed from an account
- User joined or removed from a project
- User joined or removed from a tool qualification
- User joined or removed from a physical access level.

Normally, this table does not require direct editing. User permissions and permission history can be accessed on the [users page](#) detailed on page 293. [Account and project changes](#) are detailed on page 207.

42.29.2 Summary page

The summary page provides a listing of membership histories (Figure 952). Click the membership history field in the row of interest to edit.

The screenshot shows a table with the following columns: Action, PARENT CONTENT TYPE, PARENT OBJECT ID, ACTION, CHILD CONTENT TYPE, CHILD OBJECT ID, DATE, and AUTHORIZER. The data in the table is as follows:

Action:	PARENT CONTENT TYPE	PARENT OBJECT ID	ACTION	CHILD CONTENT TYPE	CHILD OBJECT ID	DATE	AUTHORIZER

Change membership history

HISTORY

Parent content type:	account
Parent object id:	7
Child content type:	project
Child object id:	9
Date:	Date: 05/04/2020
	Time: 08:37 PM
The time at which the membership status was changed.	
Authorizer:	Captain Nemo (captain)
The staff member who changed the membership status of the account, project, or user in question.	
Action:	Added

Figure 953 Membership histories add/edit page

- Parent content type – select from drop down list either account, physical access level, project or tool. Selection corresponds to a record in *Accounts table, Physical access levels table, Projects table, or Tools table*.
- Parent object id – the table row id number of the content type. For example, if the content type is account, an id of 10 would correspond to the account table where id=10.
- Child object type – select from the drop-down list either user or project. Selection corresponds to a record in *Users table or Projects table*.
- Child object id – the table row id number of the object type.
- Date – date and time action was taken.
- Authorizer – the user that made the change (required) *Users table*
- Action – select from drop down list either added or removed.

42.29.4 User access page

Normally, this table does not require direct editing. User permissions and permission history can be accessed on the [users page](#) detailed on page 293. [Account and project changes](#) are detailed on page 207.

42.30 News

42.30.1 Usage

The news table stores the story information for the news and events page. This table normally does not require direct editing however story content mistakes can be corrected here. The [news and events page](#) is detailed on page 186.

Normally, this table does not require direct editing. User permissions and permission history can be accessed on the [users page](#) detailed on page 293. [Account and project changes](#) are detailed on page 207.

Last updated: Date: 09/26/2018 Today |

Time: 12:33 PM Now |

The date and time this story was last updated

Last update content: Updated on Wednesday, September 26th, 2018 @ 12:33 PM by Captain Nemo (captain):
About two o'clock, I was in the drawing-room, busied in arranging my notes, when the Captain opened the door and appeared. I bowed. He made a slight inclination in return, without speaking. I resumed my work.

The most recent update to the story, useful for visually hiding updates 'in the middle' of the story

Archived
A story is removed from the 'Recent News' page when it is archived

Update count:

The number of times this story has been updated. When the number of updates is greater than 2, then only the original story and the latest update are displayed in the 'Recent News' page

Figure 955 News add/edit page

- Title – this is the top-level title given to the news story.
- Pinned – checkbox to indicate whether or not this news story should stay at the top.
- Created – date and time story was initially posted.
- Original content - the content of the story when it was first published, useful for visually hiding updates 'in the middle' of the story.
- All content – the entire content of the story including all updates.
- Last updated – date and time the story was last updated.
- Last update content – the most recent update to the story useful for visually hiding updates 'in the middle' of the story.
- Archived – checkbox to indicate that the story has been removed from the Recent News page.
- Update count – integer number to indicate the number of times the story has been updated. When the number of updates is great than 2, only the original story and the latest update are displayed in the recent news page to save space. A reader would need to expand the story to see all of the content.

42.30.4 User access page

Normally, this table does not require direct editing. Adding and updating news stories is done on the [news and events page](#) detailed on page 186.

42.31 Notifications

42.31.1 Usage

The notifications table stores updates to news and safety events so notification alerts can be provided on a user-by-user basis on the landing page icons if used. If a new safety event or new news event is updated or published, the notifications will be triggered and stored in this table. Once a user visits the safety or news page, the notification is deleted from the table. Notifications are displayed as a number at the bottom right of the safety or new icon on the landing page. Safety notifications are discussed in the [safety](#) section starting on page 160. News notifications are discussed in the [news and events](#) section starting on page 186.

42.31.2 Summary page

The summary page provides a listing of notifications (Figure 956). Click the id field in the row of interest to edit.

- User – the person the notification is for. (required)
- Expiration – date and time notification will expire. Currently all notifications post for 30 days. (required)
- Content type – select from drop down list. Only news and safety issue have been implemented. (required)
- Object id – the ID of the news or safety issue record in their respective tables. (required)

42.31.4 User access page

Normally, this table does not require direct editing. Safety notifications are discussed in the [safety](#) section starting on page 160. News notifications are discussed in the [news and events](#) section starting on page 186.

42.32 Onboarding phases

42.32.1 Usage

Onboarding phases are optional and provide a way to keep track of user onboarding for staff users. They are meant to be used as a checklist.

42.32.2 Summary page

The summary page provides a listing of onboarding phases (Figure 958). Click the name field in the row of interest to edit.

- Name – the name of the onboarding phase. (required)
- Display order – the order to display this onboarding phase in. (required)

42.32.4 User access page

There is no user access page available for onboarding phases. However, they are displayed as a checklist when creating/editing [Users](#).

42.33 Physical access levels

42.33.1 Usage

The physical access levels table associates areas with schedules. Schedules can be set for always, weekends, or weekdays between a set start and end time. User permissions to access areas are given as physical access levels to have the ability to limit the days and times users have access. Exceptions to a physical access level can be made using the physical access exception table detailed above. Exceptions could be a holiday schedule or other expected closures. User permissions are discussed on the [users](#) page detailed starting on page 293.

42.33.2 Summary page

The summary page provides a listing of physical access levels (Figure 960). Click the name field in the row of interest to edit.

Figure 962 Physical access levels add/edit page 2

- Authorized users – select available users and use the right arrow to add to the chosen users list. Multiple users can be selected using the control or shift keys.
- Physical access exceptions – select available exceptions and use the right arrow to add to the chosen list. Multiple exceptions can be selected using the control or shift keys. More details about exceptions can be found in [Detailed administration - Physical access exceptions](#).

42.33.4 User access page

There is no user page available to create physical access levels. Once created, permissions to access physical levels are given to users on the [users](#) page detailed starting on page 293.

42.34 Physical access logs

42.34.1 Usage

The physical access logs automatically record each time a door is accessed by a user at an entrance tablet and the access result. Doors are discussed in more detail in the [entrance tablet section](#) on page 588.

42.34.2 Summary page

The summary page provides a listing of physical access logs (Figure 963). Click the user field in the row of interest to edit.

The add/change page for this table lists the fields that can be edited (Figure 964). See [Common features in detailed administration](#) for more information.

Home > Nemo > Physical access logs > PhysicalAccessLog object (33)

Change physical access log

HISTORY

User: Captain Nemo (captain) + 

Door: Lab Entrance + 

Time: Date: 09/23/2020 Today | 
Time: 01:27 PM Now | 

Result: Allow + 

Details:
The user was permitted to enter this area, and already had an active area access record for this area.

Any details that should accompany the log entry. For example, the reason physical access was denied.

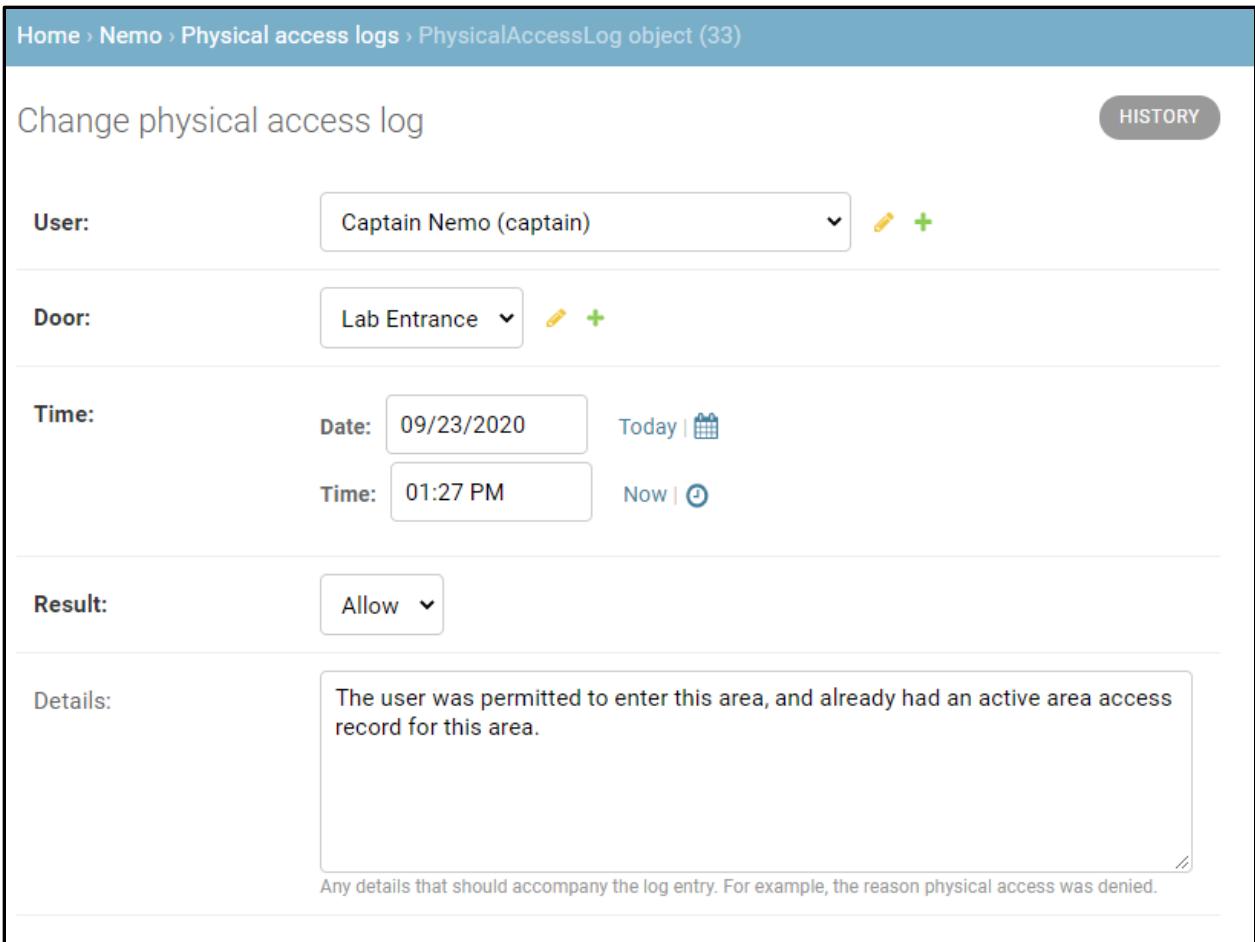

Figure 964 Physical access logs add/edit page

- User – drop down list of name of user accessing door. (required) *Users table*
- Door – drop down list of doors. (required) *Doors table*
- Time – date/time door was accessed. (required)
- Result – drop down list allow or deny. (required)
- Details – narrative of access event.

42.34.4 User access page

There is no user page available to create or edit physical access logs. Events are created automatically when a door is accessed at an entrance tablet. Doors are discussed in more detail in the [entrance tablet section](#) on page 588.

42.35 Projects

42.35.1 Usage

The projects table maintains the association of projects with a parent account and child users. For a user to access NEMO resources the user must be active on a project which is active on an account. A detailed discussion of projects can be found in the [Accounts and projects](#) section on page 207.

42.35.2 Summary page

The summary page provides a listing of projects (Figure 965). Click the name field in the row of interest to edit.

The screenshot shows the 'Projects' summary page. At the top, there's a breadcrumb navigation: Home > Nemo > Projects. Below it, a search bar with placeholder 'Select project to change' and a 'Search' button. To the right is an 'ADD PROJECT +' button. On the far right is a 'FILTER' sidebar with sections for 'By active', 'By account', and 'By start date'. The main table lists three projects:

<input type="checkbox"/>	NAME	ID	APPLICATION IDENTIFIER	ACCOUNT	ACTIVE	START DATE
<input type="checkbox"/>	Cleanroom Eng	1	PROJ.2019.02	Cleanroom Staff	<input checked="" type="checkbox"/>	-

Figure 966 Projects add/edit page

- Name – descriptive name of project (required)
- Application identifier – the application identifier is not used by NEMO but is a convenient way to associate the project with external project tracking systems. (required)
- Account – select from drop down list. All charges for this project will be billed to the selected account. (required)
- Start date – the start date for this project.
- Allow consumable withdrawals – unselect to prevent consumable/supplies withdrawals for this project. Default is enabled.
- Active – users may only charge to a project if it is active. Deactivate the project to block billable activity (such as tool usage and consumable check-outs).
- Members – select available users and use the right arrow to add to the chosen users list. Multiple users can be selected using the control or shift keys.
- Principal Investigators – select available users and use the right arrow to add to the chosen users list. Multiple users can be selected using the control or shift keys
- Only allow tools – select available tools to limit billing options for this project. Users belonging to this project will only be able to reserve and enable those specific tools, and areas that this tool requires access to. Staff charges will only be available for those tools and areas they require. Training will also be limited to the tools as well.

42.35.4 User access page

Projects are administered in the [Accounts and projects](#) section detailed on page 207.

42.36 Recurring charges

42.36.1 Usage

Recurring charges are used to charge customers for consumables at regular intervals. For example, a yearly or monthly fee for renting storage bins or cleanroom gowns.

42.36.2 Summary page

The summary page provides a listing of recurring charges (Figure 967). Click the name field in the row of interest to edit.

Select Recurring charges to change						
Action:	NAME	CUSTOMER	PROJECT	GET RECURRENCE DISPLAY	LAST CHARGE	NEXT CHARGE
<input type="checkbox"/>	Cleanroom gown #1	Pierre Aronnax (professor)	Cleanroom Eng	Every 5 days, starting 11/02/2022	-	Monday, December 12th, 2022 @ 12:00 AM

<input type="checkbox"/>	Storage bin #2	Captain Nemo (captain)	Cleanroom Eng	Every 4 week days, starting 11/02/2022	Thursday, December 8th, 2022 @ 8:55 PM	Monday, December 12th, 2022 @ 12:00 AM

Figure 967 Recurring charges summary page

42.36.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 968). See [Common features in detailed administration](#) for more information.

Change Recurring charges

HISTORY

Storage bin #1

Name:	Storage bin #1	
The name/identifier for this recurring charge.		
Customer:	Pierre Aronnax (professor)	
The user who will be charged.		
Consumable:	Storage bin	
Quantity:	1	
The number of consumables to charge.		
Project:	Cleanroom Eng	
The project to bill.		
Start:	11/02/2022	
Start date of the recurring charge.		
Frequency:	Week Day(s)	
The charge frequency.		
Interval:	4	
Recurring interval, i.e. every 5 days.		
Until:		
End date of the recurring charge.		
Count:		
The number of recurrences to charge for.		
Last charge:	Thursday, December 8th, 2022 @ 8:55 PM	
The date and time when the user was last charged.		
Last updated:	Tuesday, November 1st, 2022 @ 4:10 PM	
The time this charge was last modified.		
Last updated by:	Captain Nemo (captain)	
The user who last modified this charge (and will be used as merchant on the charge).		

Figure 968 Recurring charges add/edit page

- Name – descriptive name of the recurring charge (required).
- Customer – select from drop down list. The user to charge.
- Consumable – select from drop down list. The consumable to charge (required).
- Quantity – the quantity of consumable to start (required).
- Project – select from drop down list. The project to charge.
- Start – the date to start charging. This is used as the starting point for the frequency.
- Frequency – select from drop down list. The frequency at which to charge.
- Interval – the interval of the frequency. For example, every 2 days.

- Until – the date to stop charging. If left blank the consumable will be charged at the frequency indefinitely.
- Count – the number of times to charge before stopping. For example, charge every 2 days 5 times. If left blank the consumable will be charged at the frequency indefinitely.
- Last charge – read-only field showing the last time this item was charged.
- Last updated – read-only field showing when this item was updated last.
- Last updated by – read-only field showing the user who last updated this item.

42.36.4 User access page

Recurring charges are made and managed on the [recurring charges](#) page.

42.37 Reservation Questions

42.37.1 Usage

The reservation questions table provides a way to ask users questions when they are making a reservation.

42.37.2 Summary page

The summary page provides a listing of reservation questions (Figure 969). Click the id field in the row of interest to edit.

The screenshot shows a web application interface for managing reservation questions. At the top, there's a header bar with the text 'NEMO' on the left and 'WELCOME, CAPTAIN. VIEW SITE / LOG OUT' on the right. Below the header, a blue navigation bar contains the text 'Home > Nemo > Reservation questions'. The main content area has a light gray background. It displays the heading 'Select reservation questions to change' and a sub-heading 'Action: Go 0 of 1 selected'. There are two checkboxes: one for 'RESERVATION QUESTIONS' and another for 'Test questions'. A message below the checkboxes says '1 reservation questions'. In the top right corner of the content area, there's a button labeled 'ADD RESERVATION QUESTIONS +'. The entire interface is enclosed in a black border.

Figure 969 Reservation questions summary page

42.37.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 970). See [Common features in detailed administration](#) for more information.

42.37.4 User access page

There is no user access page to create reservation questions.

42.38 Reservations

42.38.1 Usage

The reservations table maintains the association of projects with a parent account and child users. For a user to access NEMO resources the user must be active on a project which is active on an account. A detailed discussion of projects can be found in the [Accounts and projects](#) section on page 207.

42.38.2 Summary page

The summary page provides a listing of reservations (Figure 972). Click the id field in the row of interest to edit.

Change reservation

HISTORY

User:	Ned Land (ned)			
Creator:	Ned Land (ned)			
Creation time:	Date: 09/21/2020	Today	Time: 02:26 PM	Now
Tool:	-----			
Area:	Cleanroom			
Project:	Project 2			
Indicates the intended project for this reservation. A missed reservation would be billed to this project.				
Start:	Date: 09/22/2020	Today	Time: 06:00 PM	Now
End:	Date: 09/22/2020	Today	Time: 08:00 PM	Now

Figure 973 Reservations add/edit page part 1

- User – select from drop down name of user the reservation is for (required) *Users table*
- Creator – select from drop down name of user that created the reservation. (required) *Users table*
- Creation time – date/time the reservation was created. (required)
- Tool – select from drop down name of tool reserved. (either a tool or an area must be selected) *Tools table*
- Area – select from drop down name of area reserved. (either a tool or an area must be selected) *Area table*
- Project – select from drop down name of project to bill reservation to. A missed reservation would be billed to this project.
- Start – date/time the reservation starts. (required)
- End – date/time the reservation ends. (required)

<input type="checkbox"/> Short notice	Indicates that the reservation was made after the configuration deadline for a tool. Staff may not have enough time to properly configure the tool before the user is scheduled to use it.		
<input type="checkbox"/> Cancelled	Indicates that the reservation has been cancelled, moved, or resized.		
Cancellation time:	Date:	<input type="text"/>	Today
	Time:	<input type="text"/>	Now
Cancelled by:	<input type="text"/>		
<input type="checkbox"/> Missed	Indicates that the tool was not enabled by anyone before the tool's "missed reservation threshold" passed.		
<input type="checkbox"/> Shortened	Indicates that the user finished using the tool and relinquished the remaining time on their reservation. The reservation will no longer be visible on the calendar and a descendant reservation will be created in place of the existing one.		
Descendant:	<input type="text"/>		Any time a reservation is moved or resized, the old reservation is cancelled and a new reservation with updated information takes its place. This field links the old reservation to the new one, so the history of reservation moves & changes can be easily tracked.
Additional information:	<input type="text"/>		
<input type="checkbox"/> Self configuration	When checked, indicates that the user will perform their own tool configuration (instead of requesting that the staff configure it for them).		
Title:	<input type="text"/> Shows a custom title for this reservation on the calendar. Leave this field blank to display the reservation's user name as the title (which is the default behaviour).		

Figure 974 Reservations add/edit page part 2

- Short notice – indicates that the reservation was made after the configuration deadline for a tool. Staff may not have enough time to properly configure the tool before the user is scheduled to use it.
- Cancelled – indicates that the reservation has been cancelled, moved, or resized.
- Cancellation time – date/time the reservation was changed.
- Cancelled by – select from drop down name of user that changed the reservation *Users table*
- Missed – indicates that the tool was not enabled by anyone before the tool's "missed reservation threshold" passed. Missed reservations require a threshold set in the tool table and a timed job to check for missed reservations periodically. Missed reservations are discussed in the [reservations section](#) starting on page 61.

- Shortened – indicates that the user finished using the tool and relinquished the remaining time on their reservation. The reservation will no longer be visible on the calendar and a descendant reservation will be created in place of the existing one.
- Descendant – any time a reservation is moved or resized, the old reservation is cancelled and a new reservation with updated information takes its place. This field links the old reservation to the new one, so the history of reservation moves & changes can be easily tracked.
- Additional information – text that can be provided by a user when making a reservation on a configurable tool.
- Self-configuration – when checked, indicates that the user will perform their own tool configuration (instead of requesting that the staff configure it for them).
- Title – Shows a custom title for this reservation on the calendar. Leave this field blank to display the reservation's user name as the title (which is the default behavior).

42.38.4 User access page

Reservations are made and maintained on the [calendar](#) page and detailed starting on page 38.

42.39 Resource categories

42.39.1 Usage

Resource categories are optional but can be useful for grouping similar resources to make visualization easier. Resource categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no resource categories are defined, they are not displayed on the resources page. Resource categories are discussed in the [Resources](#) section detailed on page 265.

42.39.2 Summary page

The summary page provides a listing of resource categories (Figure 975). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing resource categories. At the top, there's a blue header bar with the navigation path "Home > Nemo > Resource categories". Below the header, the main content area has a light gray background. A title "Select resource category to change" is centered at the top of the content area. To the right of the title is a button labeled "ADD RESOURCE CATEGORY +". Below the title, there's a search bar with the placeholder "Action: -----" and a dropdown arrow, followed by a "Go" button and the text "0 of 3 selected". A horizontal line separates this from the list of categories. The list consists of three items, each with a small square checkbox to its left:

- RESOURCE CATEGORY
- Gases**
- Lab**
- Utilities**

At the bottom of the list, it says "3 resource categories".

Figure 975 Resource category summary page

42.39.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 976). See [Common features in detailed administration](#) for more information.

The screenshot shows a web-based application interface for editing a resource category. At the top, there's a blue header bar with the navigation path "Home > Nemo > Resource categories > Lab". Below the header, the main content area has a light gray background. A title "Change resource category" is centered at the top of the content area. To the right of the title is a button labeled "HISTORY". A horizontal line separates this from the input field. The input field is a rectangular box with the word "Lab" typed into it. To the left of the input field, the label "Name:" is visible.

Figure 976 Resource category add/edit page

- Name – the name can be up to 200 characters (required).

42.39.4 User access page

Resource categories must be setup in this table view but are discussed in the [Resources](#) section detailed on page 265.

42.40 Resources

42.40.1 Usage

Resources provide a method to define tool dependencies such as gases, facility spaces, and utilities that can be associated with tools are either required or non-required resources. When a resource is unavailable, users are blocked from using tools or areas that require the resource and notified on tools that with a non-required association. Resources are discussed in the [Resources](#) section detailed on page 265.

42.40.2 Summary page

The summary page provides a listing of resources (Figure 977). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing resources. At the top, there's a navigation bar with 'Home > Nemo > Resources'. Below it, a header says 'Select resource to change' with an 'ADD RESOURCE +' button. A 'FILTER' sidebar on the right allows filtering by availability ('All', 'Yes', 'No') and category ('All', 'Gases', 'Lab', 'Utilities'). The main area is a table with columns: 'NAME', 'CATEGORY', and 'AVAILABLE'. The table lists 14 resources:

<input type="checkbox"/>	NAME	CATEGORY	AVAILABLE
<input type="checkbox"/>	2% SiH4	Gases	✓
<input type="checkbox"/>	Ar	Gases	✓
<input type="checkbox"/>	Bay 1	Lab	✓
<input type="checkbox"/>	Bay 2	Lab	✓
<input type="checkbox"/>	Bay 3	Lab	✓
<input type="checkbox"/>	Bay 4	Lab	✓
<input type="checkbox"/>	Bay 5	Lab	✓
<input type="checkbox"/>	CF4	Gases	✓
<input type="checkbox"/>	CHF3	Gases	✓
<input type="checkbox"/>	CMP	Lab	✓
<input type="checkbox"/>	Cl2	Gases	✓
<input type="checkbox"/>	Cleanroom	Lab	✓

Figure 977 Resources summary page

42.40.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 978, Figure 979). See [Common features in detailed administration](#) for more information.

42.42.4 User access page

All safety functions are detailed in the [safety](#) section starting on page 160.

42.43 Safety items

42.43.1 Usage

Safety items are used to provide Safety information to users, organized in categories. Safety items are discussed in the [Safety items](#) section.

42.43.2 Summary page

The summary page provides a listing of safety items (Figure 984). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing safety items. At the top, there's a breadcrumb navigation: Home > Nemo > Safety items. Below the header, a message says "Select safety item to change". On the right, there's a large "ADD SAFETY ITEM +" button. In the center, there's a table with three rows of data. The columns are labeled "NAME", "CATEGORY", and "DOCUMENTS". The first row has a checkbox next to "NAME" and contains the text "Code of conduct". The second row has a checkbox next to "NAME" and contains the text "Dispose of chemicals". The third row has a checkbox next to "NAME" and contains the text "How to handle chemicals". To the left of the table, there's a dropdown menu labeled "Action" with a "Go" button and a message "0 of 3 selected". To the right of the table, there's a "FILTER" sidebar with a "By category" section containing "All", "Chemical handling", and "Cleanroom safety". At the bottom left of the main area, it says "3 safety items".

NAME	CATEGORY	DOCUMENTS
Code of conduct	Cleanroom safety	1
Dispose of chemicals	Chemical handling	1
How to handle chemicals	Chemical handling	2

- Display order – the order to display this safety training in. (required)

42.44.3 User access page

There is no user access page available for onboarding phases. However, they are displayed as a checklist when creating/editing [Users](#).

42.45 Scheduled outage categories

42.45.1 Usage

Scheduled outage categories are optional but can be useful for binning outages aiding in future analysis and trending. Scheduled outage categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no scheduled outage categories are defined, they are not displayed on the scheduled outages page. Scheduled outage categories are discussed in the [scheduled outages table](#) section detailed on page 483.

42.45.2 Summary page

The summary page provides a listing of scheduled outage categories (Figure 988). Click the name field in the row of interest to edit.

There is no user access page for scheduled outage categories however, scheduled outage categories usage are discussed in the [scheduled outages table](#) section detailed on page 483.

42.46 Scheduled outages

42.46.1 Usage

Scheduled outages table records outages for tools, areas, and resources. A scheduled outage is a planned shutdown that triggers automatically at the designated time and will clear automatically at the designated end time. Scheduled outages are useful for planned activities such as gas bottle changes or tool maintenance that happens in a predictable way. Scheduled outages are created and maintained on the [calendar](#) which is detailed on page 62 and the [resource](#) pages which is detailed on page 265.

42.46.2 Summary page

The summary page provides a listing of scheduled outages (Figure 990). Click the id field in the row of interest to edit.

42.46.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 991). See [Common features in detailed administration](#) for more information.

Home > Nemo > Scheduled outages > Foil clean

Change scheduled outage

Start:	Date: 04/27/2020	Today
	Time: 11:30 AM	Now
End:	Date: 04/27/2020	Today
	Time: 01:00 PM	Now
Creator:	Captain Nemo (captain)	
Title:	Foil clean	A brief description to quickly inform users about the outage
Details:	The chamber is flaking so we will change the foil and vacuum.	
	A detailed description of why there is a scheduled outage, and what users can expect during the outage	
Category:	Preventative maintenance	
	A categorical reason for why this outage is scheduled. Useful for trend analytics.	
Tool:	Evaporator	
Area:	-----	
Resource:	-----	

Figure 991 Scheduled outages add/edit page

- Start – date/time scheduled outage will start. (required)
- End – date/time scheduled outage will end. (required)
- Creator – drop down list select user that created the scheduled outage. (required) *Users table*
- Title – a brief description to quickly inform users about the outage. (required)
- Details – a detailed description of why there is a scheduled outage, and what users can expect during the outage.
- Category – grouping similar outages for future analysis. *Scheduled outage categories table*
- Tool – drop down list select tool. (required to have one tool, area, or resource selected) *Tools table*
- Area – drop down list select tool. (required to have one tool, area, or resource selected) *Areas table*

- Resource – drop down list select tool. (required to have one tool, area, or resource selected) *Resources table*

42.46.4 User access page

Scheduled outages are created and maintained on the [calendar](#) which is detailed on page 62 and the [resource](#) pages which is detailed on page 265.

42.47 Staff absence types

42.47.1 Usage

Staff absence types are used to represent the different types of absences for staff members. Examples would be Annual leave, Sick leave etc.

Absence types are used to create absences in [Detailed administration -> Staff absences](#) and in the [Staff status](#) page.

42.47.2 Summary page

The summary page provides a listing of staff absence types (Figure 992). Click the name field in the row of interest to edit.

Home > Nemo > Staff absence types	
Select staff absence type to change	
Action: <input type="button" value="-----"/> Go 0 of 2 selected	
<input type="checkbox"/> NAME	DESCRIPTION
<input type="checkbox"/> AL	Annual Leave
<input type="checkbox"/> SL	Sick Leave
2 staff absence types	

Figure 992 Staff absence types summary page

42.47.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 993). See [Common features in detailed administration](#) for more information.

Home > Nemo > Staff absence types > AL (Annual Leave)	
Change staff absence type	
Name:	<input type="text" value="AL"/> The name of this absence type.
Description:	<input type="text" value="Annual Leave"/> The description for this absence type.

Figure 993 Staff absence types add/edit page

- Name – name of the absence type
- Description – longer description of the absence type

42.47.4 User access page

There is no user access page to create staff absence types. However, staff absence types are used on the absence type dropdown of the [Create a new absence](#) page.

42.48 Staff absences

42.48.1 Usage

Staff absences record when staff members are absent or on leave. Absences are discussed in details on the [Staff status](#) page.

42.48.2 Summary page

The summary page provides a listing of staff absences (Figure 994). Click the creation time field in the row of interest to edit.

The screenshot shows a table of staff absences with the following columns: CREATION TIME, STAFF MEMBER, ABSENCE TYPE, FULL DAY, START DATE, and END DATE. The data is as follows:

CREATION TIME	STAFF MEMBER	ABSENCE TYPE	FULL DAY	START DATE	END DATE
Thursday, February 10th, 2022 @ 10:32 AM	Ned Land (ned)	SL (Sick Leave)	✗	Jan. 31, 2022	Feb. 1, 2022
Tuesday, February 8th, 2022 @ 2:43 PM	Captain Nemo (captain)	AL (Annual Leave)	✓	Feb. 1, 2022	Feb. 9, 2022
Tuesday, February 8th, 2022 @ 2:43 PM	Ned Land (ned)	AL (Annual Leave)	✓	Feb. 1, 2022	March 1, 2022
Tuesday, February 8th, 2022 @ 9:16 AM	Albert Einstein (einstein)	AL (Annual Leave)	✓	Feb. 7, 2022	Feb. 8, 2022

Below the table, it says "4 staff absences". To the right is a sidebar titled "FILTER" with three sections: "By staff member", "By absence type", and "By start date".

Figure 994 Staff absences summary page

42.48.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 995). See [Common features in detailed administration](#) for more information.

Change staff absence

StaffAbsence object (15)

Staff member: Albert Einstein (einstein)

The staff member who will be absent.

Absence type: AL (Annual Leave)

The absence type. This will only be visible to facility managers.

Start date: 30-08-2022

The start date of the absence.

End date: 06-09-2022

The end date of the absence.

Full day
Uncheck this box when the absence is only for part of the day.

Description:

The absence description. This will be visible to anyone.

Manager note:

A note only visible to managers.

Figure 995 Staff absence add/edit page

- Staff member – the staff member that will be absent. This is **not** a reference to a user but rather a reference to [Staff availability](#)
- Absence type – the absence type as defined in [Staff absence types](#)
- Start date – the start date of the staff absence
- End date – the end date of the staff absence
- Full day – whether the absence is for the whole day or partial
- Description – the absence description, which will be shown to all users. Use this field to specify absence details, for example “Out until 2pm”
- Manager note – a note only visible to facility managers

42.48.4 User access page

Staff absences can be created by facility managers in the staff status page of the status dashboard. See [Create a new absence](#) for more details.

42.49 Staff availability

42.49.1 Usage

The staff availability provides a place to set staff working categories (shifts for examples), working days, and working hours. It is used when creating staff absences.

42.49.2 Summary page

The summary page provides a listing of staff availabilities (Figure 996). Click the staff member field in the row of interest to edit.

Select staff availability to change											
Action:	STAFF MEMBER	CATEGORY	START TIME	END TIME	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY	SUNDAY

Home > Nemo > Staff availability > Captain Nemo (captain)

Change staff availability

Staff member: Captain Nemo (captain) +/-

The staff member to display on the staff status page.

Category: Staff +/-

The category for this staff member.

Start time: 06:00 AM Now | 🕒

The usual start time for this staff member.

End time: 06:00 PM Now | 🕒

The usual end time for this staff member.

Monday
Check this box if the staff member usually works on Mondays.

Tuesday
Check this box if the staff member usually works on Tuesdays.

Wednesday
Check this box if the staff member usually works on Wednesdays.

Thursday
Check this box if the staff member usually works on Thursdays.

Friday
Check this box if the staff member usually works on Fridays.

Saturday
Check this box if the staff member usually works on Saturdays.

Sunday
Check this box if the staff member usually works on Sundays.

Figure 997 Staff availability add/edit page

- Staff member – the staff member to appear in the staff status list
- Category – the staff category that will be displayed on the staff status
- Start time – the typical daily start time of the staff member (optional)
- End time – the typical daily end time of the staff member (optional)
- Monday – whether the staff member typically works on Mondays
- Tuesday – whether the staff member typically works on Tuesdays
- Wednesday – whether the staff member typically works on Wednesdays
- Thursday – whether the staff member typically works on Thursdays
- Friday – whether the staff member typically works on Fridays
- Saturday – whether the staff member typically works on Saturdays
- Sunday – whether the staff member typically works on Sundays

42.49.4 User access page

There is no user access page to create staff availabilities. However, staff availabilities are used on the staff member dropdown of the [Create a new absence](#) page.

42.50 Staff availability categories

42.50.1 Usage

Staff availability categories are optional but can be useful for grouping types of staff on the [Staff Status](#) page. Staff availability categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no categories are defined, all staff will be listed in alphabetical order.

42.50.2 Summary page

The summary page provides a listing of staff availability categories (Figure 998). Click the name field in the row of interest to edit.

Select staff availability category to change		
Action:	NAME	DISPLAY ORDER

- Staff member – drop down list select staff user that will perform the work. (required) *Users table*
- Customer – drop down list select user that work will be billed to. (required) *Users table*
- Project – drop down list select project to charge against. (required) *Projects table*
- Start – date/time scheduled outage will start. (required)
- End – date/time scheduled outage will end.
- Note – text description of the charge.
- Validated – checkbox to indicate if a staff member has confirmed the charge is valid and correct.

42.51.4 User access page

Staff charges are created and managed on the [staff charges](#) page which is detailed starting on page 276.

42.52 Task categories

42.52.1 Usage

Task categories are optional but can be useful for binning tasks aiding in future analysis and trending. Task categories, if used, must be created in this table view and can be any text name. Any number can be defined. Also, they can be defined for use as initial problem categories or final problem categories. If no task categories are defined, they are not displayed on the tasks page. Task categories are discussed in the [Report a problem](#) tab of the Tool control page detailed on page 118.

42.52.2 Summary page

The summary page provides a listing of task categories (Figure 1002). Click the name field in the row of interest to edit.

Figure 1002 Task categories summary page

42.52.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 1003). See [Common features in detailed administration](#) for more information.

Home > Nemo > Task categories > Facility problem

Change task category

Name:	Facility problem
Stage:	Completion ▾

Figure 1003 Task categories add/edit page

- Name – the name can be up to 200 characters (required).
- Stage – drop down list select either initial or completion (required).

42.52.4 User access page

There is no user access page to create task categories. However, task categories are discussed in the [Report a problem](#) tab of the Tool control panel detailed on page 118.

42.53 Task statuses

42.53.1 Usage

Task statuses are optional but can be used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Task statuses, if used, must be created in this table view and number can be defined. If no task statuses are defined, they are not displayed on the tasks page. Task statuses are discussed in the [Report a problem](#) tab of the Tool control page detailed on page 118.

42.53.2 Summary page

The summary page provides a listing of task statuses (Figure 1004). Click the name field in the row of interest to edit.

The screenshot shows a web-based application interface for managing alert categories. At the top, there's a breadcrumb navigation: Home > Nemo > Alert categories. Below the header, a message says "Select alert category to change". On the right, a button labeled "ADD ALERT CATEGORY +". Underneath, there's a search bar with "Action: -----" and a dropdown arrow, followed by a "Go" button and the text "0 of 3 selected". A table lists four alert categories, each with a checkbox next to it:

	NAME
<input type="checkbox"/>	Facility outage
<input type="checkbox"/>	Long PM
<input type="checkbox"/>	Site closure

At the bottom left, it says "3 Alert categories".

Figure 1004 Task statuses summary page

42.53.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 1005). See [Common features in detailed administration](#) for more information.

The screenshot shows a web-based application interface for adding a new alert category. At the top, there's a breadcrumb navigation: Home > Nemo > Alert categories > Add alert category. Below the header, a message says "Add alert category". A "Name:" label is followed by an input field containing a placeholder character. At the bottom, there are three buttons: "Save and add another", "Save and continue editing", and a large blue "SAVE" button.

Figure 1005 Task statuses add/edit page

- Name – the name can be up to 200 characters (required).

42.53.4 User access page

There is no user access page to create task statuses however, task statuses are discussed in the [Report a problem](#) tab of the Tool control page detailed on page 118.

42.54 Tasks

42.54.1 Usage

Tasks are used to track problems with tools statuses are optional but can be used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Task statuses, if used, must be created in this table view and number can be defined. If no task statuses are defined, they are not displayed on the tasks page. Task statuses are discussed in the [Report a problem](#) tab of the Tool control page detailed on page 118.

42.54.2 Summary page

The summary page provides a listing of tasks (Figure 1006). Click the id field in the row of interest to edit.

<input type="checkbox"/>	ID	URGENCY	TOOL	CREATOR	CREATION TIME	PROBLEM CATEGORY

42.54.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 1007, Figure 1008). See [Common features in detailed administration](#) for more information.

HISTORY

Change task

Urgency:

High ▾

Tool:

Chlorine Etch ▾

The tool that this task relates to.

 Force shutdown

Indicates that the tool this task relates to will be shutdown until the task is resolved.

 Safety hazard

Indicates that this task represents a safety hazard.

Creator:

Captain Nemo (captain) ▾

The user who created the task.

Creation time:

Date: 06/05/2020

Today |

Time: 02:41 PM

Now |

The date and time when the task was created.

Problem category:

Process problem ▾

**Problem description:**

The etch rate is nearly zero. Tried a conditioning run and the etch rate did not improve. No errors were noted during the runs.

Progress description:

On Friday, June 5th, 2020 @ 5:44 PM Captain Nemo (captain) updated this task:

Chamber clean completed. Found etch buildup in chamber that was likely suppressing the etch rate. Ready for testing.

Figure 1007 Tasks add/edit page part 1

42.54.4 User access page

Tasks are created and maintained in the [Report a problem](#) tab of the Tool control page detailed on page 118.

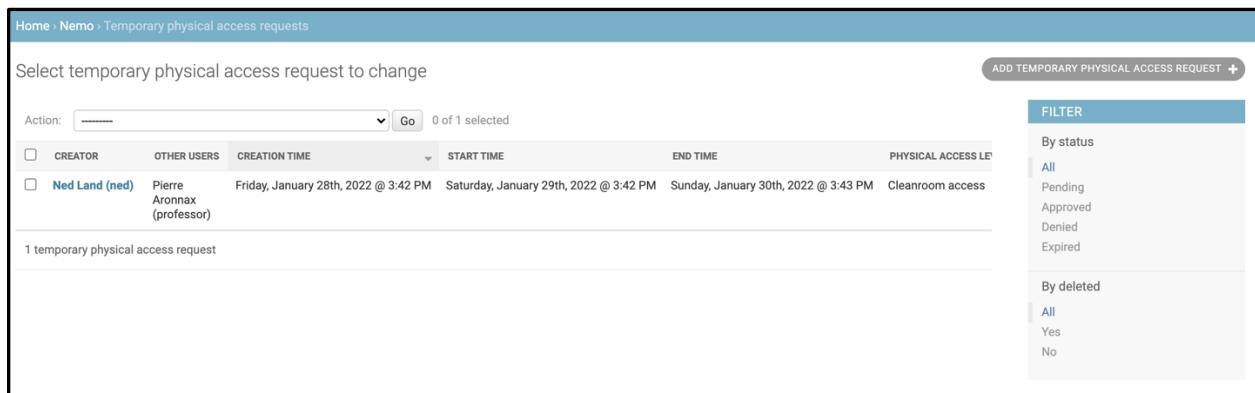

42.55 Temporary physical access requests

42.55.1 Usage

Temporary physical access requests are used so users can submit a request to obtain a physical access temporarily. For example, a user could request temporary access to the Cleanroom on a weekend when they don't otherwise have access. Access requests are discussed in the [access requests](#) page detailed on page 149.

42.55.2 Summary page

The summary page provides a listing of temporary physical access requests (Figure 1009). Click the creator field in the row of interest to edit.

CREATOR	OTHER USERS	CREATION TIME	START TIME	END TIME	PHYSICAL ACCESS LEVEL
Ned Land (ned)	Pierre Aronnax (professor)	Friday, January 28th, 2022 @ 3:42 PM	Saturday, January 29th, 2022 @ 3:42 PM	Sunday, January 30th, 2022 @ 3:43 PM	Cleanroom access

Figure 1009 Temporary physical access requests summary page

42.55.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 1010, Figure 1011). See [Common features in detailed administration](#) for more information.

Home > Nemo > Temporary physical access requests > TemporaryPhysicalAccessRequest object (1)

Change temporary physical access request

Creator: Ned Land (ned)  

Last updated by: Ned Land (ned)   
The last user who modified this request.

Physical access level: Cleanroom access  

Description:

The description of the request.

Start time: Date: 01/29/2022 Today 
Time: 03:42 PM Now 
The requested time for the access to start.

End time: Date: 01/30/2022 Today 
Time: 03:43 PM Now 
The requested time for the access to end.

Figure 1010 Temporary physical access requests add/edit page part 1

- Creator – drop down list select user who created the request (required).
- Last updated by – drop down list select the user who last updated the record.
- Physical access level – drop down list select the physical access level that the user is requesting (required).
- Description – text description of the request.
- Start time – date/time the requested access should start (required).
- End time – date/time the requested access should end (required).

The screenshot shows a user interface for managing temporary physical access requests. On the left, under 'Other users:', there is a list titled 'Available other users' with a search bar and filter. It contains two entries: 'Captain Nemo (captain)' and 'Ned Land (ned)'. To the right, under 'Chosen other users', there is a list with one entry: 'Pierre Aronnax (professor)'. Below these lists are two buttons: 'Choose all' and 'Remove all'. A note below the lists says: 'Select the other users requesting access. Hold down "Control", or "Command" on a Mac, to select more than one.' At the bottom, there are sections for 'Status:' (set to 'Pending'), 'Reviewer:' (a dropdown menu), and a checkbox for 'Deleted' with the note: 'Indicates the request has been deleted and won't be shown anymore.'

Figure 1011 Temporary physical access requests add/edit page part 2

- Other users – select from available users and click the right arrow to add to chosen users. Multiple users can be selected at the same time using shift or control keys.
- Status – drop down list select the status of the request (required).
- Reviewer – drop down list select user who reviewed the request.
- Deleted – checkbox indicates that this request was deleted.

42.55.4 User access page

Access requests are created and maintained in the [access requests](#) page detailed on page 149.

42.56 Temporary physical access

42.56.1 Usage

Temporary physical access are used to temporarily give users access to an area.

42.56.2 Summary page

The summary page provides a listing of temporary physical access (Figure 1012). Click the id field in the row of interest to edit.

The screenshot shows a web-based administrative interface for managing temporary physical access. At the top, a green banner indicates that a new entry has been added successfully. Below this, a header bar includes a back button, the title 'Temporary physical access', and a 'FILTER' button. The main content area displays a table with one row of data. The columns are labeled 'ID', 'USER', 'START TIME', 'END TIME', 'AREA', and 'SCHEDULE'. The single row shows ID 1, user 'Ned Land (ned)', start time 'Friday, January 28th, 2022 @ 4:00 PM', end time 'Saturday, January 29th, 2022 @ 6:00 PM', area 'Cleanroom', and schedule 'Anytime'. To the left of the table is a search bar with dropdown menus for 'Action', 'USER', and a 'Go' button. To the right of the table is a 'FILTER' sidebar with sections for 'By physical access level' (All, Cleanroom access, Cleanroom access weekdays, Grey room access), 'By area' (All, Campus, Cleanroom, Grey room), 'By end time' (Any date, Today, Past 7 days, This month, This year), and 'By start time' (Any date).

ID	USER	START TIME	END TIME	AREA	SCHEDULE
1	Ned Land (ned)	Friday, January 28th, 2022 @ 4:00 PM	Saturday, January 29th, 2022 @ 6:00 PM	Cleanroom	Anytime

Figure 1012 Temporary physical access summary page

42.56.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 1013). See [Common features in detailed administration](#) for more information.

Home > Nemo > Temporary physical accesss > Add temporary physical access

Add temporary physical access

User: ----- (Required) (Required)

Physical access level: ----- (Required) (Required)

Start time: Date: Today | CALENDAR
Time: Now | CLOCK
The start of the temporary access

End time: Date: Today | CALENDAR
Time: Now | CLOCK
The end of the temporary access

Figure 1013 Temporary physical access add/edit page

- User – drop down list select user who will have the access (required).
- Physical access level – drop down list select the physical access level to give the user (required).
- Start time – date/time the start time of the temporary access (required).
- End time – date/time the end time of the temporary access (required).

42.56.4 User access page

There is no user access page for Temporary physical access. However, they are created behind the scenes from the data in Temporary physical access request discussed in the [access requests](#) page detailed on page 149.

42.57 Tool usage counters

Tool usage counters are linked to numeric or float post usage questions and accumulate value with each tool logout based on the answer to the post usage question. This feature is useful for displaying how much a tool has been used, to track material usage, or to trigger preventative maintenance. Tool usage counters are displayed on the [tool control summary page](#) detailed on page 90.

42.57.1 Usage

The tool usage counters table lists each counter, the associated tool, the post usage question field, the current value, and last reset information. The tool usage counter must be created from this view.

- Tool usage counter setup
 - Prerequisites: the tool and a post usage question for that tool must exist.
 - Create tools and post usage questions for tools of interest in the [Detailed administration → Tools](#) table detailed starting on page 512.
 - For example, if we used the following post usage question on the “790 RIE Right” tool (Figure 1014)

Figure 1014 Tool usage counter example post usage question

- Add a tool usage counter in the [Detailed administration → Tool usage counter](#) table in this section and save.
 - For example, if we create a tool usage counter based on the post usage question above:
 - **Name:** “Etch Time”
 - **Description:** “This is for the etch time in minutes.”
PMs are performed every 100 minutes of use.”
 - NOTE: line breaks will be displayed on the tool summary page so limited formatting can be used to keep the page readable.
 - **Tool:** 790 RIE Right
 - NOTE: selected from dropdown box.
 - **Tool usage question:** “etch_time”

- NOTE: “etch_time” is the name we gave the post usage question in the previous step. When saving, the post usage question name must be present, or an error will occur.
- When we log out of the 790 RIE Right tool, the following post usage question is displayed on the tool summary page before logout (Figure 1015). The [Tool control → Summary](#) page is detailed starting on page 90.

The screenshot shows a simple input form. At the top, the text "How long did you etch?" is displayed in blue. Below it is a large rectangular input field. To the right of the input field, the word "minutes" is written in a smaller font. The entire form is enclosed in a thin black border.

Figure 1015 Tool usage counter post usage input

- The counter is updated and displayed (Figure 1016) on the [Tool control → Summary](#) page detailed starting on page 90. If a warning threshold is set, the value will be green when it is less than the threshold, orange when it is equal to the threshold and red when the value is greater than the threshold.
 - NOTE: the reset button is only visible to staff.

The screenshot shows a digital display for a counter. On the left, it says "Etch Time: 100". Next to it is an orange "Reset" button. To the right, there is explanatory text in a grey box: "This is for the etch time in minutes. PMs are performed every 100 minutes of use."

Figure 1016 Tool usage counter display

42.57.2 Summary page

The summary page provides a listing of tool usage counters (Figure 1017). Click the name field in the row of interest to edit.

The screenshot shows a table with the following data:

Action:	NAME	TOOL	TOOL USAGE QUESTION	VALUE	WARNING THRESHOLD	LAST RESET	LAST RESET BY	IS ACTIVE
<input type="checkbox"/>	Total etch time	790 RIE Right	etch_time	682.81	-	-	-	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Etch Time	790 RIE Right	etch_time	534.81	510.0	Tuesday, December 1st, 2020 @ 4:48 PM	Jerry Bowser (jbowser)	<input checked="" type="checkbox"/>

2 tool usage counters

Figure 1017 Tool usage counters summary page

42.57.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 1018). See [Common features in detailed administration](#) for more information.

Change tool usage counter

Name:	<input type="text" value="Etch Time"/>	The name of this counter
Description:	<p>This is for the etch time in minutes. PMs are performed every 100 minutes of use.</p> <p>The counter description to be displayed next to it on the tool control page</p>	
Value:	<input type="text" value="534.81"/>	The current value of this counter
Tool:	<input type="text" value="790 RIE Right"/>	The tool this counter is for.
Tool usage question:	<input type="text" value="etch_time"/>	
	The name of the tool's post usage question which should be used to increment this counter	
Last reset value:	<input type="text" value="9.0"/>	The last value before the counter was reset
Last reset:	Date: <input type="text" value="12/01/2020"/>	Time: <input type="text" value="04:48 PM"/>
	The date and time this counter was last reset	
Last reset by:	<input type="text" value="Jerry Bowser (jbowser)"/>	
	The user who last reset this counter	
Warning threshold:	<input type="text" value="510.0"/>	
	When set in combination with the email address, a warning email will be sent when the counter reaches this value.	
Warning email:	<input type="text" value="mrampant@nist.gov"/>	
	The address to send the warning email to. A comma-separated list can be used.	
<input checked="" type="checkbox"/> Is active	The state of the counter	
Warning threshold reached:		

Figure 1018 Tool usage counters add/edit page

- **Name** – the name of the counter. This name will be displayed on the tool summary page.
- Description – the counter description to be displayed next to the counter on the tool summary page.
- **Value** – the current value of the counter.
- **Tool** – the tool the counter is for. *Tools table*
- **Tool usage question** – the name of the post usage question used to increment the counter.
- Last reset value – the last value before the counter was last reset. When a counter is reset, a comment is also written for the associated tool that captures the last reset value, date, and who reset.
- Last reset – the date/time the counter was last reset.
- Last reset by – the user who last reset the counter.

- Warning threshold – the value which once reached will trigger an email to be sent to the warning email.
- Warning email – email address to send the tool usage counter threshold reached email to. For this feature to work, the counter_threshold_reached_email needs to be set in [Customization – Counter threshold reached email](#)
- Is active – checked indicates the counter is active and will be displayed on the tool summary page. Unchecked hides the counter.

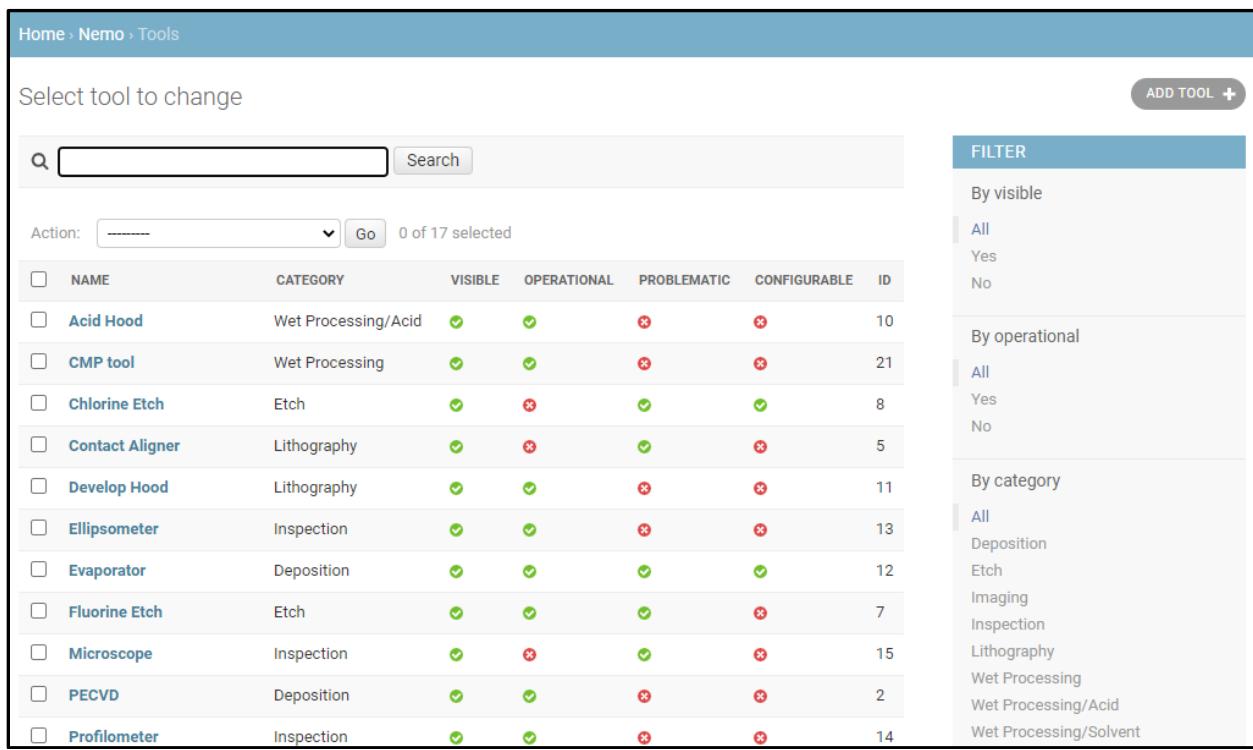

42.58 Tools

42.58.1 Usage

The tools table lists each tool, its status, qualified users, usage rules, interlock information, reservation rules, and dependencies. While the attributes can be modified on various pages of NEMO, the tool must first be created from this view.

42.58.2 Summary page

The summary page provides a listing of tools (Figure 1019). Click the name field in the row of interest to edit.

The screenshot shows a table of tools with the following data:

NAME	CATEGORY	VISIBLE	OPERATIONAL	PROBLEMATI	CONFIGURAB	ID
Acid Hood	Wet Processing/Acid	✓	✓	✗	✗	10
CMP tool	Wet Processing	✓	✓	✗	✗	21
Chlorine Etch	Etch	✓	✗	✓	✓	8
Contact Aligner	Lithography	✓	✗	✓	✗	5
Develop Hood	Lithography	✓	✓	✗	✗	11
Ellipsometer	Inspection	✓	✓	✗	✗	13
Evaporator	Deposition	✓	✓	✓	✓	12
Fluorine Etch	Etch	✓	✓	✓	✗	7
Microscope	Inspection	✓	✗	✓	✗	15
PECVD	Deposition	✓	✓	✗	✗	2
Profilometer	Inspection	✓	✓	✗	✗	14

On the right, there is a sidebar titled "FILTER" with three sections: "By visible" (All, Yes, No), "By operational" (All, Yes, No), and "By category" (All, Deposition, Etch, Imaging, Inspection, Lithography, Wet Processing, Wet Processing/Acid, Wet Processing/Solvent).

Figure 1019 Tools summary page

42.58.3 Fields

The add/change page for this table lists the fields that can be edited. See [Common features in detailed administration](#) for more information.

General Information (Figure 1020)

- Name – text field of what the tool will be called throughout NEMO. (required)
- Parent tool – Select the parent tool from the dropdown list. If parent/child tools will be used, the child tools must identify which tool is the parent tool. If a parent tool is selected, the child tool will use all of the attributes of the parent tool except for the name. The parent/child tool relationship is useful when a single tool is used for multiple purposes that may be billed at different rates. For example, a dual beam focused ion beam tool may have one rate to use in SEM mode and another rate when used in FIB mode.

Tools table

- Category – tools can be grouped together by location, type, or other grouping. These categories will be used to group tool in the calendar and tool control sidebars. Create sub-categories using slashes. For example, "Category 1/Sub-category 1". (required)
- Qualified users – select from available users and click the right arrow to add to chosen users. Multiple users can be selected at the same time using shift or control keys. Qualified users are managed on the users page, training page, or qualifications page.

Users table

Figure 1020 Tools general information

Post usage questions (Figure 1021)

- Post usage questions – json formatted list can ask users for input at the end of their processes as either optional or required input using a radio button list, dropdown list, text entry (textbox or textarea), or numeric input (number or float). Only number inputs can trigger consumable purchases. The json script is validated when saving the tool record and error messages indicating format or missing required fields will be displayed.
- Responses to post usage questions are entered on the summary tab of the tool control page (page 103) and stored in the run data field of the usage events table as json formatted data (page 535). In addition, responses are displayed on the tool control page under usage data history detailed on page 115. Post usage questions can be configured so responses are either required or optional. In addition, questions can be grouped and repeated a configurable number of times to capture multiple processes in a single tool usage.

post usage questions:

```
[
  {
    "type": "number",
    "title": "How much gold was deposited?",
    "max-width": 250,
    "suffix": "nm",
    "required": true,
    "placeholder": "0",
    "name": "gold_used",
    "consumable": "Sputter gold"
  },
  {
    "type": "radio",
    "title": "Please rate your experience.",
    "choices": ["Great", "As expected", "Not terrible", "Disaster"],
    "name": "user_rating",
    "required": true,
    "default_choice": null
  },
  {
    "type": "textbox",
    "title": "Tell us about your run?",
    "name": "feedback",
    "max-width": 250,
    "required": true
  }
]
```

Upon logging off a tool, questions can be asked such as how much consumables were used by the user. This field will only accept JSON format

- Group, allows creation of a group of questions that can be repeated. For example, when a user uses multiple processes on a tool, and we want to collect information about each one (Figure 1028).
 - “**type**”: “group”
 - “**title**”: title of the group (label), use “\n” to force line breaks
 - “**name**”: name of the group for submit (unique)
 - “**max-number**”: maximum number of times the group of inputs can be repeated.
 - “**questions**”: list of questions, enclosed in brackets, to group together.
 - “**title_html**”: html code to display instead of title
 - “**group_add_button_name**”: name of “Add” button to display

```

[

{
  "type": "group",
  "title": "Tell us about the work you performed today.",
  "name": "group1",
  "max_number": 3,
  "questions": [
    [
      {
        "type": "dropdown",
        "title": "What material did you etch?\n:",
        "placeholder": "Pick one",
        "required": true,
        "max-width": 250,
        "choices": ["Silicon Oxide", "Silicon Nitride"],
        "name": "etch_material"
      },
      {
        "type": "number",
        "title": "How long did you etch (minutes)?",
        "max-width": 250,
        "suffix": "minutes",
        "required": true,
        "default_choice": null,
        "placeholder": 0,
        "name": "etch_time"
      },
      {
        "type": "textbox",
        "title": "Additional Notes",
        "max-width": 500,
        "required": false,
        "default_choice": null,
        "name": "etch_notes"
      }
    ]
  }
]

```

Figure 1028 Tools post usage group example

- Post usage preview – after saving the tool record with post usage question json information, the post usage preview will display what users will see (Figure 1029). This feature is useful for verifying the json input is correct and previewing the output. If there are errors in the json script, they will be indicated and suggestions to fix the issue will be given. The preview will show not valid if the required fields are not entered or in the specified range.

Additional Information (Figure 1035)

- Description – html description that will be displayed near the bottom of the tool summary page.
- Serial – alphanumeric field that will display at the top right of the tool summary page.

- Image – 500 pixel x 500 pixel maximum image that will display on the tool summary page next to the description.

Additional Information

description:

HTML syntax could be used

serial:

Serial Number

image:

No file chosen
An image that represent the tool. Maximum width and height are 500px

Figure 1035 Tools additional information

Current state (Figure 1036)

- Visible – checkbox to indicate whether the tool is visible to users. If not checked, the tool will not be displayed on the calendar or tool control sidebars.
- Operational – checkbox to indicate whether the tool is available to users. The operational status is managed by the report a problem tab on the tool control page.

Current state

Visible
Specifies whether this tool is visible to users.

operational
Marking the tool non-operational will prevent users from using the tool.

Figure 1036 Tools current state

Contact Information (Figure 1037)

- Primary owner – select from the drop down list the staff member who is responsible for the administration of the tool. The primary owner is listed on the details tab of the tool control page. (required)
- Backup owners - select from available users and click the right arrow to add to chosen users. Multiple users can be selected at the same time using shift or control keys. The backup owners are listed on the details tab of the tool control page.

- Superusers – select from available users and click the right arrow to add to chosen superusers. Multiple users can be selected at the same time using shift or control keys. The superusers are listed on the details tab of the tool control page and have the ability to train users on tools they are listed as superusers for.
- Notification email address – in addition to the primary and backup tool owners, comments, problems, and shutdown notices will be forwarded to this email address.
- Location – a text descriptor to identify the tools location. The location is displayed on the details tab of the tool control page. In addition, the kiosk uses the location to group nearby tools. Since this is a free form text input, make sure locations across tools are consistently listed. (required)
- Phone number – a text listing of the phone number. No phone number formatting is performed so extensions can be used as well as full phone numbers. The phone number is displayed on the details tab of the tool control page. (required)

Usage policy (Figure 1039)

- Policy off between times – Check this box to disable policy rules every day between the given times
- Policy off start time – The start time when policy rules should NOT be enforced
- Policy off end time – The end time when policy rules should NOT be enforced
- Policy off weekend – Whether or not policy rules should be enforced on weekends
- Minimum usage block time – The minimum amount of time (in minutes) that a user must reserve this tool for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this tool.
- Maximum usage block time – The maximum amount of time (in minutes) that a user may reserve this tool for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this tool.
- Maximum reservations per day – The maximum number of reservations a user may make per day for this tool.
- Minimum time between reservations – The minimum amount of time (in minutes) that the same user must have between any two reservations for this tool.
- Maximum future reservation time – The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

Usage policy

policy off between times
Check this box to disable policy rules every day between the given times

policy off start time: Now |

The start time when policy rules should NOT be enforced

policy off end time: Now |

The end time when policy rules should NOT be enforced

policy off weekend
Whether or not policy rules should be enforced on weekends

minimum usage block time:

The minimum amount of time (in minutes) that a user must reserve this tool for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this tool.

maximum usage block time:

The maximum amount of time (in minutes) that a user may reserve this tool for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this tool.

maximum reservations per day:

The maximum number of reservations a user may make per day for this tool.

minimum time between reservations:

The minimum amount of time (in minutes) that the same user must have between any two reservations for this tool.

maximum future reservation time:

The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

42.58.4 User access page

There is no user access page to create tools. However, once created, several parameters can be updated in NEMO pages.

- Qualified users are managed on the [users page](#) detailed starting on page 293, the [training page](#) detailed starting on page 289, or the [qualifications page](#) detailed starting on page 251.
- Most tool attributes are displayed on the [tool control pages](#) detailed starting on page 81.
- Reservation and usage policy are discussed in the [reservations section](#) detailed starting on page 49.
- Dependency status is updated on the [resources page](#) detailed starting on page 265.

42.59 Training sessions

42.59.1 Usage

The training sessions table records the time and type of training provided. It is updated directly from the training page and under normal situations this table should not need to be directly modified. If a facility charges for training, this table contains the training to be billed and duration.

42.59.2 Summary page

The summary page provides a listing of training sessions (Figure 1043). Click the id field in the row of interest to edit.

- User – drop down list select the user using the tool. This is the person being billed. (required) *Users table*
- Operator – drop down list select the user using the tool. This is the person using the tool so it could be the user or a staff member on behalf of the user. (required) *Users table*
- Project – drop down list select the project to charge usage to. (required) *Projects table*
- Tool – drop down list select the tool in use. (required) *Tools table*
- Start – data/time the usage event started. (required)
- End – data/time the usage event ended. Active usage has a blank end date/time.
- Validated – checkbox indicates if the staff member confirmed the usage was correct. Only applies to tool run on behalf of another user.
- Run data – contains the answers to any post usage questions in json format.

42.60.4 User access page

Training sessions are maintained on the [training page](#) detailed on page 289.

42.61 User preferences

42.61.1 Usage

The user preferences table records the preferences for each user that are settable in NEMO. User preferences are automatically created and updated from the [user preference page](#) detailed on page 194.

42.61.2 Summary page

The summary page provides a listing of user preferences (Figure 1047). Click the user field in the row of interest to edit.

The screenshot shows a web-based application interface for managing user preferences. At the top, a blue header bar displays the navigation path: Home > Nemo > User preferences. Below the header, the main content area has a light gray background. A title 'Select User preferences to change' is centered at the top of the content area. Below the title, there is a search bar labeled 'Action:' with a dropdown menu showing '-----'. To the right of the dropdown is a 'Go' button and the text '0 of 5 selected'. A list of user entries follows, each consisting of a small square checkbox and a user name in blue text. The users listed are: USER, Conseil Aronnax (conseil), Pierre Aronnax (professor), jerry bowser (jerry), Captain Nemo (captain), and Ned Land (ned). At the bottom left of the list, the text '5 User preferences' is displayed. The entire interface is contained within a black-bordered frame.

Figure 1047 User preference summary page

42.61.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 1048). See [Common features in detailed administration](#) for more information.

Home › Nemo › User preferences › UserPreferences object (5)

Change User preferences

Created_reservation_invite
Whether or not to send a calendar invitation when creating a new reservation

Cancelled_reservation_invite
Whether or not to send a calendar invitation when cancelling a reservation

Figure 1048 User preference add/edit page

- **Created_reservation_invite** – checkbox indicates whether or not to send a calendar invitation when creating a new reservation
- **Cancelled_reservation_invite** – checkbox indicated whether or not to send a calendar invitation when cancelling a reservation

42.61.4 User access page

User preferences are automatically created and updated from the [user preference page](#) detailed on page 194.

42.62 User types

42.62.1 Usage

User types are optional but can be useful for binning users aiding in future analysis and trending. User types, if used, must be created in this table view and can be any text name. Any number can be defined. If no user types are defined, they are not displayed on the user page. User types are discussed in the [users page](#) detailed on page 293.

42.62.2 Summary page

The summary page provides a listing of user types (Figure 1049). Click the name field in the row of interest to edit.

Action:	-----	Go	0 of 3 selected

<input type="checkbox"/>	NEMO_Services		
<input type="checkbox"/>	Staff		
<input type="checkbox"/>	User		

3 user types

Figure 1049 User types summary page

42.62.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 1050). See [Common features in detailed administration](#) for more information.

Home > Nemo > User types > NEMO_Services

Change user type

Name:

Figure 1050 User types add/edit page

- Name – the name can be up to 200 characters (required).

42.62.4 User access page

There is no user access page to create user types however, user types are discussed in the [users page](#) detailed on page 293.

42.63 Users

42.63.1 Usage

The users table lists each user, their permissions, important dates, and qualifications. Users are created and maintained from the [users page](#) detailed on page 293. However, some attributes may be updated from other pages and some attributes may only be set directly from this page. If an attribute can be set from a page other than the users page, it will be noted in the field details below.

42.63.2 Summary page

The summary page provides a listing of tools (Figure 1051). Click the name field in the row of interest to edit.

The screenshot shows a table with columns: FIRST NAME, LAST NAME, USERNAME, EMAIL ADDRESS, ACTIVE, DOMAIN, STAFF, USER OFFICE, ACCOUNTING OFFICER, TECHNICIAN, and SERV. The rows represent users: Assistant (Conseil), Captain (Nemo), Commander (Farragut), Ned (Land), and Pierre (Aronnax). The 'ACTIVE' column contains green checkmarks for all users. The 'DOMAIN' column has red circles with 'o's. The 'STAFF' column has green checkmarks. The 'USER OFFICE' column has red circles with 'o's. The 'ACCOUNTING OFFICER' column has green checkmarks. The 'TECHNICIAN' column has red circles with 'o's. The 'SERV' column has red circles with 'o's. A sidebar on the right titled 'FILTER' includes dropdowns for 'By active' (All, Yes, No), 'By domain' (All), 'By staff' (All, Yes, No), 'By facility manager' (All, Yes, No), and 'By technician' (All, Yes, No).

FIRST NAME	LAST NAME	USERNAME	EMAIL ADDRESS	ACTIVE	DOMAIN	STAFF	USER OFFICE	ACCOUNTING OFFICER	TECHNICIAN	SERV
Assistant	Conseil	conseil	assistant.conseil@nautilus.com	✓	✗	✓	✗	✗	✗	✗
Captain	Nemo	captain	captain.nemo@nautilus.com	✓	✗	✗	✗	✗	✗	✗
Commander	Farragut	commander	commander.farragut@nautilus.com	✓	✗	✗	✗	✓	✗	✗
Ned	Land	ned	ned.land@nautilus.com	✓	✗	✗	✗	✗	✗	✗
Pierre	Aronnax	professor	pierre.aronnax@nautilus.com	✓	✗	✓	✗	✗	✗	✗

Figure 1051 Users summary page

42.63.3 Fields

The add/change page for this table lists the fields that can be edited. See [Common features in detailed administration](#) for more information.

Personal Information (Figure 1052)

- First name – text field of the user’s first name. (required)
- Last name – text field of the user’s last name. (required)
- Username – text field of the user’s username. This is the name the user authenticates with. (required)
- Email address – text field of the users email address. NEMO uses emails to provide useful updates and information to users. (required)
- Badge number – the badge number associated with this user. This field must correctly correspond to a user in order for the entrance tablet and kiosk systems to work properly.

- Type – drop down list select user type from list. This is an informational user type for grouping users for future data analysis.
- Domain – If the identity service is being used to validate users against multiple domains, enter the active directory domain that the account resides on. Not needed for single domain implementations.
- Notes – free text area to enter any type of notes for this user

The screenshot shows a 'Change user' interface with a blue header bar. The title 'Change user' is at the top left, and a 'HISTORY' button is at the top right. Below the header, the user's name 'Captain Nemo (captain)' is displayed in bold. A blue bar labeled 'Personal information' spans across the page. The form fields include:

- First name:** Captain
- Last name:** Nemo
- Username:** captain
- Email address:** captain.nemo@nautilus.com
- Badge number:** 1
A note below states: 'The badge number associated with this user. This number must correctly correspond to a user in order for the tablet-login system (in the lobby) to work properly.'
- Type:** Lab staff (dropdown menu with edit, add, and delete icons)
- Domain:** (empty field)
A note below states: 'The Active Directory domain that the account resides on'
- Notes:** (large empty text area)

Figure 1052 Users personal information

Permissions (Figure 1053)

- Active – checkbox designates whether this user can log in. Unselect this instead of deleting accounts.
- Staff – checkbox designates technical staff users. Can only be changed from this page.
- User office – checkbox designates User office staff members. Can only be changed from this page.
- Accounting officer – checkbox designates Accounting officers. Can only be changed from this page.
- Service personnel – checkbox designates this user as service personnel. Service personnel can operate qualified tools without a reservation even when they are shutdown or during an outage and can access authorized areas without a reservation. Can only be changed from this page.

- Technician – checkbox specifies how to bill staff time for this user. When checked, customers are billed at technician rates. Can only be changed from this page.
- Facility manager – checkbox designates the facility manager(s). When checked, users will receive task status updates and will be able to approve/deny access requests. Can only be changed from this page.
- Administrator – checkbox designates that this user has all permissions without explicitly assigning them. Can only be changed from this page.
- Facility rules tutorial required – checkbox when selected, the user is blocked from all reservation and tool usage capabilities.

Permissions	
<input checked="" type="checkbox"/> Active	Designates whether this user can log in. Unselect this instead of deleting accounts.
<input checked="" type="checkbox"/> Staff	Designates this user as technical staff. Technical staff can start remote projects, check maintenance, change configuration, train users etc.
<input type="checkbox"/> User office	Designates this user as part of the User Office. User Office staff can create and manage users and projects, charge supplies, check usage etc.
<input type="checkbox"/> Accounting officer	Designates this user as Accounting officer. Accounting officers can manage projects, view user details, and check usage/billing.
<input type="checkbox"/> Service personnel	Designates this user as service personnel. Service personnel can operate qualified tools without a reservation even when they are shutdown or during an outage and can access authorized areas without a reservation.
<input type="checkbox"/> Technician	Specifies how to bill staff time for this user. When checked, customers are billed at technician rates.
<input checked="" type="checkbox"/> Facility manager	Designates this user as facility manager. Facility managers receive updates on all reported problems in the facility and can also review access requests.
<input checked="" type="checkbox"/> Administrator	Designates that this user has all permissions without explicitly assigning them.
<input type="checkbox"/> Facility rules tutorial required	When selected, the user is blocked from all reservation and tool usage capabilities.

Figure 1053 Users permissions

Additional Permissions (Figure 1054)

- Groups – groups can be used to list common user permissions into a single item to make assignment easier. Select from available groups and click the right arrow to add to chosen groups. Multiple groups can be selected at the same time using shift or control keys. Groups can be created from the detailed administration groups page. Normally, groups do not need to be assigned to users. Can only be changed from this page.
- User permissions – user permissions pertain to either detailed administration access or behind the scenes activity such as doors and kiosks. Select from available user permissions and click the right arrow to add to chosen user permissions. Multiple user permissions can be selected at the same time using shift or control keys. Normally, user permissions do not need to be assigned to users. Can only be changed from this page.
- Physical access levels – physical access levels determine what area access a user has and when. Select from available physical access levels and click the right arrow to add to

chosen physical access levels. Multiple physical access levels can be selected at the same time using shift or control keys.

User permissions:

Available user permissions

Chosen user permissions

Figure 1058 Users other information

42.63.4 User access page

Users are created and maintained from the [users page](#) detailed on page 293 or directly in this table view. The permissions that give elevated user status are only settable or updateable in this table view.

Once created, some parameters can be updated in NEMO pages other than the users page.

- Qualified users can also be managed on the [training page](#) detailed starting on page 289, or the [qualifications page](#) detailed starting on page 251.
- Projects can also be managed in the [Accounts and projects](#) section detailed on page 207.

43 Detailed administration – Sensors (admin only)

This is the section regarding admin pages for Sensors.

It is available by going to Administration -> Detailed administration -> Sensors, or directly at <site_address>/admin/sensors.

To enable sensors in your application, see the [Sensor data -> Setup](#) page.

43.1 Sensor alert emails

43.1.1 Usage

The sensor alert emails page lists alerts for sensors. Those alerts trigger an email as well as an alert log when the trigger condition is met, or when no data could be read if that option is selected.

43.1.2 Summary page

The summary page provides a listing of sensor alert emails (Figure 1059). Click the sensor field in the row of interest to edit.

Select sensor alert email to change						ADD SENSOR ALERT EMAIL +
Action:	-----	Go	0 of 1 selected			
<input type="checkbox"/> SENSOR	ENABLED	TRIGGER CONDITION	TRIGGER NO DATA	ADDITIONAL EMAILS	TRIGGERED ON	
<input type="checkbox"/> Bay 1 Temperature	✓	value > 70	✗		Monday, June 13th, 2022 @ 1:52 PM	
1 sensor alert email						

Figure 1059 Sensor alert emails summary page

43.1.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 1060). [Common features in detailed administration](#) is detailed on page **Error! Bookmark not defined..**

Change sensor alert email

SensorAlertEmail object (1)

Enabled

Sensor: Bay 1 Temperature

Trigger no data
Check this box to trigger this alert when no data is available

Trigger condition: value > 70

The trigger condition for this alert. The sensor value is available as a variable named **value**. e.g. value == 42 or value > 42.

Additional emails:
Additional email address to contact when this alert is triggered. A comma-separated list can be used.

Triggered on: Monday, June 13th, 2022 @ 1:52 PM

Figure 1060 Sensor alert email fields

- Enabled – uncheck to disable the alert
- Sensor – the sensor this alert should apply to (required)
- Trigger no data – check the box to have this alert triggered when no data is read
- Trigger condition – the condition that will trigger this alert. Mathematical functions and operators can be used. The sensor value is available as the variable “value”. For example: “abs(value) > 42”. The result will be evaluated as a python Boolean. See <https://docs.python.org/3/library/stdtypes.html#truth-value-testing> for details on what is considered true/false in python.
- Additional emails – text field of additional email addresses to send the alert email to. A comma separated list can be used
- Triggered on – read only field showing the last time the alert was triggered

43.1.4 User access page

There is no user access page to create sensor alert emails. However, sensor alerts are discussed in the [Sensor data -> Alerts](#) section.

43.2 Sensor alert logs

43.2.1 Usage

The sensor alert logs page is a read-only page displaying the history of all alert logs. It will display the alert details from the time the alert was triggered, even if the information has changed since.

43.2.2 Summary page

The summary page provides a listing of sensor alert logs (Figure 1061). Click the id field in the row of interest to edit.

Select sensor alert log to view					
< 2022 June 13					
ID	TIME	SENSOR	RESET	VALUE

43.2.3 Fields

The view page for this table lists the read-only fields (Figure 1062).

View sensor alert log

SensorAlertLog object (3)

Sensor:	Bay 1 Temperature	HISTORY
Value:	70.1	
Reset:	✖	
Condition:	value > 70	
No data:	✖	

Close

The screenshot shows a modal window titled "View sensor alert log". Inside, it displays a "SensorAlertLog object (3)" with five rows of data. The first row has "Sensor:" and "Bay 1 Temperature" with a "HISTORY" button. The second row has "Value:" and "70.1". The third row has "Reset:" and a red "✖" icon. The fourth row has "Condition:" and "value > 70". The fifth row has "No data:" and a red "✖" icon. At the bottom right is a "Close" button.

Figure 1062 Sensor alert log fields

- Sensor – read-only sensor
- Value – read-only sensor value at the time of the alert
- Reset – read-only flag, whether the alert was set or reset
- Condition – read-only text of the trigger condition at the time of the alert
- No data – read-only flag, whether the alert trigger condition included triggering when no data is read

43.2.4 User access page

There is no user access page to create sensor alert logs. However, sensor alerts logs are discussed in the [Sensor data -> Alerts](#) section.

43.3 Sensor card categories

43.3.1 Usage

Sensor card categories are used to link a sensor class in sensor.py to sensor cards so NEMO knows how to talk to the sensor. A sensor card category should be created for each sensor class in sensors.py that will be used to control sensors.

43.3.2 Summary page

The summary page provides a listing of sensor card categories (Figure 1063). Click the name field in the row of interest to edit.

Select sensor card category to change		ADD SENSOR CARD CATEGORY +
Action:	NAME	KEY
	<input type="checkbox"/> ModbusTcp	modbus_tcp

Change sensor card category

ModbusTcp

Name:
The name for this sensor card category

Key:
The key to identify this sensor card category by in sensors.py

Delete **Save and add another** **Save and continue editing** **SAVE**

Figure 1064 Sensor card category fields

- Name – name can be up to 200 characters (required).

- Key – The key to identify this sensor card category in sensors.py (required)

The sensors.py file has a dictionary that links this key name to each sensor class in sensors.py. Users can create their own sensor class and access it in NEMO by updating the dictionary to include their custom class (Figure 1065).

```
sensors: Dict[str, Sensor] = {"modbus_tcp": ModbusTcpSensor()}
```

Figure 1065 Sensor card categories example dictionary in sensors.py

43.3.4 User access page

There is no user access page to create sensor card categories. Sensor card categories, if used, must be created in this table view and can be any text name. Sensor card categories are used in the sensor cards table to define how NEMO should communicate with the sensors.

43.4 Sensor cards

43.4.1 Usage

Sensor cards define the communication parameters with a sensor device. Regardless if single sensors are used or multi-sensor devices are used, each device will require definition as a sensor card. Information such as IP address, port number and sensor category define how NEMO will communicate with the device.

43.4.2 Summary page

The summary page provides a listing of sensor cards (Figure 1066). Click the name field in the row of interest to edit.

Select sensor card to change					
Action:		Go		0 of 2 selected	
<input type="checkbox"/>	NAME	ENABLED	SERVER	PORT	CATEGORY

Figure 1067 Sensor card fields

- Name – name can be up to 200 characters (required).
- Server – IP address or FQDN of interlock device (required)
- Port – port number to access device through (required). ModbusTcp default port is 502
- Category – sensor card category selectable from drop down list (required). See [Sensor card categories](#).
- Username – if a username and password is required to access the sensor device, enter the username
- Password – if a username and password is required to access the sensor device, enter the password
- Enabled – check box to set the status of the device, normally checked.

43.4.4 User access page

There is no user access page to create sensor cards. Sensor cards must be created in this table view. Sensor cards are used in the sensors table to define which sensor device to talk to.

43.5 Sensor categories

43.5.1 Usage

The sensor categories page lists categories for sensors. It provides a way to organize sensors with multiple level hierarchies.

43.5.2 Summary page

The summary page provides a listing of sensor categories (Figure 1068). Click the name field in the row of interest to edit.

Select sensor category to change		
Action:	NAME	PARENT

Change sensor

Bay 1 Temperature

Name: Bay 1 Temperature 

Visible
Specifies whether this sensor is visible in the sensor dashboard

Sensor card: Temp/Humidity card: cleanroomsensors.example.org  

Interlock card:   

Sensor category: Bay 1   

Data label: Temperature
Label for graph and table data

Data prefix: 
Prefix for sensor data values

Data suffix: °F
Suffix for sensor data values

Figure 1073 Sensor fields

- Name – text field of the sensor name (required)
- Visible – checkbox of whether this sensor should be visible in the sensor dashboard page.
- Sensor card – sensor card this sensor is connected too.
- Interlock card – interlock card this sensor is connected too. This allows for certain sensors to be connected to an interlock card, provided the interlock card category key is the same as the one corresponding to the sensor class. For example, a ModbusTCP interlock card is compatible with the ModbusTCP sensor implementation. Certain manufacturers provide interlock boxes allowing for relays and sensor connection on the same device.
- Sensor category – the sensor category for this sensor
- Data label – text field for the label to show on the Y axis of the chart data for this sensor
- Data prefix – text field for the prefix to add to the value read. Only used when displaying the data.
- Data suffix – text field for the suffix to add to the value read. Only used when displaying the data.

Unit id:	<input type="text"/>		
Read address:	<input type="text" value="24"/>		
Number of values:	<input type="text" value="1"/>		
Formula:	<div style="border: 1px solid #ccc; height: 150px; width: 100%;"></div>		
<small>Enter a formula to compute for this sensor values. The list of registers read is available as variable registers. Specific functions can be used based on the sensor type. See documentation for details.</small>			
Read frequency:	<input type="text" value="5"/>		
<small>Enter the read frequency in minutes. Every 2 hours = 120, etc. Max value is 1440 min (24hrs). Use 0 to disable sensor data read.</small>			
Delete	Save and add another	Save and continue editing	SAVE

Figure 1074 Sensor fields continued

- Unit id – number field for the unit id of the sensor. Usually left empty
- Read address – number field for the address to start reading data from (required for ModbusTCP sensors). Refer to your sensor manual to find this value.
- Number of values – number of values to read (required for ModbusTCP sensors). Refer to your sensor manual to find this value. If greater than 1, the formula field will be required
- Formula – the formula to apply when reading the values. The values are available as a list “registers”. For example, “round(registers[0], 2)” to round the value to the nearest 2 decimal value. Some sensor ModbusTCP devices split data into multiple registers, and they need to be decoded together. The following modbus-specific functions are available:
 - decode_8bit_uint
 - decode_16bit_uint
 - decode_32bit_uint
 - decode_64bit_uint
 - decode_8bit_int
 - decode_16bit_int
 - decode_32bit_int
 - decode_64bit_int
 - decode_16bit_float
 - decode_32bit_float

- decode_64bit_float
- decode_bits
- decode_string

For example, “decode_32bit_float(registers)” would decode a 32 bit float from a register list containing 2 values. Refer to your sensor manual for details.

43.7.4 User access page

There is no user access page to create sensors. However, sensors are discussed in the [Sensor data](#) section.

44 API access

44.1 Usage

- The API base access page is accessible in the Administration menu under API. A list of available data tables will be displayed (Figure 1075).
- Several tables are available through the API
 - accounts: "site-address /api/accounts/",
 - area_access_records: "site-address /api/area_access_records/",
 - areas: "site-address /api/areas/",
 - billing: "site-address /api/billing/",
 - The billing information is discussed in a separate later in this section.
 - projects: "site-address /api/projects/",
 - reservations: "site-address /api/reservations/",
 - resources: "site-address /api/resources/",
 - scheduled_outages: "site-address /api/scheduled_outages/",
 - staff_charges: "site-address /api/staff_charges/",
 - tasks: "site-address /api/tasks/",
 - tools: "site-address /api/tools/",
 - training_sessions: "site-address /api/training_sessions/",
 - usage_events: "site-address /api/usage_events/",
 - users: "site-address/api/users/"

The screenshot shows a web browser interface for an API endpoint. At the top, there's a header with 'Api Root' and two buttons: 'OPTIONS' and 'GET'. Below the header, the URL 'The default basic root view for DefaultRouter' is shown. Underneath, a 'GET /api/' button is present. The main content area displays a JSON response:

```

            "is_staff": true,
            "is_superuser": true,
            "is_technician": false,
            "is_service_personnel": false
        },
        {
            "id": 3,
            "first_name": "Ned"
        }
    ]
}

```

Figure 1076 API access example data list view

- To remove all formatting and convert the data to a json output stream, add the parameter “format=json” or select the drop down in the top right corner then select json from the list (Figure 1077).

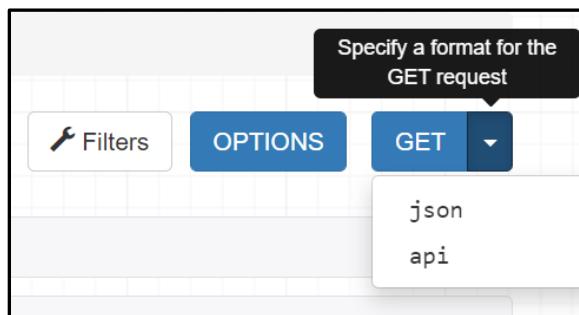

Figure 1077 API access change to json view

- The page output will now be in json format which can be parsed in many external software packages for analysis or billing (Figure 1078). The example below was reached with the address “site-address/api/users/?format=json”

```
{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 1,
      "first_name": "Captain",
      "last_name": "Nemo",
      "username": "captain",
      "email": "captain.nemo@nautilus.com",
      "date_joined": "2012-12-10T11:43:37-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": true,
      "is_superuser": true,
      "is_technician": false,
      "is_service_personnel": false
    },
    {
      "id": 3,
      "first_name": "Ned",
      "last_name": "Land",
      "username": "ned",
      "email": "ned.land@nautilus.com",
      "date_joined": "2012-12-10T11:49:38-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": false,
      "is_superuser": false,
      "is_technician": false,
      "is_service_personnel": false
    },
    {

      "is_technician": false,
      "is_service_personnel": false
    }
  ]
}
```

Figure 1078 API access example data json view

44.2 Special parameters

The “expand” parameter can be used to request fully nested object in the response. For example, this is the view without expand. “site-address/api/projects/” (Figure 1079)

```

HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 1,
      "name": "Cleanroom Eng",
      "application_identifier": "PROJ.2019.02",
      "start_date": null,
      "active": true,
      "allow_consumable_withdrawals": true,
      "account": 1,
      "only_allow_tools": []
    },
    ...
  ]
}

```

Figure 1079 API access example projects

And this is an example with expand. “<http://localhost:8005/api/projects/?expand=account>” (Figure 1080)

Django REST framework Captain Nemo (captain)

Api Root / Project List

Project List

`GET /api/projects/?expand=account`

HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

```
{
    "count": 3,
    "next": null,
    "previous": null,
    "results": [
        {
            "id": 1,
            "name": "Cleanroom Eng",
            "application_identifier": "PROJ.2019.02",
            "start_date": null,
            "active": true,
            "allow_consumable_withdrawals": true,
            "account": {
                "id": 1,
                "name": "Cleanroom Staff",
                "start_date": null,
                "active": true,
                "type": null
            },
            "only_allow_tools": []
        }
    ]
}
```

Figure 1080 API access example projects with expand

The parameter “fields” can be used to select specific fields to be retrieved. For example “site-address/api/projects/?fields=name” will only retrieve the name of the projects (Figure 1081)

Django REST framework Captain Nemo (captain)

Api Root / Project List

Project List

`GET /api/projects/?fields=name`

HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

```
{
    "count": 3,
    "next": null,
    "previous": null,
    "results": [
        {
            "name": "Cleanroom Eng"
        },
        {
            "name": "Project 2"
        },
        {
            "name": "Project 3"
        }
    ]
}
```

Figure 1081 API access example projects with fields

Using the same syntax, “?omit=name” can be used to retrieve all fields except “name” (Figure 1082)

The screenshot shows the Django REST framework's browsable API interface. At the top, it says "Django REST framework" and "Captain Nemo (captain)". Below that, the URL "Api Root / Project List" is shown. On the right, there are buttons for "Filters", "OPTIONS", and "GET". The main area displays a JSON response for a "Project List". The response includes headers: "HTTP 200 OK", "Allow: GET, HEAD, OPTIONS", "Content-Type: application/json", and "Vary: Accept". The JSON data starts with a count of 3, followed by a "results" array containing one object. This object has fields: "id": 1, "application_identifier": "PROJ.2019.02", "start_date": null, "active": true, "allow_consumable_withdrawals": true, "account": 1, and "only_allow_tools": []. The "name" field is omitted from the response.

```

HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

{
    "count": 3,
    "next": null,
    "previous": null,
    "results": [
        {
            "id": 1,
            "application_identifier": "PROJ.2019.02",
            "start_date": null,
            "active": true,
            "allow_consumable_withdrawals": true,
            "account": 1,
            "only_allow_tools": []
        }
    ]
}

```

Figure 1082 API access example projects with omit

44.3 Export formats

The API data can be exported in 2 different formats: JSON and XLSX.

JSON export format is enabled out of the box, however the XLSX format is not.

To enable XLSX format, the following setting must be used in the REST_FRAMEWORK section of the setting.py file:

```
'DEFAULT_RENDERER_CLASSES': ['rest_framework.renderers.JSONRenderer',
'rest_framework.renderers.BrowsableAPIRenderer',
'drf_renderer_xlsx.renderers.XLSXRenderer'],
```

44.4 Date/Time formats

The default date/time formats which are used to format date and times in the API can be set in the REST_FRAMEWORK section of the settings.py file, for example:

```
'DATETIME_FORMAT': '%m-%d-%Y %H:%M:%S',
'DATE_FORMAT': '%m-%d-%Y',
'TIME_FORMAT': '%H:%M:%S',
```

44.5 Access Errors

If an error is received, the user may not have permission to access the API interface (Figure 1083). Users accessing the API must have either superuser status or have the “Can use billing API” permission.

Figure 1083 API access permission error

The authentication class must be set for the method you plan to access the API, or you will receive an error (Figure 1084). To use token authentication which is the easiest way for a program to retrieve data, the following setting must be used in the REST_FRAMEWORK section of the setting.py: 'DEFAULT_AUTHENTICATION_CLASSES': ('rest_framework.authentication.TokenAuthentication'). Then, a token must be created for the user that will access the API. When token authentication is enabled, tokens can be created in the detailed administration tokens table.

To allow web address access, add ('rest_framework.authentication.SessionAuthentication') to the authentication class tuple.

Figure 1084 API access authentication error

44.6 Billing information

Billing information can be directly accessed in a date range through the billing API. The billing API requires a start date (start) and end date (end) to be passed as arguments.

Valid parameters are:

- **start** (required): date in format MM/DD/YYYY
- **end** (required): date in format MM/DD/YYYY
- **username**: username of a user to get billing for
- **account_name**: name of the account to get billing for
- **account_id**: id of the account to get billing for
- **project_name**: name of the project to get billing for
- **project_id**: id of the project to get billing for
- NOTE: If valid start and end dates are not given, an error will be returned (Figure 1085).

Django REST framework Captain Nemo (captain)

Api Root / Billing

Billing

OPTIONS GET ▾

GET /api/billing

HTTP 400 Bad Request

Allow: OPTIONS, GET

Content-Type: application/json

Vary: Accept

```
{  "start": [    "This field is required."  ],  "end": [    "This field is required."  ]}
```

Figure 1085 API access billing date range error

- The format for requesting billing information through the API is site-address/api/billing?start=1/1/2020&end=12/31/2020. This request will produce the output in Figure 1086.

The screenshot shows the Django REST framework's API browser interface. At the top, it says "Django REST framework" and "Captain Nemo (captain)". Below that, the URL "Api Root / Billing" is shown. The main title is "Billing". On the right, there are two buttons: "OPTIONS" and "GET". Underneath the title, the URL "GET /api/billing?start=1/1/2020&end=12/31/2020" is displayed. The response starts with "HTTP 200 OK" and includes headers: "Allow: OPTIONS, GET", "Content-Type: application/json", and "Vary: Accept". The data is presented as a JSON array:

```
[
    {
        "type": "tool_usage",
        "name": "Chlorine Etch",
        "details": "",
        "account": "Cleanroom Staff",
        "account_id": 4,
        "project": "Cleanroom Maint",
        "project_id": 4,
        "application": "Proj.2019.001",
        "username": "staff",
        "user_id": 6,
        "start": "09/21/2020 16:03:32",
        "end": "09/21/2020 16:23:38",
        "quantity": 20.08
    }
]
```

Figure 1086 API access example billing data list view

- The format for requesting billing information as a json stream is the same as the other tables; site-address/api/billing?start=1/1/2020&end=12/31/2020&format=json. This request will produce the output in Figure 1087.

```
[{"type": "tool_usage", "name": "Chlorine Etch", "details": "", "account": "Cleanroom Staff", "account_id": 4, "project": "Cleanroom Maint", "project_id": 4, "application": "Proj.2019.001", "username": "staff", "user_id": 6, "start": "09/21/2020 16:03:32", "end": "09/21/2020 16:23:38", "quantity": 20.08}, {"type": "tool_usage", "name": "Ellipsometer", "details": "", "account": "Account 1", "account_id": 1, "project": "Project 1", "project_id": 1, "application": "PROJ.123", "username": "professor", "user_id": 2, "start": "09/21/2020 16:03:02", "end": "09/21/2020 16:23:48", "quantity": 20.62}, {"type": "tool_usage", "name": "Sputter", "details": "", "account": "Account 2", "account_id": 2, "project": "Project 2", "project_id": 2, "application": "PROJ.456", "username": "ned", "user_id": 3, "start": "09/21/2020 16:02:39", "end": "09/21/2020 16:23:43", "quantity": 21.07}, {"type": "tool_usage", "name": "PECVD", "details": "", "account": "Cleanroom Staff", "account_id": 4, "project": "Cleanroom Maint", "project_id": 4, "application": "Proj.2019.001", "username": "captain", "user_id": 1, "start": "09/21/2020 15:00:39", "end": "09/21/2020 16:23:41", "quantity": 83.02}, {"type": "tool_usage", "name": "PECVD", "details": "", "account": "Cleanroom Staff", "account_id": 4, "project": "Cleanroom Maint", "project_id": 4, "application": "Proj.2019.001", "username": "captain", "user_id": 1, "start": "09/21/2020 11:54:07", "end": "09/21/2020 15:00:33", "quantity": 186.42}, {"type": "tool_usage", "name": "PECVD", "details": "Work performed by Captain Nemo (captain) on your behalf", "account": "Account 1", "account_id": 1, "project": "Project 1", "project_id": 1, "application": "PROJ.123", "username": "ned", "user_id": 3, "start": "09/21/2020 11:52:45", "end": "09/21/2020 11:53:03", "quantity": 0.28}, {"type": "tool_usage", "name": "Sputter", "details": "", "account": "Cleanroom Staff", "account_id": 4, "project": "Cleanroom Eng", "project_id": 6, "application": "Proj.2019.002", "username": "captain", "user_id": 1, "start": "06/08/2020"}]
```

Figure 1087 API access example billing data json view

45 Kiosk

Kiosks provide a quick and convenient way for users to access tools and reservations. The kiosk can run on any device with web access but requires a card reader and NEMO user with permission to act as a kiosk.

45.1 Setup

To enable this feature, you need to have ‘NEMO.apps.kiosk’ in INSTALLED_APPS in your settings.py.

The use of a kiosk tablet requires a tablet or computer configured to interface with NEMO and send the appropriate messages.

45.1.1 Kiosk user

A dedicated NEMO user should be setup for kiosk tablets. That user must have the following permissions which are set in the users table of the database:

- NEMO|user|Kiosk services

45.1.2 Card reader

The kiosk tablet uses a badge reader to identify the user. Usually, an identity card that users of the facility already have can be utilized, but there are also tokens that can be used. NEMO defaults to expecting the F2 character to start recording the badge number and another F2 character to end and submit the badge number similar to what is provided by a pcProx Plus card reader (Figure 1088). NIST does not endorse this product but the information is provided as an example of the type of reader that can be used.

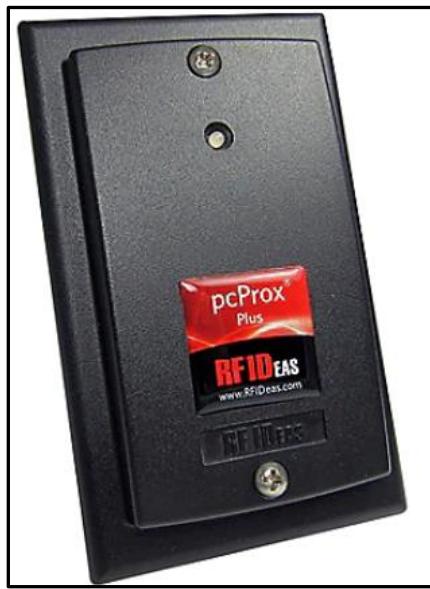

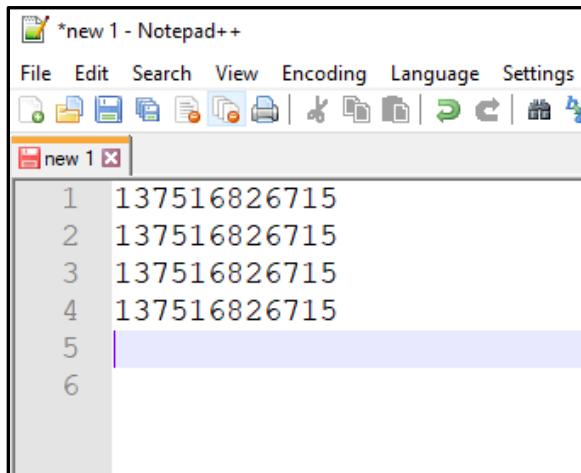

Figure 1088 Kiosk card reader example

If your card reader uses different characters, a custom badge reader configuration can be setup in the [badge reader table](#) detailed starting on page 389.

Once the card reader is setup, it can be tested by opening notepad or other computer text editor software then scan a badge. A serial number should be seen (Figure 1089).

The screenshot shows a Notepad++ window titled '*new 1 - Notepad++'. The menu bar includes File, Edit, Search, View, Encoding, Language, and Settings. Below the menu is a toolbar with various icons. The main text area contains six lines of text, each starting with a number from 1 to 6 followed by the serial number '137516826715'. Line 5 is highlighted with a light purple background.

Figure 1089 Kiosk card reader test example

45.1.3 User setup

Now that the card reader is setup, each user needs to have their badge number entered into their user profile. This is easily accomplished by setting up a card reader on a computer that has access to NEMO by a staff member. Then follow these steps:

- Navigate to the Administration → Users page (Figure 1090)

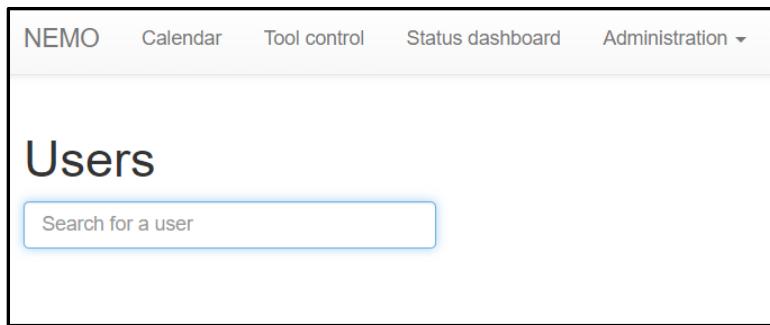

Figure 1090 Kiosk card reader users page

- Enter the user name of interest and click their name when it appears or create a new user if needed (Figure 1091).

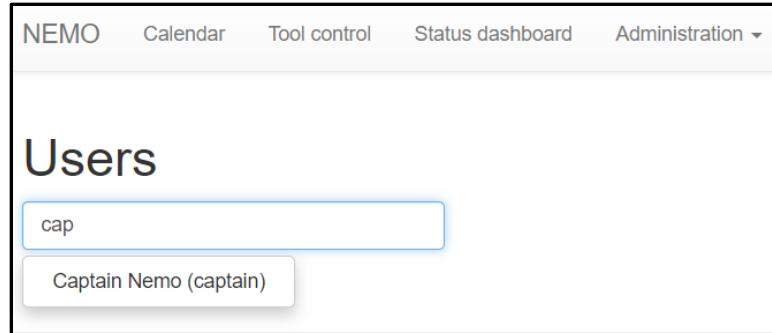

Figure 1091 Kiosk user name

- Click in the badge number dialog box and ensure there are no characters already entered (Figure 1092).

A screenshot of the 'Modify user' form. The top navigation bar is identical to Figure 1091. The main section is titled 'Modify user'. It contains fields for 'First name' (Captain), 'Last name' (Nemo), 'User name' (captain), 'E-mail address' (captain.nemo@nautilus.com), 'Type' (a dropdown menu showing '-----'), and 'Badge number' (an empty input field). At the bottom, 'Access expiration' is set to '04/09/2021' and 'One year from now'. The 'User name' field has a blue border around it, indicating it is selected or active. The entire form is contained within a black-bordered box.

Figure 1092 Kiosk update user

- Then, scan the users badge. The badge number will fill in and the user dialog will close (Figure 1093).

The screenshot shows the 'Modify user' page. At the top, there are links: 'Search for another user', 'View user history', and 'Safely deactivate this user'. Below this, the title 'Modify user' is displayed. The form contains the following fields:

- First name:** Captain
- Last name:** Nemo
- User name:** captain
- E-mail address:** captain.nemo@nautilus.com
- Type:** A dropdown menu showing '-----'.
- Badge number:** 137516826715
- Access expiration:** 04/09/2021 (with a note: One year from now)

Figure 1093 Kiosk scan badge

- An update successful message will appear at the top of the users page (Figure 1094).

The screenshot shows the 'Users' page. At the top, there are links: 'NEMO', 'Calendar', 'Tool control', 'Status dashboard', and 'Administration'. A green success message box displays the text: 'Captain Nemo (captain) has been updated successfully'. Below the message, the title 'Users' is centered, and there is a search bar with the placeholder text 'Search for a user'.

Figure 1094 Kiosk update success

- Once the kiosk tablet is confirmed to be operational, repeat the badge update for all users.

45.1.4 Web page

The list of kiosk locations can be found on the kiosk summary page, site-address/kiosk/ (Figure 1095). The list is enumerated from the location field in the tool table. Since the field is a text input, it is important to make how locations are entered consistent (e.g. cleanroom is not the same as Cleanroom). This location is important for capturing near-by tools.

Kiosk locations

CMP Lab

Cleanroom Bay 1

Cleanroom Bay 2

Cleanroom Bay 3

Cleanroom Bay 4

Cleanroom Bay 5

NanoFab

Figure 1095 Kiosk summary page

- Kiosk URL format – site-address/kiosk/{location}/

In addition, the current occupants of an area can be displayed on the idle tablet by including the occupancy parameter and providing the case sensitive area name.

- Kiosk URL format – site-address/kiosk/{location}/?occupancy=Cleanroom

45.2 Usage

45.2.1 Access and main page

- When idle, the kiosk tablet will display the idle message (Figure 1096). The idle message can be edited in the kiosk.html page in the kiosk/templates directory.

Scan your badge to control tools

Figure 1096 Kiosk idle screen

- If the occupancy parameter is set for the area (e.g. site-address/kiosk/Cleanroom bay 2/?occupancy=Cleanroom), occupancy will be displayed as well (Figure 1097).

Scan your badge to control tools

Staff members are highlighted in green.

Service personnel are highlighted in orange.

Users with expired reservations are highlighted in red.

Cleanroom		0 / 3 people (+ 2 staff and 1 service personnel)
User	Since	Working on project...
Captain Nemo	Friday @ 9:30 AM	Cleanroom Maint
Tech Cleanroom	Thursday @ 5:58 PM	Cleanroom Maint
Staff Cleanroom	Thursday @ 5:58 PM	Cleanroom Eng

Figure 1097 Kiosk idle screen with area occupancy

- Scan your badge at the card reader to begin. NOTE: after a badge scan if the user is prompted for additional information and does not respond the page will automatically return to the welcome screen. Wait times vary and are detailed with each prompt below.
 - Each time a badge is scanned, the badge number is displayed on the screen greyed out (Figure 1098). This is useful when determining why a user's badge isn't opening a door.

137516826715, sent

Figure 1098 Kiosk badge scan

- If the badge isn't recognized, a message will be displayed, and the view will revert to the idle screen after 15 seconds (Figure 1099).

Your badge wasn't recognized. If you got a new one recently then we'll need to update your account. Please contact staff to resolve the problem.

Figure 1099 Kiosk badge error

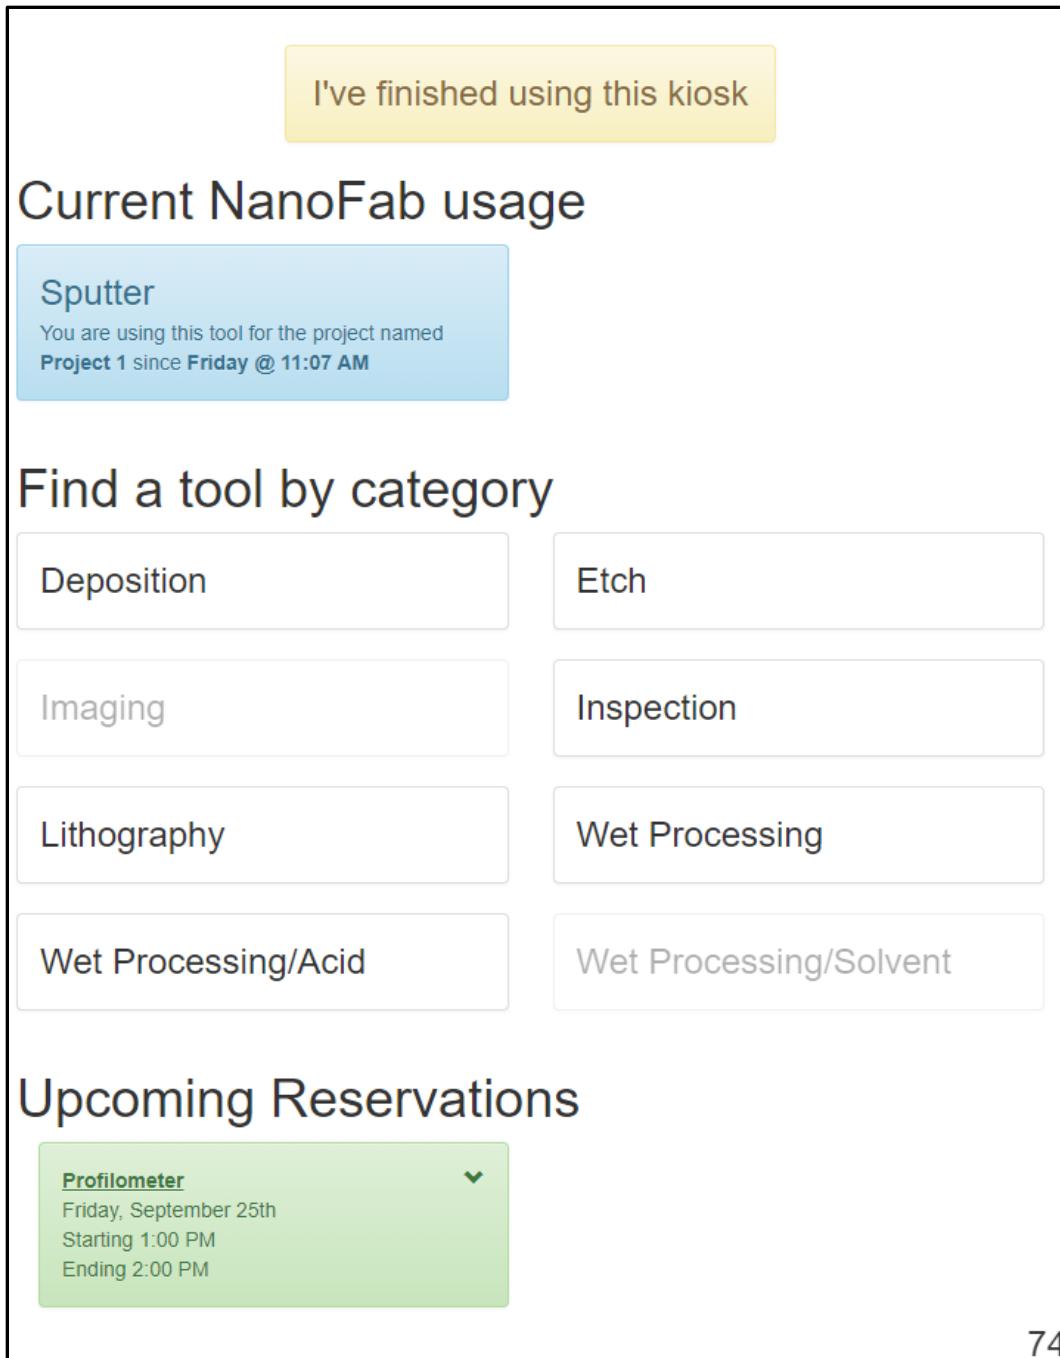

- If there is a problem with user permissions, a message will be displayed, and the view will revert to the idle screen after 15 seconds (Figure 1100).

There was a problem communicating with the web server. Please visit the user office for assistance.

Figure 1100 Kiosk permission error

- Upon success, the kiosk main page will appear (Figure 1101). The page will revert to the idle screen after 75 seconds. The time remaining appears in the bottom right side of the screen. Anytime user input occurs, the timer is reset to 75 seconds.

74

Figure 1101 Kiosk main page

- Click the I've finished using the kiosk button to end the kiosk session (Figure 1102). If no activity is detected in 75 seconds, the view will revert to the idle screen.

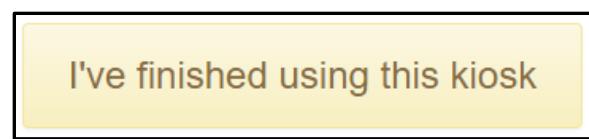

Figure 1102 Kiosk finished button

- Current usage is displayed at the top of the screen (Figure 1103). Click the tool usage of interest to open that tools detail page.

Current NanoFab usage

Sputter

You are using this tool for the project named
Project 1 since Friday @ 11:07 AM

Figure 1103 Kiosk current usage

- Tool can be accessed by clicking the category (Figure 1104). Categories that are in grey mean the user does not have any qualifications on tools in that category. Clicking a category will open the tool selection page for the tool category.

Find a tool by category

Tuesday, August 3rd
Starting 10:00 AM
Ending 11:00 AM

Created by Mathieu Rampant (mrampant) on Monday, August 2nd, 2021 @ 10:28 AM

[Cancel this reservation](#)

Figure 1105 Kiosk reservations

45.2.2 Tool selection

- Clicking a tool category on the main page will open the tool selection page for the selected category (Figure 1106).
 - Icons are displayed next to each tool to provide status information. [Tool status icons](#) are described on page 83.
 - Click the tool button to open the tool detail page for the selected tool.
 - Click the ‘Go back’ button to return to the main page.
 - The page will revert to the idle screen after 60 seconds of no activity.

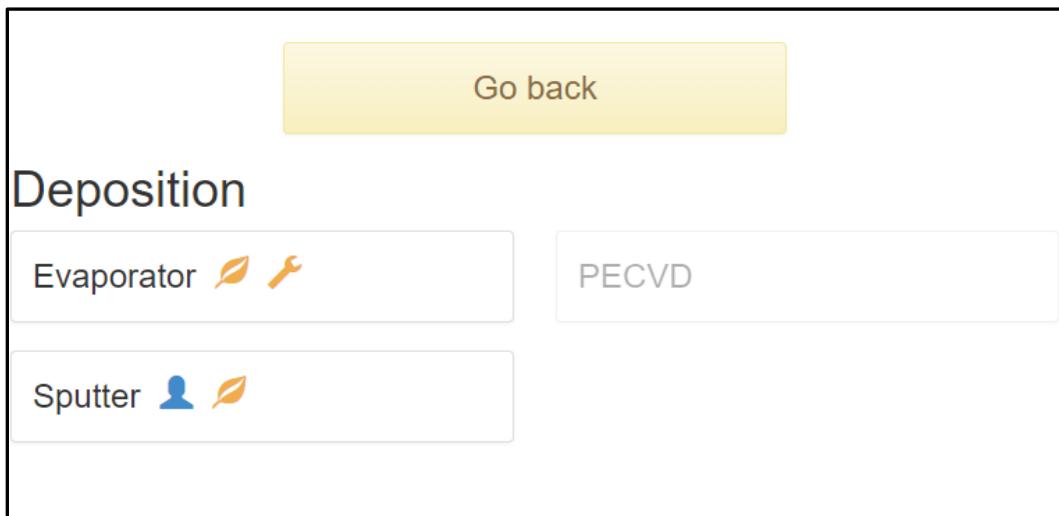

Figure 1106 Kiosk tool selection

45.2.3 Tool detail

- Tool usage features are the same as the mobile view tool control features and are detailed in the [tool control section](#) starting on page 126.
- Tool reservation features are the same as the mobile view reservation features and are detailed in the [reservations section](#) starting on page 74.
- The tool detail page provides the tool status and buttons to use the tool and to reserve the tool (Figure 1107).

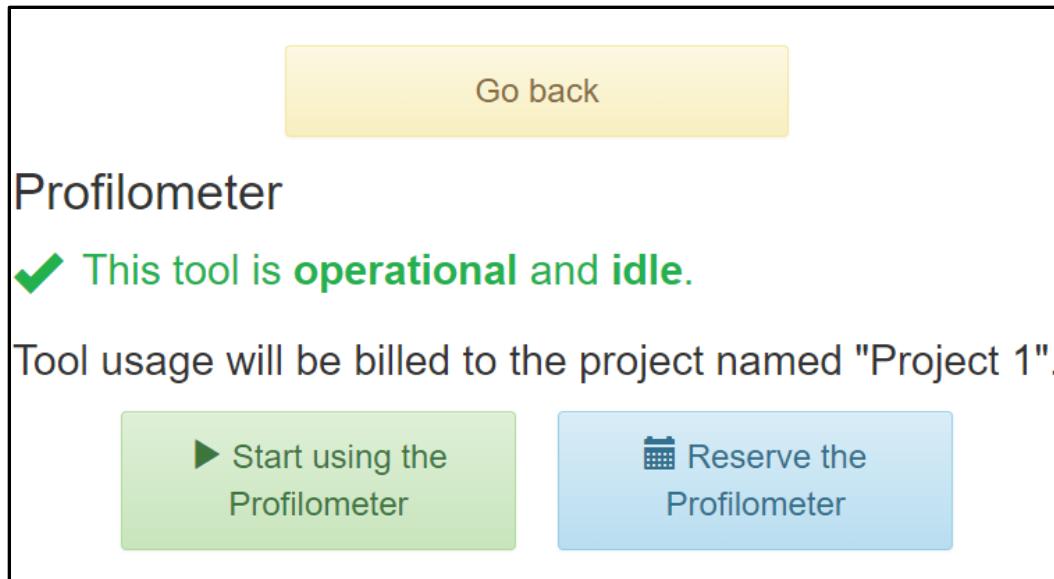

Figure 1107 Kiosk tool detail idle tool

- If a tool is currently in use, usage information, a stop usage button, and a make reservation button are provided (Figure 1108).

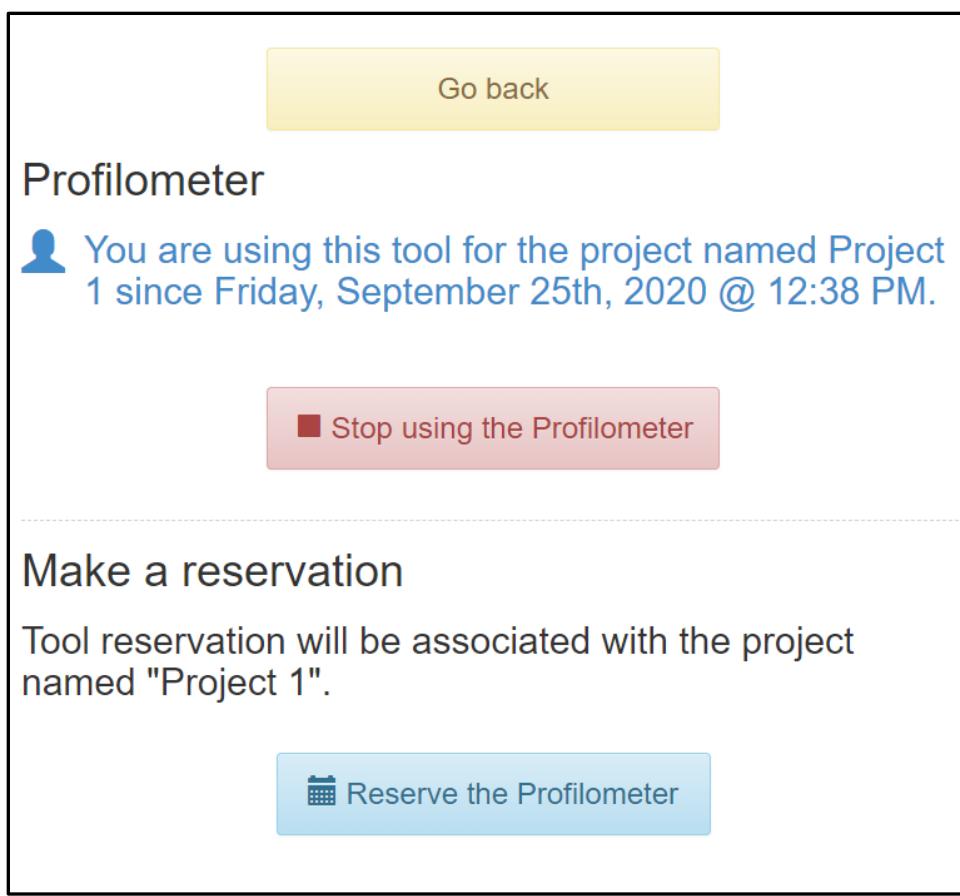

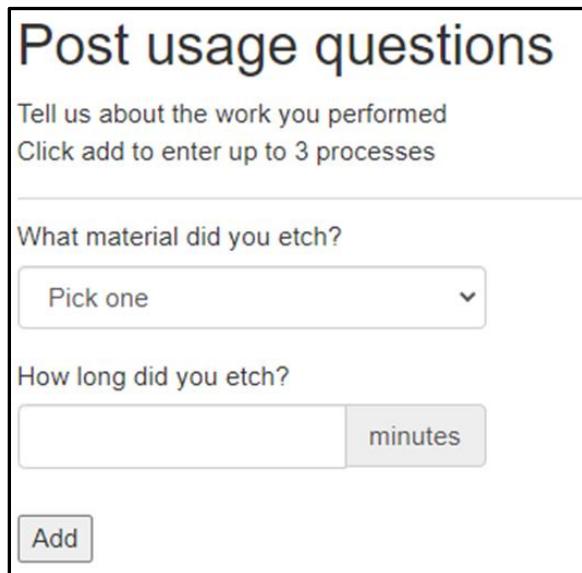

Figure 1108 Kiosk tool detail tool in use

- If the tool has numeric input post usage questions configured (Figure 1109), clicking in the dialog box will open a keypad for the user to enter the response (Figure 1110).

The dialog box is titled "Post usage questions". It contains the text "Tell us about the work you performed" and "Click add to enter up to 3 processes". Below this, there are two questions: "What material did you etch?" with a dropdown menu labeled "Pick one", and "How long did you etch?" with a text input field followed by a unit selector "minutes". At the bottom is a "Add" button.

Figure 1109 Kiosk post usage questions

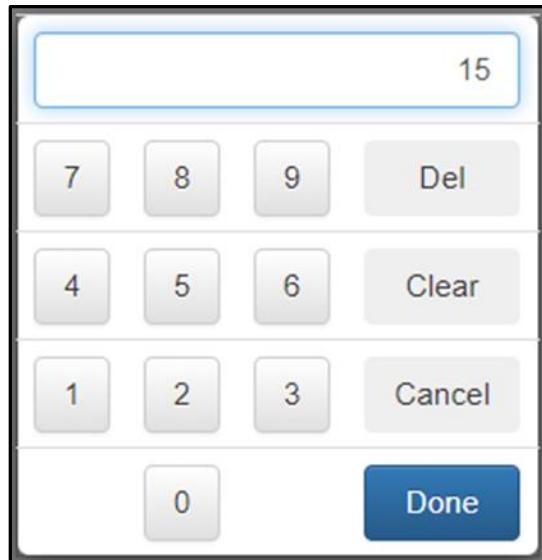

Figure 1110 Kiosk post usage question and delayed logout numeric input keypad

- If the tool has delayed logout configured, clicking in the dialog box will open a keypad for the user to enter the delay time to prevent other users login (Figure 1111).

Delayed logoff

Use the following field to prevent others from using the tool for minutes after disabling the tool. [What's this?](#)

Figure 1111 Kiosk delayed logout dialog

- If a user clicks on a tool they are not qualified to use, information about how to get trained is provided (Figure 1112).

Figure 1112 Kiosk tool detail not qualified for tool

46 Entrance tablet

The entrance tablets are used to provide an interface for users to access the lab and choose the appropriate project to bill lab time against. Entrance tablets are associated with door that have been defined in the doors table of the database. This method allows multiple entrance and exit tablets to be associated with one area but multiple doors and locks. Tablets or computers can be configured to allow users to sign into an area and open the door (entrance tablet) as well as sign them out when they leave (exit tablet).

46.1 Setup

To enable this feature, you need to have ‘NEMO.apps.area_access in INSTALLED_APPS in your settings.py.

The use of an entrance or exit tablet requires a door that is tied to an interlock that will unlock a door and an entrance tablet configured to interface with NEMO and send the appropriate messages.

46.1.1 Door setup

Doors are setup in the [doors table](#) of the database detailed on page 425. The doors table associates areas with interlocks.

[Physical access levels](#) must be established to provide users with a time schedule that they can access a door and are detailed on page 448. Users are given physical access level permission on the users page.

Areas are created in the [areas table](#) of the database detailed on page 384 and are used to group tools into common spaces. When a tool is located in an area, the requires area access field in the tools table for the tool of interest should be updated to require the active area access. This will prevent users enabling or disabling the tool unless they are currently logged into the area.

Interlocks are created in the [interlocks table](#) detailed on page 436. An interlock must be associated with an interlock card which are created in the interlocks card table.

46.1.2 Entrance tablet user

A dedicated user should be setup for entrance tablets. That user must have the following permissions which are set in the users table of the database:

- NEMO|area access record|Can add area access record
- NEMO|area access record|Can change area access record

46.1.3 Card reader

The entrance tablet uses a badge reader to identify the user. Usually an identity card that users of the facility already have can be utilized, but there are also tokens that can be used. NEMO defaults to expecting the F2 character to start recording the badge number and another F2 character to end and submit the badge number similar to what is provided by a pcProx Plus card

reader (Figure 1113). NIST does not endorse this product but the information is provided as an example of the type of reader that can be used.

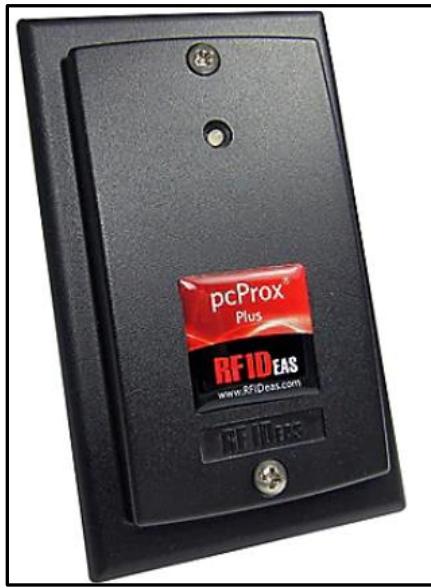

Figure 1113 Entrance tablet card reader example

If your card reader uses different characters, a custom badge reader configuration can be setup in the [badge reader table](#) detailed starting on page 389.

Once the card reader is setup, it can be tested by opening notepad or other computer text editor software then scan a badge. A serial number should be seen (Figure 1114).

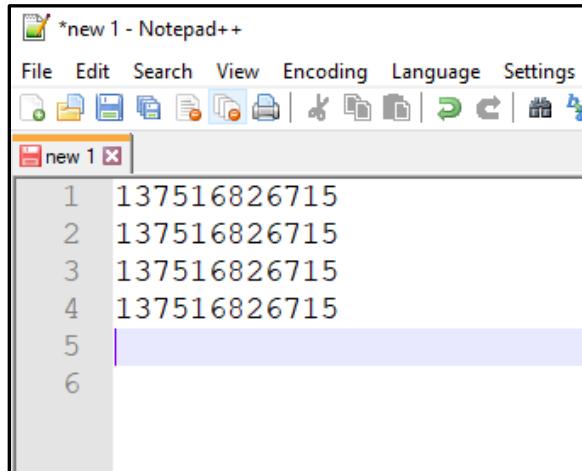

Figure 1114 Entrance tablet card reader test example

46.1.4 User setup

Now that the door and card reader are setup, each user needs to have their badge number entered into their user profile and be given permission to access the door. This is easily accomplished by

setting up a card reader on a computer that has access to NEMO by a staff member. Then follow these steps:

- Navigate to the Administration → Users page (Figure 1115)

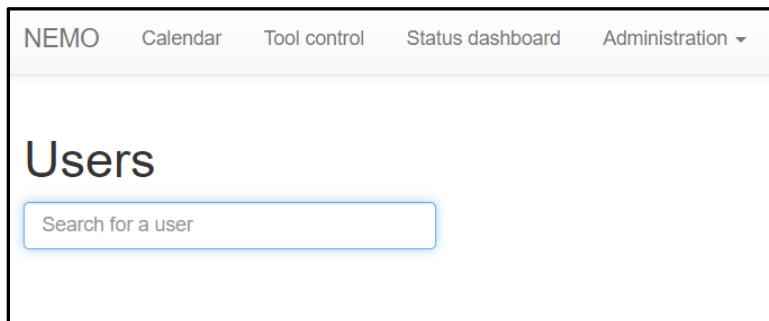

Figure 1115 Entrance tablet card reader users page

- Enter the user name of interest and click their name when it appears or create a new user if needed (Figure 1116).

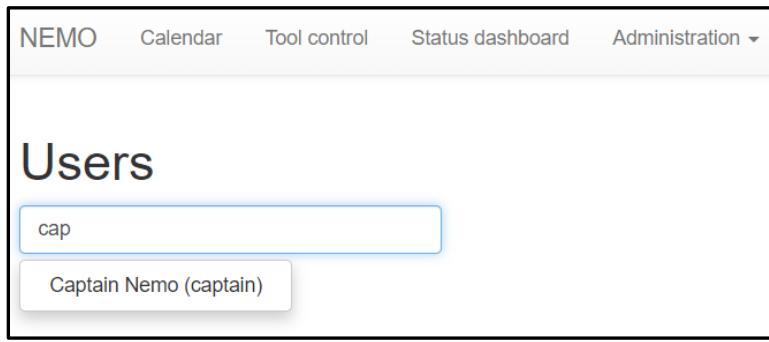

Figure 1116 Entrance tablet user name

- Scroll down and update the physical access level for the user (Figure 1117). Note: staff and super users may already have access by default if the physical access level was set up to allow staff access. In that case, the checkboxes will be checked but greyed out.

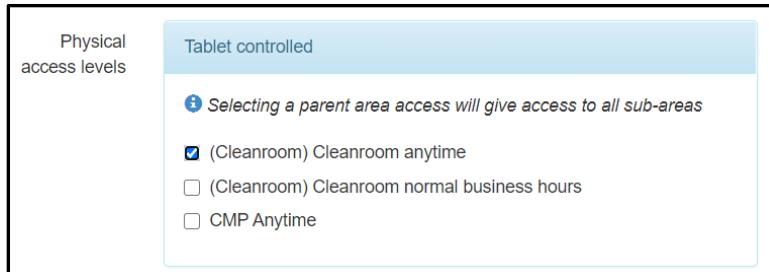

Figure 1117 Entrance tablet physical access

- Click in the badge number dialog box and ensure there are no characters already entered (Figure 1118).

- An update successful message will appear at the top of the users page (Figure 1120).

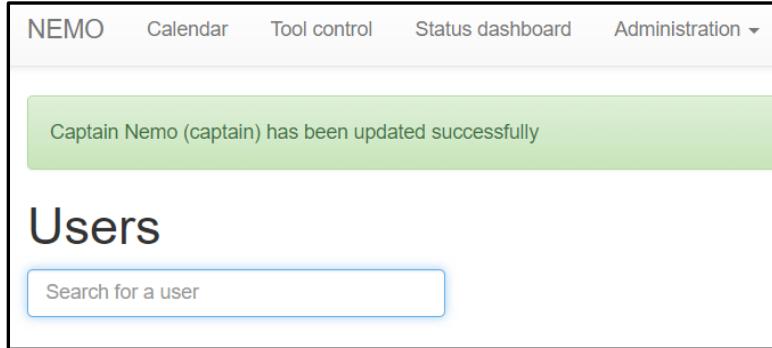

Figure 1120 Entrance tablet update success

- Once the entrance tablet is confirmed to be operational, repeat the badge update for all users.

46.1.5 Web page

The webpage URL for each door is listed on the doors summary page (Figure 1121).

Home > Nemo > Doors					
Select door to change					
Action:	-----	Go	0 of 1 selected	ADD DOOR +	
<input type="checkbox"/>	NAME	AREA	INTERLOCK	URL	ID
<input type="checkbox"/>	Lab Entrance	Cleanroom	3ch Raspberry Pi Interlock: relay3, channel 3	/welcome_screen/1/	1
1 door					

Figure 1121 Doors summary page

- Entrance URL – site-address/welcome_screen/{doors_ID}/
- Exit URL – site-address/farewell_screen/{doors_ID}/

In addition, the current occupants of the area can be displayed on the idle tablet by including the occupancy parameter and providing the case sensitive area name.

- Entrance URL with occupancy – site-address/welcome_screen/{doors_ID}/?occupancy=Cleanroom
- Exit URL – site-address/farewell_screen/{doors_ID}/?occupancy=Cleanroom

46.2 Usage

46.2.1 Entrance Tablet

- When idle, the entrance tablet will display the welcome message that was set in the area table for the area the entrance leads to (Figure 1122).

Figure 1122 Entrance tablet welcome screen

- If the occupancy parameter is set for the area (e.g. site-address/welcome_screen/1/?occupancy=Cleanroom), occupancy will be displayed as well (Figure 1123).

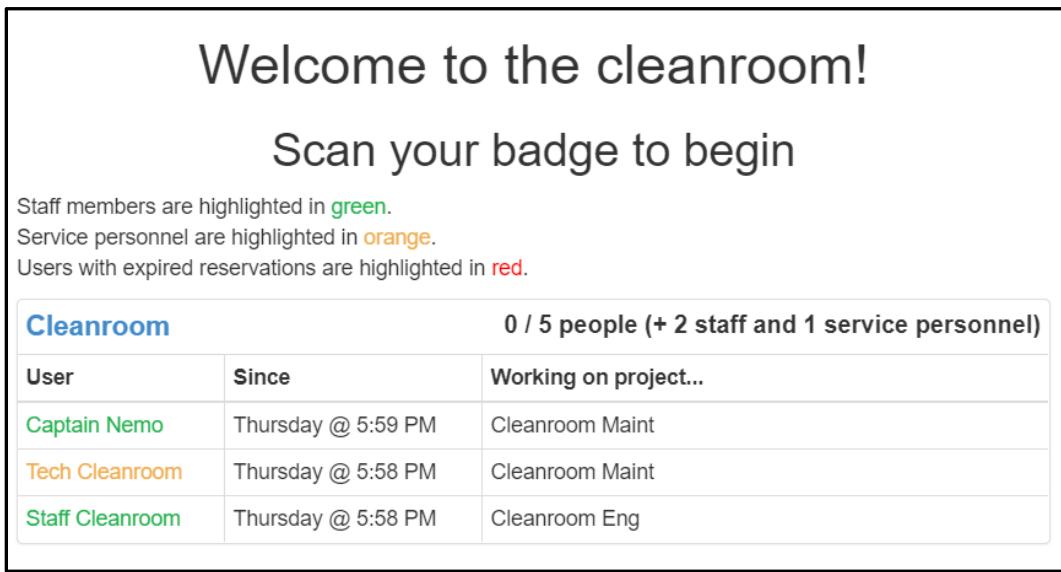

Figure 1123 Entrance tablet welcome screen with area occupancy

- Scan your badge at the card reader to begin the login process. NOTE: after a badge scan if the user is prompted for additional information and does not respond the page will automatically return to the welcome screen. Wait times vary and are detailed with each prompt below.

- Each time a badge is scanned, the badge number is displayed on the screen greyed out (Figure 1124). This is useful when determining why a user's badge isn't opening a door.

137516826715, sent

Figure 1124 Entrance tablet badge scan

- If you have multiple projects, a dialog to select your project will appear (Figure 1125). Select the project to be billed or select 'Nevermind, don't log in' to return to the welcome screen. If no input is provided within 30 seconds, the page will return to the welcome screen.

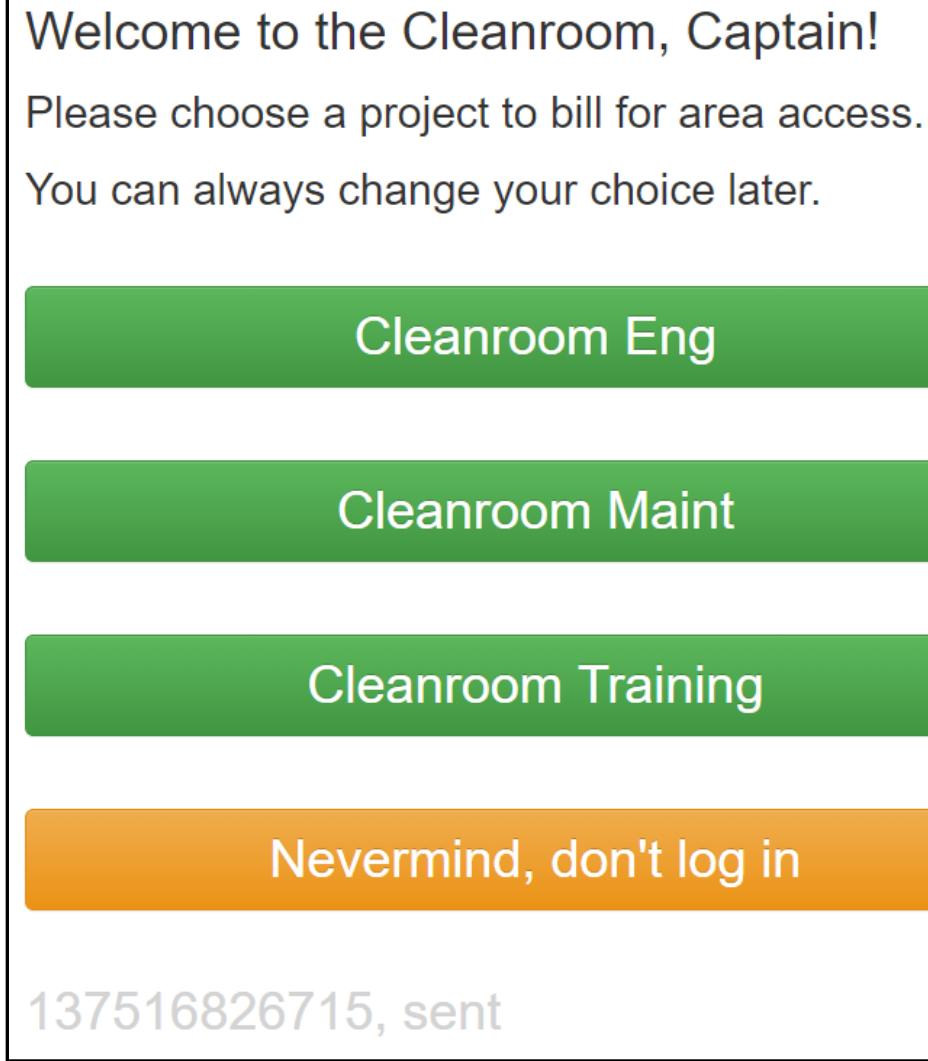

Figure 1125 Entrance tablet multiple projects

- If you are already logged in to the area, a dialog with a list of possible actions is displayed (Figure 1126). Select the action to take. If no input is provided within 15 seconds, the page will return to the welcome screen.

According to our records, you're already logged into the Cleanroom under the project named Cleanroom Maint.

Please visit the NanoFab staff if you believe this is an error.

What would you like to do?

Do nothing and keep me logged in

Open the door and keep me logged in

Log out of the Cleanroom

- Selecting ‘Do nothing and keep me logged in’ will return to the welcome screen.
- Selecting ‘Open the door and keep me logged in’ will display a door unlocked dialog (Figure 1127) and unlock the door for 8 seconds then return to the welcome screen.

The door is open.
137516826715, sent

Figure 1127 Entrance tablet door open

- Selecting ‘Log out of the Cleanroom’ will end your area access. Note: additional screens displayed are detailed in the Exit tablet section below.
- If an error occurs a dialog will appear informing the user of the issue. Log in errors are described in section 46.2.2 below.
- Upon success, the user will be logged into the area, a record will be recorded in the area access records table, a record will be recorded in the physical access logs table, and the door will open for 8 seconds. A success message will be displayed while the door is unlocked then revert to the welcome screen (Figure 1128).

You're logged in to the Cleanroom, Captain.
The door is open.
Access time is being charged to the project named
Cleanroom Maint.

46.2.2 Log in errors

If an error occurs a dialog will appear informing the user of the issue. Errors will be displayed for 15 seconds then the page will revert to the welcome screen.

- Physical access denied.
 - The area requires a reservation, and the user does not have one (Figure 1130). Requiring reservations to access an area are set in the [areas table](#) detailed on page 384.

Figure 1130 Entrance tablet reservation error

- The area occupancy limit has been reached (Figure 1131). Occupancy limits are set in the [areas table](#) detailed on page 384.

Figure 1131 Entrance tablet occupancy error

- No physical access levels have been granted to the user (Figure 1132). Physical access level permissions are set in the [users page](#) detailed on page 293 or the [users table](#) detailed on page 542.

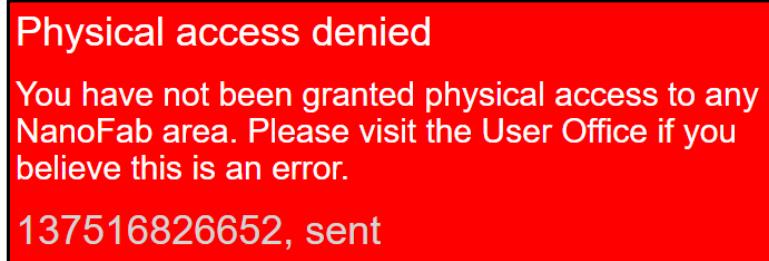

Figure 1132 Entrance tablet access level error

- Access has expired (Figure 1133). Access expiration dates are set in the [users page](#) detailed on page 293 or the [users table](#) detailed on page 542.

Physical access denied

47 Configuring NEMO

47.1 Configuring NEMO Settings

NEMO settings are maintained in the settings.py file. Additional information about the settings is available on the NEMO GitHub wiki page at <https://github.com/usnistgov/NEMO/wiki/Settings>.

47.1.1 Authentication Backends

The AUTHENTICATION_BACKENDS key is used to select the between a decoupled “REMOTE_USER” method such as Kerberos from a reverse proxy and LDAP authentication from NEMO itself.

47.1.2 Templates

The context processors in the templates section of settings.py determines if the logout button is displayed or not. Uncomment the desired processor.

- 'NEMO.context_processors.hide_logout_button', will hide the logout button on the navigation bar.
- 'NEMO.context_processors.show_logout_button', will show the logout button on the navigation bar.

47.2 Identity service

The identity service can be used to connect to external resources such as billing systems or access control systems. The identity service requires the user to create an intermediary service to act as a go between for NEMO and the service.

47.3 NEMO Timed Services

A few features require periodically polling NEMO to trigger events which can be done in two ways, by web request or management command.

47.3.1 Web request

The user that connects must have the ‘NEMO|user|Can trigger timed services’ permission or the connection will be refused. Make a GET request to trigger the service.

- Email usage reminders – typically runs every hour, site-address/email_usage_reminders/
- Reservation reminders – typically runs every 15 minutes, site-address/email_reservation_reminders/
- Reservation ending reminders – typically runs every 15 minutes, site-address/email_reservation-ending_reminders
- Missed reservations – runs every minute, site-address/cancel_unused_reservations/
- Out of time – runs every minute, site-address/email_out_of_time_reservation_notification/
- Weekend access – runs every hour, site-address/email_weekend_access_notification/

- Automatic alert creation for closures – typically runs every day, site-address/create_closure_alerts/
- Sensor data management – runs every minute, site-address/manage_sensor_data/
- Tool qualification management – runs every day, site-address/manage_tool_qualifications/
- Access expiration reminders – runs every day, site-address/email_user_access_expiration_reminders/
- Recurring charges management – runs every day, site-address/manage_recurring_charges/

47.3.2 Management command

Management commands can be run directly on the NEMO server and eliminate the authentication and http overhead. Run the required service using “`python manage.py service-name`” or “`django-admin service-name`”.

- Email usage reminders – typically runs every hour, `send_email_usage_reminders`
- Reservation reminders – typically runs every 15 minutes, `send_email_reservation_reminders`
- Reservation ending reminders – typically runs every 15 minutes, `send_email_reservation-ending_reminders`
- Missed reservations – runs every minute, `cancel_unused_reservations`
- Out of time – runs every minute, `send_email_out_of_time_reservation_notification`
- Weekend access – runs every hour, `send_email_weekend_access_notification`
- Automatic alert creation for closures – typically runs every day, `create_closure_alerts`
- Sensor data management – runs every minute, `manage_sensor_data`
- Tool qualification management – runs every day, `manage_tool_qualifications`
- Access expiration reminders – runs every day, `send_email_user_access_expiration_reminders`
- Recurring charges management – runs every day, `manage_recurring_charges`

For example, to process missed reservations, run: “`python manage.py cancel_unused_reservations`” or “`django-admin cancel_unused_reservations`”

47.3.3 Systemd tasks

Examples of systemd tasks for each of the timed services is available in the [resources/systemd](#) folder. The scripts make use of the docker command and assume the container running nemo is named “nemo”. Feel free to adapt those to your specific needs.

47.4 Email logging

All emails sent by NEMO are logged for audit purposes and accessible in [Detailed administration → Email logs](#). If you are a developer, make sure to use the `send_email` function available in `utilities.py` to benefit from this feature.

48 NEMO Release notes

48.1 [Release 4.4.0](#)

48.1.1 Upgrade notes

Support for Python 3.7 has been dropped. Python 3.8 or newer is now required:

- If you are using the docker image, it will be automatically taken care of.
- If you are installing NEMO using pip, you will need to update your version of python, as well as your start/stop services to point to gunicorn from python 3.8

48.1.2 New features

- Added **Safety** as a new main menu item. Safety issues and Safety data sheets have been moved under this new section to provide a main Safety "hub" in NEMO.
- Added Safety items:
 - It is a customizable list of Safety bullet points, consisting of a name, a description and (optionally) a list of documents.
 - Safety items can be grouped in Safety categories.
 - PDF and Video documents (.mp4, .ogv, .webm, .3gp) can be opened directly in NEMO (popup)
 - All other types of documents will take the users to the link/download the file.
 - Users can search through Safety items name and descriptions.
- In Customization -> Safety, the Safety menu item can be hidden, as well as the Safety suggestions and SDS. Safety categories can be organized as flat/collapsible items all in one page, or as separate side sub-menu items.

48.1.3 Improvements

- Added update of os packages when building NEMO docker images, to guarantee the latest security patches and updates are installed.
- Allowing user office members to force a user out of a tool.

48.1.4 Bug fixes

- Fixed an issue on Chrome (Windows only) and Safari when clicking the back button after a spinner was shown would keep that spinner on indefinitely.

48.1.5 Libraries

- gunicorn 19.9.0 -> 20.1.0
- cryptography 38.0.4 -> 39.0.0
- Pillow 9.3.0 -> 9.4.0
- pymodbus 2.5.3 -> 3.1.1
- pytz 2022.6 -> 2022.7.1
- requests 2.28.1 -> 2.28.2

48.2 Release 4.3.0

48.2.1 Upgrade notes

- New User Office and Accounting Officer roles have been added. They allow a greater level of granularity in NEMO. Consequently, Staff users won't be able to edit user information or see the billing information for other users by default. To give a user any of the new roles, go to Detailed Administration -> Users select the user and check the User office or Accounting officer checkbox and uncheck the Staff box. More information can be found in the feature manual.
- A cron job for access expiration email reminders needs to be enabled for the feature to work. A systemd version for docker is available in the systemd folder.
- A cron job for managing tool qualifications needs to be enabled for the feature to work. A systemd version for docker is available in the systemd folder.
- A cron job for managing recurring charges needs to be enabled for the feature to work. A systemd version for docker is available in the systemd folder.

48.2.2 New features

- Added recurring consumable charges, which allows charging users for the same consumable at a given frequency. For example, charging user for renting user bins every year.
- Recurring charges can be exported (including potential errors)
- The quantity can be forced to a certain number in customization (for example when it should only and always be just one)
- The recurring charges can be locked so non facility managers can only assign them to user and not change the frequency or linked consumable.
- A consumable category can be set in customization to limit recurring charges to only consumables belonging to that category.
- Validating customers (inactive, access expired, etc.) can be deactivated for recurring charges in customizations.
- Users can set email reminders for their recurring charges in User preferences.
- Added Tool qualification expiration to remove tool qualification from users after a certain number of days. It needs to be enabled in Customization -> User. An example of the email template can be found here. There are 2 separate cases that can be customized:
- Number of days since the user last used a tool. For example, remove tools from the user qualifications if they have not used it for 6 months.
- Number of days without using a tool since the user was trained on that tool. For example, remove tools from the user qualifications if they haven't used it in the 2 weeks after being trained on it.
- Added Access expiration reminder email to remind users a certain number of days before their access expires. It needs to be enabled in Customization -> User. An example of the email template can be found here.
- Added an optional EMAIL_USE_DEFAULT_AND_REPLY_TO option in settings.py to use the default server email for all communication and setting the reply-to of the email to the actual sender. This option is helpful when using an email server that doesn't allow spoofing (for example a unique Gmail address).

- Added an optional USERNAME_REGEX option in settings.py to validate usernames.
- Added an optional MAIN_URL option in settings.py. This is useful when running multiple instances of NEMO, so all email links are sent to the same URL.
- Added audit log library that can be customized to track any changes in NEMO. See setup instructions on the wiki.
- Added a few contributions from Cornell NanoScale Facility:
- Added Discipline, a new configurable category that can be set on projects and users (Chemistry, Electronics etc.).
- Added Safety trainings, a new configurable list of trainings that can be checked/unchecked for each user.
- Added Onboarding phases, a new configurable list of items that can be checked/unchecked for each user.
- Added user and project document upload, which can be enabled in Customization -> Application and Customization -> Projects & accounts.

48.2.3 Improvements

- Added unit_id for interlocks using Modbus and added last reply time.
- Added tooltips with tool information in the status dashboard page.
- All email templates can now use global variables like site_title, facility_name etc.
- Updated autocomplete to be either synchronous or asynchronous, the latter considerably speeding load time of pages like "Users".
- The user search bar is now available when viewing/modifying users to facilitate switching between them.
- Consumables can now be reusable which will prevent the quantity from ever decreasing when withdrawals are made.
- Added customization in Customization -> User to hide inactive user in the users page and made the modify user page go back to previous pagination page upon success. Thanks USC Nanofab for the contributions!
- Added customization in Customization -> Project & accounts to hide inactive accounts, inactive projects, and to collapse the project list by default. Thanks Polytechnique Montréal - LMF for the contributions!
- Added a way to change the calendar time format in Customization -> Calendar.
- Updated buttons in the entire application to have a consistent color and icon for same functionality.
- Optimized Safety Data Sheets page and added sorting by Hazard.
- Users now have the option to opt out from some of the email notifications in User preferences.
- Added Safety Data Sheets CSV export.
- Made pagination number of results per page sticky when navigating away and back. Also added an "all" option.
- Broadcast email feature now allows selecting multiple tools/areas/projects/accounts.

48.2.4 Bug fixes

- Fixed delayed docker container removal when stopping NEMO. Thanks @r-xyz for the contribution!

48.2.5 Libraries

- added django-audit-log 2.2.1
- added pytz 2022.6
- cryptography 37.0.4 -> 38.0.4
- django 3.2.15 -> 3.2.16 (vulnerability)
- django-auditlog 2.2.0 -> 2.2.1
- django-mptt 0.13.4 -> 0.14.0
- djangorestframework 3.13.1 -> 3.14.0
- drf-excel 2.1.0 -> 2.2.0
- Pillow 9.2.0 -> 9.3.0

48.3 [Release 4.2.0](#)

48.3.1 New features

- Added Safety data sheets:
 - ChemicalHazard (flammable, toxic, etc.) and Chemical objects should be added in the Detailed administration
 - Chemical document can be either uploaded to NEMO or set with a URL
 - Common hazard icons are available [in the resources folder](#)
 - Keywords/synonyms can be set for a Chemical and search through in the Safety data sheet page
 - There is no direct link in the navigation bar. A Landing page choice option needs to be added for this with url /safety_data_sheets/. An SDS icon is available for download [in the resources folder](#)
- Added a button in the calendar to only display qualified tools for non-staff users. This feature is disabled by default and needs to be activated in the Customization page.
Thx [@pdessauw](#) and NIST MML for the contribution!

48.3.2 Improvements

- Updated style of Rate table in Tool control. The table is collapsed by default and can be expanded by default by checking the box in Customization -> Rates
- Added LDAP "username_format" property to allow for custom formatting of the username
- Checks during login are now case insensitive for username
- Added Staff absence note which will only be visible to facility managers
- Non-working days will not be shown as absence on the facility manager view of staff status
- Updated display of comments in Tool control to keep new lines

48.3.3 Bug fixes

- Fixed a bug preventing rates from being loaded at startup
- Fixed a bug when running migrate of makemigrations before database is initialized
- Fixed a bug when authentication fails and is not sending to the correct page due to not allowing POST
- Fixed interlock configuration not accepting 0 as coil number
- Fixed an issue where all tools would disappear when expanding/collapsing categories and switching from Calendar to Tool control
- Fixed a ClosureTime warning on the staff status page
- Fixed validation for reservation questions not being updated when adding/removing a group question

48.3.4 Libraries

- Django 3.2.13 -> 3.2.15 (vulnerability)
- drf-flex-fields 0.9.8 -> 1.0.0
- cryptography 37.0.2 -> 37.0.4
- django-filter 21.1 -> 22.1
- requests 2.27.1 -> 2.28.1
- Pillow 9.1.1 -> 9.2.0

48.4 [Release 4.1.0](#)

48.4.1 Upgrade notes

To enable the new sensor data plugin:

- Add 'NEMO.apps.sensors' to INSTALLED_APPS in your settings.py
- Add a cron job to run every minute, either calling docker exec -it nemo django-admin manage_sensor_data or sending an http request to /manage_sensor_data

48.4.2 Live demo!

A live splash pad demo is now available at <https://nemo.nist.gov/demo>.

You can find the instructions on how to use it at <https://github.com/usnistgov/NEMO#online-demo>

48.4.3 New features

- Added Sensor data plugin for temperature, humidity, gases etc.:
 - Sensor cards can be created in a similar way to the interlock cards. Currently only Modbus TCP connection is available for sensors.
 - Sensors can be added to a sensor card as well as Sensor categories to organize all the sensors.
 - Sensor data can be displayed as a graph with different date ranges and data can be exported in csv file for further processing.
 - Sensor email alerts can be set with a trigger condition or when no data is read for a sensor.

- The sensor dashboard will display sensor or categories as red when an alert has been triggered.
- Split customization settings into tabs for better readability and refactored it in a way that plugins can now add their own.
- Added option to make training required flag for new users optional (in customizations page).
- Added alternate email in user preferences (gear icon on top right corner in NEMO) as well as flags to decide which NEMO emails should be sent to the alternate email address.

48.4.4 Improvements

- Added landing page option flag to hide item from staff (visible to facility managers and admin only)
- Added minified version of most Javascript libraries to improve page load time
- Date pickers will now follow the format set for DATETIME_INPUT_FORMAT, DATE_INPUT_FORMAT and TIME_INPUT_FORMAT for better consistency throughout the application. Remove Bootstrap datepicker in favor of more versatile datetimepicker.
- Added red border on required reservation and post usage questions, and on failed validation to better spot where the error is. Updated validation checks to happen on any input rather than only on required ones.
- Added new REST_FRAMEWORK API permission: 'NEMO.permissions.DjangoModelPermissions' that allows for more granular permissions. With this permission class, users need view permission on individual models (UsageEvent, Project, Account etc.) to be able to access the data in the REST API. The only exception is for accessing billing data, which requires the special use_billing_api permission to access since no models are directly associated with billing.

48.4.5 Bug fixes

- Fixed issue where staff status calendar was not respecting the closure staff_absent flag (always showing closure rather than only when flag is set)
- Fixed "Cancel outage" button not showing anymore
- Users should be logged in to access any media files. Thanks @r-xyz for reporting and fixing this!
- Fixed a chicken-and-egg situation when migrating or creating migrations

48.4.6 Libraries

- Django 3.2.12 -> 3.2.13 (vulnerability)
- Moment 2.10.2 -> 2.29.3
- cryptography 36.0.2 -> 37.0.2
- Pillow 9.1.0 -> 9.1.1 (vulnerability)

48.5 Release 4.0.0

48.5.1 Upgrade notes

- In settings.py:
 - Set DEFAULT_AUTO_FIELD = 'django.db.models.AutoField'
 - In REST_FRAMEWORK -> DEFAULT_RENDERER_CLASSES replace renderer 'drf_renderer_xlsx.renderers.XLSXRenderer' by 'drf_excel.renderers.XLSXRenderer'
 - If using postgres database, replace database engine django.db.backends.postgresql_psycopg2 by django.db.backends.postgresql
- Some web browsers will cache old CSS/Javascript from detailed administration. If you are having issues (blank screens) in the admin section, try Ctrl + Shift + R or Ctrl + F5 to force a refresh or clear your browser's cache

48.5.2 Improvements

- Closure alert preview and validation were added to catch potential issues before the automatic alert is created.
- Closure on staff status calendar will now display the alert content if one is set.
- Added interlock card enabled field on interlock view in detailed administration.

48.5.3 Interlock Modbus support

- Support for Modbus over TCP was added to provide greater flexibility and support more interlock types.

48.5.4 Libraries

- Django 2.2 -> 3.2.17
- drf_renderer_xlsx 0.4.5 -> drf_excel 2.1.0
- cryptography 36.0.1 -> 36.0.2
- Pillow 9.0.1 -> 9.1.0
- drf-flex-fields 0.9.7 -> 0.9.8
- Added pymodbus 2.5.3 as new dependency

48.6 Release 3.16.0

48.6.1 New features

- Added export of email addresses on broadcast email page. For use outside of NEMO.
- Added option to send broadcast email using the users default email client. This only works when the list of emails is less than 2000 characters total due to limitations of the MAILTO feature. Use the export function to get around it.

48.6.2 Improvements

- Tool configurations can now be enabled/disabled for more flexibility.
- Added day view option for staff status page which is also the new default view.

- Added settings in customizations to control whether users and or staff members can look at past/future staff availability and what view choices users can have (day/week/month) for more privacy control.
- Added separate Staff availability categories to allow more flexibility in ordering staff in the staff status page.
- Added user preference so users can choose their default staff status view.

48.6.3 Bug fixes

- Fixed a bug with tool usage counter throwing an error when being updated from post usage questions. Thanks [@cnf-clark](#) for reporting it!

48.6.4 Libraries

- Pillow 9.0.0 -> Pillow 9.0.1

48.7 [Release 3.15.0](#)

48.7.1 Upgrade Notes

- For the new automatic alert creation for Closures and reminder emails on last occurrence to work, a daily cron job must be added, calling either docker exec -it nemo django-admin create_closure_alerts or by sending an http request to /create_closure_alerts

48.7.2 New features

- Added Staff status, a new feature on the status dashboard displaying whether staff are in/out:
 - Leave type can be customized (sick leave, annual leave, parental leave etc.)
 - Staff working days and typical hours can be set, as well as staff categories (second shift, user office etc.)
 - Only facility managers can add/edit staff absences and see the details (sick leave, annual leave etc.)
 - Regular user and staff users only see in/out status
 - Facility managers can also export the calendar
 - Customizations available: show/hide weekends, display staff status only to other staff members, start week on Sunday/Monday
 - Week/Month view
- Renamed PhysicalAccessException to Closure and massively updated the feature:
 - A closure can now have multiple dates (to set Labor day for multiple years in advance for example)
 - A closure can trigger an automatic alert a certain number of days prior to the closure. (5 days before Labor day for example, informing users that buddy system will be in place etc.)
 - Staff can be marked as absent in the Staff status page during a closure (optional)
 - A reminder email can be sent on the last occurrence of a closure reminding facility managers to add more if needed. (In case you set Labor day 5 years in advance and then forget to add more dates)

48.7.3 Bug fixes

- Fixed a bug preventing XLSX export in API
- Fixed a bug requiring the identity service to be set in settings for qualifications to work. Thanks @rmwhite85 for reporting this!
- Fixed reservation details on Mobile and Kiosk only displaying times which would make it very confusing when reservations span over multiple days. Thanks @nsieb for bringing this up!
- Fixed reservations losing their reservation questions when moving/resizing them. Fixes #104. Thanks @jat255 for reporting it!

48.7.4 Libraries

- Django 2.2.26 -> 2.2.27 (vulnerability)
- drf-renderer-xlsx 0.4.4 -> 0.4.5 (fixes broken XLSX with manytomany fields)

48.8 [Release 3.14.1](#)

48.8.1 Bug fixes

- Fixed a wrong template name used in usage event details in calendar
- Fixed another bug in custom task status. Thanks @rmwhite85 once more!
- Fixed date format issues in user creation and abuse pages

48.9 [Release 3.14.0](#)

48.9.1 Upgrade Notes

- NEMO now requires Python 3.7 since security support for 3.6 ended last month.
- The LAB_MANAGERS list in settings.py has been replaced by a permission on users called is_facility_manager. If you were using the LAB_MANAGERS setting, go to Detailed Administration -> Users and set the facility managers there after updating NEMO. Also please note that you need at least one facility manager to enable the new Access request feature.
- The qualified checkbox is now enabled by default when recording training sessions. Make sure to double check before confirming.
- The access request weekend access feature (more on this below) requires a cron job to be set hourly, calling docker exec -it nemo django-admin send_email_weekend_access_notification or sending a request to /email_weekend_access_notification

48.9.2 New Features

- Added temporary access. This allows admins to give users access for a limited time. For example, giving someone weekend cleanroom access for one weekend. It is available through in Detailed Administration only.
- Added user access requests:
 - Grouping Access Requests and Buddy Requests under one common "Requests" menu item.

- Access requests (after-hours requests) need to be enabled by checking the "allow user request" box on a "Physical Access Level" in Detailed administration and by setting at least one Facility manager.
 - Added customizations for tab title, description message, minimum number of buddies, maximum number of requests to display, and weekend access emails and cutoff day and time (more on this below)
 - Once enabled, users can submit access requests by selecting a start and end time, an access level (if multiple are enabled) and a list of buddies. Facility managers (see below) are then notified and can approve/deny the request in NEMO. Upon approval, a corresponding temporary access will be created for all users in the request.
 - The request creator and buddies will receive a confirmation email, and buddies/facility managers will have a notification badge in NEMO on the requests tab indicating there is something new.
 - Facility managers can approve/deny a request and have the opportunity to update it before approving. This allows them to change the dates, update the description etc. before approving. This is useful if for example the request can only be approved for one day due to lack of staff on the second day, etc.
 - A "weekend access" customizable email can be sent to a list of emails set in customization on the cutoff day and time set. If the email template is set, the email will be sent the within an hour of the first approved request that includes weekend time with a weekend_access value of True. If no access requests that include weekend time are approved by the cutoff day and time, the same email will be sent with a weekend_access value of false. The latter will not be sent if the cutoff day and time is not set.
- Added the facility manager role in Detailed administration -> Users to replace the LAB_MANAGERS settings. Facility managers receive all tasks related updates and approve/deny access requests.
- Added "Charge note". This is a text area field that can be set and updated after creating a Staff Charge. It will be displayed in "My usage", "Project billing" and "Remote work" pages as well as in the API.
- The project selection name can now be customized in the "Customization" page. It will use the Django templating engine, allowing the use of things like "{{ project.account.name }} - {{ project.name }}" which would display the account name followed by the project name. This is limited to project selection lists (in reservations, logging in an area, kiosk etc.)
- A standalone reservation view was added for linking from outside of NEMO, available at /event_details/reservation/<reservation_id>. Thanks @jat255 for the contribution!
- Email templates to be used in customizations were added in the resources folder. Feel free to adapt them to your needs.

48.9.3 Improvements

- Date and time formats have been made more consistent across NEMO and follow django's format from settings.py instead of being hardcoded in certain places. Make sure DATETIME_FORMAT, SHORT_DATETIME_FORMAT, DATE_FORMAT,

`SHORT_DATE_FORMAT` and `TIME_FORMAT` are set to your liking in `settings.py` otherwise Django's default will be used.

- Added an `EXPORT_DATE_FORMAT` and `EXPORT_TIME_FORMAT` to `settings.py` to allow a custom format to be used in filenames when exporting (in API, My Usage, Tool Usage Data etc.). If not set, they will default to “`m_d_Y`” and “`h_i_s`” respectively.
- Supplies/consumables withdrawals are now allowed in group post usage questions.
- Project information can now be shown and exported in "Tool Usage Data History" through a checkbox (unchecked by default).
- The qualified checkbox when recording a training session is now checked by default.
- Fixed styling issues in the Email logs feature in the detailed administration, and also updated Customization to open the content preview in a separate tab.

48.9.4 Bug fixes

- Fixed a bug dating back to 2018 in custom task status using `primary_tool_owner` instead of `primary_owner`. Thanks @rmwhite85 for noticing!
- Fixed a bug when exporting usage where it would use UTC dates in the CSV file.
- Fixed a bug when user having back-to-back reservations would have one of them marked as missed when they were in fact already logged in to the area (from the prior reservation).
- Updated the misleading message when selecting projects for reservation. It will now only mention missed reservation fees if the `missed_reservation_threshold` field is set on the tool/area and the message will mention what the threshold actually is.
- Fixed issue when billable items would not show up in API when crossing over the period. i.e. if a charge started before the end of the month and finished the next month, it would not show up. Changed the logic to show billables by end date only.

48.9.5 Libraries

- Updated Django to 2.2.26
- Updated django-filter to 21.1
- Updated djangorestframework to 3.13.1
- Updated django-mptt to 0.13.4
- Updated cryptography to 36.0.1
- Updated drf-flex-fields to 0.9.7
- Updated drf-renderer-xlsx to 0.4.4
- Updated python-dateutil to 2.8.2
- Updated ldap3 to 2.9.1
- Updated requests to 2.27.1
- Updated Pillow to 9.0.0

48.10 [Release 3.13.2](#)

48.10.1 Bug fix

- Fixed email broadcast error when sending to users having access to an area or when sending to all users

48.11 [Release 3.13.1](#)

48.11.1 Bug fix

- Fixed issue with mobile reservations breaking when the user has only one project

48.12 [Release 3.13.0](#)

48.12.1 New Features

- Added support for group questions in Reservation questions.

- Added option to send an email to all registered users.

- Rest API updates:

- Added Excel export.

To enable it, it must be added to the DEFAULT_RENDERER_CLASSES of the REST_FRAMEWORK dictionary in settings.py, like the following:

'DEFAULT_RENDERER_CLASSES':

```
['rest_framework.renderers.JSONRenderer',
 'rest_framework.renderers.BrowsableAPIRenderer',
 'drf_renderer_xlsx.renderers.XLSXRenderer'],
```

- Added billing to the browsable API page.

- Added link to the API in the Administration menu. Only visible for admins.

48.12.2 Bug fix

- Fixed an issue where sorting tools by name in the detailed admin section would break.
- Fixed multi email field validation issue where rendering would break when there was a validation issue.
- Fixed multiple issues with reservation calendar invite in Outlook where the organizer cannot be the attendee. The organizer can now be set in settings.py using RESERVATION_ORGANIZER_EMAIL and RESERVATION_ORGANIZER for the email and the name of the organizer, respectively. see the settings page for details.
- Made Customizations page only accessible to admins.

48.12.3 Library updates

- Updated drf-flex-fields to 0.9.3
- Updated Pillow to 8.3.2

48.13 [Release 3.12.2](#)

48.13.1 Bug fix

- Fixed issue with badge number not working on area access pages (already logged in and choose project pages) and kiosk “Go back” button.

48.14 [Release 3.12.1](#)

48.14.1 Bug fix

- Fixed issue with badge number not working in area access if they start with 0 or have letter in it.

48.15 [Release 3.12.0](#)

48.15.1 New Features

- Added export of tool tasks and comments history to a text file.
Located in Tool Control -> Details -> Task and comment history.
- When creating recurring scheduled outages, the number of days in advance can now be customized in the Customization page.

48.15.2 Improvements

- In post usage group questions, the "Add" button text can be customized using property group_add_button_name
- Changed display of upcoming reservation on Kiosk so they don't need to be expanded to cancel. Clicking on a reservation will go to the corresponding tool.

48.15.3 Bug fix

- Fixed a bug in new version of Chrome where extra scrollbars would appear and flicker on the calendar page.
- Fixed an issue with recording training sessions, where a staff member who is also a tool superuser would not be able to record training on tools he is not superuser for.
- Fixed issue when double clicking on task/comment creation/update would create multiple instances.

48.15.4 Vulnerabilities

- Updated drf-flex-fields to version 0.9.1

48.16 [Release 3.11.0](#)

48.16.1 New Features

- Added reservation questions that are asked when a user makes a reservation. They can be added in the detailed admin section. Reservation questions can be set for tools and/or areas and can also be limited to specific tools, specific areas and/or specific projects.
- Added Areas, Resources, Staff Charges and Training Sessions to Rest API
- Added conditional nesting of related objects in Rest API as well as cherry picking of fields returned using [drf-flex-fields](#) (see link for details)
- Added a projects page for projects Principal Investigators who are not staff members. This allows them to see project information and users.

48.16.2 Improvements

- Added filtering by display and filtering by areas in Reservation admin page.
- Added filters to Rest API (for a complete list, see NEMO/views/api.py)
- Added a "pinned" field to news to have certain news stay at the top of the feed.
- Added optional start date for both projects and accounts. Added optional account type for accounts.
- Improved dynamic form (JSON formatted questions):
 - Added red asterisk when a field is required
 - Added "title_html" attribute to display html in title
 - Added "help" attribute (displaying help text for inputs)
 - Added "maxlength" attribute to textbox questions (max characters allowed in input)

48.16.3 Bug fix

- Fixed issues with reservation dates in ical invites not using UTC times.

48.17 [Release 3.10.0](#)

48.17.1 New Features

- Added "All tools", "All areas" and "All tools & Areas" overview options in the calendar. Thanks @bpedersen2 for the contribution!
- Added tool superusers who are allowed to train users on tools. They can be added in the detailed admin section, either in the user section or the tool section.
- Added a way to restrict projects to only certain tools, regardless of the users qualifications. This can be done in Detailed Administration/Project.
A project restricted to certain tools will:
 - allow reservations and usage of those tools only.
 - allow reservations and login on area that this tool requires.
 - allow staff charges on those tools and areas they require.
 - allow training on those tools only.
- Added a checkbox on projects to allow consumable withdrawals or not. Consumable withdrawals set through post usage questions are always allowed.
- Added warning threshold and warning email addresses for Tool usage counter. Added corresponding email template in customizations
- Added an area reservation ending reminder email 30 and 15 minutes before reservation ends and user is still logged in.

48.17.2 Improvements

- Changed user's badge number field to string (rather than integer) to get around integer max number but also to provide better flexibility with card readers.
- Added option to clear the list of consumable withdrawals.
- Added tools the user is a backup owner on, in detailed administration user page.
- Improved calendar support for making and cancellation reservations. Thanks @bpedersen2 for the suggestion.
- Moved the set PI on project feature to Detailed Administration only.

- Now sending task updated email when a task is cancelled.

48.17.3 Bug fix

- Fixed issue where writing in a post usage question of type textarea would not update the "stop using tool" button
- Fixed layout issues on pagination pages on mobile devices
- Fixed an issue when multiple coincident reservations could be created at the same time.
- Fixed NEMO install_systemd_service command.

48.18 [Release 3.9.2](#)

48.18.1 Bug fix

- Fixed badge number max digits issue by making it a char field instead of integer. It should also provide more flexibility with badge readers

48.18.2 Security vulnerability

- Fixed badge number max digits issue by making it a char field instead of integer. It should also provide more flexibility with badge readers

48.19 [Release 3.9.1](#)

48.19.1 Bug fix

- fixed a bug after updating LDAP library. TLS is not needed anymore since the LDAP connection security is set on the server connection through use_ssl (and it actually raises an error if set on an already secure server connection).

48.20 [Release 3.9.0](#)

48.20.1 New Features

- Added the ability to set Principal Investigators on projects. PIs are able to see all activities for the projects they manage in the "My usage" page.
- Added exporting of data in CSV format from "My usage" page.
- When forcing a user out of a tool, if there are any required unanswered post usage questions, the required questions will be sent in an email to the user, lab managers, tool owner & backup owner, and to the staff member who forced the user off. Blank answers are set in the usage history record until edited in detailed admin.
- Added float post usage question (with optional precision property) and textarea (with optional rows property)
- Added tool documents. (thanks to [4D Labs](#) for the contribution)

48.20.2 Improvements

- Added options for last 10, 25, 50 & 100 records and filtering by users in tool usage data history
- Added filtering by tool in Tool usage counter admin page
- Improved the import of plugin URLs to be more consistent

48.20.3 Bug fixes

- Fixed an issue where areas that don't require a reservation would not show up when using staff charges
- Updated to latest versions for all dependencies

48.21 [Release 3.8.0](#)

48.21.1 New Features

- Added list views for Accounts and Projects and Users pages (thanks to [4D Labs](#) for the contribution)
- Supplies/Consumables withdrawal can now be done in bulk. A flat list is displayed, and users can add supplies to their cart, and checkout all the items at once.
- Added a way to bypass interlock errors on both desktop and kiosk. If there is an error with an interlock command, the user will now be able to:
 - enable anyway (so that time tracking can still take place - when staff can override interlocks manually)
 - try again
 - cancel

The "enable anyway" option can be turned on or off in customizations, and the error messages for both tool and door interlock failures can be customized as well.

48.21.2 Improvements

- Billing pages (billing and project billing) will now redirect to usage/project usage if billing service is not defined or not available
- Added notification message when post usage questions are linked to consumables/supplies withdrawals so that the user is aware that they are being billed for those.
- Added 11:59pm time option for access level exception (end of the day)
- Updated resources page so resizing would not mess with the layout
- Made required tool fields bold and capitalized in detailed admin for consistency

48.21.3 Bug Fix

- Fixed issue with upcoming reservation showing when delayed logoff is in effect ([#60](#))
- Fixed an error when creating a user would fail if identity service was not defined
- Fixed an error when adding access level exception with blank start or end time would break (added validation)
- Added locking mechanism to enable/disable tools and area login to prevent race condition (enabling the same tool at the same time - through js or "double click")

48.21.4 Security

- Updated dependency version of cryptography library (due to vulnerability in previous version)

48.22 [Release 3.7.0](#)

48.22.1 New Features

- When a tool requires an area access, area access time will be charged when staff use tool for a remote project (so staff time, tool time and area time are all started at the same time)
- Staff charge for area access will stop when staff users log out of any area
- Added virtual keyboard for Kiosk text post usage questions
- Added keypad for delayed logoff on Kiosk
- Kiosk timeout will now reset on user input
- Added a way to contact other users from reservation details and to contact the current user of a tool on tool control page
- Added the Buddy Board, a simple message board for buddy requests:
 - At least one area need to be set to "allow buddy system" in detailed administration for this feature to be active
 - Users will be notified of new buddy requests with notification badge number on menu item (can be turned off in user preferences)
 - Users will be notified by notification badge number and via email when somebody also replies on a request they replied to (can be turned off in user preferences)
 - A disclaimer can be set in customizations. Use it to specify special instructions or rules for buddy system
 - Buddy requests expire at the end of the day on their end date
 - Only users who have completed training, have an active project and have access to the area can reply
- A news story will now be published when a new NEMO release is installed (with links to the release notes and the feature manual). This feature can be disabled by setting `NEW_VERSION_NEWS = False` in `settings.py`

- All emails sent by NEMO will now be logged for audit purposes and accessible in the detailed administration. If you are a developer, make sure to use the `send_email` function available in `utilities.py` to benefit from this feature.

48.22.2 Improvements

- News stories can now include HTML tags (link etc.)
- Added validation for physical access exceptions in detailed admin (end date must be later than start date)

48.22.3 Bug Fix

- Fixed a bug where project usage page was only showing results for the current logged in user.
- Fixed a bug on Kiosk when the keypad would stay open on Kiosk timeout.

48.23 [Release 3.6.0](#)

48.23.1 New Features

- Added "dropdown" type for tool post usage questions
- Added "group" type post usage question. This allows to create groups of questions that can be repeated. For example, when a user uses multiple processes on a tool, and we want to collect information about each one. More details can be found on the feature manual.
- Added "Usage Data History" tab in tool control, which displays the history of answers to post usage questions. The data can also be exported to CSV.
- Added Tool usage counters:
 - They are counters linked to a "number" type post usage question and keep a running total of some user inputs.
 - They can be added in the detailed administration and NEMO will check that the post usage question exists in the corresponding tool (with the correct type)
 - Counters are displayed in the tool summary page.
 - Counters can be reset by staff members. A comment will be added to the tool and an email will be sent to LAB_MANAGERS if that setting is enabled.
 - For example, you can use it to keep track of total etch time for maintenance purposes etc.
- Added a new setting in customization to display current time indicator in the calendar.
- Added Physical Access Exceptions which allows to set specific exceptions when access levels will be denied. This can be used for holiday closures, understaffed times etc.

48.23.2 Improvements

- Area reservations can now be extended even while user is logged in the area (but not moved or cancelled).
- Updated calendar area login/logout buttons to be shown only when relevant (instead of being grayed out if a tool is selected for instance)
- Updated billing/usage search to use Bootstrap date picker instead of pickadate
- Updated validation on post usage questions to check that consumable exists with the correct name, and that required attributes are provided
- Added management commands to run timed services. (you can now use manage.py or django-admin to run timed services actions)
- Added keypad for answering post usage questions of type number (only on Kiosk)

48.23.3 Bug Fixes

- Fixed an error when using the search feature in physical access log (in Detailed Administration)
- Fixed excessive load time when selecting a reservation in Detailed Administration
- Fixed [#43](#) unique constraint violation in Postgres, thanks to [@bpedersen2](#)

48.23.4 Security

- Updated dependency version of cryptography library (due to vulnerability in previous version)

48.24 [Release 3.5.0](#)

48.24.1 New Features

- Added a way to link contact information to an actual user (through Detailed Administration\Contact Information). When both are linked, in Tool Control details page, the contact information will be displayed (instead of simply the email) of the tool owner or backup owner.

48.24.2 Improvements

- Area reservation policies: user cannot cancel area reservation while logged in that area during that reservation. also, users won't be able to cancel or move an area reservation when they have tools reservations that require that area reservation.
- Added post usage question validation and better error message for required attributes.
- Consumables can now only be withdrawn if the post usage question is of type "number".

48.24.3 Bug Fixes

- Fixed a bug preventing tool synchronization feature to work.
- Fixed a bug in tool admin page, when missing required attributes of post usage questions would completely break the page.
- Fixed a bug where selecting Facility Usage in calendar view would display ALL tool usage even when selecting a particular area.
- Fixed a bug when a tool needed to be shutdown and the wrong email was sent to users.

48.25 [Release 3.4.0](#)

48.25.1 New Features

- Added the ability to create more badge reader configuration in detailed administration. When using the Kiosk or Area Access, add ?reader_id=<reader_id> to the URL to select a badge reader configuration.

48.25.2 Improvements

- Added ability to search by user in project billing
- Added user information on Usage Events in usage page.
- Hiding project billing if billing service isn't defined

48.25.3 Bug Fix

- Fixed an error when not all areas would show up on the email broadcast page
- Fixed out of time email being sent when customer has back to back reservations

48.26 [Release 3.3.0](#)

48.26.1 New Features

- Added service personnel to NEMO: service personnel can access **authorized** areas without having a reservation and use **qualified** tools even when shutdown or during outages
- Added checkbox to count service personnel in area capacity or not
- Added supply reminder email: a reorder email will be sent when supplies fall below the defined threshold.

48.26.2 Improvements

- Improved the staff charges page to show more details: customer being charged staff time, area access and tool usage on behalf of that user
- Improved resources page to be easier to navigate. Added a resource details page where the user can schedule an outage and modify the resource availability.

48.26.3 Security

- Updated Pillow library to latest stable version

48.26.4 Bug fix

- Reservations were not marked as missed if the email template wasn't defined. Fix it so that reservations would be marked as missed regardless.

48.27 [Release 3.2.7](#)

48.27.1 Bug Fix

- fixed a broken link when selecting tool on mobile

48.28 [Release 3.2.6](#)

48.28.1 Bug Fix

- fixed an issue in the kiosk where upcoming reservations would include area reservations and trying to display tool_id would fail

48.29 [Release 3.2.5](#)

48.29.1 Bug Fix

- Fixed an issue with platform specific formatting (was causing issues on Windows)
- Fixed an issue when enabling a tool would not work if the user id contained a specific number

48.30 [Release 3.2.4](#)

48.30.1 Bug Fix

- fixed an issue with overlapping reservations not being counted correctly towards capacity

48.31 [Release 3.2.3](#)

48.31.1 Bug Fix

- Fixed a small UI issue where calendar/tool control would not show up correctly when impersonating.
- Fixed an issue where Jumbotron would try to show tool usage info when no tools are set up

48.32 [Release 3.2.2](#)

48.32.1 Bug Fix

- fixed an issue with impersonating (couldn't go back in some conditions)

48.33 [Release 3.2.1](#)

48.33.1 Bug Fix

- fixed an issue when `rest_framework` isn't installed

48.34 [Release 3.2.0](#)

48.34.1 New Features

- (**superusers only**) added the ability to impersonate other users. Located in the administration dropdown menu. You'll need to add '`NEMO.middleware.ImpersonateMiddleware`', to `settings.py` for this to work
- default user reservation preferences can be overridden in `settings.py` with `USER_RESERVATION_PREFERENCES_DEFAULT = True`

48.34.2 Bug Fix

- fixed a bug where access usage was not showing when clicking on areas in sidebar

48.34.3 Improvements

- removed hard coded URLs which cause issues when deploying using subpath
- added success message when saving user preferences
- fixed authentication issues when using multiple authentication backends (especially when mixing pre-auth backends and backends using login page)

48.35 [Release 3.1.2](#)

48.35.1 Bug Fix

- fixed an issue when staff cancels another user's reservation and the email is not sent to the additional reservation emails set on the area

48.36 [Release 3.1.1](#)

Re-releasing 3.1.0 as 3.1.1 to fix docker tag issue.

48.37 [Release 3.1.0](#)

48.37.1 New Features

- A reservation email (or a list) can now be set on areas. Any reservation created or cancelled will be sent to that email with an .ics calendar invite attached (in addition to the user).
- An abuse email (or a list) can now be set on areas. When a non-staff user overstays (reservation expired but still logged in the area) an email will be sent to that email (in addition to the user).

48.37.2 Improvements

- Now using foldable trees in views where areas can be selected (self login, area access login, and physical access in user form).
- Added email previews and link to download current content in customizations.

48.37.3 Note

For the abuse and reservation emails, NEMO will send the emails "all the way up the tree". So if you have a setup where Campus contains Buildings which contains Offices, then when a reservation is created in an office, the email will be sent to the email for the Office, and the email for the Building (if set) and the email for the Campus (again, if set) etc. same goes for overstays.

48.38 [Release 3.0.1](#)

48.38.1 Bug Fix

- fixed a bug when counting occupancy

48.39 [Release 3.0.0](#)

NEMO 3.0.0 is here with area reservations!

48.39.1 Before Updating

- **add mptt to INSTALLED_APPS in settings.py**
- **add timed services call to**
url /email_out_of_time_reservation_notification every minute
- **if you plan on using area reservations, update reservation email templates to check whether the reservation item is a tool or an area.** **reservation.tool, reservation.area or reservation.reservation_item** **and reservation.reservation_item_type can be used for that. (emails to update area: reservation_reminder_email, reservation_warning_email, missed_reservation_email, cancellation_email, reservation_created_user_email, reservation_cancelled_user_email)**
- **if you plan on using area reservations,** **update unauthorized_tool_access_email to use the new type variable. It can be either 'reservation' when a user tries to use a tool without a reservation or 'access' when a user tries to use a tool without being logged in to the required area**

48.39.2 New Area Features

- Added the ability to make reservations for Areas that have requires_reservation set to True
- Added icon on tools in the sidebar when they require access to an area that requires a reservation
- Tools cannot be reserved until a reservation is made on the required area (area reservation needs to exist at the start time of the tool reservation)
- Added Area capacity and policy rules for area reservations. Area capacity is checked when making reservation and logging in, parent area capacity is also checked. (Capacity can be set on buildings or campuses that have other areas in them as well)

- Warning will be shown to user when making a reservation if `reservation_warning` is set on an area
- Added categories to area
- Added `count_staff_in_occupancy` flag on areas. If unchecked, staff users will not count.
- Added customization setting to display all areas or only areas the user has access to
- Access levels can now be set directly when creating the access level.
- Access level can be given on parent areas (i.e. Buildings)
- Outages can be scheduled on Areas as well. Can also be set on parent area through the detailed administration
- Added tooltip showing all users logged in an area
- Added ability to log in and out of areas directly from the calendar view (enable with setting in customization)
- Logged in users without a reservation will be shown in red on status dashboard
- Area reservation are shortened when user logs out
- Added ability to email users authorized to access an area or parent area (building)
- Displaying scheduled outages and unavailable resources for areas in sidebar
- Added mobile calendar area reservations
- Added email to be sent when users are out of time (logged in area but reservation expired). A grace period can be set in area.

48.40 [Release 2.3.4](#)

48.40.1 Bug fix

- Fixed a bug preventing disabling tools from kiosk

+++++
+++++

48.41 [Release 2.3.3](#)

48.41.1 Security vulnerability

- Updated django version

48.42 [Release 2.3.2](#)

48.42.1 Bug Fix

- fixed a bug with reservation warning

48.43 [Release 2.3.1](#)

48.43.1 Bug Fix

Fixed a bug with facility usage events not showing in calendar

48.44 [Release 2.3.0](#)

48.44.1 Before Updating

- Replace '`NEMO.context_processors.device`' with '`NEMO.context_processors.base_context`' in `context_processors` in `settings.py`
- Rename media
file `nanofab_rules_tutorial.html` to `facility_rules_tutorial.html` and update form in file to post to `facility_rules` URL
- Rename media
file `nanofab_rules_tutorial_email.html` to `facility_rules_tutorial_email.html`

48.44.2 New Features

- Added a reservation warning (number) field to Area. A "Busy time" warning will be displayed when reserving a tool in that Area when there already are a greater number of users with reservations for that same area. (This can be used separately from the area capacity)
- Added a Boolean field in area to decide if staff should count towards max capacity. Updated pages to show a separate staff count if unchecked
- Post usage questions now support `number` type and `min`, `max` and `pattern` attribute.
- Post usage questions preview has been added as well.
- Consumable withdrawal now subtracts from quantity.
- In email page, subject and content are now required and the preview can now be updated before sending.
- Added area access record in remote work for staff charges.
- Self login button will now be shown all the time when enabled from customization. Errors will be displayed when user cannot login (rather than hiding the button)

- User type isn't required anymore. Confirmation of user creation/update has been added and another `safely deactivate user` link was added next to the active checkbox
- The facility name can now be configured from the customization page. Thanks [**@dsbarth**](#) for the original code!
- The site name can also be configured from the customization page.
- The calendar view can now be configured from the customization page (default view, first day of the week, start of the day, column date format for day, week, and month views). Thanks [**@sbonaime**](#) for the suggestions and help!

48.44.3 Improvements

- Added a spinner in tool control page when waiting after clicking on tools
- Past outages aren't shown on scheduled outage page anymore
- Added staff charges to billing api. Added detailed information for items.
- Made identity service optional in `settings.py`
- Made `no_header` feature sticky (per session): use parameter `no_header=True` in page URL to use NEMO without header bar, use `no_header=False` to turn it off.

48.44.4 Bug fixes

- Added consumable withdrawal on Kiosk after answering post usage questions.

48.45 [Release 2.2.3](#)

48.45.1 Bug Fix

- Fixes [#32](#) (mix up between access levels and areas in area access record page)

48.46 [Release 2.2.2](#)

48.46.1 Bug Fix

- fixes [#33](#)

48.47 [Release 2.2.1](#)

48.47.1 Bug Fix

- Fixes [#32](#)

48.48 [Release 2.2.0](#)

48.48.1 Improvements

- Improved LDAP settings to allow users to specify port, bind credentials, dn search and more
- Improved interlock implementation interface, allowing to validate both interlock card and interlock objects
- Updated tool autocomplete results to have better spacing.
- Updated Jumbotron to not display areas when none are defined

48.48.2 New Features

- Users can now change the project on an upcoming reservation
- Added comments that only staff can see (and create)
- Added ProXR interlock implementation (contribution by [@4Lowe](#) at the Minnesota Nano Center)
- Added rates to customizations. Labs can now upload a json file containing rates for tools
- Added authorization failed to customizations. Labs can personalize the error message shown when login failed
- Added jumbotron watermark to customizations.
- Made tasks and comments searchable
- Added notification icon and statement when scheduled non required resource is not available
- Added tool config history tab (in tool control)
- Added max capacity for areas

48.48.3 Bug fixes

- Fixed an issue where staff needed to select a project when making reservations on desktop site (didn't need to in mobile). Now it doesn't ask for project either way (staff are not charged for missed reservations, so no projects needed)
- Fixed a few typos here and there

48.49 [Release 2.1.1](#)

48.49.1 Bug Fix #24

- Fixed error when image was being resized and removed then saved again (when no changes were made on the file)

48.50 [Release 2.1.0](#)

48.50.1 New Features

- Added Tool image, serial and description. Thanks [**@sbonaime**](#) for the contribution!
- In Kiosk, categories and tools that a user is not qualified to use will be grayed out
- Added checkbox in Physical Access Level to grant access to staff without have to do it explicitly
- Added categories to alerts, and updated alerts to keep them after they are deleted or expired
- Only showing visible tools on resource pages

48.50.2 Improvements

- Updated Ldap authentication to provide better logging and not require certificate
- Updated NEMO's configuration to work without django admin installed
- Added version number to Jumbotron, Kiosk & Area Access pages
- LAB_MANAGERS will now receive an email when a task is created (not just updated)
- Added training sessions to billing API
- Updated plugin feature so that URLs are automatically added when plugin name starts with 'NEMO'
- Added name to interlock cards

48.50.3 Bug Fix

- Fixed user history when history item had been deleted

48.51 [Release 2.0.1](#)

48.51.1 Bug Fix

- fixed wrong migration filename

48.52 [Release 2.0.0](#)

48.52.1 NEMO 2.0 is here!

This major release is focused solely on internal improvements and library updates. no changes have been to features or user interface.

48.52.2 Plugin Development

- A big effort has been made to facilitate plugin development in NEMO. See the [Plugin Development](#) wiki page for detailed instructions and examples.

48.52.3 Improvements

- Updated to Django 2.2 (LTS version with extended support until April 2022), requests 2.22, django rest framework 3.11, and to latest version of all the other libraries (cryptography, django-filter, ldap, pillow and dateutil).
- Added JSON validation for post usage questions. Thanks [@sbonaime](#) for the contribution!

48.52.4 Before Updating

The Kiosk and Area Access features of NEMO have been moved into internal plugins. If you were using them, you'll need to add them to `INSTALLED_APPS` of your `settings.py` file:

- '`NEMO.apps.kiosk`',
- '`NEMO.apps.area_access`',
